and night

5 times the coverage by day 35 times the coverage by night

THE PRE-WAR G-E 1-KW FM TRANSMITTER

Station interference pattern produced by AM stations on the 1400-kc channel. The dots indicate location of stations. Large circles indicate possible 400-mile interference range.

Establish a priority on delivery of your FM equipment. Write for your copy of the "G-E Equipment Reservation Plan" which explains in complete detail how General Electric can help you obtain early delivery of your broadcast equipment.

General Electric's new FM equipment will include revolutionary circuit developments and improved layout features that will contribute to the quality and economy of your broadcasting system.

50 FM BROADCAST STATIONS ARE ON THE AIR; HUNDREDS OF APPLICATIONS ARE PENDING

M

THE ANSWERS TO SPOT PROBLEMS

BUY THESE ELEVEN ESSENTIAL STATIONS IN THE ELEVEN ESSENTIAL MARKETS

Advertising dollars are best spent in *essential* markets—radio efforts are best spent on *essential* stations.

Once you have the facts on these prospect-rich markets . . . the facts on how they are best covered . . . your selection of these eleven stations will become automatic.

Here's why all eleven of these stations are essential to you: (1) they broadcast to 55% of the radio homes in the U. S.; (2) they are in markets whose buying power is 34.2% higher than the country's average.

Call your nearest NBC Spot Sales Office listed below for complete data on audiences, buying habits, coverage, programs, spectacular successes, time available, costs—all the answers to your spot problems.

45 - 84

FOREWORD RADIO DAILY herewith presents the eighth edition of RADIO ANNUAL, a volume compellingly reflecting the inevitably changing complexion and constant march, both of victory and of progress, of the colorful industry of RADIO. The thousand pages that follow are as accurate as humanly possible. The text comes from a thousand reliable sources.

DEDICATION The great field of RADIO is now concerned, perhaps more than ever before, with the problems of preparedness. Preparedness first with the concluding stages of the War, and preparedness second, with the industry's own reconversion period as well as the advent of Television. It is to this dual purpose, specifically, that this 1945 Edition is dedicated.

APPRECIATION The editor wishes to take this opportunity to thank all those who have so enthusiastically helped in the full revision, re-arrangement and material strengthening of this volume. To the FCC, the NAB, the world-wide organizations of NBC, CBS, the American Broadcasting Co. (Blue), and Mutual, as well as the great legion of radio showmen everywhere we gratefully acknowledge their assistance with a hearty and understanding thank you.

The Swing is to WHB in Kansas City

Meet WHB's John Wahlstedt— "The Cook Tenor" . . . and our Program Director

Do not mistake this stern-visaged gent for a Federal Judge or a member of the U. S. Senate. He's 237 pounds of Swedish tenor who has been a fixture at WHB since 1932. He began, and continues, as "The Cook Tenor", and in more than a decade has appeared on some 6080 half-hour programs sponsored by the Cook Paint & Varnish Company. In 1942, when Dick Smith became WHB's War Program Manager for the duration, John took over Dick's former duties as Program Director.

As background, he has a Bachelor's degree in engineering from the University of Kansas; a Master's degree in education; and fifteen years' teaching experience. He left his position as Vice-Principal of Kansas City's East High School to devote his full time to WHB. He's a Shriner, a Jester, "the worst golfer in the state" (his claim); and he loves to hunt and fish, and fish and hunt.

Meanwhile, he not only continues to sing daily on WHB for Cook's . . . but he's proud to sing in WHB's praise as the result of a Kansas City radio-station program-survey just completed by the Merchants' Association. Tabulated, here are the facts:

RETAIL RADIO SURVEY	
Kansas City Merchants Association	
Tabulating 600 replies to 4775 questionnaires sent by the Association to home-makers in this area.	
Question: "Which radio station in Kansas City do you most prefer for Shopping Programs?"	
Answers WHB 364 votes	60%
Station B 87 votes .14%	Station D 17 votes .028%
Station C 47 votes.078%	Station E 5 votes .088%
Question: "Do you listen regularly to any of the Shopping Programs which are now on the air?"	
Answers: Of the 600 replies, the following mentions were made:	
WHB—"Mary Jane on Petticoat Lane"	228 mentions38%
WHB—"Sandra Lea" The Plaza Shopper	174 mentions29%
Station B—Downtown Store Program	139 mentions23%

6 Revenue-Producing Services Offered to All SESAC Licensees

More than 100,000 copyrighted musical compositions of every category available in the catalogs of SESAC publishers.

SESAC *Program Builder*—the indexed desk reference for daily use, containing the cream of the SESAC repertory, arranged by type and alphabetically.

SESAC transcriptions—tailor-made to meet your program needs—plus the SESAC Transcribed Music Library of outstanding tunes, available to all SESAC licensees.

America's Finest Music—available to advertising agencies and transcription companies at a flat fee of only 2c per composition per record. There are *no* additional charges, clearance problems or bookkeeping headaches for agency, sponsor or broadcaster when SESAC music is used.

Periodic visits and suggestions by our *Station Relations Staff* designed to help solve your program needs and operational problems.

SESAC *Program Service Department*—ready to assist stations, agencies and transcription companies in their music requirements.

SESAC has meant SERVICE to the broadcasting industry for the past 15 years, and will continue to meet the needs of broadcasters, agencies and transcription companies everywhere.

MAKE YOUR NEWS PROGRAMS

Distinctive!

It is essential to do so *now*.

And it will be even more necessary in meeting post-war competition.

Don't use "canned" news! Monotonous repetition drives away listeners.

You can hold and enlarge your audiences with superior, distinctive newscasts from the *complete* leased wire report of

INTERNATIONAL NEWS SERVICE

"Get It *FIRST*, But *FIRST* Get It *RIGHT*"

first again!

First to give radio a complete news service. **First** to win equal recognition for radio news at the White House and in Congress. **First** and only press service to wage a fight for lower communications costs, saving broadcasters five million dollars annually. **First** to develop local and state bureaus giving broadcasters unrestricted use of local news.

NOW

TRANSRADIO

proudly presents

EDEX

the service for Editors and Executives
VIA HIGHSPEED TELETYPE, 18 HOURS DAILY

- Radio Intelligence for Station Executives.
- *Direct* Washington coverage for each subscriber.
- Exclusive "commentiques" for Commentators.
- An entirely new service for Sportscasters.

PLUS Transradio's regular Worldwide News Service,
- unexcelled for accuracy and speed.

The EDEX franchise may still be open in your city

THE ONE, THE ONLY and THE ORIGINAL!

TEL-PIC Displays and Service

314 RADIO STATIONS

Coast to Coast

Each week more and more radio stations are contracting for TEL-PIC displays. Renewed contracts are our best evidence as to satisfaction. These stations range from 250 Watters to 50,000 Watters. Upon request we shall be happy to furnish names, etc.

TEL-PIC LEADS BECAUSE...

- 1—Pictures are mailed daily (not just a few a week).
- 2—Pictures printed on 70 lb. coated stock.
- 3—TEL-PIC displays attract attention . . .
- 4—There are 5 beautiful colors screened on glass, including the American Flag.
- 5—Separate removable slides with your copy changed weekly or monthly for station and/or sponsor promotion.
- 6—Pictures are carefully selected so as to attract attention from passers-by.
- 7—TEL-PIC owns its own printing plant.
- 8—TEL-PIC manufactures its own displays.
- 9—TEL-PIC uses Press Association (division of AP) pictures.
- 10—Most important of all . . .

TEL-PIC Originates not Imitates!

Each merchant subscriber receives 100 bound booklets for free distribution containing photos of radio personalities that appear on *your station with station copy*. Covers of booklets are imprinted with your call letters, frequency and your message.

If your present contract with a news service is expiring or if you are contemplating publicity for your station you owe it to yourself to investigate the TEL-PIC Plan. Why be satisfied with less than TEL-PIC offers? Remember TEL-PIC station renewals years after year are evidence that our stations must be satisfied.

No other news picture company offers so much radio station publicity promotion to its station subscribers.

TEL-PIC SYNDICATE, Inc.

1697 Broadway

New York, N. Y.

TEL-PIC offers a new reciprocal payment plan to your radio station. Write for further details. No obligation on your part.

*"Here we
are again!"*

These words, the circus-day greeting of the traditional talking clown of a century ago, have lost none of their enthusiasm; indeed they have gained new meaning in 1945.

Tested by the exigencies of the times and by hardships that troupers long ago learned to accept as facts-of-life in show business, the Big One proudly points its wagon tongues toward the open road and sends its agents out again among the loyal friends of the Circus — the Men and Women of Radio.

There are only two days in circus business: today and tomorrow. Soon the bright banners will be flying on the halyards of a new, flameproof big top. The band tempo is circus gallop-time and the brass is wide open. And the echo of the old-time clown comes shouting up the corridors of a hundred years—

"Here we are again!"

RADIO

IN ITS 25TH YEAR A POWER FOR PEACE

By PAUL A. PORTER
*Chairman, Federal Communications
Commission*

AT this time and in the months to come when we must win the war, build world peace machinery and plan our domestic economy to give jobs and opportunity to all our citizens, we are fortunate in having at hand such a powerful instrument as our broadcasting system.

Now in its 25th anniversary year, American broadcasting has demonstrated on various thrilling occasions that it has the potentialities to be a leading, if not the leading force in assisting the nation to understand and conquer the complicated problems ahead.

Herein lies radio's great opportunity for public service. As the casualty lists pour in from battlefields around the globe, as Americans ponder plans to prevent the breadlines and soup kitchens of the past, and as they resolve that some way, somehow, a better way of life must come for all, they are placing new values on familiar forces. To be of maximum usefulness to the nation, radio must rise above its high accomplishments in selling goods, in entertaining, in making big profits.

To meet the challenging problems of the future in a truly democratic way, we shall need the widest dissemination of information, the fullest discussion from all points of view. It will be radio's upcoming and continuing prime responsibility to bring this to the nation.

Although there is a disposition in some quarters of broadcasting even after 25 years of radio, to bring a 1920 attitude to bear on the responsibilities of 1945, there is also heartening evidence that that is by no means the universal approach.

There is an increasing amount of public discussion on the responsibilities of our radio system in assisting citizens to cope with their local, national and world problems. Most leaders of the industry realize that such discussion is a recognition of the indispensability of radio as dynamic force for culture and education in our modern life.

This 25th anniversary finds radio on the eve of spectacular technical developments. Under the impetus of war, the engineers have pushed back the frontiers of the science of radio to an extent previously un hoped for. All the rest of us concerned with radio must have equal vision in assisting the art of radio to fulfill its highest destiny.

Radio must never aspire to be only a sideshow in our civilization. Its goal must always be to improve itself as one of the greatest facts of that civilization.

RADIO SETS VAST PLANS FOR POST WAR ERA

By

J. HAROLD RYAN

President National Association of Broadcasters

AS THE SCROLL of history begins to unroll for the 1945 stanza, during which American Broadcasting celebrates its Twenty-Fifth Anniversary, it becomes clearly evident that because of the delayed progress of the European phase of the war a great deal of the planning that has been made for

post-war activities is going to have to be changed. That is especially true in radio where technical and engineering developments are being held up until materials can be made available and the newest laboratory advances can be unveiled.

With television, frequency modulation and facsimile hovering on the radio horizon, it is very apparent that once the war is over radio broadcasting is going to take tremendous strides in developing new phases of the art and new means of delivering broadcasting programs as we have known them. The universal application and acceptance of television in the post-war period will entirely revolutionize radio and radio programming as it affects the average citizen and may even change to a considerable degree his accepted habits of listening. FM, on the other hand, is simply another method of delivering the broadcast programming with which we have long been familiar. Facsimile presents a challenge and an opportunity in the field of the newspaper of the air, although it must be admitted that during the past ten years progress has been slow.

The National Association of Broadcasters some three or four years ago altered its By-Laws so as to admit to membership FM stations, television stations and facsimile stations. We now have in membership representatives of these new ranks in broadcasting and every month sees additions to the television and FM stations in the NAB.

The Association has been engaged for sometime in strengthening and developing its aid to members along the lines of Employer-Employee relations, which it views as one of the most important and necessary services of this period.

Considerable thought has been given, and is being given, to the question of program development and improvement. During the past year a standing Committee of the Association has been created on programming, composed of program directors. A Radio News Committee has been formed and we are now planning a Committee of Farm Editors.

In the line of business planning our Department of Broadcast Advertising is continuing its efforts to interest and convert more retailers to the field of advertising over the air. The Retail Promotion Plan, staged over a year ago, resulted in a quite substantial increase in air advertising from retailers.

Probably the most important and most pretentious plan that the NAB has in development for this and the post-war era is a standardized and authenticated form of measurement of station coverage.

But before the plans and dreams of radio people can be brought to fulfillment in the world of the future this war must come to a successful conclusion.

TWENTY-FIVE YEARS OF RADIO

By Frank Burke
Editor, RADIO DAILY

TWENTY-FIVE years ago the modern miracle—radio—was born and today “pledged to Victory” the industry observes a quarter of a century of progress confident that the years ahead hold promise of a dramatic new era of expansion.

It was during an election year, 1920, that radio was first heard. To be exact the late Dr. Frank Conrad broadcast the returns of the Harding-Cox Presidential election from KDKA in Pittsburgh. Therefore, historically, November 2, 1920, is considered the birthdate of an art which in the short span of 25 years has become one of the nation's foremost industries.

Since the early days of crystal sets, cumbersome storage battery receivers, earphones and sleepless nights of the late listeners, radio has grown to an industry with 33,000,000 radio families, 59,000,000 receivers and estimated gross network sales of over \$126,000,000 during the year 1944.

Today radio with four major networks, 925 AM stations and several hundred applications for FM and television licenses, enters 1945 pledged to support the war effort and with post-war plans for the electronic future. Proud of the industry's achievement, J. Harold Ryan, president of the National Association of Broadcasters, announced plans for dedicating the 1945 anniversary activities to the winning of the war. Ryan, in a formal proclamation, said:

“1945 marks the Twenty-Fifth anniversary of the American System of Broadcasting.

“I therefore urge all stations and networks to observe the anniversary throughout the year in a manner befitting the position of broadcasting in American public life.

“Broadcasting is dedicated to the winning of the war. Let us use the slogan, “Radio's Twenty-Fifth Anniversary — Pledged to Victory.”

Act on Proclamation

Acting on President Ryan's proclamation, network representatives met with NAB officials in New York last December and formed the first committee for the Twenty-Fifth Anniversary observ-

ance. Dr. Frank Stanton, vice-president of CBS; Robert D. Swezey, vice-president and assistant general manager of Mutual; Frank E. Mullen, vice-president and general manager of NBC, and Mark Woods, president of the Blue Network, were asked to determine general network policy and to correlate the activities of dramatizing the Twenty-Fifth Anniversary plans. Later the Radio Manufacturers Association, Broadcast Music, Inc., Radio Corporation of America, and other organizations joined in the movement to celebrate the anniversary year.

To chronologically review the developments of the radio industry since its inception a quarter of a century ago would require a volume. Suffice to say this industry has an unparalleled record of achievement and today is one of the nation's ranking industries in volume of business.

First Network Program

Turning back the pages of radio history one finds that in the early days music comprised more than two-thirds of the radio programming and the first special event of any importance to be broadcast was the Dempsey-Carpentier fight by RCA from Jersey City on July 2, 1921. Records reveal that the first network program in history was carried by two stations linked by telephone wires in January of 1923. This program was a five-minute saxophone solo and was carried by WEAJ, New York, and WNAC, Boston.

Greatest of all program trends in station and network operations over the past 25 years has been the developments in the field of news and special events. While the war in a large measure is responsible for the present emphasis on news broadcasting there is every likelihood that after the return of peace reporting of national and international news will continue to play a major role in programming.

Radio's twenty-fifth anniversary symbol is “XXV”. The industry has combined the now famous musical “V” with the “X” taken from the continental code. Together they symbolize “Radio's Twenty-Fifth Anniversary—Pledged to Victory.”

TEN OUTSTANDING RADIO NEWS EVENTS OF 1944

D-Day In Europe. Outstanding coverage of the Invasion of France and the Philippines.

James Lawrence Fly resigns as Chairman of the FCC to go into private law practice. Senate confirms President Roosevelt's nomination of Paul A. Porter to succeed Fly.

FM convention in New York draws some 700 broadcasters and others in allied fields.

Edgar Kobak resigns executive post with the Blue Network and becomes president of Mutual Broadcasting System, succeeding Miller McClintock who resigned.

RCA-CRC-NBC signs with the AFM on the musician's union terms after failure to receive action from the WLB, in the dispute involving special fees for making recordings.

NAB adopts Station Coverage Yardstick plan of audience coverage at its annual convention in Chicago. Plan approved by the AAAA and the ANA.

Hearings were held before the FCC on matters of allocation in allotting channels to television and FM.

Television Broadcasting Association holds two-day convention in New York.

Greatest number of station sales and transfers in recent years with several newspapers significantly entering the field.

House investigating committee held hearings throughout the year, providing many stormy sessions relating to former Chairman Fly, the WMCA case etc.

Outstanding Broadcasts:

"The Land Is Bright," Fifth War Loan Program on CBS.

NBC's kick-off show on the Sixth War Loan scripted by Robert Sherwood.

George Hicks' (Blue) pooled broadcast from Naval craft in English channel during Invasion of France.

"Return to the Philippines"—half hour documentary program on General MacArthur's return to the Islands.

"1944 in Review," presented by WOR over Mutual network.

THANKS A MILLION . . . for helping us raise over a million Christmas Gifts for disabled War Veterans.

EDDIE CANTOR

"LET YOURSELF GO"

CBS

Rep.: WILLIAM MORRIS AGENCY

U. S. RADIO STATIONS AT WAR

By *M. H. Shapiro*
Managing Editor, *RADIO DAILY*

THROUGHOUT 1944 the American way of broadcasting continued to be a weapon of war as well as an instrument of morale and dissemination of news and vital war messages for the home front. When World War II overtook the United States its radio system virtually proved itself a Secret Weapon, so completely did it integrate the people at large in presenting a solid front in the prosecution of its enemies.

Graphic picture of the radio station status, standard, FM, educational, television and international outlets is presented below, as of January 1, 1945.

Standard Stations

There were 943 standard broadcast stations—919 in operation and 24 under construction. Mutual had 244 affiliates; the Blue, 194; CBS, 143; NBC, 149.

* * *

Frequency Modulation

There were 46 high frequency (FM) broadcasting stations licensed and seven under construction, in addition to two temporary Class 2 experimental high frequency broadcast stations also furnishing FM programs. There are 323 applications pending in FCC files to build new commercial FM stations when materials become available.

* * *

Television

Six commercial television broadcast stations were licensed at the close of the year, all of which had maintained a minimum program schedule of four hours per week during the year. Three other construction permits for commercial television stations were outstanding. Twenty-five experimental television stations had licenses and fifteen others were under construction. Pending in FCC files are 98 applications to build commercial television stations when the freeze on civilian radio construction is lifted.

* * *

International

A total of 31 international broadcast stations were operating within the United States at the close of the year and five others were under construction.

All international broadcast stations are, of course, programmed by the Office of War Information or the Office of the Coordinator of Inter-American Affairs. These two offices have set the goal of 36 powerful international transmitters operating from within the United States to provide adequately the needs of psychological warfare. About 20 additional frequencies have been made available for international service.

* * *

Educational

Five channels are allocated for non-commercial educational broadcast stations adjacent to the commercial FM broadcast band. At year-end five stations were broadcasting regularly and five others were under construction. While these stations have not been subject to wartime restrictions on construction, under the FCC's Memorandum Opinion of April 27, 1942, equipment shortages and lack of skilled personnel have served to retard their development. Thirteen applications to build educational FM stations are pending in FCC files and 18 other applications received in 1944 were returned as incomplete or not wholly in proper form. According to the U. S. Office of Education, which is working closely with State Departments of Education, plans are under way in 31 of the 48 states for state-wide educational FM networks after the war.

* * *

Facsimile

At the present time only three facsimile transmitting stations are authorized. Although the FCC's rules provide for multiplex transmission of facsimile by high frequency (FM) broadcast stations, no regular FM stations provide this service. Considerable interest has been evinced in multiplexing facsimile throughout the FM broadcast band and also in facsimile simplex operation after the war.

PARAMOUNT PICTURES**

REPORT ON THE "VOICE OF AMERICA"

By Louis G. Cowan

Chief, New York Office Overseas Branch, Office of War Information

AS the European countries have been liberated and the war has increased its tempo in the Pacific, the Overseas Branch of the Office of War Information has kept pace with the rapid offensive of the Army and Navy.

Although radio is only one medium utilized by OWI in its psychological warfare and informational programs, it is a vastly important one and the powerful strides made in that field by OWI are indicative of its advance in the whole overseas propaganda operation. But, as Edward W. Barrett, who was appointed director of the Overseas Branch of OWI in September, 1944, said as the year closed, "There is still an enormous job to be done."

Progress in the Atlantic theater is illustrated by the April 30th opening of ABSIE (American Broadcasting Station in Europe), which also marked the first time Great Britain has ever permitted a foreign power to set up its own facilities for broadcasting on British soil. On D-Day, June 6, ABSIE was ready. It carried the voices of General Eisenhower and his supreme headquarters with instructions to a France poised to rise and with warnings to the Germans that their defeat was inevitable. Later, on the continent itself, Radio Luxembourg was added to Allied radio stations and, with ABSIE and the stations at Algiers, it relays programs shortwaved from New York to target areas.

Powerful Transmitters

In September, 1944, three powerful 200 kilowatt transmitters, built for the Government by Crosley Corp. in Ohio, were added to the already formidable shortwave battery of OWI.

On the West Coast, six new 50 kilowatt transmitters were added during 1944 to the four already operated by OWI and the two by CBS, thus almost doubling the hours of radio barrage against the Japanese. The opening of a new 100 kilowatt shortwave station at Honolulu and a 50 kilowatt medium wave station at Saipan helped to draw the psychological warfare radio net even tighter around our enemies in the Pacific theater.

D-Day Activity

At H-Hour on D-Day, 3:34 a.m., June 6, the internal teletype system linking all radio and cable desks sent a flash to language desks reading: "First landings in Western Europe have started." At 3:37 a.m. the flash was broadcast in French, at 3:47 a.m. in Italian, and at 3:48 a.m. direct contact was made with SHAEF in London.

The first news flash of General MacArthur's landing on Leyte was sent out by OWI at the end of its 12:15 a.m. October 20th broadcast beamed at Germany and used in all languages from then on. Once again the Voice of America had fulfilled one of its major roles of using the psychological advantage of a great military victory for the Allies.

The Voice of America's programs to Europe have been as flexible as psychological warfare demanded. As vast areas were liberated by the armed forces, OWI's function shifted from creating and maintaining pro-Allied resistance in occupied countries to a military phase—exploiting the psychological impact of actual fulfillment of the predictions and promises of the first phase. It has now entered its third phase, that of holding its European audience for the message of America's role in war and peace.

Shortwave Reorganized

Shortwave broadcasting from New York was reorganized in December, 1944, to concentrate solid blocks of time in one language at best local listening hours. Thus at any time during evening hours, a French listener, for instance, will know he can pick up a French language program from New York, an Italian listener is able to get a similar service in Italian.

In the words of Elmer Davis, director of the Office of War Information, on the occasion of the dedication of the Crosley transmitters last September: ". . . The Voice of America, weak or strong, has had, from the very beginning, the same content—the truth—strong in the faith that truth was on our side. It has told the truth from those dark early days of defeat right down to these times when every day brings news of fresh victories; it will go on telling the truth.

TELEVISION GOES COMMERCIAL

By Dr. Allen B. DuMont

President, Allen B. DuMont Laboratories, Inc.

ONE need not be a prophet to discuss post-war television. Nor attempt rash guesses. By the simple and safe expedient of projecting recent engineering developments, present attainments and logical plans into the near future we obtain a pretty comprehensive appraisal of commercial television.

Three main factors in my opinion are responsible for our early transition from the noble television experiment to the full-fledged television business:

1. Engineering know-how, which enables us to provide a truly satisfactory means of sending and receiving programs.

2. Programming, whereby we can provide see-hear entertainment and enlightenment worthy of an audience in television's own right.

3. Sponsorship, whereby we are assured of adequate financial support for telecasting, in return for a worthy audience.

Taking up each of these major items in turn, here is post-war commercial television as I see it:

Engineering Adequate

Television engineering is adequate for immediate requirements, after a decade or more spent in developing and refining the electronic scanning technique. At first the war seemed to threaten continuing television progress, but as a matter of record it is contributing tremendously to our engineering and production experience. The extensive and intensive application of cathode-ray tubes to the industrial and fighting fronts has been responsible for numerous developments and refinements. Radar especially is contributing a tremendous fund of engineering experience, much of which still remains to be generally released and applied in television terms.

The mass production of cathode-ray tubes for military needs has resulted in manufacturing methods, trained personnel and productive facilities which must count heavily in supplying the demands of post-war home television. Especially so when rounded out by the experience of

manufacturers in producing radar and oscillographic equipment which is closely related to the television receiver.

Skilled Craftsmen

Another notable contribution is the training of hundreds of thousands of men in radar and electronics generally. The commercial success of television depends largely on satisfactory local servicing. Television is necessarily more intricate than radio. The installation calls for a special antenna. There are problems of location, direction, height, reflection and transmission line, calling for considerable experience in the handling of ultra-high-frequency signals and intricate circuits. Post-war television is fortunate indeed to have such specialized veterans available.

It is important to note that recent engineering progress is mainly in the direction of detailed refinement rather than any radical departure in established technique. For instance, we have recently achieved a remarkable improvement in pictorial detail by a finer trace and greater contrast in our cathode-ray tubes—about the last place we were looking for possible refinements. There is steady refinement of this sort taking place month by month. In fact, until the possibilities for refinement and improvement have been practically exhausted, there is insufficient justification, in my personal opinion, to go to more scanning lines and higher transmitting frequencies which would introduce new technical problems and obstacles to early commercialization. The trend today is still to exhaust the possibilities of 525-line scanning and present transmitting frequencies before going on to other standards. Likewise with color television which may well be considered after we have exhausted the entertainment possibilities of black-and-white pictures.

Programming Explored

In the matter of programming, we have sufficient experience already to provide satisfactory entertainment and enlightenment. While engineers and tech-

SYMPHONIC MUSIC ON THE AIR

By Serge Koussevitzky

I AM extremely interested in the progress of the radio. I often listen to our principal orchestras on the air—even to my own orchestra on those Saturday nights when there is a guest conducting. I am impressed by the excellent quality of broadcasting at its best. And I am greatly interested in the letters which come from all parts of the country. There is but one possible conclusion from all this: Symphonic music, which thanks to radio, has been brought to numberless people who were strange to it, is continually gaining a larger audience.

Choice of Programms

As a conductor I am made aware of the importance of a wise choice of programs for this vast and mixed audience. When a conductor plans his programmes, he does not simply write down what first occurs to him, or some music he happens personally to prefer. If he did that he would be neglecting the responsibilities of his position. He is responsible not only for the performance of a hundred men, but for what the thousands are to hear who constitute his concert audiences and the millions who constitute his radio audiences. He is a leader in the broadest sense of the word—a leader of his public no less than of his orchestra. He must choose what they shall hear, and if his reading of certain music carries his own conviction in the interpretation, he becomes a director of general opinion.

I feel this as more than a responsibility. It is a privilege, and a privilege which I could never take lightly. That is why the problem of making a programme is always for me a matter of great care and thought.

How shall I choose between new music and old music? If I decide to programme the Fifth Symphony of Beethoven, there will be some who have heard it too often and others who have not heard it often enough, either because they are young or because they are new converts to symphonic music, or because they live in musically remote communities. They are very important and they must have every consideration. If I decide to play a new work which departs from the lines of custom and convention, those very ones who most want to hear Beethoven's Fifth Symphony or Brahms' First will be less interested.

The letters which come to me from all sides after a broadcast interest me especially because they are an indication of what the great radio audience wants. Of course it would be impossible to give all of these letter writers what they want, because, for one reason, they are always contradicting each other. I would answer those who complain of too many repetitions of the classical symphonies, that, as many times as I have heard and performed the symphonies of Beethoven or Brahms or Tchaikovsky, they hold for me a fresh stimulation.

What Listeners Want

To those who have written saying that they would rather not hear music of today, I would answer with the reassurance that there is music of such great beauty being written by our composers that the man who dismisses it is seriously depriving himself. The majority of the important composers of today are now in America. Some of them were born here, and others have come from Europe and made America their home. Not all of their music, but the best of their music, which I try to single out for my programmes, is the inspired voice of a new and growing art which, when it reaches its full flowering, may stand comparison with any past epoch in musical history. If some of it sounds strange to you, if it seems to violate the traditional rules of what constitutes beautiful combinations of sound, I ask you to be patient and listen with an open mind.

The duty of every conductor now is no different from what it has been in the past. A conductor must be a prophet—not a mystical but a very practical one, who can look into the future far enough to see that what audiences now reject they will soon be begging for. An example of this is the Fifth Symphony by Shostakovitch, which was greeted with little attention and many objections when it was first heard. My answer to these objections was to repeat the symphony again and again until it became one of the most popular of contemporary symphonies in our repertory. The conductor's function as a "leader" is to bring about that change; to make the unpopular music of today the popular music of tomorrow, and always to have that tomorrow in his plans.

FM AS AN EDUCATIONAL MEDIUM

By I. Keith Tyler

*Director of Radio Education, Ohio State University, and
President, Association for Education by Radio*

THE development of frequency modulation radio offers a magnificent opportunity to do a comprehensive and thorough job of educational broadcasting. That this opportunity will be seized upon and made use of is by no means assured. Many dangers face the whole enterprise.

It seems certain that the FCC will assign a sizeable number of channels to non-commercial educational broadcasting. This is in contrast to standard AM broadcasting in which educational stations have always had to compete with the more amply financed commercial stations for frequencies, hours and power. It will enable the non-profit stations to broadcast at times when they can best serve the educational needs of listeners. It will make possible the establishment of dozens, and possibly hundreds, of new stations by universities, colleges and school systems which have at long last awakened to the values in broadcasting only to find that no facilities were available or that present facilities were inadequate.

Educational Independence

The actual establishment and operation of non-profit FM stations will free educational institutions from the hampering dependence upon commercial stations for time and facilities. With time sales at new highs in 1944, it was becoming increasingly more difficult, if not impossible, to secure desirable hours for educational offerings. Either no time at all was available or that given was not well suited to reaching listeners. With sponsors seeking new markets in the postwar period, it is doubtful if educational programs will fare much better then, than now. So the independent operation of non-profit stations becomes a necessity if people needing and wanting education are actually to be reached with such programs at the best times.

Such stations also will make possible a decided increase in the number of educational programs available to listeners. Many more minority interests can be served.

Where several institutions competed for the opportunity to broadcast over limited commercial facilities, only the programs with the widest possible appeal to a large mass audience were likely to

gain an airing. Needs of smaller groups had necessarily to be ignored. Now many of these institutions will operate stations serving the widest variety of needs—from foreign language lessons to gardening, from appreciation of poetry to popular psychology, from kindergarten stories to sixth-grade arithmetic, from music to drama.

Certainly the need for education was never greater than it is likely to be after the war. Millions of men and women in the armed services will want the schooling they missed without the necessity of going back to college. Citizens will require background for the momentous decisions they will need to make in re-shaping the world. New problems of leisure-time pursuits, hobbies and interests will need to be accommodated. And such matters as slum-clearance, city planning, regional development and postwar aviation need to be understood and appreciated. FM stations will make possible an abundance of programs dealing with such material.

But the picture is by no means entirely a rosy one. In spite of the go-ahead from the FCC, educators and broadcasters alike should give serious thought to what may happen—to consequences which may be disastrous for radio education.

Early Experiences

In the first place, we may have a repetition of the earlier AM experience, with large numbers of educational stations initially established and then suspending operations until only a handful remain. The picture is more favorable this time, however. Most of the earlier stations were engineering experiments, and stations gave up licenses when faced with the necessity for serious programming; this time, licenses are applied for in order to engage in program operations, and this presumes an acknowledgement of continuing program responsibilities. Last time, educational stations had to compete directly with commercial stations for time and facilities; now they have their own channels. And, finally, educators are much more alive to the values of broadcasting. They are taking radio seriously.

Ed (Archie) Gardner

In the second place, there is a grave danger that commercial stations and networks may look upon the establishment of FM educational stations as relieving them of the obligation to engage in public-service and educational broadcasting. They may feel free to devote themselves entirely to entertainment and commercialism. This would be the greatest imaginable mistake for educators and commercial broadcasters alike.

It would be disastrous for commercial broadcasters because, in the long run, it would change the character of the so-called American System of Broadcasting and ultimately lose the substantial support of listeners. American radio has built its solid reputation not alone on its Jack Bennys and Bob Hopes but also upon its NBC Symphony, its American School of the Air, its Columbia Workshop, its University of the Air, its farm programs, and its service to the war effort. A pure entertainment venture with an unadulterated profit motive would have difficulty justifying its service to the public interest.

It would be tragic for education because mass enlightenment will need to rely upon the great mass audiences which have been developed by network radio. Minority interests, serious adult education and specialized educational services can utilize the separate FM stations best.

But broad educational and cultural needs in music, in drama and in the discussion of public issues can best be met for the nation as a whole through the superb facilities of commercial network broadcasting. And for these features, such networks will have established audiences which should not be given up if the whole American people is to be served.

Income Level Involved

In the third place, it must be recognized that the developments in FM generally, and FM educational stations in particular, depend upon the maintenance of a high level of national income. With a nation-wide income total of \$150 to \$175 billions, the American people can afford to make the change-over from AM to FM—a process involving the purchase of 30 to 50 million new receiving sets. With a depression level of \$60 billions, such a transition is doubtful. And the establishment and support of educational FM stations depends upon a national income that can afford to sponsor mass education by radio through appropriations to universities, colleges and school systems. An economy of abundance will demand these measures for the education of all—a depression economy will eliminate all but the most elementary educational expenditures. The future of education by radio is inextricably intermingled with the future of the whole economy.

TELEVISION GOES COMMERCIAL -- By Dr. Allen B. DuMont

icians have been devoting their spare time from urgent war jobs in order to gain practical telecast experience, we have had writers, producers and performers volunteering their services in order to learn the intricacies of this new medium for their talents. Many television headliners of tomorrow are now in the making. Recent technical advances, notably higher illumination levels and greater depth of focus, make available a larger stage and greater freedom of action. We have learned much about scenery and backgrounds, camera technique, lighting and other details of production. Already we have trained writers and directors who know how to get the most out of televised productions. We are pretty well set on programming.

Solve Sponsor Angle

Lastly, we have evolved the sponsorship angle whereby telecasting can be placed on a self-supporting basis essential to truly commercialized television. While engineers behind cameras and performers out front have worked out a satisfactory telecast art, we have had

advertising men and advertisers working in the "commercial" or sales message and studying audience reactions. While the audience is still numbered in tens of thousands as against the millions for broadcasting, we can nevertheless gain the practical experience now for later business efforts.

Seeing as well as hearing the "commercial" gives television a tremendous advantage over usual broadcasting. In fact, the sales message can be made fully as interesting and often more so than the sustaining feature, as contrasted with the veritable intrusion of "commercials" in the midst of otherwise enjoyable radio.

With the sponsorship angle already worked out, and with a growing list of sponsors ready to go along with expanding telecasting, we are rounding out the final phase of the television business. All we are waiting for is the release of necessary materials and manpower whereby we can build transmitters for telecasters throughout the country, and produce hundreds of thousands of television receivers for homes.

THE WOMEN AND RADIO—1945

*By Mildred O'Neill
Radio Daily Staff Writer*

THE year 1944 came to a close on a happy note for the women of radio, not only for themselves but for the industry and the war effort as well. They are now considered to be an integral part of the industry. Outright recognition came slowly, but when it did come it was unanimous with network and station officials and in the agency field. For over twenty years women have been trying to defeat the discrimination against them in a he-minded industry, a situation which, however, some few overcame. It was when the United States entered the war that radio gave challenge to woman's ability and they got their chance at jobs heretofore held only by men.

Television

Having broken down the barriers, it is only natural to find them at the beginning of 1945 in on the "ground floor" of the video art. There are women scenic artists, make-up specialists, announcers, sound technicians, script writers and producers. At this relatively early stage of the game there is a television station in Illinois which claims to be the first one of its kind in the country to be run entirely by women. Women are particularly suited to this work as it requires infinite patience and careful attention to detail. There is considerable promise that the field of television will be an important source of female employment when the sight and sound reign gets off to a flying start after the war.

Women Directors

A significant chapter on the progress of women in radio has been written by the Association of Women Directors. A subsidiary of NAB, this is the only women's organization in radio. The AWD has a membership of 700 women, each of whom has been accredited by her station manager for the work of promoting a broader aspect to women's interest in radio and increasing through greater commercial sponsorship and improved public relations areas of service to industry. This year 1945 will witness a move to consolidate the efforts of women in radio in both hemispheres. In this connection, the AWD has announced a special promotion, "Women of the United Nations," proposed to widen the scope of women's activities in broadcasting by means of wireless. Close co-operation

will be maintained with 20 major women's organizations, the United Nations Information Office and the Inter-American Commission of Women.

BBC Statistics

The British Broadcasting Corporation offers another example of the widening of radio's portals to women. One out of every two employees at BBC is a woman. The largest influx has been in the engineering division where before the war no female had been employed other than a secretary. Now, more than 500 women are working as operators, at studio centres, in recording rooms and at transmitting stations. Of these, 480 are technical assistants, 23 program engineers, two have graduated to maintenance engineers and three have become assistant engineers. Only about one in four had had pre-war experience. In addition, there are over 20 women announcers and 32 producers and there are 50 program assistants.

The Canadian Broadcasting Corporation which operates Canada's two coast-to-coast networks also found it necessary to engage women to offset the inroads of war. Apart from this emergency, it felt there was a need adequately to present women's interests and as a consequence many were placed in important, even executive, posts.

Women With OWI

By the same token that radio has become an important part of every-day life and habit, so has the woman's daytime program which is directed at the female audience assumed an undisputed prominence in radio programming. Our government recognized this and through the Women's Activities section of the Domestic Radio Bureau of the Office of War Information launched the Women's Radio War Program Guide as a means of getting war messages to the daytime audience.

The Guide has carried four war campaigns each month and broadcasters have been asked to use one message a week. The subjects that have been used include Paper Shortage, Careless Talk, Give War Bonds and Stamps for Christmas, Nurses' Aides for Army Hospitals, and others equally pertinent. Co-operation from women's programs with this movement has been reported as excellent.

Mgt. LOU CLAYTON

THE MARKET FOR RADIO IN 1945

By M. H. Shapiro
Managing Editor, *RADIO DAILY*

RADIO faces new problems of determining its best markets for 1945. With new markets still springing up and some wartime swollen markets tapering off, no newer population estimates by the Bureau of Census than November, 1943, are available. This is due, of course, to the fact that the latest available civilian population is based upon the last War Ration Book No. 4.

However, it is safe to assume that on a regional or state-wide basis there has been little change since 1943. Elsewhere in the Radio Annual, population figures for Regions and States are presented as well as Metropolitan District Counties and all other counties with a city of 25,000 population or more. These, naturally, are radio's basic markets and with only few exceptions each Metropolitan District County listed is a home for Radio.

When it is remembered that the country as a whole lost approximately 4,000,000 in civilian population from April, 1940-November, 1943, it is interesting to note that only a few Metropolitan Districts and other listed counties showed an equal or greater loss. Many of these urban centers on the other hand showed substantial gains in civilian population. From this it can be said that a large portion of Radio's customers have come closer to the major buying centers and thus more receptive to Radio's message. Naturally, this has been a boon to the local stations and has increased the potential audience for stations in this class in those communities which show population gains.

On the other hand while the rural areas have shown the greatest loss in population this is counteracted by the large increase in spending power now enjoyed by the farmers. From an average cash farm income of \$8,100,000,000 from 1934-1938, it is estimated that this figure would reach approximately \$22,000,000,000 in 1944—an increase of 271 per cent. And as numerous surveys have shown that the farm family listens the most

hours to radio this potential more than makes up for the fewer cash customers throughout the agricultural areas.

Radio Daily estimates that there are 31,271,178 families in the United States with at least one radio set in operation. This national market is the greatest that can be reached effectively by a single media and represents nearly the entire market receptive to the national advertiser. During 1945 it can be confidently stated that radio will continue to show increases in total billing; as has occurred during the past several years.

If the war should end this year, it is not expected that there will be witnessed the same severe dislocation of population as quickly as happened in the early days of the war. In the past six months many surveys have been made among war-workers in cities with great population gain and a surprising percentage of those questioned said they intended to remain in their new homes rather than return from whence they came. This is particularly true on the Pacific Coast, the region with the greatest increase in population since 1940. Active planning to retain population growths has been under way for a long time in many communities and every effort will be made to maintain the "new" city sizes brought on by the war. It is possible that industry will possibly change its location in many instances to be nearer many employed markets and bringing peacetime production and jobs to many of them rather than let them return to their pre-war status.

However radio evaluates these markets, a quick yardstick of postwar prospects is contained for the Metropolitan Districts in the statistical section of Radio Annual. The ratings for postwar take into consideration decades of population growth as well as wartime boom and can be used as a basis for postwar planning at least. Since there will be no new national Census until 1950, the population figures presented will probably not be superseded until that date.

A GOOD SONG LIVES FOREVER

By Morton Downey

I DO not believe that the current revival of old tunes can be interpreted as a trend. Looking backward over many years in show business, I am inclined to believe that it is merely a survival of the fittest of numbers which awakened an emotional response in all people over a long period of time.

Some songs (like some lucky people) are ageless. Graceful or gay, sentimental or nostalgic—some even tragic!—they linger on. Linger on? They gain new life from jazz, swing or what-have-you in musical arrangements that key the tempo of each passing generation.

You never can tell. Today some chap, somewhere, is polishing off a song destined to become a great hit. People will sing it, recording factories will smoke with hot wax, the bobby-soxers will go simply ma-a-a-d about it. And then—poof, out like a candle.

What's the answer? I'd be a presumptuous guy to give a didactic answer because I may be all wet. But here's something I have first-hand knowledge of. Before I went overseas to tour hospitals behind the lines for the USO, the Broadway boys kept taking me aside to advise me on what our lads would want to hear. "Be sure," they told me solemnly, "be very sure not to include any sad or corny home-and-mother stuff. What those kids want is hot, swingly stuff."

What They Wanted

Well, I followed the advice. I rehearsed fast-moving numbers, hopped-up stuff with even a touch of risqué. And in the first hospital I visited I threw the whole routine away. Because, do you know what those kids called for? In this order: 1, "I'll Walk Alone." 2, "Spring Will Be a Little Late This Year." 3, "Irish Lullaby." 4, "Melancholy Baby." 5, "Star Dust"—and such perennials as "When Day Is Done," "All the World Is Waiting for the Sunrise," "When Irish Eyes Are Smiling."

Why? For the simplest of all reasons. One thought is uppermost in the minds of those kids—home—whether it be where the woodbine twineth or a Brooklyn tenement. Home and mother and sweetheart. Corn—maybe, but it's corn with pretty sound kernels.

The mood of those boys at the moment, to the exclusion of all else, is centered on those simple, homey things. But, to me, the most interesting thing is that after they're home, safe and sound and with the blood and mud behind them, they'll still be singing those songs ten years from now. And longer.

It adds up, I think, to the fair conclusion that a good song never dies. Like wine, it mellows and strengthens with the years. America, still a young country, is friendly and sentimental. That's why the songs—I mean the sound numbers with nostalgic lyrics—that came out soon after the turn of the century with home and hearthside the very warp-and-woof of their story—that's why those songs are ageless.

A Few Examples

Let's look at a few examples of those deathless old songs. "You Made Me Love You," written in 1913 and sung and danced to by children of men and women who sang it when it first came out. "Shine on Harvest Moon," 36 years young. "On Moonlight Bay," written in 1912. "Can't You Hear Me Calling, Caroline"—the Germans were invading Belgium in World War I when that was published, back in 1914. Irving Berlin's unforgettable "All Alone"—that came from his facile pen in 1924. "Dinah," in 1925, "Carolina Moon" in 1928—and that gay, rollicking "Oh, You Beautiful Doll" that rattled the rafters in ballrooms, back in 1911, where the Turkey Trot was still a daring dance.

Ray Noble, back in 1932, penned the sentimental "The Very Thought of You." As of this moment it is being played as often as "Don't Fence Me In." No, you just can't kill a good number—and who would want to? These songs have earned the right to a spot in the heart of musical America. In my opinion, I repeat, that I do not believe there is such a thing as trends in songs as the term applies to other fields. At regular intervals, a novelty or patriotic tune may sweep the country and after a brief flash pass into oblivion—never to be heard again. People in the entertainment world, song writers and music publishers all felt that the war would be productive of a trend. But it has not.

WARTIME SPORTS BROADCASTING

By Don Dunphy

THE War has increased the responsibility of the Sports Announcer. At all times, in war or peace, his duty has been to the Radio Audience, to give a clear and accurate picture of what was happening in the field of sports whether his medium was a play by play description of an event or a daily or weekly summary. But now with so many sports minded Americans in the service overseas and almost wholly dependent on radio for their sports information, his responsibility has increased manifold.

After the attack on Pearl Harbor on December 7th, 1941, the continuance of sports during the war was very much in doubt. But sports continued and it soon became apparent that the morale factor of athletics for the civilian population and more important for the man and woman in uniform was of tremendous importance. Sports broadcasting immediately became an integral part of this picture. The Sports Announcer has always been the liaison between the game and the listener, he is the eyes of the radio audience. It is for him to occupy the seat of the person who cannot attend the game or fight and to see the event as the listener would were he present. Now with so many millions overseas or occupied on the civilian front and unable to otherwise keep posted, the responsibility of the sportscaster becomes more and more apparent. It is for him to see that they get the sports news that they want.

Armed Forces Co-op

Through the co-operation of the Armed Forces Radio Service, there have been sent overseas play by play descriptions of baseball, boxing, basketball, hockey, track meets and other sports events. These have gone out both live and recorded along with daily and weekly summaries. We know from the mail response from the men in uniform how much sports by radio has done to bring "Back home" a little closer to "Over there." We know what they have done to keep alive his interest in sports, how much it has meant in the way of relaxation and enjoyment. This has been indicated by the reports that have come back of a group of soldiers huddled in an igloo in the black of an Alaskan night listening to the play by play of the last

World's Series between the Cardinals and the Browns, of fliers returning from a bombing mission asking for baseball scores, of parents mentioning letters from sons in which they talk of enjoying fight broadcasts, of soldiers and sailors the world over waiting impatiently by their sets for the kickoff in the Army-Navy football game. All these things should make the sports announcer even more anxious to do a good job and to turn out a better performance.

Other Duties

Aside from the actual descriptions and summaries there have been other duties for the sports announcer. There has been for instance the co-operation with the Office of War Information in putting important announcements before the public; the giving impetus to the various War Loan Drives; the calling attention to the Red Cross both in the matter of the blood banks and the raising of funds; also the important matter of reminding the folks at home to write to those in the service.

In 1944 the New York Sports Broadcasters Association conceived the idea of putting on its own radio show in connection with the Fourth War Loan Drive. It was broadcast on Mutual and was called "The Golden Age of Sports." What started out as a germ of an idea soon grew into a billion dollar program. You in the industry who know something of the costs of talent imagine if you can the cost of a program with Jack Dempsey, Babe Ruth and Frankie Frisch; with Benny Leonard and Barney Ross; with Red Grange and Bob Zuppke, with Gene Sarazen and Earl Sande; with Frank Hunter and Alice Marble; with Lester Patrick and the New York Rangers hockey team, and others. Add to them practically every topnotch sports announcer in the country and you draw the conclusion that never again will so much sports talent be gathered on one program. Only the War Effort could have brought them all together.

Yes, the War has increased the responsibility of the Sports Announcer but I think he has realized his responsibility and answered the question, the while striving to present a better and clearer sports picture.

THE WEST COAST HAD A BUSY YEAR

By Ralph Wilk

RADIO DAILY West Coast Representative

THE year 1944 was marked by more changes in ownership of Pacific Coast outlets than in any other 12 months. This was due to the FCC order, prohibiting anyone owning or controlling more than one station in any community.

The Blue bought KECA, Los Angeles, from Erle C. Anthony, who retained ownership of KFI. KEX, Portland, was purchased by Westinghouse from the Oregonian Publishing Co., which will continue to operate KGW. C. W. Meyers, owner of KOIN, Portland, disposed of KALE to the Portland Journal and Charles Couche.

Station Status

Birt F. Fisher sold his third interest in KOMO, Seattle, to the Fisher Brothers, and in turn acquired KJR, Seattle, from the brothers, to whom he is not related. Jack O. Gross bought O. L. "Ted" Taylor's half interest in KFMB, San Diego. Sheldon Sackett, Marshfield, Ore., and Philip Lasky, manager of KROW, Oakland, purchased Wesley I. Dumm's interest in the outlet. Dumm has bought KPAS, Pasadena, from the J. Frank Burke interests and retains KSFO, San Francisco.

Ralph Sherwood and Mott Brandon sold KJBS, San Francisco, to a syndicate, but continue to operate KQW, San Francisco.

A significant development is that, due to carrying a heavy volume of business, several independent stations are in a good financial condition and able to set aside funds for any future FM and television plans they may wish to undertake. Shortage of newspaper space resulted in many advertisers buying radio time for the first time, and the broadcasters expect to retain much of this new business in the postwar period.

The quality of programs for the four Coast nets showed improvement, with

sponsors spending more money to gain quality. Saturday morning, which was formerly unpopular with time buyers, is now yielding much revenue for Coast broadcasters, with important programs using the heretofore despised time.

Personnel Changes

Several personnel changes developed during 1944. Don E. Gilman, long a leading figure in Western radio, resigned as the Pacific Blue's top man to become the "Will Hays" of the Coast petroleum industry. Don Searle left the management of KPO, San Francisco, to head the Pacific Blue's activities. Frank Samuels came down from San Francisco to become the Pacific Blue's sales manager, succeeding Tracy Moore, who resigned to join the Sonovox organization.

John Swallow, veteran program manager of NBC's Western division, left the net to enter the advertising agency field. Frank Conrad entered the Coast radio fold by becoming station relations manager for the Pacific Blue.

George L. Moskovics, who was the Columbia Pacific's sales manager, went East and is now assistant to Howard Meighan, who is in charge of Columbia's radio sales. Charles E. Morin, who was Columbia's Pacific's Eastern sales manager, is now the Coast net's sales manager.

Joe Alvin, who was assistant director of NBC's Western division press department, was promoted to head the net's special events and news department.

Paul Appleby left a Government post in Washington, D. C., to become vice-president and director of KIBO, Seattle, while Harold N. Graves, who also did Government work in the capital, joined the same outlet as vice-president in charge of finance and personnel.

Pat Campbell joined Don Lee-Mutual and his duties include those of station relations manager.

Ralph Edwards'
"T or C"

ON THE WASHINGTON FRONT

By *Andrew H. Older*

Staff Correspondent, Radio Daily

RADIO served two functions in the nation's capital in 1944—it made news and it told the news. Radio itself could not, in the year 1944, make as important news as it spread, even though it played a vital part in making the good news from the war fronts. In a sense, however, the news radio made vies in importance with that it carried. For the importance of radio as an instrument for the keeping of world peace keyed most of the news radio made in 1944.

In December, appearing before the Senate Foreign Relations Committee, Assistant Secretary of State Archibald MacLeish declared that radio is one of the media which will do as much to safeguard world peace in the future as the traditional diplomats. The appointment of MacLeish to the State Department post itself was clear indication of the recognition by our government of the absolute need for utilization of radio in fostering international friendship.

Freedom of Radio

Throughout the year, both on Capitol Hill and at the FCC, the fight to assure the complete freedom of the air—freedom of listeners and freedom for broadcasters—which must be enjoyed in post-war America has gone on without pause. For not only has radio a major role to play in the preservation of world peace, but free radio is likewise a cornerstone of democracy in our own country. The two are related. World peace can be assured only if the voice of each nation speaks the will of the people of that nation, and only through radio and its sister media of public opinion can that will be determined.

On Capitol Hill there were three major events in the move to safeguard radio freedom. The ill-starred investigation of the FCC by the special House Committee chaired by Rep. Clarence F. Lea drew to a close with what amounted to a clean bill of health for the commission. As we write this we've not seen the final report of the committee, but know from speaking with members that the FCC was found not to be the hotbed of radicalism and corruption which some congressional critics had maintained.

Second event was the preparation of a

thoroughgoing revision of the Communications Act by Senator Burton K. Wheeler. Reactions to this bill were mixed, and it was abandoned in short order, but it was extremely important that the need for clear, modern streamlined radio legislation was sufficiently apparent to our lawmakers that an attempt was made to outline such legislation. Further attempts will be made. It is also important to recall that new radio legislation will not be written in a vacuum on Capitol Hill; Wheeler's experience makes it obvious that the voice of those men who have brought radio to its present eminence will be given full weight in further deliberations.

The third event on Capitol Hill was the introduction of a joint resolution by Senator Claude Pepper and Representative John Coffee calling for broadcast of the proceedings of the House and the Senate. The great functioning body of democracy, these and other members believe, would find its democratic purpose furthered were it brought to the people in a way no medium other than radio can bring it. Radio, they feel, can return our democratic machinery to the status of the town council from which it sprang.

FCC Hearings

No discussion of the radio year in Washington would be complete without mention of two specific events. First is the series of hearings held by the FCC, during which all segments of the industry presented their views on post-war frequency allocation. Decision of the FCC on this all-important division of the spectrum is to be found elsewhere in this volume.

The second event that must be mentioned is the resignation of James Lawrence Fly as FCC chairman. Retiring to take up private practice, Fly will not be forgotten by the radio industry for many years to come. In his five years at the commission helm he was the most maligned and most respected radio regulator the industry has ever known. As the year closed, Paul Porter moved into the Chairman's office to lead the commission in the vital deliberations ahead of it as the post-war set up for broadcasting—AM, FM, television—shapes up.

DON AMECHE

Management

GEORGE FRANK, INC.

CHICAGO LOOKS TO THE FUTURE

By Bill Irwin

RADIO DAILY Staff Correspondent

CHICAGO is ready to assume a pre-eminent place in postwar radio and television. Plans already made and in the making assure this area of new projects in the broadcasting field and the improvement and expansion of existing facilities on a scale which would seem to bear out the prediction of Niles Trammell, president of the National Broadcasting Co., that Chicago will emerge as a television hub of the nation in the postwar era.

From a television standpoint, particularly, Chicago is geographically favored. It would inevitably become the nerve center in any coast-to-coast tele hook-ups. It likewise offers unlimited possibilities for construction of physical facilities in outlying areas.

An example of this is found in the postwar plans of the newly-organized consolidated Television Corporation which call for a 200-acre suburban center, rivaling New York's Radio City, where live television shows and films for television would be produced. The blueprint for this elaborate project includes a physical plant costing several millions and housing a staff of 1,000 directors, actors, technicians and cameramen.

Television Plans

Chicago looms large in the postwar television plans of at least three of the major networks, NBC, CBS and Blue, each of which has included the Windy City as the site of a commercial television station in applications filed with the FCC for licenses to operate such stations. During 1944, Paramount Pictures, Inc., also applied to the Federal Communications Commission for authority to operate a series of television relay stations, comprising a national television network, one of which would be situated in Chicago.

Chicago already has two television transmitters in operation, W9XZV, owned by the Zenith Radio Corp., which has been broadcasting continuously scheduled programs for nearly six years, longer than any television transmitter in the country, and WBKB, the Balaban & Katz station, which has been operating for the past two years.

Network Tie-up

The Blue Network recently announced that negotiations had been completed with Balaban & Katz to present network programs suitable for televising from the studio of WBKB. Two Chicago-originated Blue Network programs which definitely will be televised are the Quiz Kids and the Breakfast Club.

In its role as host to the 1944 national political conventions, Chicago was for a couple of weeks last Summer the radio hub of the nation, with the four networks providing the most comprehensive coverage of party conventions in the history of broadcasting. NBC supplemented its schedule of broadcasts with telecasts of both the Republican and Democratic conventions.

One of the most elaborate postwar radio-television projects is WGN's "Theater of the Future." It will be one of the world's largest and most spacious radio studios, with a seating capacity of 2,000 and a stage capable of accommodating a 75-piece orchestra, a chorus of 40 and the principals of a musical cast. The new WGN building is to be erected on a site just south of Tribune Tower, overlooking Michigan Avenue and the Chicago River. It will have two other theaters, each seating about 600 persons.

Radio-Tele Theater

The WGN "Theater of the Future" is to be used first as a radio theater and later as a television theater. WGN has placed a postwar order with General Electric for a 40,000-watt transmitter and telecasting equipment to cost more than a quarter of a million dollars.

Another expansion program which awaits only the end of the war is that of the Blue Network's Central Division, which has been sharing quarters with NBC in the Merchandise Mart. The Blue's postwar plans call for new and more spacious headquarters in Chicago.

Television Station WBKB also has postwar plans for expansion. The Navy at present is using half of the station's available space in the State-Lake Building for its Basic Electronics Training School.

CANADIAN POST-WAR PLANS

By *Glen Bannerman*

President and General Manager, Canadian Association of Broadcasters

MUCH has been written and said during 1944 about the necessity of industries and organizations planning for their post-war activities. If by post-war planning the writers and speakers mean the taking of steps to develop sound practices and essential expansions to face the era of peace in a readiness to enter competitively into serving the needs of the public, radio broadcasting in Canada has been steadily planning throughout the war.

Insofar as the privately owned broadcasting stations are concerned, planning for the future has to take into consideration two important factors: First, improvements in service to their listeners. This factor breaks down into two divisions—one, improvement in standards of programming and public service; two, improvements in technical development for clearer signals and better coverage.

The second factor requires planning to make it easier to do business with commercial and prospective commercial sponsors. Since the private stations are entirely dependent upon the revenue obtained from commercial sponsors to carry out their obligations in serving the public, this second factor is of paramount importance.

Standarization of Rate Structures

In Canada, from the day that radio broadcasting became an advertising medium up until recently, the variations in frequency discounts and time period rates has been a bug-bear to time buyers and advertisers alike. This confusion undoubtedly acted as a deterrent to the successful purchase and use of radio time. For years before the war the situation was a matter of discussion by broadcasters at the Annual Meetings of the Canadian Association of Broadcasters. Finally, in 1943, a standard rate structure committee was appointed.

As a result of the work of this committee, rate cards of all privately owned stations in Canada, with one or two exceptions, have adopted a standard discount as between time periods down to the five minute programme and a standard of frequency discounts for these same periods. This year, for the first time, the Canadian Association of Broadcasters has been able to place in the

hands of time buyers a rate book of all privately owned station rates in which all but one or two stations are in line with the standard rate structure committee's recommendations.

A Yardstick of Measurement

Radio station coverage is an important yardstick of measurement as a basis for the time buyer and advertiser to estimate what is available for the money invested in radio time. Up to 1944, no one standard of measurement existed in Canada. In 1942 the Canadian Association of Broadcasters, at its Annual Meeting, authorized the setting up of a Joint Committee of advertisers, agencies and broadcasting stations. The Committee was appointed and as a result of its findings and recommendations, the Bureau of Broadcast Measurement was organized in the summer of 1944.

For the first time in radio broadcasting, advertisers and agencies now know that the coverage figures for a station in British Columbia have been arrived at on the same standard as the figures for a station in Nova Scotia. While all stations as yet are not members of the Bureau of Broadcast Measurement, 47 out of 90 commercial stations are members.

During 1944 the Canadian Broadcasting Corporation finally recommended that some 34 privately owned stations with power frozen at 1000 watts be authorized to increase power to 5 k.w. This is the power authorized under the Havana Treaty. As soon as equipment is available, these stations will take more power.

Canadian RTPB

Another phase of post-war planning is to be found in the establishing of a Canadian Radio Technical Planning Board. This Board will function in a similar manner for Canada as the Radio Technical Planning Board does for the United States. The Radio Manufacturers Association of Canada, with the blessing of the Radio Division, Department of Transport, is responsible for initiating the Board. Much of the material of the Radio Technical Planning Board in the United States will be basic, but usage of AM, FM and Television bands as they cover the Canadian picture will be subjects of future study.

first things first

Sometimes the hard way is the easiest—if you go at it right.

Here at Mutual we're busy building a better network. For a solid decade, this has been a good network. To make it better—better for listeners, for artists, for stations, for clients—is a large order. And we plan to do it soundly, concentrating continuously on *first things first* in all our operations.

Foundations come first in any structure, and we think the rockbottom foundation for a radio network is the minds and skills of its personnel. Mutual is particularly well-grounded in this respect. Its directorate comprises successful broadcasters whose radio-business experience covers the whole span of broadcasting's quarter-century... a lineup of practical know-how outstanding in the entire field of commercial radio.

This basis of first-hand experience has lately been strengthened from within by the organization of a complete and able executive staff, headquartered in New York and buttressed at key points elsewhere. Into capable hands have been charged the various problems of general management as well as programming, station relations, sales and all other phases of efficient network operation. Mutual efforts toward improvement in each of these fields deliberately follow the fundamental, first-things-first pattern . . . with the listener—the family on the receiving end of radio—foremost in our planning at all times.

Shouting from the housetop has no place on the Mutual schedule, but as we build upon this sturdy foundation, we think our “hard-way” approach may prove the easiest route to a better network after all. We’ll let you know how it works out.

COMMUNICATIONS LIAISON COMMITTEE FOR CIVILIAN DEFENSE

The duties of this Committee include the submission of expert advice on all communications problems in which the Defense Communications Board and the Office of Civilian Defense are mutually interested. With the requirements of national defense as a primary consideration, the Committee will submit recommendations to the Board on such problems as are referred to it by the Board. In addition, the Committee shall have liaison with a similar committee of the Office of Civilian Defense and shall work with that committee in planning for the most efficacious use of communications facilities for civilian defense.

RADIO DAILY

IS HAPPY TO PRESENT

THE

“ALL AMERICAN

RADIO PROGRAM

O F 1 9 4 4”

PROGRAMS, artists and songs listed as winners on the following pages were chosen by 1,051 ballots as voted by the newspapermen and women of America. Each figure represents the exact number of votes received by the respective winners and the first five in each classification. All ballots have been checked by the Ross Federal Research Corp. which conducted the field work for Radio Daily and official certification was by a recognized firm of certified public accountants. Original signed ballots and worksheets used in tabulating votes are open to inspection by the industry.

Trade acceptance of the Certified Poll was unanimously received on January 9, 1945 when network, independent station and press association representatives attended a luncheon at the Waldorf Astoria Hotel, New York, examined the ballots, and learned the methods used in obtaining them.

Nighttime listening in 1077 cities

THE FIRST OF A SERIES OF REPORTS from NBC's 1944 Nation-wide Survey of Listening Habits is just completed. It contains details as to how the people in 1077 cities . . . all the U. S. cities of 10,000 population and over . . . responded when they were asked "To which station do you listen MOST . . . at night, after 6:00 P.M."

These pages give you the highlights. For complete information, write for the NBC book — "1077 Cities . . . and How They Listen at Night."

In 1077 cities

being all those in the United States having populations
of 10,000 or more—and accounting for

16,000,000 radio families, or 56% of the nation's total

NBC leads the next network

in "Listened to Most" at night

by 128%

57% of the Radio Families "Listen Most" to NBC

25% of the Radio Families "Listen Most" to Network B

6% of the Radio Families "Listen Most" to Network C

9% of the Radio Families "Listen Most" to Network D

...summing up by cities

NBC leads by nearly 6 to 1

In 860 cities NBC leads all other Networks (total radio families 14,576,813)

In 154 cities Network B leads all other Networks (total radio families 1,254,996)

In 32 cities Network C leads all other Networks (total radio families 149,949)

In 14 cities Network D leads all other Networks (total radio families 50,158)

HOW RADIO FIGHTS FOR VICTORY

By John Salt

North American Director of the BBC

THE end of 1944 seems an excellent time to review the accomplishments of the BBC's European Service, which is the special radio service created at the time of the Munich crisis. As Radio Daily's Annual for 1945, goes to press, many of the countries occupied by the Nazis have been liberated. Amazing stories of the tremendous importance of BBC's European Service may now be revealed. Innumerable sacrifices were required on the part of the hundreds of radio technicians, producers, newsmen and broadcasters to keep the European Service going from England which has been at the front lines of the war.

We do not consider that this story belongs to the BBC alone. It is something in which all freedom loving people throughout the world may take pride.

Maximum Resources

It is true that it was the BBC that organized its maximum resources and energies to the task of keeping alive the will to resist and hope for liberation in the countries overrun by the Nazis,—But this is as it should be. If the war against the enemy were being fought near the United States it would have been the great American radio organizations that would have rolled up their sleeves and said: "This job comes first" as we did at Broadcasting House in 1939.

Fan mail is usually considered by American broadcasters to be a good gauge of listening habits. What then would you think of a program pulling more than 4,000 letters a month! And what would you think if your letter writers were risking jail and possible death by listening to your programs of writing letters!

From France alone the BBC's European Service has received an average of 4,000 letters monthly. But these, and thousands of other letters from Belgium, Holland, Czechoslovakia, Poland and even from within Germany, have been more than letters of appreciation. They have been a barometer by which to ascertain who is listening. From these letters have come invaluable information as to potential strength of the Patriot forces in the various countries.

BBC's European Service first began with about a half an hour a day in French, German and Italian, sandwiched into the Home Service. At the outbreak of the war six more languages were added. By April of 1944 the BBC was broadcasting 50 hours daily in 24 languages to millions who were listening secretly at the risk of death.

It was a few weeks before D-Day that ABSIE began to operate. This has resulted in the closest collaboration between the BBC and the OWI in technical and other fields.

In preparation for D-Day the first instructions to the people of Europe came from BBC's European Service and ABSIE.

It was in 1944 that Jacques Duchesne returned to his beloved France. He had escaped from occupied France to start with his patriots the program "Les Francais Parlent Au Francais," over the BBC. When he stepped onto French soil he was greeted as a hero. All Frenchmen knew his voice,—It was the voice of Freedom. Said Duchesne to his countrymen, "Above all, we thank the BBC because they knew not only how to respect our freedom but also how to organize it."

The "V" Campaign

All Americans know of the power of the "V" campaign. But not all know of the origin of this momentous drive that united millions throughout the world into one mighty voice shouting "V For Victory." It was in BBC's European Service that Victor Delavelaye, Belgium's Minister of Education, conceived the "V" program. Recently Delavelaye said to his compatriots, "You are free and have no more need of the voice that reached from the BBC in London and which gave you the reasons for hope."

And in December Jean Guignebert, Director General of Radio Diffusion Francaise visited London where he said, "The whole of France was dependent on transmission from the BBC. The enormous majority got from them faith, hope and the certainty of victory. The salvation of an entire people is the most sensational of exploits to radio's credit."

A Study in Figures . . .

99% of the dollar volume in the industry is represented by BMI licensees . . .

972* commercial licensees in the United States and Canada . . . embracing all the major networks and the important FM and Shortwave broadcasters

600* music publishers, affiliated with BMI, are creating many of the nation's top song hits consistently . . . and BMI has the exclusive performing rights to nearly a million titles of these publishers as well as of the performing rights societies of Argentina, Brazil, Chile, Cuba, Mexico and Uruguay

700,000 titles are listed as available for use in the latest BMI catalogue . . . music which ranges from the venerable classics to the newest in boogie-woogie

30,000 phonograph records performable under the BMI license . . . and thousands more available in the libraries of the electrical transcription companies

*As of February 1, 1945.

It's Nice to Be With You Gracie

Fred Brady

Gracie Fields

This label identifies the organization best equipped to deliver — complete with writing, performing and production talent — everything from a 15-second spot to a full hour recorded show. It guarantees the same “know-how” in transcriptions that the William Morris Agency has brought to its live talent programs.

Televised Spots Next!

WHY TRANSCRIPTIONS MAKE GOOD

By Willis B. Parsons

Asst. Sales Mgr., NBC Radio-Recording Division, New York

LOOKING at transcriptions from the right point of view, there is no difference between a recorded program and a "live" show except that the transcribed program is "stored" on a disc until it is ready to be used. Both recorded and live shows start with the same elements—script, actors, music, production. The live show is broadcast immediately over a single station or simultaneously on a network of stations—the recorded show gets "in the groove" and comes out one week, a month or a year later over stations in varying time periods depending on local availabilities.

When you can't be personally at the stations you've selected for your spot schedule, directing the talent you want in the production you've chosen—but still insist on having a program that's "network calibre" in script, talent and production—then you're the best prospective customer for transcriptions.

Advertiser's Viewpoint

From the standpoint of the advertiser whose distribution or marketing problems says "Use spot radio," recordings have distinct advantages. They permit flexibility of programming—and in these days of limited time availabilities, that is particularly important: a recorded show can be spotted at the best available time, perhaps at different times in different markets. Transcriptions give you production control of local broadcasts, whether a spot announcement or a variety program, permit you to select the best actors, singers or musicians the big talent centers have to offer and produce the program the way you want it to go on the air. You have an advantage in producing the show, too—your actor makes a fluff, you can do it over; if your singer hits a sour note, you make another cut—you can correct the mistakes that, in a live program would have gone on the air and could never be recalled. In every market, you have the same talent, the same excellent production, the same effect that you want produced down to the pronunciation of every syllable.

The advertiser with a healthy budget can go as far as he wants in building a transcribed show tailor-made to his own specifications. But what about the local or regional advertiser who must

make every radio advertising dollar do double duty? He's up against tough competition from the big network shows and the elaborate programs produced locally by many of the larger stations. The syndicated recorded program is the answer to his budget problem. Produced in talent centers such as New York, Chicago and Hollywood, these transcribed shows are frequently written by the same authors, cast with the same talent, produced by the same directors who are responsible for many of the networks' leading programs—yet, because their cost is shared by a number of advertisers, they are well within the means of limited budget advertisers.

Syndicated Programs

The syndicated recorded program is complete, ready to go on the air, needing only the advertiser's sales message to be read by the local announcer. And if the advertiser wants to carry uniformity of presentation to the nth degree, he can have his commercials recorded as well.

In the local radio picture, you should not overlook the recorded musical library service, for here is a wealth of fine musical material recorded by dance bands, popular concert orchestras, symphony orchestras, outstanding instrumentalists, vocal soloists, choruses and specialty groups that can be presented in musical shows of every type.

From the radio station's viewpoint, transcriptions are almost indispensable in these days of war-limited staffs. The advertiser's recorded shows simplify programming operations. The syndicated program gives the network affiliate a quality of production for local sponsored presentation that is comparable to the shows on its network feeds, helping the station to retain its audience.

There was a time, not so many years ago, when the designation required by the FCC, "The following program is transcribed," was enough to start an epidemic of dial switching. Today, the listener might never be able to tell the difference between a "live" and a recorded show except for this announcement, so great have been the improvements in production and recording technique. And that's the final answer to the question: "Why transcriptions?"

CODE OF WARTIME PRACTICES FOR AMERICAN BROADCASTERS OFFICE OF CENSORSHIP

AS OF FEBRUARY FIRST, 1945

T*THIS is the third revision of the Code of Wartime Practices for American Broadcasters.*

The principle of censorship remains the same. It is voluntary and broadcast management is responsible for fulfilling the function in its own medium. The broadcasting industry, to this end, should be constantly aware of the dangers inherent in (1) news broadcasts; (2) routine programming; and (3) commercial copy.

To combat these dangers effectively, broadcast management must be in complete control of all programming every minute of every day of operation. This responsibility should not be delegated to anyone over whom the management does not exercise control.

The facilities of the Office of Censorship are at the disposal of broadcasters 24 hours a day, to assist them with consultation and advice when any doubt arises as to the application of this Code. The following are the principal advisory guideposts (as revised) which are intended to aid in discharging censorship responsibilities:

I. NEWS BROADCASTS AND COMMENTARIES

Broadcasters should edit all news in the light of this Code's suggestions and of their own specialized knowledge, regardless of the medium or means through which such news is obtained.

Special attention is directed to the fact that all of the requests in this Code are modified by a proviso that the information listed may properly be broadcast when authorized by *appropriate authority*. News on all of these subjects will become available usually from Government sources; but in war, timeliness is an important factor and the Government unquestionably is in the best position to decide when disclosure is timely.

Caution is advised against reporting,

under the guise of opinion, speculation, or prediction, any fact which has not been released by appropriate authority.

It is requested that news in any of the following classifications be kept off the air unless made available for broadcast by appropriate authority or specifically cleared by the Office of Censorship.

(a) WEATHER. — Weather forecasts other than those officially released by the Weather Bureau. Mention of wind direction or barometric pressure in current or past weather (including summaries and recapitulations) except when contained in EMERGENCY warnings released specifically for broadcast by the Weather Bureau authorities.

NOTE: Special events reporters, covering sports or any outdoor assignments (fires, flood, storms, etc.), are cautioned especially against mention of wind directions.

“ONCE UPON A TIME THERE WAS A FINGER” - - -

Along about 1908 or 1909 (or maybe it was 1926) there was a baby born with a silver stop watch in its little kisser, tousled grey hair and an ulcer. Also, this Job had *eleven fingers!*

“Gad!” said his old man, “What a natural for a radio producer! Just think how deftly he could throw a cue with that eleventh pinkie!”

And so, all during his formative years, **LITTLE FINGER** was groomed for his mission in life. He couldn't play baseball like other kids, nor roller skate, nor upset garbage cans, just practice throwing cues. After each day of practice, the Super Digit was carefully washed, manicured, groomed and put to rest in a special leather carrying case.

Then came the great day. A whole studio full of actors, musicians, announcers, writers and sound effects men was assembled just to have that wonderful finger thrown at them. “What a Hooper we'll get!” chortled the account executive. “What sales we'll get!” cried the sponsor. “What a show we'll get!” chorused the public joyfully.

At last the great moment was upon them. Our hero took off his coat and opened his collar. Beads of sweat formed on his brow. He wound up—and **THREW THE MAGIC CUE!**

And what do you think happened?

Why nothing, of course. No Hooper, no sales, no nothing—just a cancellation. All of which goes to show you kids. It ain't the finger that's important. It's the brain power and teamwork *behind* the finger that counts.

The next time you have a radio problem, whether you need a ten second station break or a \$25,000 a week variety show, how about dropping us a line or giving us a call? We don't promise to solve all your problems over night, (nobody is that good) but we *do promise* constructive, down-to-earth thinking. After all, what makes the radio business go, if it ain't ideas? Lots of people you know have ten fingers (or eleven) but how many people do you know with ten ideas?

(b) ARMED FORCES.—Type and movement of United States Army, Navy and Marine Corps units, within or without continental United States including information concerning—

- Location.
- Identity.
- Exact Composition.
- Equipment.
- Strength.
- Destination.
- Routes.
- Schedules.
- Assembly for Embarkation.
- Prospective Embarkation.
- Actual Embarkation.

Such information regarding troops of friendly nations on American soil.

Revelation of possible future military operations by identifying an individual known for a specialized activity.

Exceptions: (1) ARMED FORCES IN THE UNITED STATES: Those in training camps and units assigned to domestic police duty, as regards names, addresses, location and general character.

(2) ARMED FORCES OUTSIDE THE UNITED STATES:

Names and locations (without unit identification) if presence of United States forces in area has been announced officially.

Names of Naval personnel without mention of their ships, unless said ships have been announced by the Navy as lost or damaged.

(c) SHIPS (CONVOYS, ETC.).—Type and movements of United States Navy, or merchant vessels, or transports, of convoys, of neutral vessels, or vessels of nations opposing the Axis powers in any waters, including information concerning—

- Identity.
- Location.
- Port of Arrival.
- Time of Arrival.
- Prospect of Arrival.
- Port of Departure.
- Ports of Call.
- Nature of Cargoes.
- Assembly.
- Personnel.

Enemy naval or merchant vessels in any waters, their

- Type.
- Identity.

Location.
Movements.

Secret information or instructions about sea defenses, such as—

- Buoys, lights and other guides to navigators.
- Mine fields and other harbor defenses.

Ship in construction—

- Type.
- Number.
- Size.
- Location.

Advance information on dates of launchings, commissionings.

Physical description, technical details of shipyards.

Movement of diplomatic exchange ships under the direction of the State Department.

Exceptions: Movements of merchant vessels on Great Lakes or other sheltered inland waterways unless specific instances require special ruling.

(d) DAMAGE BY ENEMY LAND OR SEA ATTACKS.—Information on damage to military objectives in continental United States or possessions, including—

- Docks.
- Railroads.
- Airfields.
- Public utilities.

Industrial plants engaged in war work.

Counter-measures or plans of defense.

Appropriate authority: for information about damage from enemy attacks to military objectives on land within continental United States or possessions is the commanding officer in the zone of combat, or the Army Bureau of Public Relations, Washington. (For the Hawaiian Islands, the Navy).

(e) ACTION AT SEA.—Information about the sinking or damaging from war causes of war or merchant vessels in any waters.

Appropriate authority: Appropriate authority for the release of news about the sinking or damaging of naval or merchant vessels in or near American waters is the commanding officer of the district in which the action occurs, or Naval Office of Public Relations, Washington.

(f) ENEMY AIR ATTACK.—Estimates of number of planes involved; number of bombs dropped; damage to—

20th Century-Fox Films

• Victor Recording Artist

GENERAL AMUSEMENT CORPORATION

Fortifications.

Docks.

Railroads.

Ships.

Airfields.

Public utilities.

Industrial plants engaged in war work.

All other military objectives.

Warnings or reports of impending air raids; remote ad lib broadcasts dealing with raids, during or after action.

Mention of any raid in the continental United States during its course, except on appropriate authority of the designated representatives of the Defense Commander in whose area the raid occurs or the War Department in Washington.

News which plays up horror or sensationalism; deals with or refers to unconfirmed reports or versions; refers to exact routes taken by enemy planes, or describes countermeasures of defense, such as troop mobilization or movements, or the number and location of anti-aircraft guns or searchlights in action.

Exceptions: After an air raid, general descriptions of action after all-clear has been given. Nothing in this request is intended to prevent or curtail constructive reporting or programming of such matters as feats of heroism, incidents of personal courage, or response to duty by the military or by civilian defense workers.

(g) ACCREDITED MILITARY AND NAVAL CORRESPONDENTS.—No provisions in this Code of Wartime Practices for American Broadcasters modify obligations assumed by accredited correspondents who accompany Army or Navy forces or are given special accrediting by the War or Navy departments to visit restricted areas in the United States.

These commitments, under War and Navy department practice, pledge such correspondents to submit to censorship anything they write in zones of combat or restriction, or what they may write at a later date as result of their observation in these zones. The military department concerned is the censorship agency for all such material.

In case of a protracted enemy attack on the continental United States, necessitating military declaration of a combat zone, censorship within such an area would, of necessity, be by military authority. Accrediting of news gatherers

for such a zone will be as in any other combat area. In the case of such an attack and declaration of a military zone of combat, the requests in this Code remain applicable to broadcast operations outside the declared area.

(h) PLANES—

Air Units.—Military air units of the United States and the United Nations as to—

Disposition.

Missions.

Movements.

New characteristics.

Strength.

Information concerning new military aircraft and related items of equipment or detailed information on performance, construction and armament of current military aircraft or related items; military activities of commercial air lines or the Civil Air Patrol.

(i) FORTIFICATIONS AND AIR INSTALLATIONS.—Location and description of fortifications, including—

Coast Defense Emplacements.

Anti-aircraft guns and other air defense installations.

Defense Installation details of public airports used for military purposes.

Camouflaged objects.

Location of specially constructed bomb shelters.

Information concerning installations for military purposes outside the U. S.

(j) SABOTAGE.—Specifications (including information on bottlenecks) which saboteurs could use to damage military objectives. No mention of sabotage should be made except on appropriate authority of the military agency concerned or the Department of Justice.

(k) PRODUCTION. (see also SABOTAGE)
—New or secret Allied military weapons, identity and location of plants making them, designs or rate of production or consumption of any specific type of war materiel, formulas or experiments connected with war production.

Information on imports, exports or Government stock piles of critical or strategic materials such as tin, natural rubber, uranium, chromium, tantalum, manganese, quinine, tungsten and high-octane gasoline.

TED STEELE
and his Orchestra
"CHESTERFIELD SUPPER CLUB"
Monday thru Friday, 7:00-7:15 P.M., E.W.T.
NBC

Transportation—Movement or transportation of war materiel.

NOTE: Progress of production for general categories of war materiel such as planes, tanks, guns, vehicles and munitions may be reported, but statistical information on specific weapons such as bombers, fighter planes, 155 mm. guns, medium tanks, etc., should be avoided without appropriate authority.

(l) COMBAT ZONE INTERVIEWS AND LETTERS.—Interviews with service men or civilians from combat zones (including accounts of escapes from foreign territory) should be submitted for review before broadcast, either to the Office of Censorship or to the appropriate Army or Navy Public Relations Officer. Letters from combat zones are censored at the source, for home and family consumption only. When used on the air, broadcasters should measure the contents of such letters in the light of the provisions of this Code. In case of any doubt, consult the Office of Censorship. (See clause on Armed Forces, regarding unit identifications).

(m) WAR PRISONERS, INTERNEES, CIVILIAN PRISONERS.—Information as to arrival, movements, confinement, escape or identity of military prisoners from war zones; identity of persons arrested or interned as enemy aliens; locations or operations of alien internment camps; place of confinement of civilians convicted of treason, espionage or sabotage.

NOTE: The appropriate authority for information as to war prisoners or their camps is the War Department; for information as to resettled persons, the project official in charge; for information as to enemy aliens or their camps, or civilian prisoners described above, the Department of Justice. In any inquiry, please make certain whether the individuals involved are military prisoners of war, enemy aliens or resettled citizens or aliens.

(n) MILITARY INTELLIGENCE.—Information concerning war intelligence, or the operations, methods, or equipment of counter-intelligence of the United States or its allies or the enemy.

Information concerning secret detection devices.

Information concerning secret United States or Allied means or systems of military communication, including the establishment of new International points of communication.

(o) WAR NEWS COMING INTO THE UNITED STATES.—War information originating outside United States territory may be broadcast if its origin is made plain.

Any recordings or information for broadcast gathered in any form that is sent across the United States-Canadian border should contain nothing that will conflict with the censorship of the country in which the information originates.

(p) GENERAL.—Casualties. Identification of combat casualties until made available for publication by the War or Navy Departments or the next of kin.

Strategy.—Secret war plans or diplomatic negotiations or conversations which concern military operations.

Art Objects, Historical Data.—Information disclosing the new location of national archives, or of public or private art treasures.

Diplomatic Information.—Information about the movements of the President of the United States (including advance notice of the place from which he will broadcast); information of official military, or diplomatic missions of the United States or of any other nation opposing the Axis powers—routes, schedules, destinations within or without continental United States; movements of ranking Army or Naval officers and staffs on official missions; movements of other individuals or units on military or diplomatic missions.

II. PROGRAMS

These suggestions are made in order that broadcasters will have a pattern to follow in accomplishing the most important censorship function of program operation: keeping the microphone under the complete control of the station management, or its representatives.

(a) REQUEST PROGRAMS.—Music.—No telephoned or telegraphed requests for musical selections should be accepted. No requests for musical selections made by word-of-mouth at the origin of broadcast, whether studio or remote, should be honored.

Talk.—No telephoned or telegraphed requests for service announcements should be honored, except as hereinafter

qualified. Such service announcements would include information relating to—

- Lost pets.
- “Swap” ads.
- Mass meetings.
- Personal messages.
- Club meetings.
- Club programs, etc.
- Vital statistics.

The same precaution should be observed in accepting “classified advertisements” for broadcasting.

No telephoned, telegraphed or word-of-mouth dedications of program features or segments thereof should be broadcast.

No telephoned, telegraphed or word-of-mouth auction bids, contributions or similar acknowledgments from listeners, should be broadcast.

Exceptions: Emergency announcements (such as those seeking blood donors, doctors, lost persons, lost property, etc.) may be handled in conventional manner if the broadcaster confirms their origin. They should emanate from the police, the Red Cross, or similar recognized governmental or civilian agency.

Service announcements may be honored when source is checked and material is submitted in writing, subject to rewriting by station continuity staff. Requests for the broadcast of greetings or other programs to commemorate personal anniversaries may be honored if the actual broadcast is not made on the anniversary date or at the time or on the date designated in the request.

ALL requests, subject to the above qualifications, may be honored when submitted via mail, or otherwise in writing if they are held for an unspecified length of time and if the broadcaster staggers the order in which such requests are honored, rewriting any text which may be broadcast.

(b) QUIZ PROGRAMS.—It is requested that all audience-participation type quiz programs originating from remote points, either by wire, transcription or short wave, should not be broadcast, except as qualified hereinafter. Any program which permits the public accessibility to an open microphone is dangerous and should be carefully supervised. Because of the nature of quiz programs, in which the public is not only permitted access to the microphone but encouraged to speak into it, the danger of usurpation by the enemy

is enhanced. The greatest danger here lies in the informal interview conducted in a small group—10 to 25 people. In larger groups, where participants are selected from a theater audience, for example, the danger is not so great.

Generally speaking, any quiz program originating remotely, wherein the group is small, wherein no arrangement exists for investigating the background of participants, and wherein extraneous background noises cannot be eliminated at the discretion of the broadcaster, should not be broadcast. Included in this classification are all such productions as man-in-the-street interviews, airport interviews, train terminal interviews, and so forth.

In all studio-audience type quiz shows, where the audience from which interviewees are to be selected numbers less than 50 people, program conductors are asked to exercise special care. They should devise a method whereby no individual seeking participation can be *guaranteed* participation.

(c) FORUMS AND INTERVIEWS.—During forums in which the general public is permitted extemporaneous comment, panel discussions in which more than two persons participate, and interviews conducted by authorized employees of the broadcasting company, broadcasters should devise methods guaranteeing against the release of any information which might aid the enemy as described in Section I of the Code. If there is doubt concerning the acceptability of material to be used in interviews, complete scripts should be submitted to the Office of Censorship for review. (See paragraph (L) of Section 1.)

(d) SPECIAL EVENT REPORTING (ad lib).—Special events reporters should study carefully the restrictions suggested in Section I of the Code, especially those referring to interviews and descriptions following enemy offensive action. Reporters and commentators should guard against use of descriptive material which might be employed by the enemy in plotting an area for attack.

If special programs which might be considered doubtful enterprises in view of our effort to keep information of value from the enemy are planned, outlines should be submitted to the Office of Censorship for review.

(See also Paragraph (a), Section I.)

(e) SIMULATED AIR RAIDS, BLACKOUTS.

—In view of the provisions contained in Paragraph (f) Section I of this Code, which prescribe radio silence at the scene of an air raid until the "all clear" is sounded, it is the belief of this office, in which the Office of Civilian Defense concurs, that broadcasting stations should not employ their facilities during a simulated air raid in any way which would encourage listeners to rely upon the medium for advice and assistance should an actual raid occur. This is intended to place no proscription on the legitimate broadcast of descriptions and commentaries dealing with simulated air raids and blackouts after the events have been conducted.

(f) **COMMERCIAL CONTINUITY.**—Broadcasters should be alert to prevent the transmission of subversive or restricted information through the use of commercial continuity in program or announcement broadcasts. In this connection, the continuity editor should regard his responsibility as equal to that of the news editor.

III. FOREIGN LANGUAGE BROADCASTS

(a) **PERSONNEL.**—The Office of Censorship, by direction of the President, is charged with the responsibility of removing from the air all those engaged in foreign language broadcasting who, in the judgment of appointed authorities in the Office of Censorship, endanger the war effort of the United Nations by their connection, direct or indirect, with the medium. Bases of judgment in exercising this function will be twofold: (1) current material written for broadcast or broadcast over American facilities; (2) past and/or present conduct of the individual, including evidence substantiating his sympathy with the regimes of our enemies. This function of the Office of Censorship is not intended to relieve in any measure the full responsibility resting with the management of the foreign language broadcasting station to employ only those whose loyalty he does not question. There extends to such broadcast management the additional responsibility to report to the Office of Censorship the names of any personnel in this field who might be suspected for any reason.

(b) **SCRIPTS.**—Station managements are requested to require all persons who broadcast in a foreign language to submit to the management in advance of broadcast complete scripts or transcriptions of such material. (This procedure

does not apply to programs originated and produced by the Office of War Information and distributed to foreign language stations). It is further requested that this material be checked "on the air" against the approved script and that no deviations therefrom be permitted. These scripts or transcriptions should be kept on file at the station.

(c) **CENSORS AND MONITORS.**—In order that these functions can be performed in a manner consistent with the demands of security, station managers are reminded that their staffs should include capable linguists as censors and monitors whose duty it will be to review all scripts in advance of broadcast and check them during broadcast against deviation.

(d) **SUBMISSION OF SCRIPTS.**—From time to time, the Office of Censorship will ask foreign language broadcasters to submit specified scripts to this office for review. If a station obtains its foreign language program from another originating point via network, these requirements do not apply; in such event the originating station will be held responsible for fulfilling the requests contained herein.

(e) Station managements are reminded that all provisions of this code, as outlined in Section I and II, apply equally to foreign language broadcasting.

—

Broadcasters should ask themselves, "Is this information of value to the enemy?" If the answer is "Yes," they should not use it. If doubtful they should measure the material against the Code.

From time to time the Office of Censorship may find it necessary to issue further communications either to interpret certain existing requests, amend or delete them, or otherwise to cover special emergency conditions. Such communications will be addressed to managers of radio stations and networks and should receive preferential attention.

If information concerning any phase of the war effort should be made available anywhere, which seems to come from doubtful authority, or to be in conflict with the general aims of these requests; or if special restrictions requested locally or otherwise by various authorities seem unreasonable or out of harmony with this summary, it is recommended that the question be submitted at once to the Office of Censorship, Washington. Telephone Executive 3800; Teletype WA-434.

THE OFFICE OF CENSORSHIP,
BYRON PRICE, *Director.*

December 1, 1943.

air-time: 1 YEAR

The CBS World News Studio in the forenoon of D-Day, June 6, 1944. Left to right: Ned Colmer, Correspondent and Analyst; Jesse Zousmer, Night News Editor; Bob Trout, Correspondent and Analyst; Quentin Reynolds (broadcasting), News Analyst; Major George Fielding Elliot, Military Analyst; foreground, back to camera, Joseph King, News Reporter. During D-Day CBS broadcast 15 hours 52 minutes of news of the Allied Invasion of Normandy

Between December 7, 1941 and December 7, 1944 there passed 1096 days.

During that period CBS broadcast a total of over 8686 hours, or 361 days 22 hours, telling the American people how the war was being faced and fought, and how best they could help win it.

That adds up to almost one total year of the three elapsed.

During that relentless outpouring of war-information, 46,052 separate CBS broadcasts, short, medium and long, offered 56,667 distinct ideas touching the progress of the war and the best way to move forward toward victory.

Of these 46,052 broadcasts, 25,891 were offered on commercial programs by patriotic CBS advertisers. The balance—some 20,161—were broadcast as CBS sustaining programs.

→ Victory is not yet. It is more visible today than it was Pearl Harbor Day. But we do not know, we do not guess, when it will come. Only one thing we know—that until the eagle perches on our standards for good, we shall not relax the volume and frequency, nor reduce the quality, of the war-broadcasting in which all of 147 CBS stations have played their becoming parts.

Thus radio, as the strongest young arm of the American system of distributing ideas about goods, has proven that it can distribute equally tangible ideas about citizenship. The hard experience of war has seasoned and tempered radio for the challenge of its responsibilities and powers in insuring the peace. Radio will take up that challenge with energy and humility—and without fear.

* Let the record note, too, that these totals here reported do not include the truly uncountable number of war-broadcasts sponsored by local advertisers on the 147 CBS stations, nor the sustaining war-programs originated by those stations themselves.

SHOWMAN'S CALENDAR

FOR 1945

January

- 1: New Year's Day (In all the States, Territories, District of Columbia and possessions). Paul Revere Born (1735). Proclamation of Emancipation (1863).
- 2: Georgia Admitted (1788).
- 4: Utah Admitted (1895).
- 6: New Mexico Admitted (1912).
- 8: Anniversary of the Battle of New Orleans (Louisiana).
- 9: Connecticut Admitted (1788).
- 14: First Written Constitution Adopted at Hartford, Conn., (1639).
- 17: Benjamin Franklin Born (1706).
- 19: Robert E. Lee's Birthday (Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia).
- 21: Stonewall Jackson Born (1824).
- 20: Inauguration Day. Begun in 1937. To be observed every fourth year from that date by the 20th Amendment to the Constitution.
- 21: Foundation Day. In the Canal Zone.
- 26: Michigan Admitted to the Union (1837). Gen. Douglas MacArthur's birthday. First A.E.F. Landed in Ireland (1942).
- 29: McKinley Born (1843). Kansas Admitted (1861).
- 30: Franklin D. Roosevelt's Birthday.
- 31: Franz Schubert Born (1797).

February

- 1: Victor Herbert Born (1859).
- 3: Horace Greeley Born (1811).
- 6: Massachusetts Admitted (1788).
- 7: Charles Dickens Born (1812).
- 9: Nebraska Admitted (1867).
- 11: Thomas A. Edison's Birthday. Daniel Boone Born (1734).
- 12: Lincoln's Birthday (Alaska, California, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nevada, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Virgin Islands, Washington, West Virginia, Wyoming). Georgia Day.
- 14: Valentine's Day. Admission Day (Arizona). Oregon Admitted (1859).
- 15: Destruction of the Maine (1898).
- 15: Constitution Day. In the Canal Zone. Susan B. Anthony Day. Observed in honor of the birthday of the pioneer crusader for equal rights for women. Governors of 33 States and 3 Territories have honored the day by special proclamations.
- 19: Ohio Admitted (1803).
- 20: Shrove Tuesday. Observed as Mardi Gras in Florida (in cities and towns where carnival is celebrated), Louisiana (Parishes of Jefferson, Orleans, St. Bernard, St. Charles, St. John the Baptist, East Baton Rouge), Canal Zone.
- 22: Washington's Birthday (All the States, Territories, District of Columbia and Colonial Possessions).
- 23: Ash Wednesday (Lent Starts).
- 27: Henry Wadsworth Longfellow's Birthday. First Railroad Charter (1827).

March

- 1: Nebraska Admitted (1867).
- 2: Texas Independence Day.
- 3: Florida Admitted (1845). First Postage Stamp used in U. S. (1847).
- 4: Pennsylvania Day. Vermont Admitted (1791).
- 5: Boston Massacre (1770).
- 7: Luther Burbank's Birthday (California).
- 15: Maine Admitted (1820). Andrew Jackson Born (1767).
- 17: St. Patrick's Day.
- 17: Evacuation Day. In Boston, Chelsea, Revere, Winthrop and Suffolk County.
- 13: Fast of Esther. Grover Cleveland's Birthday.
- 21: First Day of Spring.
- 22: Emancipation Day (Puerto Rico)
- 25: Maryland Day.
- 29: First Day of Passover.
- 30: Seward Day (Alaska)
- 31: Transfer Day, in the Virgin Islands.

April

- 1: All Fools' Day.
- 1: State Election. In Michigan.
- 2: Palm Sunday.
- 6: War Declared with Germany (1917).
- 6: Army Day. Observed in New York, and some other States, by a display of flags and by military parades.
- 7: Peary Discovered North Pole (1909). Good Friday. Metropolitan Opera House Opened in New York City (1830). Louisiana Admitted (1812).
- 9: Surrender of General Lee (1865). Easter Sunday.
- 12: Halifax Independence Resolution (North Carolina).
- 13: Thomas Jefferson's Birthday (Alabama).
- 14: Assassination of Abraham Lincoln. Pan-American Day.
- 19: Patriot's Day (Maine, Massachusetts).
- 21: Anniversary of Battle of San Jacinto (Texas).
- 22: Morton's Birthday (Nebraska). Arbor Day (Nebraska). William Shakespeare Born (1564).
- 24: First Newspaper Issued in America (1704). U. S.-Mexico War (1846).
- 24: Arbor and Bird Day. In Massachusetts.
- 25: War Declared with Spain (1898).
- 26: Confederate Memorial Day (Florida, Georgia, Mississippi). Slavery Abolished in U. S. (1865). First Shot of War with Germany (1917).
- 27: General U. S. Grant Born (1822).
- 28: President Monroe Born (1758). Maryland Admitted (1788).
- 30: Louisiana Purchased. Washington Became First President (1789). Rhode Island Settled (1636).

May

- 1: May Day. Child Health Day. Labor Day (Philippines). Dowey's Victory in Manila (1893).
- 2: Stonewall Jackson Shot (1863). National Music Week.

THE BUSINESS SIDE OF RADIO

By M. H. Shapiro

Managing Editor, RADIO DAILY

CHRONICAL of radio's forward march during 1944 is virtually a repetition of the magnificent strides taken each year of its history, both from the standpoint of progressively good business and public service. Contributing every possible effort to winning the war, offering co-operation on a scale no industry not actually engaged in war production per se could attempt, the broadcaster, network or independent station, stood shoulder to shoulder with those on the home front giving their best.

Naturally, along with all other media, radio received its share of increased advertising appropriations and if wartime paper stocks held down some newspapers and magazines, it must be remembered that radio started with the unalterable limitation of time itself. That is, the number of hours during which listeners are receptive to the sponsor messages, much less the obvious as to the hours in a single broadcast day.

Billings Up

In each instance, the major networks showed substantial increases in gross billings. Spot and regional webs also fared comparatively well, with the overall figure hovering around the 23 per cent mark. Net figures will deviate one way or the other, but indications are it will stand at that figure fairly close with not more than a 2 per cent differential in the final adjustment. Total billings before various discounts are deducted will reveal gross radio time sales edging toward the \$400,000,000 mark. Undoubtedly, this year will see the mark actually reached, if not exceeded. The net proceeds to the industry will approximate a figure \$100,000,000 below the gross. As it concerns all industries, the net profit accruing to the radio industry will not be much more for 1944 than it was for 1943 due to the increased Government taxes.

In the figures for the sale of time, of course no provision is made for the talent sales which, it stands to reason, increases from year to year. As to its expanded billings, radio did not exactly sit idly by and wait for the business to come in, over the proverbial transom as it were. In some cases of course, the time if desirable, was a sure sale to one client or another. However, diligent efforts by the

research, sales, and sales promotion departments of the industry succeeded in rounding up considerable new business, business which never before used radio. Which applies also to the clients sold on going into markets not heretofore considered.

Problems En Route

Not alone in this respect, radio's main problems were those of labor, the replacements for the manpower that went to war, and to be sure labor unions figured in the routine. Outstanding among the problems was the recording situation with the AFM. RCA, CBS and NBC saw fit to sign with the musicians' union on its own terms after a more than two-year cessation of work for the affiliated companies of these networks.

Allocation hearings before the FCC resulted in FM, for the time being at least, being worried as to its future because of the moves suggested to the higher frequencies in the spectrum. Television benefited somewhat in that it was being permitted to remain where it was, although provisions saw to it that neither television nor frequencies that may be needed in the public service were arbitrarily frozen.

As stated here in the past, broadcasting is not an industry that had to convert to war production as in the case of other great industries and it will not have to worry about a postwar change to normalcy. All its "changes" will depend on what happens to its clients rather than what actually happens to radio.

Sound Position

In this respect, there is no reason to believe that any untoward happening will take place and in the postwar era, radio stands to gain on most every count. It still holds, that brand names being kept alive now will of necessity come back strongly in the flesh, so to speak, and the field is wide open in practically every commercial project. Thus any halt in hostilities on any particular front will not cause severe dislocation in the broadcasting setup; rather it will be the signal for increased desire on the part of clients to reach the consumer via the fastest means available. Which is predicated of course on the client seeing daylight as to normal peacetime production.

This agency brings to the sale of talent and production of radio programs an expertness resulting from fourteen years of specialization in the radio industry.

United Press began supplying news for radio in 1935, the first major service to do so. Every month since then its client list has lengthened. It is the first agency to supply news to all 48 states. Both in the U. S. and abroad, it delivers news to more stations than do all other services combined. First to start, U. P. today is still, and more clearly than ever, first in the radio field.

● *The Cast of "The Boys from Boise," Television's first full length, original musical comedy, sponsored by ESQUIRE Magazine.*

"Mark well this evening of September 28, 1944. This is the night television came of age . . . 'Boise' is to video what the late Thomas Edison's *Train Robbery* film was to movies, and a decade from now the trade will regard it as such."

—THE BILLBOARD

"Broadway last week had its premiere of 'Bloomer Girl,' but over on Madison Avenue there was an event that may be longer remembered. It was the premiere of 'The Boys From Boise,' the first full-length musical comedy to be written especially for television."

—NEW YORK TIMES

50 East 42 Street, New York 17, N. Y.

ADVERTISING AGENCIES

Listing includes agencies placing network and important spot business during 1944 and those handling larger local accounts.

WHEN AND HOW CAN TELEVISION TURN A PROFIT?

Interest in television is assuming flood proportions. Within 18 months after Victory there is every indication that television service will be available to 30,000,000 people . . . and enjoyment limited only by plant capacity of set manufacturers.

Prospective television station operators who reserve DuMont telecasting equipment *now* will be prepared to ride a wave of unprecedented popular enthusiasm . . . to ride the swift and inevitable commercial expansion of the greatest scientific advance of our time. Valuable prestige and

good-will are natural windfalls of the early bird in this new field.

A fortune is not required to build a television station, nor years to "break even." DuMont designed and constructed 3 of the 9 television stations on the air today. The low operating cost and rugged dependability of DuMont equipment has been demonstrated week-in and week-out for more than 4 years. When and how television can turn a profit are questions to which DuMont holds factual answers. Would you like to hear them?

TELEFLASH! More than 90 requests for permission to construct and operate commercial television stations are on file with the Federal Communications Commission. As only a few channels are available for television, the number of stations in a trading area is limited. In consequence, options are already being sought for desirable "time." More than 61 advertising agencies have installed television departments. The value of riding with public interest is attracting more and more advertisers to television every week. They are learning to control the terrific sales impact of this wonderful new medium. Their experiments are well worth watching!

TELEVISION MOVES AHEAD

By *Frank Burke*
Editor, *RADIO DAILY*

PUBLIC acceptance of television as a post-war sight and sound media is assured based on the 1944 developments in the video field.

Notable among the past year's video achievements were the formation of the Television Broadcasters Association in January; the Television Seminar, conducted by the Radio Executives Club of New York during May and June; the FCC's allocations hearing in Washington and controversial issues growing out of spectrum allocations.

Controversial Issues

The controversial side of television centered around whether it should remain "downstairs" or go "upstairs." Most of the spectrum difficulties were ironed out with the FCC's preliminary allocations report which took cognizance of both schools of thought in the allocation of channels. Commercially television is allowed to remain roughly where it is in the lower spectrum with provision made in the higher spectrum for experimental television in color and higher definition monochrome pictures.

Production Problems

Indications that production is one of television's paramount problems was gained during the Television Seminar conducted last summer by the Radio Executives club and discussed at subsequent meetings of video groups in New York, Chicago and Los Angeles. Two schools of thought on production have voiced opinions. One suggests that films, especially produced for video, will constitute the bulk of sight and sound entertainment fare when television gets in stride in the postwar period. Another group argues that film programming will grow monotonous and "live" programs based news and sports events will constitute much of the programming in the early days of commercial tele development.

Right now television stations in New York, Chicago and on the west coast are experimenting in production with a view of being prepared when television is launched on a large scale. Some radio

programs such as "The Missus Goes A Shopping," "Ladies Be Seated" have been given successful tryouts in New York together with news commentators, puppet shows and fashion productions. On the west coast films have been used successfully with "live" talent in the presenting of programs. The movies are used as background and for full 15 minute and half hour shows.

Another interesting phase of experimental programming is the surveys being conducted among television set owners on the type of programs they regard as the best video entertainment. Stations in New York have contacted approximately 5,000 television set owners on the Eastern seaboard and in Chicago questionnaires have been mailed to tele set owners in that area.

TBA's First Conference

Formation of the TBA in January of 1944 and the first national conference of the organization in December was another important development of the past year. The conference attracted 700 registrants to the Hotel Commodore in New York with broadcasters, equipment manufacturers, advertising agency executives and others interested in video participating. One of the highlights of the meeting was the presentation of 12 awards to leaders in the video field for services rendered during 1944.

Television covered the Republican and Democratic national conventions in Chicago in June and special films of these conventions were telecast by New York stations and a network including Philadelphia, New York, and Schenectady. Later the linking of New York, Philadelphia and Schenectady stations were heralded in the press as the nation's first television network.

Chronology Presented

Strides made by television during the past year are chronologically listed month by month in this issue of the *RADIO ANNUAL*. Recapitulation of these events is recreating the dramatic story of television's progress during 1944.

The First Network!

ANOTHER MILESTONE
IN THE PROGRESS OF

TELEVISION

PHILADELPHIA

SCHENECTADY

NEW YORK

CHAIN television is here! With the recent dedication of the new Philco Relay Transmitter at Mt. Rose, N. J., the first Television Network, linking Philadelphia, New York and Schenectady, is in actual operation today. Now Philadelphians enjoy clear reception of programs from New York through their local Philco television station. Thus the first step has been taken through which millions will eventually witness events that take place thousands of miles away . . . *by television.*

HOW PHILCO RESEARCH SPEEDS THE ADVANCE OF TELEVISION

This first television network is an example of how Philco research is working to establish transmission principles which can extend chain television broadcasting from coast to coast. At the same time, Philco research is improving the clarity, sharpness and detail of the television picture . . . so that future television sets will have the greatest possible sales appeal. Thus in two ways . . . by helping to broaden the market for television, and by designing a more saleable product for that market . . . Philco leads toward the goal of television as tomorrow's "billion dollar industry."

PHILCO

FAMOUS FOR QUALITY THE WORLD OVER

FILM OUTLOOK IN TELEVISION

By RALPH B. AUSTRIAN

Executive Vice-President, RKO Television Corp.

WILL most post-war television programs be live-talent or will they be filmed? This question has been asked ten thousand times this past year. I believe that the most suitable type of television program as they are evolved through experience, will be far different in character from the feature motion pictures created in Hollywood for theater exhibition. In the evolving of such programs, however, motion picture technique will play a greater part than existing radio or stage techniques and the use of film will be infinitely more important in television broadcasting than the electrical transcription disc is today in radio. In short, I believe that the majority of programs will be on film.

No "Shackles"

The use of the motion picture for the presentation of a television program immediately frees the writer, director and producer from the shackles of the live stage. A television program using live talent naturally faces many of the same restrictions that limit a stage production. All action at any given time is on a single set, and if the action is continuous, the players are held to a single costume. Offstage action can only be referred to and not shown, unless an intermission is declared for a shift of scene and a change of costumes. But with television there can be no between-the-acts intermission. An intermission on a television program—and its audience would promptly dial to another station. True, a system of revolving stage sets, multiple cameras and quick costume changes might be employed, but the technical complications would be heartbreaking. At best, it would permit only a very few locale changes, but would continue to impose a multitude of restrictions on both writer and producer. No reverse shots or complicated angle shots—no shots from other sets, unless there are three more cameras at least on each set. A fundamental of television as in movies is constant scene change and camera movement. The public is accustomed to it and will demand it. I want to see a

typical drawing room scene with four or five people—lit so they may move around freely and remain perfectly lit at all times.

Handicaps Removed

All of these program handicaps and restrictions, however, are immediately removed when it is a film program. For example, should the script call for an authentic street scene in Calcutta or Miami, a blizzard in Alaska, or a storm at sea, it would be available from the extensive film libraries maintained by RKO in Hollywood or Pathe News in New York. The players called for in the script could perform against the background of such a scene in such a natural manner that to the television viewer it would all appear to be taken on location. When film is used, rather than live talent, this and hundreds of other proven motion picture devices can be employed to give the television program producer practically limitless freedom of action. There is no substitute for the cutting room and a pair of sharp scissors.

An objection to programs on film is that they do not have the sense of "immediacy" that live talent has. I don't think that is true except, of course, in the case of sporting events—spot news—fires—floods, etc. There's no one who appreciates the live performance provided by the legitimate stage any more than I do. There's something about sitting in a theater watching a good play performed by capable actors and actresses that has no substitute; but if you were to put cameras in that theater and watch those actors and actresses from a distance, it is then nothing more than a motion picture. It loses the personal magnetism, the feeling of live flesh and blood—that thing known as "Theater."

Immediacy Theory

Here is another reason why I cannot agree to the theory of immediacy. Every day as I come to my office which is in the same building as the Radio City Music Hall, I see literally hundreds of

IN HOLLYWOOD, CALIF.

people on line in all kinds of weather patiently awaiting to go inside and see a picture which they know was completed several months ago. The people know the middle scenes were shot first and the first scenes shot last. They know each scene was taken and retaken. Yet they line up to get it. Why? It's only a cold, moving and talking shadow—but the story and the actors and actresses will make them laugh or cry or forget themselves for a few fleeting hours.

It has been said many times: The high cost of programs on film is an impossible obstacle. I do not believe that programs in order to be entertaining and good, necessarily have to be expensive beyond reason. Some radio programs today cost from \$10,000 to \$25,000 for a 30-minute period. That's a range of from \$300 to \$600 a minute. We could supply film shows for that much and less—and, of course, more.

Knotty Problems

One of the knotty little economic problems of television which keeps occupying the attention of prospective station operators, especially the so-called originating stations for networks, is the vast amount of equipment and personnel needed to put a comparatively few hours of live talent programs on the air. There are a lot of people who say that television will operate only between four and six hours a day. Others point knowingly to a 24-hour-around-the-clock schedule. Let's take for our example a 12-hour day although even that might be some distance in the future. What would be required to put on 12 hours of programs a day if they were all live talent programs? One station operator who has been on the air for several years and who has had the unique experience of running two studios has estimated that it would take 15 studios to put on the air 12 hours of live talent program material, allowing only four hours' rehearsal time to one hour air time. Believe me when I tell you, however, that many 15-minute and half-hour live talent shows require as much as a week of rehearsal. Five of these studios would be very large studios about 3,000 square feet apiece; five would be medium size, around 2,000 square feet, and five small—around 1,300 square feet. Nobody knows just how many technicians, property men, electricians, directors, cameramen, grips and other laborers would be needed for these 15 studios. With the most careful method of staggering all help (union permitting) there may be as many as 200 men needed.

Rehearsal Angles

When a program goes into rehearsal, a production crew is assigned to it and that crew stays with it all during the rehearsal time and is the same crew that will eventually put the show on the air. So you can see that every show in rehearsal will require its own crew.

In a radio station today at the end of a program there is not very much to be done in the studio to get ready for the next show but when a live television show is over, the crew has to come in, strike the set, properties and lights, bring in the new set, dress it, light it, and you just don't do that in 30 minutes. How very simple it is going to be when programs are provided on film. A large motion picture company can arrange with the advertising agency for whom it functions to supply identical prints of a program to any number of television stations throughout the country or, for that matter, the world. It would do this precisely as it supplies its regular motion picture film, on a "day and date" basis. This would be done through its nationwide network of film exchanges. No excitement, no worry, no scurry—just as simple as loading a home movie.

Commercial Opportunities

Public relations or straight advertising via television opens up a vast new field of opportunity. Today, more than ever before, it has become necessary for big business to justify its existence. Television on film will offer a most unique and effective method of spreading the story of the large corporation to Mr. and Mrs. Public. In a most entertaining manner it will be possible to portray what a big company does for its employees—group insurance, social service, hospitalization, home economics, company stores, extension courses, bonus system, job insurance, retirement funds. What better way could there be to present this story to the peoples of the world than via the motion picture films? The screens of the majority of motion picture theaters in this and many other countries have been closed to the advertising or business propaganda film—and rightfully so. People do not wish to buy propaganda or advertising when they go to the theater. Now, with television, the home screens of the world will be open to the advertiser. Here again the efficacy of the television program on film becomes apparent. You can't drag television cameras all through and around a big plant and put on a carefully planned show. Also the finest

THE PICTURE ON TELEVISION

By Lewis Allen Weiss

Vice-president-General Manager, Don Lee Broadcasting System and W6XAO, Hollywood.

THE public is waiting, the advertisers are ready, and television is set to go. On that three-point platform, the Don Lee Network confirms a decision made 13 years ago when it first put its television station, W6XAO, into operation with the statement that "in a decade, the experiment of television would be a reality in the broadcasting industry."

Discounting the war years that have held up the mass production of television sets, the prophecy of our television experts, shared with others all over the country, came to a climax when the Federal Communications Commission held a hearing to determine the status of television and to make ready its introduction to the immediate post-war world.

Part of the testimony made at the hearing was on a purely technical basis, to substantiate what is common knowledge in the industry that television is ready and capable of giving the public greater and richer measure of broadcasting's third dimension than either radio or motion picture could deliver at a comparable point in their development, and thus should be permitted to operate in or near its present band in the spectrum.

Television stations are now capable of servicing nine-tenths of the population of most major cities in the country. We've also had promises from our set manufacturers that receiving sets will cost as little as \$150, combining television with both FM and AM reception. The potential television "looker" is rightfully at that point where he can make his contribution to the success of commercial television.

Public Interest

For it goes without saying that public enthusiasm about television is of paramount importance. Coming right down to brass tacks, it will be the "looker" who will make it possible for the advertiser to make full use of television, and as you'll recall, the advertiser is a third, and important necessary third, in our three-part platform for the new video industry. Certainly a public that has been asked to back and fill, so to speak,

while those in the industry make up their minds, isn't going to be a clamoring public who will respond when the signal is given.

And now, about that "advertising third." Already every alert advertising agency in the country is making investigations about the potentialities, the cost and the requirements of this fascinating new medium. At W6XAO we've consulted with both production men and executives in advertising agencies in developing our program plans. We've asked them for specific problems to solve, so that together we have come to some definite conclusions about the restrictions and obligations that must be observed in successful commercial television.

Programming Discussed

Actually, the programming of television and the production of program units are simple problems, and with the experience of radio to guide us, are easily solved by the application of sound showmanship principles to this new means of expression.

In our studios on Mount Lee, we've already produced about every type of program feasible for broadcast. Many successful years of remote broadcasting are on our records, and as those who live in the Los Angeles area remember, the sight of the huge red W6XAO television remote unit became a familiar part of our pre-war parades, festivals, athletic meets and aquatic events. We've taken our receivers up into the air to experiment with a combination of airplane and land television reporting. We've filmed news events, a fire in downtown Los Angeles is one I remember, a flood at Long Beach another, and on a televisioned program later the same day shown the pictures we obtained.

With studio programs, our experience has also been wide. Operas, famous dramas, original plays and musicals have been produced before our cameras, and we've even tried out the five-a-week serial with great success. Working with miniatures, combining film with live talent in dramatic sequences and introducing news reporting and commentary

CONSIDER TELEVISION AS AN ACTUALITY!

THE time when television was "just around the corner" has now passed. Today we have with us a vigorous new industry, complete with all the problems of a virtually untried medium.

These problems are serious but not insurmountable. There are "bugs" inherent in all new things. Television's "bugs" must be overcome. The future of the entire industry lies in our approach to these problems, and the solutions we find for them.

In a comparatively short time, televising will begin on a large scale. Too late then for "bugs." Public and sponsor acceptance of television, for years to come, will depend on the groundwork that is being done today.

In television, the glamour and eye-appeal of the stage, the imagery of the radio, the technical skills of the screen must be successfully combined. How to accomplish this? What talent will be best suited for the job? What stories are adaptable to this new medium? These are the problems with which Ray-Tele can help you. We at Ray-Tele have studied and analyzed these very difficulties. When we found the answers, we went into business for the express purpose of helping you and the industry as a whole.

Use Ray-Tele for its fund of information. Use it as a stepping-stone to success in a new business which may easily become the greatest the entertainment world has ever known.

RAY-TELE • BR. 9-5365

604 Fifth Avenue, New York 20, N. Y.

**FOR QUALITY
AP !**

through visual means have been among our experiments. And of course, by now, after some 15,000 hours of television broadcasting, we're past masters on the "how to do it" broadcast, even having grown a Victory garden before the eyes of the "lookers" tuned to W6XAO.

Question of Cost

And so, of course, we finally come to the question of cost. Here I have some more specific information. First, because hundreds of thousands of dollars worth of experimenting has gone on in the program departments of the nation's television stations, the advertisers who buy television programs will inherit a production cost much lower than they would have if organizations like Philco, RCA, Farnsworth and others like ourselves at Don Lee had limited our ground breaking interests to purely technical experiments. Secondly, we've actually computed what the technical operating costs will be, and thus have given potential advertisers some material with which to start figur-

ing. We find that the technical costs will start at \$300 per hour—that being the cost to the station to maintain the staff and put the cameras and transmitter into operation for a four hour broadcast schedule.

As I've said, for nearly 14 years now the Don Lee Broadcasting System has been helping write the history of television. We began operations in our original downtown Los Angeles studios, and in 1940 opened the world's first built-for-television studios atop Mount Lee in the heart of Hollywood. That we're looking forward to the future of both television and Frequency Modulation you all know by now, from the news released a few weeks ago telling of the purchase by the Don Lee Broadcasting System of a 160-acre site at Deer Park on Mt. Wilson, the most advantageous site our engineers could find in Southern California, the site from which we hope soon to cover all of Southern California as our commercial television station goes into regularly scheduled operation.

FILM OUTLOOK IN TELEVISION *(Continued from Page 227)*

live talent program produced in America means nothing in a country where English is not spoken or understood. The cost of the program or series of programs must be borne by the one-shot performance. Suppose it were to cost ten times as much to put it on films? By the simple expedient of what we in the picture business call "lip dubbing," we can translate the program into any and every language and send prints of such programs to all countries just as we now send foreign versions of our motion pictures. This enables our giant corporations whose scope is world-wide to reach via television not just millions in this country but eventually, billions of people.

Film as Backbone

It is quite evident that telecasting stations will be in operation considerably sooner than network programs will become available and it is here that the film transcription or "Telereel" will prove to be the backbone of the programming system.

In the post-war period when television will flourish, the advertising dollar will be scrutinized more carefully than it is today. National advertisers will not be so ready to buy a 15-minute or half-hour

spot on a network between the East and West Coasts and perhaps be in competition with a top rating program carried by another network or face a three-hour time differential. Advertising managers and market analysts will lean heavily on the spot type of telecasting. They will pick the markets in the order of their desirability, concentrate their appropriations on selected territories and make it a point to cover them at the best possible hours.

RKO is going to make syndicated film programs available as soon as station construction starts. It is preparing now. Even after national or large regional networks are established, the "Telereel" will remain an important, if not the most important factor for all programs with the exception of course of sporting events and news events which are always hot flash news.

No single individual advertiser, no single advertising agency, nor any group of advertising agencies could possibly operate such enormous facilities as RKO and its subsidiary, Pathe News, Inc., now offer the potential television users of this country. These facilities are now available to both reputable advertisers and recognized advertising agencies through RKO Television Corporation.

TELEVISION HIGHLIGHTS—1944

(From the Files of RADIO DAILY)

A review of the past year's television events indicates the tremendous post-war possibilities of the sight-and-sound medium. Increasing momentum is evident from the upward surge of activity reported in the columns of RADIO DAILY. The following pages contain the recorded highlights of the year in television.

JANUARY

- Jan. 18—The newly formed Television Broadcasters Association discussed and adopted by-laws at its first annual meeting held at Chicago.
- Jan. 21—NBC inaugurated a 50-week television course for its staff engineers in anticipation of post-war development of television.
- Jan. 26—Senor Bonifacio Fernandez Aldana, New York correspondent for a group of South American newspapers, told members of the newly formed Television Press Club at the group's first monthly luncheon that Mexico will be one of the centers of television in Latin-America.
- Jan. 28—NBC and RCA in cooperation with General Electric began installation of 45 additional tele receivers in hospitals for wounded servicemen in the metropolitan New York area. Mid State Television Corp. was formed in Boston and planned to open tele studios in Lowell, Mass., within the year.

FEBRUARY

- Feb. 1—After serving two years with OWI, F. P. Nelson has returned to Westinghouse Radio Stations, Inc., to resume his old post. He will undertake new duties as manager of television and shortwave.
- Feb. 2—The Television Broadcasters Association, Inc., elected Allen B. DuMont as its first president. Other officers chosen were Lewis Allen Weiss, Don Lee Broadcasting System, vice-president, and John R. Poppele, WOR, assistant secretary-treasurer.
- Feb. 8—First tele application of 1944 was filed by the Jamaica (N. Y.) Radio & Television Corp., which put in for channel three, previously unassigned.

- Feb. 25—A cooperative time exchange was set up between WNEW, New York independent station, and W2XWV, experimental television outlet operated in New York by the Allen B. DuMont Laboratories.

MARCH

- Mar. 1—Will Baltin, program manager for the DuMont television station W2XWV, was named secretary-treasurer of the Television Broadcasters Association at a meeting of the organization's board of directors. In an address before the Television Press Club, Dr. Alfred N. Goldsmith, vice chairman of the RTPB, forecast no conflict between FM and television in the post-war period.
- Mar. 6—Television was dramatized in the morning over CBS in one of the "American School of the Air" radio series, titled "The Vacuum Tube." Featuring Worthiton Miner, manager of Columbia's tele department, the script dramatized the role of the tube in the development of eye-and-ear entertainment.
- Mar. 20—Statements made by NBC, CBS and A.T.&T. over the weekend indicated steadily increasing interest in planning television's future. N. Ray Kelley was appointed by NBC to take charge of the network's technical facilities of television. Plans for a \$2,000,000 trial of short-wave radio relays for intercity tele and telephone relays was made by A.T.&T. Paul W. Keston, executive vice-president of CBS, forecast post-war tele in full and natural color in the annual report to CBS stockholders.
- Mar. 21—Stromberg-Carlson Co. announced plans for a tele station and a new "Rochester Radio City" housing AM, FM and television as a post-war development through William Fay, vice-president in charge of broadcasting.

Mar. 24—Allen B. DuMont, president of TBA, told the American Marketing Association at a Murray Hill Hotel luncheon that advertisers and advertising men are already convinced that television advertising has real possibilities. He spoke on the topic, "T.N.T.—Television Now and Tomorrow."

Mar. 29—Thomas F. Joyce, manager of RCA Victor's radio, phonograph and tele department, indicated in an address before a morning educational forum of The Advertising Women of New York that television's quality of immediacy would provide the greatest vehicle of mass education that he had ever known.

APRIL

April 3—Gerald Cook, former director of tele for the BBC, expressed the belief that progress of television programming would be advanced 10 years through a merger of sight-and-sound facilities by the webs and other interested parties for a training period of three years only. He added that this opinion was his own and did not reflect the policy of BBC. First among the class magazines to experiment with television was the "Mademoiselle," with its debut over W2-XWV, aimed at projecting what's new in the news in fashions, in jobs and futures and in fun.

April 3—As guest speaker at the organizational meeting of the newly formed Television Producers Association, Allen B. DuMont stressed the improvement of the technique of writing and creating television programs.

April 4—Approval of 12 members in the Television Broadcasters Association, Inc., was voted by the board of directors at a meeting held in the TBAI offices in New York, bringing the total membership to 15.

April 7—Addressing a luncheon meeting of the Radio Executive Club on "Television's Opportunities," Dr. Alfred N. Goldsmith, electrical engineer, declared that the industry will be a boom to employment and that "science and engineering will have added one more great implement to those at the disposal of humanity." . . . At a special press luncheon, General Electric revealed its post-war television plans. . . . Announcement was made by the Radio Executives Club that the REC would conduct a "Television Seminar" starting in May and continuing through September, covering all phases of the subject.

Apr. 10—WFIL, of Philadelphia, has designated the station's "Playhouse Studio" as experimental studio for video coaching. . . . First television premiere of a film to be televised at key points across the country was MGM's "Patrolling the Ether." James L. Fly, chairman of the FCC, appeared before the NBC tele cameras in New York to introduce the film which dramatized the war time activities of the radio intelligence division of the FCC.

Apr. 19—Television Actors Guild, social organization devoted to the advancement of television acting, was formed in Hollywood. John Folger was named temporary chairman.

Apr. 21—Eddie Cantor announced from Chicago that he plans to jump the gun on television next season by doing away with scripts and staging his broadcasts as though they were being presented in front of television cameras.

Apr. 24—Post-war industrial applications of television were outlined in Detroit by Ralph R. Beal, assistant to the vice-president in charge of RCA Laboratories, before a meeting of the Engineering Society. He looked for tele as a visual means of plant control to speed production.

Apr. 24—Locations for "Vaqueros Ride" is believed to be the first television "Western" movie, shot at Coe's Cove Rancho in Hollywoodland. Telecine 16mm. film was used for the first time.

Apr. 25—Growing interest of the nation's newspaper publishers and editors in the post-war development of television, FM, and facsimile were indicated at the convention of the American Newspaper Publishers Association at the Waldorf-Astoria, New York.

Apr. 26—Speaking on the topic "The Story of Television Programming," Gilbert Seldes told members of the Television Press Club that television does best what is caught unprepared. . . . In a move which was believed to be designed to head off the formation of a Television Actors Guild in New York similar to the one recently organized on the West Coast, Equity Screen Actors Guild and the American Federation of Radio Artists issued a joint statement.

MAY

May 5—Transformation of color in television gradations of black and white was demonstrated by Bud Gamble, of Farnsworth Tele-

vision & Radio Corp., at a meeting of the TPA held in New York.

May 8—The first commercially sponsored television program on the Balaban & Katz station, WBKB, was purchased and broadcast Friday night, May 5, for Marshall Field Co., Chicago.

May 18—In step with the industry's progressive thinking and planning, RADIO DAILY presented the first issue of TELEVISION DAILY as a monthly supplement to this publication. TELEVISION DAILY will be published on a monthly basis for the duration of the war as an enterprising voice in the new field of revolutionary electronics.

May 25—Television and other refinements of the radioart will provide millions of jobs for American soldiers, Senator Burton K. Wheeler, D. Mont., declared during his address on the occasion of the 100th anniversary of the sending of the first telegraph message. . . . George Henry Payne, former member of the FCC, has been named vice-president and director of the Finch Telecommunications Co. of New York. . . . The board of governors of the Television Press Club named Richard W. Hubbell chairman of the scribes' organization at its first semi-annual election of officers.

May 31—Television as it may be applied to department store advertising was demonstrated by NBC and RCA for 22 representatives of retail organizations comprising the Associated Merchandising Corp.

JUNE

June 6—First film company to enter the television film production field is RKO with a new subsidiary known as RKO Television Productions, Inc., which will produce news and entertainment shorts exclusively for video.

June 7—With the Allied Expeditionary Forces smashing inland from the French coast, two New York television stations, WBNT and WABD, went on the air with special events marking the historic thrusts into European continent.

June 15—A three-city tele network will pick up the video signals of WNBT, New York, and the pictorial proceedings of the Republican National Convention in Chicago will be made available to about 7,000 television in the Eastern area, C. L. Menser announced. . . . Staging of a two-hour musical comedy, "The Boys from Boise" on Thursday, July 13, will mark the opening of DuMont's new WABD studios and will represent television's most ambitious program planning to date in the New York area.

JULY

July 6—Pacific Coast Independent Television Producers Association was formed, with Patrick Michael Cuning, Hubbard Hunt, Rudi Feld, Armand Piaggi and Joseph Sawyer charter members.

July 13—Because of an increasing demand for speakers versed in the technical and non-technical aspects of television, a Television Speakers Bureau was established by the Television Broadcasters Association, Inc.

July 24—The award for the year's outstanding contribution to the art of television programming was presented to WRGB, Schenectady, N. Y., by Dan D. Halpin, president of the American Television Society.

AUGUST

Aug. 3—Announcement was made of an ambitious plan to educate agency executives and advertisers in the post-war potentialities of television with the launching in Baltimore on Aug. 20 of a 10-day tele demonstration by NBC and RCA in co-operation with radio station WBAL.

Aug. 8—First advertising agency to set up regularly weekly auditions for commercial tele talent is Ruthrauff & Ryan with try-outs scheduled for ever Friday at WABD.

SEPTEMBER

Sept. 5—Widespread interest in television as an advertising medium is indicated in the countrywide response of General Electric's invitation extended to the stores to be present at a program to be staged in Schenectady, N. Y., in the studios of WRGB, on Friday, Sept. 29.

Sept. 8—In a closed meeting of the television and FM panels of the RTPB held in New York City, preliminary discussions of allocations aired in preparation for the hearings to be conducted in Washington, beginning Sept. 28.

Sept. 18—Presentation of a plaque by the American Television Society to Allen B. DuMont, president of DuMont Laboratories, Inc., for the "best contribution to television during the year" highlighted the first fall meeting of the American Television Society Sept. 14.

OCTOBER

Oct. 2—A settlement of the differences of opinion between the television and FM panels of the RTPB was reached at the frequency allocation hearings conducted by the FCC.

TELEVISION HIGHLIGHTS

This dispute, the first to be brought into the open since the sessions started Thursday, Sept. 28, involved claims for that portion of the spectrum between 50 and 56 megacycles, the present No. 1 video band.

- Oct. 3—Four out of every ten persons plan to purchase television sets when they are released after the war; six out of ten postponing the purchases of tele sets say they will buy within three years after the end of the war; six out of 10 say the clarity of the picture will not influence their purchases, it was disclosed by the Allen B. DuMont Laboratories following a survey conducted within the New York City metropolitan area.
- Oct. 5—The appointment of Jay Strong to the post of director of television was made by the Basch Radio Productions.
- Oct. 9—In collaboration with the University Extension of Columbia University, NBC University of the Air inaugurated a television course which is recognized for credit toward a University degree.
- Oct. 13—Transoceanic television has not been stressed enough, Gilbert Seldes, head of CBS' television division, declared at the weekly luncheon of the Overseas Press Club of America in New York. He referred to a request for an article made by an Australian publication that has evinced great interest in the new medium and its prospects for the "world down under." . . . The War Finance Committee of New York announced that television will be used as a public service function when it is employed in the fall as a training medium for the Sixth War Loan workers.
- Oct. 16—Emphasis on the use of films as television entertainment characterized the presentation of four speakers before a meeting of the American Television Society in New York.
- Oct. 17—In Washington, D. C., television witnesses paraded before the FCC allocation hearing giving views for and against development of video in its present stage as a sight and sound media.
- Oct. 18—Television stations, at least for a good many years to come, will be limited to cities having populations of more than 500,000, Lewis Allen Weiss, head of the Don Lee Broadcasting System, told the FCC at its allocation hearing in Washington. Only cities of a half million or more will be able to support a video broadcasting station, he declared. . . . Looking ahead 10 years and envisioning the potentialities of television in the home, Thomas J. Joyce, tele executive for the RCA Victor Division, told the annual Boston Conference on Distribution that in 1955 there will be 30,000,000 homes equipped with video receivers, offering that many showrooms for merchandise as against 1,777,000 retail spots now used for display.
- Oct. 19—Supporting the statement of Don Lee's Lewis Allen Weiss that television is too expensive for any but the larger cities, James D. McLean, General Electric television sales manager, told the FCC that the initial expense for a television station would run from \$150,000 to \$300,000, with operating expenses amounting to about another \$350,000 per year. The estimate for the initial cost makes no provision for grounds, buildings or antenna supporting structures.
- Oct. 24—Television holds great promise in the first post-war decade if it can be developed to satisfactory state and released soon enough, Arno H. Johnson, director of media and research of J. Walter Thompson Co., told members of the Radio Executives Club of New York City.
- Oct. 27—Two spokesmen for television who urged the immediate post-war development of the video art were heard as witnesses before the FCC's Allocation hearing, when Niles Trammell, president of NBC, and Allen B. DuMont, president of the Television Broadcasters Association, Inc., gave testimony. Trammell counseled the Commission to give a green light to full scale television broadcasting on present standards. Urging the FCC to end the "indecisions and restraints" that have pinned down immediate expansion of television into a national service, DuMont asked the FCC to accept the recommendations voiced by Panel No. 6 of the RTPB.
- Oct. 31—Three media, television, radio and newspaper, will collaborate to bring a visual presentation of the election reports to televiewers over WABD, Nov. 7, it was announced by Raymond E. Nelson, vice-president in charge of television and radio for the Charles M. Storm agency; Bernice Judis, vicepresident and general manager of WNEW; Carl Warren of the New York "Daily News."

NOVEMBER

- Nov. 2—Television's power will be such in 1948 that the presidential nominees will be chosen for their telegenic qualities just as they are now nominated with their radio voice in mind, Edward Sobol, production director of

- NBC television, told the members of the Television Press Club at its first meeting of the new season.
- Nov. 8—Television—heralded as a major media in the Presidential election to come in 1948—played an interesting role in the election returns of last night by devoting full time on three New York stations, one in Chicago and one in Los Angeles. Other tele election programs were carried in Schenectady and Philadelphia with stations participating in an inter-city network linked with New York.
- Nov. 13—Plans for the first annual conference of the Television Broadcasters Association were disclosed at a press luncheon at the Hotel Commodore in New York City with Jack R. Poppele, chairman of the conference; Will Baltin, secretary of TBA, and Ralph Austrian, chairman of the program, discussing the convention planning.
- Nov. 20—A discussion panel on television in advertising agencies was organized in order to strengthen agency television directors' voice in the forthcoming annual Television Broadcasters Association, it was announced by Elkin S. Kaufman, executive vice-president of William H. Weintraub & Co. and moderator of the panel.
- Nov. 30—In a by-lined article, Herbert Graf, NBC director of operatic production and stage director of Metropolitan Opera Company, stated that "television, will in my opinion, be the decisive medium in making opera a popular art in America."
- Dec. 12—Sixteen television leaders were presented awards for outstanding contributions to video development at the First Annual Conference Banquet of the Television Broadcasters Association. . . . Three authorities of television, Thomas Hutchinson, head of RKO Television Productions, Commander William Eddy, formerly connected with the television firm of Balaban & Katz Corp., and Richard W. Hubbell, production manager for the Broadcast Division of the Crosley Corp., of Cincinnati, Ohio, are preparing books on television that are scheduled to appear during 1945.
- Dec. 13—Jack R. Poppele, chief engineer and secretary of WOR, New York, was elected president of the TBA at the closing session of their two-day meeting at the Hotel Commodore yesterday. Other officers elected were Robert L. Gibson, of General Electric, vice-president; Will Baltin, secretary-treasurer; and O. B. Hanson, chief engineer and vice-president of NBC, as assistant treasurer.
- Dec. 15—Television will be the motion picture industry's most powerful medium for exploiting the glamour of Hollywood and its stars, Blaus Landsberg, director of television station W6XYZ, Hollywood, told a special events meeting of the American Television Society at the Museum of Modern Art in New York.
- Dec. 18—Rene Barthelmy, French television expert, in an interview with Charles Collingwood, CBS correspondent in Paris, told of successful experiments with 1,000 line screen and predicted the eventual adoption by television interests throughout the world. . . . Plan to introduce television in Utah was announced by S. S. Fox, president and general manager of the Intermountain Broadcasting Corporation which operates KDYL with the filing of a license application with the FCC.
- Dec. 26—Speaking before a class in tele-techniques at New York University, P. D. McLean, GE sales manager of television equipment, predicted that there will be at least 150 tele stations in operation within five years after the war. He also pointed out that television would be brought to the smaller communities with the use of satellite stations, low power relay stations drawing their programs direct from the networks, and lacing the usual studio facilities.

DECEMBER

- Dec. 6—WKY, Oklahoma City, NBC affiliate, used television effectively during the Sixth War Loan Drive on a tour of 19 Oklahoma cities. Thousands of adults lined auditorium aisles for closeups of reflector pictures of local dignitaries, citizens, children, pets, and bombarded technicians with amazingly searching questions.
- Dec. 11—First annual conference of the Television Broadcasters Association, Inc., got underway at the Hotel Commodore in New York City in the morning with about 700 registrants expected to be on hand for the opening session of the two-day meeting. Registration included television broadcasters, radio station operators, manufacturers of equipment, advertising agency executives, and publishers, which indicated the widespread interest in the post-war planning of video.

Television Broadcasting Stations

As of January 1, 1945

The term "television broadcast station" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public.

FACILITIES

Equipment includes complete apparatus for studio as well as field operation. Cameras and transmitters were built by Allen B. DuMont Laboratories, Inc. and many additional units, including electronic special-effect equipment, were designed and built by Television Productions, Inc. A relay transmitter, W6XLA, to operate in conjunction with W6XYZ, was also developed and constructed by the company. A special antenna system combining a double-cone type of antenna for video and a special four di-pole antenna for audio of its own design and construction are used. Studio facilities also include a flexible lighting arrangement, slide and background projection apparatus and screens.

ACTIVITIES

W6XYZ has operated regularly since February 1, 1943, each Wednesday and Friday night and has been producing a weekly total of four to six hours of live-talent programs. These programs were entirely dedicated to the training of Civilian Defense volunteers until the summer of 1943, since which time entertainment as well as educational programs have been

COMMERCIAL TELEVISION STATIONS

aired. These programs include gymnastic courses, museum visits, variety shows, dramatic skits and one-act plays. Technical development has been directed toward improvement and simplification in the operation of present equipment as well as to the design and construction of special effects and relay equipment.

SYSTEM IN USE: 525 line 30-60 frame F.C.C., Standard, all electronic cathode-ray. Horizontal Polarization. Three Studio Cameras and film equipment. Two cameras of Orthicon type. Complete 100 ft. square two story television building housing one 100 ft. x 60 ft. x 30 ft. television stage, one 46 ft. x 26 ft. x 16 ft., stage, monitor, film, transmitter, makeup, and lounge rooms, offices, shop, transformer vaults, etc. Three hundred foot tower, antenna elevation 2000 ft.

K6XDU (experimental television relay station operating with KTSL) operates on 324 megacycles and is a beam relay type television transmitter used for outside pickups.

An uninterrupted schedule of television programs has been maintained since 1943, largely directed to bolster public morale in the War Effort. Specially written and produced

dramas have been televised with living actors in the interests of the Red Cross Blood Donor appeals, War Bonds, USO entertainment and many others. Vaudeville shows have also been televised in which well-known Hollywood talent has appeared.

The Pasadena Community Playhouse and other organizations have presented plays such as Ibsen's "Master Builder," "Alice in Wonderland" and others.

Film subjects have included cartoons from Walt Disney and others, OWI war films, shorts, musicals, and occasionally a feature.

RECEIVERS: There are some 400 television receivers in the service area of W6XAO, some as far as Pomona at 35 miles away, a number in Long Beach at 25 miles away and many in cities at lesser distance. The predominant commercially manufactured television receiver is the TRK12 or 120 of RCA. There are some RCA TRK9, and approximately 50 TT5 RCA television receivers. A number of the latter are operating satisfactorily in Long Beach at 25 miles from W6XAO. Other commercially manufactured television receivers are the local Gillilan G12 which is an equivalent to the RCA TRK12 and utilizes a 12-inch cathode ray tube, some Dumont 12 and 20-inch tube television receivers, the General Electric 12's and 9-inch receivers, and the Stromberg-Carlson and Stewart-Warner 12 and 9-inch receivers.

FACILITIES

The 160-foot tower of WABD atop a 42-story building raises the antenna to 650 feet above sea level. Covering a service range of 35 to 50 miles, the station has regular viewers as distant as 100 miles. It is completely equipped by Du Mont Laboratories. WABD has two studios for live talent shows as well as film-projection facilities. It operates on a commercial license.

ACTIVITIES

This outlet serves not only as a commercial telecast service but also as a laboratory for practical experience. Engineering, programming and advertising sponsorship aspects of television broadcasting are being worked out in actual practice. Broadcasters, engineers, producers, performers, advertisers, advertising men and others interested in television have been granted use of station facilities.

ACTIVITIES—1944

On May 5, 1944, CBS Television returned to a schedule of two hours a week of live television operations. Three weeks later it expanded its schedule to four hours a week.

This schedule, with an emphasis upon the development of new program patterns, is being maintained through the year 1945.

ACTIVITIES

Still limited by the shortage of engineering talent and the necessity to conserve existing equipment, NBC, nevertheless, considerably increased its program service during 1944. In October, the Network's television station added to its regular schedule boxing bouts from Madison Square Garden on Friday night. During that same month, WNBT also started picking up as a regular Tuesday night feature the wrestling matches from St. Nicholas Arena. In the latter part of the year, NBC broadcast many live talent programs from its newly opened television studio 3-H in Radio City.

Planned operations for the early part of 1945 include live talent telecasts as a regular Sunday night feature. It is expected that WNBT will be on the air five days a week, broadcasting about 10 hours per week.

FACILITIES

Technical facilities of Station WRGB include a direct pickup studio for live talent productions, located at 60 Washington Ave., Schenectady. It is fitted with five camera channels. A

film scanning room has two cameras and three motion picture projectors—two for 35 mm. and one for 16 mm. films. Film slide, lantern slide and projectors of small opaque pictures and objects are also available.

Signals from the WRGB transmitter, located in the Helderberg mountains, New Scotland, N. Y., near Schenectady, are received over a service area with a radius of approximately 50 miles, which includes the Troy-Albany-Schenectady area.

WRGB claims the first television relay station, picking up programs from NBC in New York City, 129 miles away, and relaying them to the Capitol district area. A minimum weekly program service of nine hours is offered viewers in the area.

ACTIVITIES

During 1944 WRGB's program activities have been varied. Among the programs various types have been tried, including a bridge game by champions, dog shows, boxing and wrestling matches, barn dances, Shakespearean plays, Gilbert and Sullivan operettas, modern comedies, news reporters and analysts. Several commercials have also been presented by the station during the past year.

Television Allocations

BASED on hearings held before the FCC from late last summer to the year end, the Commission proposed that television and FM channels be reshuffled. Whether television should stay "downstairs" or go "upstairs" was one of the most controversial questions discussed at the allocation hearings.

In order to permit the development of a system for color pictures and higher definition monochrome pictures through the use of wider channels, the Commission proposes space for experimental television between the 480 and 920 mc in the ultra high frequency portion of the spectrum.

Commercial television is permitted to remain roughly where it is in the lower part of the spectrum. Specifically, it now has 18 channels six mc wide at intervals from 50 to 294 mc. The new allocation gives it six channels, also six mc wide, from 44 to 84 mc and six from 180 to 216 mc. This gives television the same number of channels—12—below 225 mc as heretofore. No additional frequencies can be assigned to television between 225 and 300 mc because all these frequencies are required for Government services.

Interests representing FM decried the Commission's proposals and additional hearings were scheduled for Feb. 28, 1945, wherein the FCC would be open to argument on its proposals made earlier. Decision resulting from this hearing was expected to be made known possibly by spring.

The proposals made by the FCC regarding television and made public Jan. 15, 1945, follow:

Commission's Proposals

The Commission is fully convinced that by virtue of the recent developments in the electronic art, a wide channel television broadcasting system, utilizing frequencies above 400 mc, can be developed, and the transmission of higher definition monochrome pictures and high definition color pictures achieved.

The Commission is also convinced that all of the improvements that have been made possible in the transmission and reception of monochrome pictures by recent developments in the electronic art cannot be utilized in the 6-mc television channel. However, the Commission does not believe that broadcast service to the public through the use of a 6-mc channel, with the improvements presently available over pre-war developments, should be abandoned and commercial television held in abeyance until a wide channel sys-

tem in the ultra-high frequencies can be developed and proven. Therefore, we have endeavored to assign to television broadcast as many 6-mc channels below 300 mc as possible in the light of the needs of other services for frequency space in the same part of the spectrum.

Six Channels

We find that there can be made available to television broadcasting, six channels between 44 and 84 mc and six channels between 180 and 216 mc. It will be noted that the frequencies between 225 and 300 mc could not be considered for television broadcasting because all these frequencies are required for government services, and hence the six channels formerly assigned to television in this portion of the spectrum must necessarily be deleted. It will be further noted that

television has been allocated the same number of channels—12 channels—below 225 mc as previously were allocated to that service, but that due to the demands of other services, it was not possible to provide any additional channels for television below 225 mc. It should also be noted that old television channel Number 7 (102-108 mc) is left unassigned at this time and that before making an assignment the Commission will give due consideration to the requirements of television. It is urged that manufacturers of television receiving sets include this band.

The table below shows the 12, 6-mc channels that have been assigned to television broadcasting:

Channel No	Megacycles
1	44 to 50
2	54 to 60
3	60 to 66
4	66 to 72
5	72 to 78*
6	78 to 84
7	180 to 186
8	186 to 192
9	192 to 198
10	198 to 204
11	204 to 210
12	210 to 216

Television channels 7 through 12 (180-216 megacycles) will be available temporarily for television relay purposes until such time as these facilities are required for television broadcasting.

On the basis of the foregoing allocations, it will be possible to authorize seven television stations in one city if the need therefore is shown. Four of these stations can be assigned in the six channels below 100 megacycles and the other three in the six channels available between 180 and 216 megacycles.

The portion of the spectrum between 480 and 920 mc (less 508-524 mc temporarily) has been made available for experimental television. The space between 1225 and 1325 mc has been assigned for television relay stations to be used by "pick-up" stations for relaying program material to the main television station for broadcasting. In addition, frequencies between 480 and 920 mc will be available for this type of service until they are needed for television broadcasting. The determination of the channel width to be used must wait until the channel requirements of the equipment developed are known.

The testimony indicates that sky-wave interference may be a problem with television broadcasting on the lower fre-

quency channels assigned to this service. It was impossible because of the demands of other services, to find 12 television channels between the part of the spectrum which is believed free of sky-wave interference and 225 mc. Therefore the use of the lower frequency channels appeared to be the only solution. However, should this skywave interference develop, the six channels above 180 mc offer a possible means for alleviating this interference, in that these channels, in time, can be employed for the higher-powered stations, and the low frequency channels reserved for stations that can utilize a limited power for rendering a satisfactory service.

Color Provisions

In order that a television broadcast system may be developed for the transmission of color pictures and superior monochrome pictures through the use of wider channels, the space between 480 and 920 mc (less 508-524 mc temporarily), has been made available for experimental television. The time which may elapse before a system can be developed to operate on wider channels in these ultrahigh frequencies is indefinite and primarily dependent upon the resourcefulness of the industry in solving the technical problems that will be encountered. In this portion of the spectrum it is contemplated that the Commission will license the entire band between 480 and 920 megacycles for experimental television and will not designate any particular channels. Applicants desiring to operate in this portion of the spectrum should consult with the Chief Engineer as to the exact frequency band they should utilize.

It is the hope of the Commission that all persons interested in the future of television will undertake comprehensive and adequate experimentation in the upper portion of the spectrum. The importance of an adequate program of experimentation in this portion of the spectrum cannot be over-emphasized, for it is obvious from the allocations which the Commission is making for television below 300 megacycles that in the present state of the art the development of the upper portion of the spectrum is necessary for the establishment of a truly nation-wide and competitive television system.

Space Demand Great

As has been stated in other portions of this report the demand for space in the spectrum is so great that each sta-

tion and service is expected to make the best usage of its facilities and one of the underlying principles is that where within a reasonable time a particular station or service has not made full usage of its assigned or allocated facilities consideration would be given to the needs of others. Cognizance is taken of the fact that even a single television channel requires more spectrum space than is assigned to all the stations of some other services. Therefore, while television stations will be licensed as at present on an unlimited time basis, if after a reasonable period licensees are not using the facilities sufficient to warrant an unlimited assignment, consideration will be given to applicants for all or part of the time.

In order further to conserve facilities, the Commission, in the case of Television Channels 1, 2, 3, 4, 5, 9, 10, 11, and 12, proposes that provisions may be made for the operation of non-governmental fixed or mobile services on these channels upon a proper showing of need and that these channels may be shared on a non-interfering basis. Similar provision is being made for the sharing of Television Channels 7 and 8 with governmental fixed and mobile services.

** Arrangements must be made for the removal of the aviation markers centering on 75 mc. before this band will be available for television.*

★ ★ ★ Theater Television ★ ★ ★

THE proposed use of radio for theater television is intended to provide facilities whereby news, sporting events, operas, and other events can be televised and shown to the general public on large-size screens such as are normally used in motion picture theaters. It was claimed at the hearing that the motion picture industry has a definite and legitimate interest in television, since the industry is in the business of producing popular entertainment and presenting news through visual and aural means. It was estimated that over 85 million persons attended motion picture theaters weekly, and that the industry has a gross annual income of approximately \$1,600,000,000 (Tr. 3713-3716).

It was stated that the major companies in the motion picture industry have indicated that, at the end of the war, or as soon as wartime requirements permit, they will begin experimentation with the production and exhibition of theater television programs in specific local theaters, and with the transmission of such programs, to theaters in distant cities. Certain experiments were conducted prior to the war which indicated that theater television might be feasible. Large screen theater television on 15 x 18 ft. screens were shown in London during the year 1939, and were subsequently demonstrated experimentally in two theaters in New York City in 1941 on screens 15 x 20 ft. Further experimentation with theater television was discontinued after the

entry of the United States into the war (Tr. 3715).

The witness for theater television was Mr. Paul J. Larsen (Tr. 3711-3755), who appeared on behalf of the Society of Motion Picture Engineers.

The number of channels requested was predicated on the possible demand for service in New York City. It was claimed that there were 42 competitive theatrical agencies in operation; however, it was believed that because of economic factors, only 25 of the 42 agencies could afford to enter the theater television field. For the initial postwar period experiments in theater television, it was recommended that frequency allocation be made for 15 producing or exhibiting agencies in an area such as New York City, each agency to produce and distribute one theater television program to specific local theaters and to relay this program to specific distant theaters. This would require three classes of stations or services, a follows:

1. Intra City Studio Transmitter Station:
 - (a) 1 fixed studio to transmitter channel (point-to-point).
 - (b) 1 clear mobile channel (remote pickup).
2. Intra City Multiple Addressee Station:
 - 1 clear channel for private multiple-directive transmission from a single transmitter to a group

of specific addressees within the service area of the transmitter.

3. Inter City Relay:

1 channel to interconnect cities, for transmission of theater television programs simultaneously from a number of specific multiple address stations to a specific theater or theaters in different cities.

The requests for frequencies for theater television service include a total of 1500 megacycles in 75 20 megacycle channels as follows:

1. 8 contiguous 20 mc. clear channels or a band of 160 mc. from 600 to 760 mc.
2. 7 contiguous 20 mc. clear channels or a band of 140 mc. from 860 to 1000 mc.
3. 15 contiguous 20 mc. clear channels or a band of 300 mc. from 1900 to 2200 mc.
4. 15 contiguous 20 mc. clear channels or a band of 300 mc. from 3900 to 4200 mc.
5. 30 contiguous 20 mc. clear channels or a band of 600 mc. from 5700 to 6300 mc.

Postwar Presentation

It was stated that theater television in the immediate postwar period would undoubtedly be presented to the public in monochrome, possibly using the present television standard of 525 line definition. It was also claimed that improved picture quality in monochrome comparable to 35 millimeter motion picture film, and also the addition of color will undoubtedly be required if theatrical television presentations are to meet with public acceptance on a basis comparable with present motion picture film presentations. It was claimed that for a transmission of monochrome television, a band width of 20 megacycles would be required which would be suitable for 525 to 800 line definition. For monochrome of higher definition and for color transmission, a channel width of 40 megacycles would be required. This would permit a definition in monochrome comparable to the present 35 millimeter film definition and for three-color transmission of approximately 750 line definition. It was stated that ultimately the theater industry would employ highly directive antennas and then would not require any frequencies below 10,000 mc. except in very rare cases where the terrain, for instance, would make it impossible to use frequencies above 10,000 mc. However, since it was questionable whether such transmit-

ting and receiving equipment would be available immediately in the postwar period, requests were made for frequencies below 10,000 mc. in order to permit immediate experimental operation of the proposed service (Tr. 3725-3732).

No Specific Allocation

Since theater television is still in the experimental stage of development, the Commission does not propose to allocate any specific frequencies at this time. However, the Commission will give consideration to applications for experimental authorization involving transmissions, including studio to transmitter, remote pickup, and intracity multiple address stations, on the frequencies between 480 and 920 megacycles allocated to broadcasting on the basis that the use of these frequencies will be discontinued when needed for the broadcast service. In addition, experimentation with intra- and intercity relay of theater television programs may be authorized in the following bands of frequencies, namely, 1900-2300, 3900-4550, 5750-7050, 10500-13000, 16000-18000, and 26000-30000 megacycles, as discussed in section 19 of this part.

Functions

Founded Jan. 1944, as a non-profit organization of television broadcasters and others engaged in any business directly connected with television broadcasting. Objects, as stated in the by-laws, are "to foster and promote the development of the art of television broadcasting; to protect its members in every lawful and proper manner; to foster, encourage and promote laws, rules, regulations, customs and practices which will be in the best interest of the public; to protect the interests of the members of the Association by opposing the enactment or adoption of any laws, rules, regulations, customs or practices which would discriminate against or in any way injure the members of this Association."

TELEVISION FACTS AND FIGURES

PROBABLY destined to go down in history as the most revolutionary contribution to the field of entertainment of our time, television will also have its place in public service and education. Facts and figures given below are presented from the general viewpoint rather than the technical side, in order to reflect the activity in this new art form during the past year.

NINE commercial television stations are now operating in the United States: three in New York City; two in Chicago; one in Schenectady; one in Philadelphia; two in Hollywood.

112 applications for television stations were pending before the Federal Communications Commission in Washington as of March 15, 1945.

27 stations licensed to conduct experimental television broadcasting are now operating in the United States.

Cost of postwar television receivers will range from \$150 for the smaller projected image models to \$750 for de luxe receivers which will include AM and FM radio in their cabinets.

First television network was established the past year linking stations in Philadelphia, New York and Schenectady.

Estimated cost of television station equipment (pre-war cost basis) range from \$250,000 to \$300,000 and includes studio, equipment, field pickup equipment, installation, sound, lighting, etc.

Paramount problem of television at the moment appears to be production with two schools of thought on "live" and film video shows.

Television Broadcasters Association, with a membership of 38 companies associated with the industry, is the leading trade organization.

Experts forecast use of relay or booster stations in development of television networks.

Several eastern seaboard organizations are experimenting with networks. These include General Electric, International Business Machine, Raytheon, American Telephone and Telegraph Company and Radio Corporation of America.

Leading advertising agencies have established television departments but regard video programming at this time as having only experimental value.

• • • TELEVISION FACTS AND FIGURES • • •

Industry is awaiting final allocations of FCC and end of war for immediate commercial development of video.

•

Labor troubles right now loom as the drawback of the immediate future, with the AFM already making it tough on the use of musicians and other organizations preparing jurisdictional disputes.

•

Theater tele may well be on a subscriber basis so that special programs and events will go to those who subscribe only.

•

Programming in television was and is active in the five centers actively engaged in experimental and commercial television. Desire for experience and finding out what not to do is one of the chief objects at present.

•

Estimated that there are some 7,500 television receivers extant, of which 5,000 are in the New York metropolitan area. Not a few sets have been placed in veteran hospital convalescent wards.

•

Major sports have been televised with unusual success, especially football and boxing. Wrestling has already proved itself one of the easiest to televise and one of the most entertaining shows for the viewers.

•

That color television is on the way, is now not denied in any quarter; it is agreed however that it will take quite a while yet before it is perfected.

•

At least five companies have announced their intention of providing television relay facilities after the war. The relay system has proven itself satisfactory more ways than one and for the past five years has carried television programs from New York to Schenectady, a distance of more than 150 miles.

•

That the television special event source will be and is right now plentiful, was indicated in a survey which revealed nearly 50 auditoriums and arenas, also various cultural centers in New York alone where tele programs could be picked up, with a large ready-made audience. In the Los Angeles area, 16 seasonal events suitable for tele pick-up, and more than 25 events that take place regularly each year. All these are of national interest. Chicago and other tele centers to-be have equally strong prospects.

•

Curiosity centers on what the British are doing in television and just how far they were advanced at the beginning of the war and just where they have taken up. In Paris, 1000-line tele was reported by various Americans who have been abroad.

•

Giant strides forward are expected in television as a result of electronic research for the war effort and uses of tele by the military, still a guarded secret as to its development, but generally acknowledged to hold the key opening the door toward perfection.

Make it a rule

to advertise regularly in
STANDARD RATE & DATA SERVICE

With shifting markets and sales-manpower shortages, large numbers of advertisers are maintaining liquid budget reserves . . . are prepared to pour it on wherever promotion possibilities loom the largest.

This widespread policy involves an unprecedented volume of day-by-day decisions . . . offers radio many more opportunities than ever before to sell its services . . . makes "constant buyer contact" the golden rule of advertising today.

To pull more business, sell every day through Standard Rate & Data Service, used constantly by your prime advertising prospects — account executives, time buyers, advertising and sales managers, and all other important advertising officials — for planning, budgeting, scheduling and scores of other necessary operations.

Put this subtle power of hour after hour usership into your advertising appeals. Knock over sale after sale by punching hard from every angle — market data to broadcasting facilities. Jolt orders out of big buyers with timely, telling blows — when their use of the Service leaves them wide open for your sales-winning story. Rule out any chance of being overlooked in today's augmented advertising market. Make regular monthly use of Standard Rate & Data Service your advertising rule.

A Message to Radio and Electronic Manufacturers

A "TELEVISION" OF YOUR PROSPECTS

AS SEEN THROUGH THE

**RADIO
CRAFT**
AND POPULAR ELECTRONICS

NATION-WIDE SURVEY

After the war it will be possible for an executive seated at his desk to see what is going on in any corner of his plant. By merely pressing buttons, one operation after the other will be projected on television screens.

A new development would be to project your nation-wide *prospects* on a screen, enabling you to size them up properly. The nearest approach to this is the RADIO-CRAFT Survey. Instead of pressing buttons, you impress a postage stamp on a letter and receive a mental image of thousands of radio-electronic technicians—prospects for your products.

You will then readily understand why RADIO-CRAFT stands so high in their estimation. It is the magazine that tells them what is available—how it is constructed—how to use it—and how to maintain it.

Send for the Survey and get a
"television" of your prospects.

RADIO-CRAFT

We Are Justifiably Proud of our “Associate Editors” . . .

AMONG the many notable Advertising Executives who have written articles for past issues of the ADVERTISER and MARKETS of AMERICA are the famed Chairmen of the Association of National Advertisers and American Association of Advertising Agencies, respectively. We like to call them our “Associate Editors,” for they have immeasurably enriched our editorial fare.

Like their many confreres, they have written pertinent articles of interest and lasting value to the men and women who read The ADVERTISER—the nation’s advertising and merchandising executives and their advertising agency personnel.

Both of our widely read publications are the products of the men who create and place advertising . . . control the billion and more dollars spent in all media and notably radio.

In each instance we select an authority to write on his subject . . . not a long-haired theorist. Thus our readers are fully informed and appreciative of the contents of our publications. Thus, too, they prove to be every broadcaster’s best advertising prospects. Many of them are now clients—yet there are many more to reach! Reach them quickly and keep them sold on your station or network, via the advertising pages of The ADVERTISER (monthly) and MARKETS OF AMERICA, (Annual).

THE ADVERTISER

Space rate in The ADVERTISER and in MARKETS of AMERICA,
Vol. 9 is \$185. *per page*. ★ Only \$160. *per page* on 12 time contract.

WALTER P. BURN AND ASSOCIATES, INC.

7 West 44th Street

New York 18, N. Y.

Under personal direction

of Walter P. Burn

RADIO DAILY
PRESENTS
A NATION WIDE
UP-TO-THE-MINUTE
CENSUS ANALYSIS
OF THE RADIO MARKET

MAJOR MARKETS — 1945

By William P. Noble

Vice-President, Walter P. Burn & Associates, Inc.

PERTINENT data on Metropolitan District Counties, States, and Regions of the United States are presented in the 1945 RADIO ANNUAL. Figures are from the Bureau of the Census; projections are by Walter P. Burn & Associates, Inc. Postwar ratings of Metropolitan District Counties were prepared by Dr. Philip M. Hauser, Assistant Director, Bureau of the Census, and were originally presented before the National War Conference of the American Marketing Association.

Population, Families, Radio Homes

Tables for Civilian Population Changes by Regions, Divisions and States 1940-1943 are self-explanatory. It must be remembered that while the loss of population to the armed services has cut civilian population, the actual population of the country has increased during the period 1940-1943.

Civilian population for the latest available period Nov. 1, 1943 is presented for all Metropolitan District Counties, all other counties with a city of 25,000 population and for all States. This is followed by a percentage change figure for quick evaluation.

Families and Effective Radio Home Figures have been projected from latest available government sources. Because many recent surveys, both by the Government and from independent sources have begun to take account of "dead" Radio Homes, or those in which no radios are operative today, RADIO DAILY for the first time presents Effective Radio Homes as a more accurate estimate of the available listening audience rather than total Radio Homes. It is interesting to note that the total of Effective Radio Homes, 1945, is 31,271,178 based upon an estimated 36,244,024 families or a national family coverage of 86.2%, while RADIO DAILY'S 1944 estimate of total Radio Homes 1944 reached 31,298,920, a difference of only 27,742 Radio Homes.

Projected figures for Families and Effective Radio Homes are shown to the last digit, not because they are assumed to be accurate to the last digit, but for summation convenience and to follow the pattern set by the Bureau of the Census in estimating Civilian Population.

Post-War Ratings

A-1 Markets which grew most rapidly since 1940 and from 1920-1940. These markets are adjudged to have superior prospects of retaining wartime population growth.

A-2 Markets which grew at above average rates since the war's commencement and from 1920-1940. These markets are adjudged to have excellent prospects of retaining wartime population growth.

A-3 Markets which grew at above average rates since the war's commencement and which grew moderately 1920-1940. These markets are adjudged to have good prospects of retaining wartime population growth.

B Markets which grew rapidly since the war's commencement but at a substantially lower relative rate in the preceding decade. Wartime growth in these markets is considered transient

unless special efforts are made to convert to peacetime production.

C-1 Markets which lost population or increased relatively little since the war's commencement but which grew at above average rates 1930-1940. These markets are believed to have excellent postwar prospects of coming back.

C-2 Markets which lost population or increased relatively little since the war's commencement and between 1930-1940, but which grew at relatively rapid rates between 1920-1930. These markets are believed to have fair post-war prospects of coming back.

D Markets which lost population or grew relatively little since the war's commencement and between 1920-1940. These markets cannot be expected to grow rapidly nor to recoup losses in the post-war period.

The Pacific Coast, too,
IS SAWED IN TWO!

ARE YOU sawing the Pacific Coast in half? You are if you aren't using Don Lee on the Pacific Coast. For half the retail sales on the Pacific Coast are made *outside* the counties in which Los Angeles, San Francisco, Oakland, Seattle and Portland are located—and *only Don Lee* completely covers the *outside half*.

Why, you ask? Easy! Most markets in the outside half are surrounded by mountains and long range broadcasting won't work (watts do fine until they hit mountains). However, with 38 stations, Don

Lee broadcasts *locally from within* these mountain-surrounded areas. A recent Hooper coincidental telephone survey, largest ever made on the Pacific Coast, revealed 60 to 100% of the listeners in many of these "*outside*" markets were tuned to Don Lee stations.

As for *the inside half*, Hooper ratings prove that a good show on Don Lee will reach more people than the same show on other networks. During the past year all the shows that switched from any of the other 3 networks to Don Lee, have received higher Hooper ratings within thirteen weeks!

Don't saw the Pacific Coast in half! Buy Don Lee—the only network that covers it completely!

The Nation's Greatest Regional Network

THE BLUE NETWORK

of The American Broadcasting Co., Inc.

THE past year has been of supreme importance to the Blue network. During it we have materially strengthened the Blue through a series of personnel changes and departmental realignments so that we are now in a position to deliver better shows to the advertiser and the agency as well as to the public at large.

MARK WOODS

None of us can know, of course, what the next year will bring. But to the Blue Network it holds the promise of many things. We have laid the foundations for the first complete FM network. During the past year we queried our affiliated stations as to their plans for FM. Only one of the 111 stations replying to the questionnaire, declared no intention of applying for a license; all the others either have applied, are intending to apply, or, in the case of three Blue affiliates are already operating FM stations. We ourselves have applied for FM transmitters in New York, Chicago, Los Angeles, and San Francisco.

Own Buildings

During the next year, the Blue will also be planning its own buildings in Chicago, Los Angeles, San Francisco and New York. We are now reviewing potential projects for these studios which will contain the latest developments in studio design and engineering equipment, many of them unique, which will give the Blue facilities to improve broadcasting far beyond present levels.

As the past year has so ably demonstrated the radio broadcasting industry's

service to the people and the government of the United States in the preservation of free speech and the free dissemination of information, so will the next year show once again the dedication of American radio to the service of the American people.

We at the Blue feel that great strides have been made during the past year. Greater strides will be made in the year to come.

Television Plans

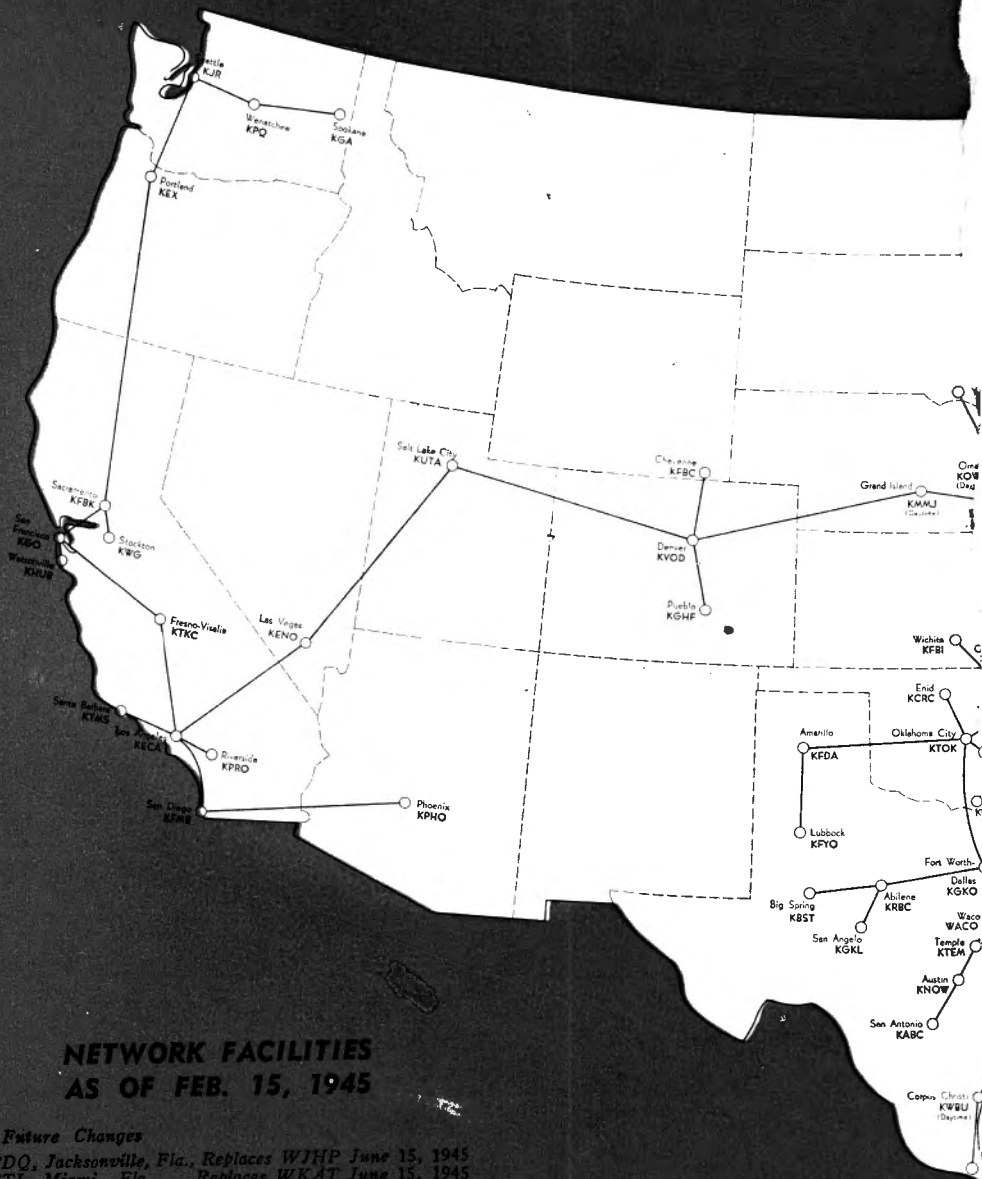

The Blue's television plans are also beginning to take shape with a television department preparing to produce shows, perhaps already producing them by press time. We have filed applications for television transmitters also in New York, Chicago, Los Angeles and San Francisco. But naturally, as with the FM transmitters, any actual construction work depends upon the government releasing the materials for the job at some time not yet definite.

Plans for the active participation of the Blue in the field of television were announced early this year by the network, in conjunction with officials of General Electric Co., owners of WRGB, Schenectady, N. Y., and Allen B. DuMont Laboratories, Inc., owners of WABD, New York City.

Debut of the Blue in television took place late in February of this year and regular series scheduled over both the above television stations on a weekly basis. As a general policy, for the time being, Blue's television operations will concern experimentation with the televising of radio shows, rather than production of shows especially for television. Negotiations are in progress presently with Balaban & Katz to present suitable network programs by television from studios of WBKB in Chicago.

COLUMBIA BROADCASTING SYSTEM

HOPE for a peaceful conclusion, in Europe, of our third war year has vanished. Yet no other conclusion that peace - with victory is possible, and each passing day brings us closer to that end.

PAUL W. KESTEN

Although fully conscious of its special obligations in war, the Columbia Broadcasting System has given serious consideration to postwar operations. Columbia intends to follow the same course in 1945, believing that today's efforts and decisions will do much to simplify, and therefore, hasten, tomorrow's peace-time development.

We have, in this past year, offered to the industry and to the FCC specific proposals concerning three major divisions of post-war broadcasting — television, international shortwave, and FM. It is our sincere conviction that the proposals we have set forth, in all three fields, represent sharp advances that must eventually be achieved if broadcasting is to continue development at a pace comparable to its past performance.

Tele Motives

In its recommendations for television, however, CBS has found itself in the curious position of having to defend a proposal for progress. We have asked for better television, as quickly as possible. We have pointed to the source of twice-as-good television, on wide bands in the high frequencies. We have matched words with actions—in applications for high-frequency stations, in orders for high-frequency transmitters, in negotiations for new type receivers, and in the expenditure of a larger television budget

than is to be found on the books of any other non-manufacturing broadcaster.

Our motives in all this should be perfectly clear. Television pictures today are in our opinion simply not good enough to attract — and hold — the audience that is essential to a commercially successful medium. Prewar set sales were negligible, and war-time audience research tells us that the public now expects far better television than present standards can give them. Until the public gets the kind of television it expects, an audience that interests advertisers cannot be built, and broadcasters will — and should — carry the cost of programs. But private resources are limited, and a television audience that ceases to grow will ultimately, of economic necessity, be allowed to die on the vine.

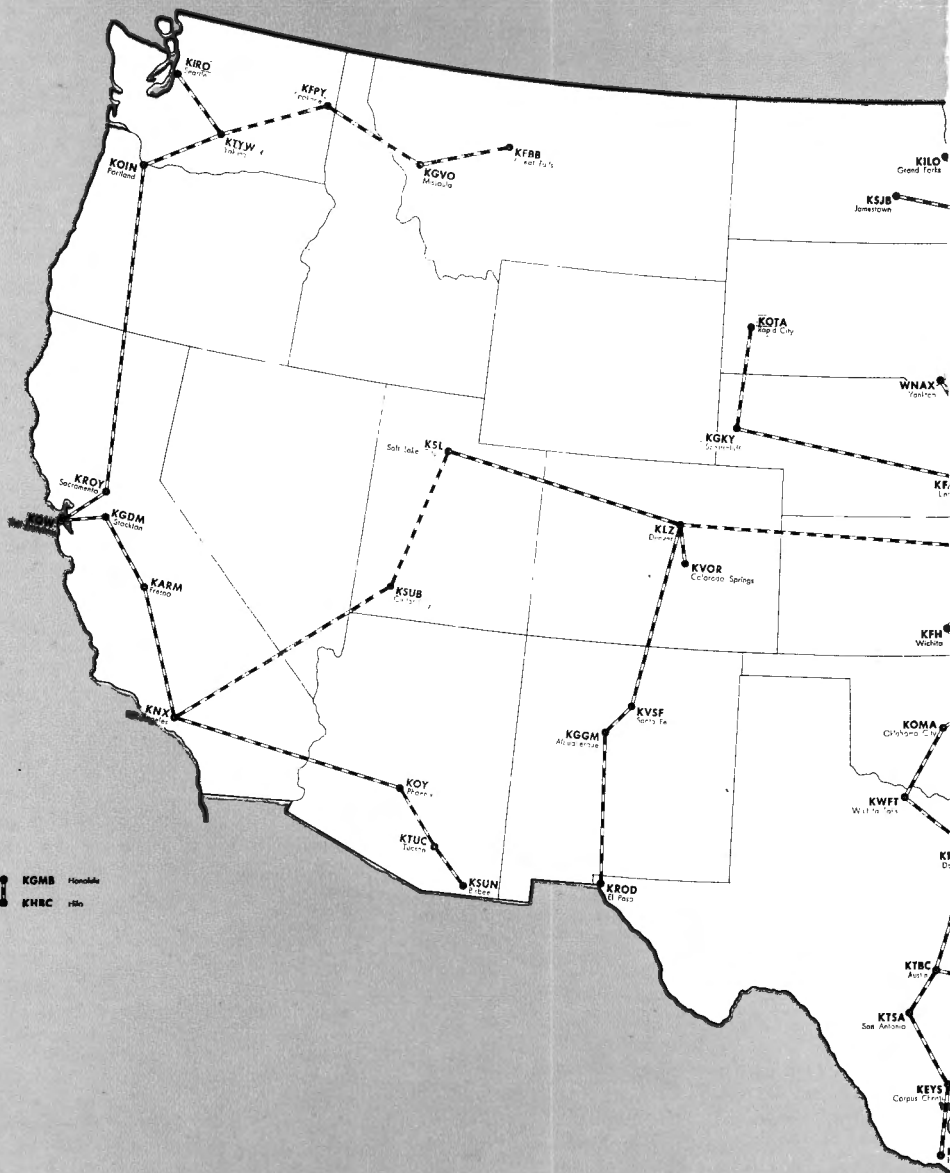

Prospects for 1945

There are good prospects that 1945 will see successful demonstration in the United States of the kind of television we can endorse. Much factual evidence uncovered in 1944 supports these hopes. High-definition, 1000-line television has already been demonstrated in France. High-frequency, wide-band television, as a world standard, is inevitable, at whatever sacrifice it may mean of present day equipment. And we have repeatedly asserted that such sacrifice would be smaller today than tomorrow, and smaller tomorrow than the day after.

Conclusion

Ours, we believe, is an optimistic as well as a realistic stand. Television can become one of America's leading post-war industries, and we intend to do everything possible in the coming year to hasten its greatest potential development. For that reason, we shall continue to disagree with any policy or action which, in our opinion, threatens to stunt the growth of a new industry for the sake of immediate and, possibly temporary profit.

MUTUAL BROADCASTING SYSTEM

THE war is being fought on all fronts across the seas. But it is sometimes being bought and sold on the broadcasting fronts for the wrong kind of profit far too much in a country which really has not fully experienced the tragedy and suffering of the present war.

We talk suavely about all the programs we put on the air to speed victory and to make our active and wounded service men happier, but I feel strongly that in many cases we are neither speeding victory nor making those fighting for us more happy about some of the things we assume here at home. Too often we are talking, singing, playing and dramatizing our way into the complacency our military leaders have been trying so hard to make us realize is a mortal danger.

This message is written in a time of great changes, yet I feel unhappily certain that by the time it reaches you our attitude will not have changed sufficiently. In talking about this speeding to victory while men are dying and undergoing hardships in a way only those who have seen combat can really know, we become entangled in a great deal of untimely activity and promotion of plans for the post-war world.

The broadcasting industry itself in a number of respects has been guilty of such premature planning. Actually, the approach of radio, in presentations of great peacetime production projects, talks of comforts for home after victory, is frequently discussed by those on the inside of the industry with a realization that peace is quite possibly nowhere nearly as close to achievement as others think. Nevertheless, much of the material which goes on the air certainly has a strong tendency to lull listeners into a false sense of security.

EDGAR KOBAK

It's been going on too long. A service man or woman on combat duty thinks of such things and often does what a Navy chaplain recently characterized as "a well-qualified layman offering a few appropriate remarks." Maybe the fighter doesn't even do that. Maybe he just screws up his face and says nothing with a feeling of bitterness.

The man in combat sometimes thinks of what we have been so casually describing as a post-war world when he has the moment of leisure which often doesn't come for weeks at a time. Of course he wants a world such as he knew to come back to.

Some of them were thinking of the life they might remake for themselves as they sat in canteens and read the newly begun post-war features in the Army newspaper, "Stars and Stripes," discussing from a fundamental standpoint, post-war civil aviation, housing, farming and education. But they well knew what tragedy was being created a few miles from them, and that "post-war" was a thing hard of achievement.

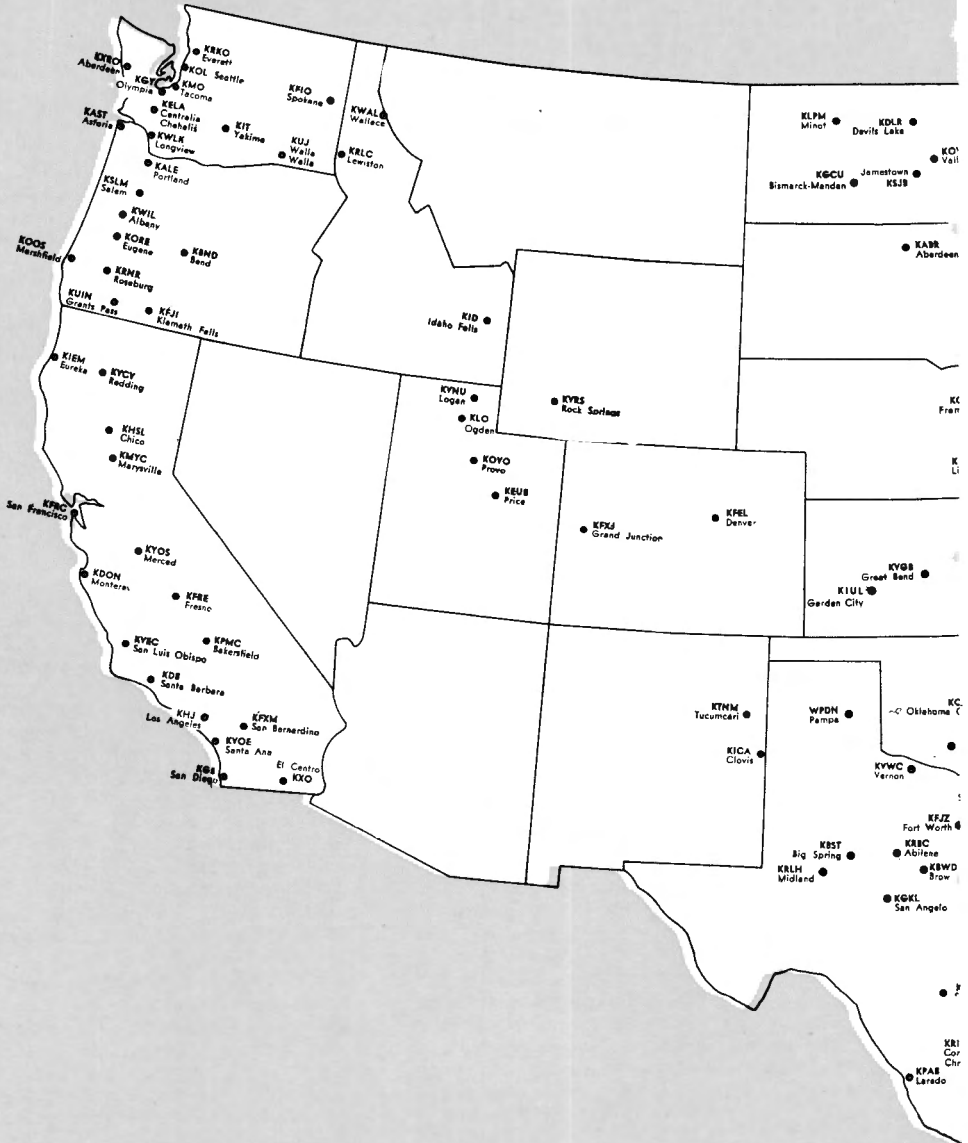

What's the use of building and sustaining a broadcasting industry if we lose the war? It still is possible to lose, even if at best through an unfortunate peace compromise.

How, then, will we be able to give those men who were lucky enough to come back, the jobs in an industry stultified because we were at least partially defeated?

How much does it mean for a broadcaster to tell the public what he is contributing in the way of programs toward winning the war? The public may some time awake with an unpleasant start and at an unpleasant time and remember that it was misled.

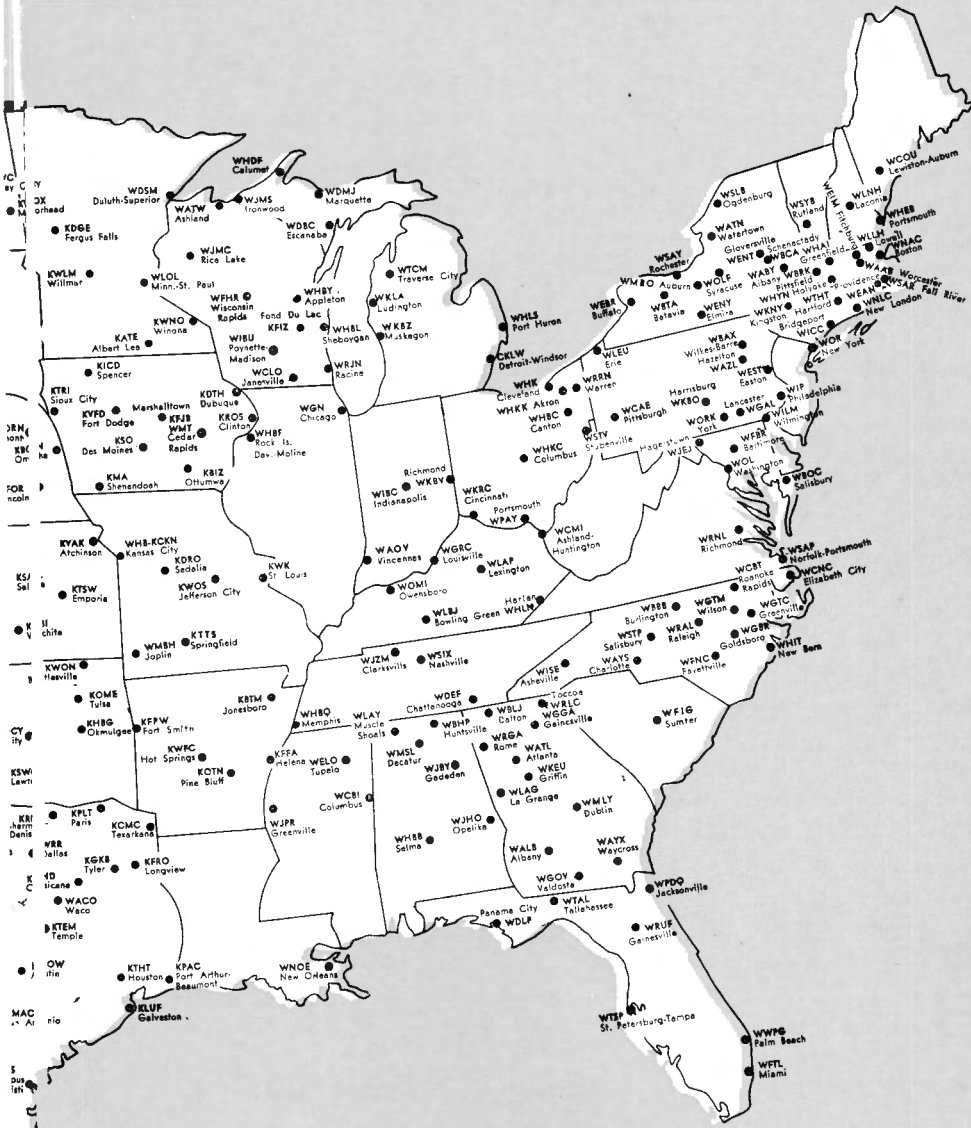

We need to be sobered up a bit. We need to forget about the immediate personal gain and think more of really winning the war instead of talking about it. We'd better start thinking about the actual price of victory so that broadcasters can blow their triumphal horns when we really win it and he able to give jobs to the men who fight for a better life for us all.

Advertising COVERAGE

Should Parallel DISTRIBUTION

Straight-thinking advertising men know, to get the most from every advertising dollar, COVERAGE must parallel DISTRIBUTION.

Rand McNally divides the United States into 366 Wholesale Trading Areas. In each area is one central city, whose wholesalers distribute consumer goods not only within that metropolitan zone, but also to the intermediate cities and rural areas surrounding them.

For example, Cincinnati is the wholesale "funnel" for 25 counties in Ohio, Indiana and Kentucky. 63.6% of its consumers live outside the central city zone, in 19 intermediate cities of 2500 population or more, and in the rural environs. These people buy 52.6% of Cincinnati's total food sales, 45.8% of Cincinnati's total drug sales, 46.3% of Cincinnati's total sales of all goods at retail.

Unless your advertising covers the intermediate cities and rural territories whose source of wholesale supply is Cincinnati, as thoroughly as it covers Cincinnati's city zone, you

may be failing to give adequate sales impetus to as much as half of the goods you ship into Cincinnati warehouses.

According to the 1944 Hooper continuing measurement studies, WLW delivers 50.3% of the nighttime audience in metropolitan Cincinnati—plus 55.8% of the audience in 19 intermediate cities, and 59.4% of the rural audience in the entire Trading Area.

There are 37 of these recognized Trading Areas in the four-state Merchandise-able Area of WLW-Land, and they represent a consumer goods market of \$3,300,105,000 annually.*

Parallel thorough DISTRIBUTION with thorough Advertising COVERAGE in this 3 billion dollar market, with one station, at one cost—probably the most efficient advertising buy in America.

*The Market Data Book.

WLW

DIVISION OF THE CROSLY CORPORATION

THE NATION'S MOST MERCHANDISE-ABLE STATION

NATIONAL BROADCASTING COMPANY

NILES TRAMMELL

THE broadcasting industry rendered a more significant service to the American public during 1944 than in any previous year in its history. For this was the third and most momentous year of the war and also the year of a presidential election. Day by day radio brought news from the fighting fronts and covered the political campaigns—

with promptness, accuracy and thoroughness. It informed and inspired those at home to fulfill their responsibilities in the cause of victory.

Reportorial Staff

World-wide news coverage was maintained by NBC's staff of fifty-seven reporters and commentators stationed in all parts of the world. At 12:41 A.M. on June 6th, when the first invasion flash was received, the NBC news staff had been ready for months to cover the momentous happenings of that day. NBC reporters accompanied the invasion forces to Normandy by sea and air, landed on the beaches and stayed with the troops as they moved through Normandy and Brittany across France and into Germany. NBC was similarly represented in the first B-29 raid over Japan and in the Philippine landings.

During the year, roughly 1200 hours on 2700 network programs were devoted solely to the war effort. The famous Army Hour, now in its third year, brought to millions of American homes every Sunday afternoon the Army's own first-hand reports of its activities of every front. NBC programs, both commercial and non-commercial, provided valuable support for the Fourth, Fifth and Sixth War Loan Drives, for the Red Cross and for a multitude of other home-front activities.

Headed by Maestro Arturo Toscanini, the NBC Symphony Orchestra—the world's first full-size, full-time symphony orchestra created especially for broadcasting—launched its eighth consecutive year over the NBC network.

The war-time need of the nation for

spiritual comfort was reflected during 1944 in an increase in the scope and variety of NBC religious programs. Of deep significance was the first broadcast of a Jewish religious service from Nazi Germany, which was presented by NBC shortly after the fall of Aachen in late October.

At the year-end, the NBC network comprised a total of 149 stations, compared with 142 at the end of 1943. Six stations are owned by NBC; the remaining 143 are independently owned and are associated with NBC in a contractual relationship.

Program Service

The National Broadcasting Company, the senior of America's four national network organizations, maintained its position of leadership in program service.

During the evening hours of two momentous days of 1944—D-Day, June 6th, and Election Day, November 7th—the total radio listening audience was more than 50 per cent above normal. Impartial surveys revealed that a far greater audience was tuned to NBC stations than to those of any other network.

The growing importance of television as a great post-war art and industry was reflected in the increase and diversity of television programs put on the air by NBC's pioneer New York station, WNBT.

Tele For Hospitals

Fifty-five television receivers have been installed in nine Army and Navy Hospitals in New York City and vicinity. Television programs of all types, particularly boxing bouts, are greatly enjoyed by the patients. The average audience per hospital television receiver is 35. On Election night, when visual reports and tabulations of the election returns were broadcast by television, a checkup of television sets in use showed that an average of eight persons gathered in front of each home receiver.

During 1944 approximately 425,000 visitors took the guided tour of the NBC New York studios. The total number of visitors during the eleven years since the NBC tours were inaugurated passed the five-million mark in October.

SERVICES OFFERED: Keystone Broadcasting System is a transcription network principally covering BEYOND-METROPOLITAN markets from coast to coast. Its affiliated stations are joined together in a national system by means of transcriptions, eliminating wire charges. At time of going to press, the network includes 210 affiliated stations. The network supplies its stations with 84 fully scripted sustaining shows per week filling 4 hours per day, seven days each week, to a total of 28 hours per week. This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to cover the BEYOND-METROPOLITAN markets intensively, in a single transaction, by means of electrical transcription. The system offers its facilities in network time periods from one hour down to five minutes and also makes available announcement periods down to twenty-five word length.

LOST- YESTERDAY

FCC figures show that about one-third of the nation—in small town and rich rural “Beyond-Metropolitan” areas—receives unsatisfactory coverage, or none at all, from major wired network stations.

Therefore, these millions of listeners were lost to national advertisers—“national” in theory but not in fact. Then came KBS.

KEYSTONE NETWORK

FOUND- TODAY

National advertisers now reach these lost millions via the Keystone transcription network. For Hooper surveys* prove that the vast majority of people in the significant "Beyond-Metropolitan" areas surveyed listen predominantly to their own local Keystone stations. KBS delivers this huge NEW mass of audience at the lowest cost per actual listener in history. Join the leading national advertisers now extending their network programs to KBS markets.

*Detailed survey on request.

THIS IS THE KEYSTONE

www.americanradiohistory.com

GREAT- TOMORROW

"Beyond-Metropolitan" America will continue and expand its present all-time-high prosperity. Says distribution chief Nelson A. Miller, Dep't. of Commerce, "In the post-war competitive market . . . the small town and rural market must be brought into selling programs in a big way, fully in proportion to its size and improved quality."

ONLY Keystone affords radio advertisers exclusive network coverage in this indispensable sector of the nation.

What's a Man?

Generally speaking, he's a time or space buyer, merchandise manager, account executive, or other *genus homo* seeking and devising ways and means to influence women. In Los Angeles, the male species finds the *best way* to influence women is through the station *programmed and managed by women*—KGFJ.

KLX

HAS HIGH
PRIORITY ON

“LISTENER LOYALTY”

From pioneer to pace setter since 1921. That's the record of radio station KLX, Metropolitan Oakland's leading Independent.

From its broadcast of the Dempsey-Carpentier fight in Jersey City, July 2, 1921, to the vital war news of today, KLX has given its listeners a high standard of radio programs and outstanding public service.

That's why it's "just natural" to tune to KLX.

with BASIC BLUE NETWORK SHOWS . . . plus local programming attuned to the listening habits of the rich San Diego market . . . a highly concentrated market where \$808,000,000.00 annually is spent by the 450,000 BUYING civilians who make up this great area. That means, in the layman's language, over \$15,000,000.00 is spent EVERY WEEK in San Diego. (Not to mention the unquotable millions in PLUS earnings and spendings by the Military personnel located in and near San Diego.)

KFMB is the spark-plug for the San Diego market . . . it is the station that REACHES and INFLUENCES this wealthy population. KFMB is San Diego's busy . . . progressive station!!

THE BEST IS YET TO BE . . .

Already the wonder child of our age, radio is so busy with its future that it has little time to dwell upon an exciting past.

We can look back over 22 years of public service. We can reminisce with many of our friends over the way programming and adcasting have improved. We can

recount the countless success stories of our clients, and talk about the phenomenal buying power through the years of The Hartford Market.

The past has been as amazing, as big and dynamic as America itself. But we prefer to look ahead and join our industry in saying, "*The best is yet to be.*"

Two requisites for Sales Success

SOUTHERN NEW ENGLAND has them both

The sales possibilities of the Southern New England market are ably demonstrated by the fact that the approximately 3,000,000 people who comprise this market possess an effective buying income more than 60% higher than the average for the entire United States. These folks have money to spend—and spend it. And they'll spend it for your product once they're convinced of its merits.

The power exerted by 50,000 WATTS and the authority gained by twenty years of faithful service (February 10, 1945), combine to make WTIC an outstanding sales medium. The people of Southern New England have a deep respect for the high standards of quality to which WTIC has long adhered. They heed your sales message when it is spoken by the friendly and familiar voice of WTIC.

IN SOUTHERN NEW ENGLAND

PEOPLE ARE IN THE *Habit* OF LISTENING TO WTIC

Frequency: 960 Kc..Power: 1,000 d.; 500 n.

SOMETHING NEW

IN NEW ENGLAND:

UNDER the new ownership of Harry C. Wilder and Associates, WELI of New Haven will prize its character above all else. We stand for The Square Deal — symbolized above.

IN LISTENERSHIP: The highest audience levels that expert, imaginative, quality programming can produce. Preserving nothing mediocre. Seeking always for something better. Deserving complete confidence of listener and sponsor.

IN SELLING: In spite of growing demands, time on WELI will be apportioned, not just sold out. No sound advertiser will ever be

denied the use of WELI in starting to build a postwar franchise in this market.

IN PROMOTION: For years our friends have known that our stations give them more than their order calls for. That phrase is solidly linked with us throughout the radio industry.

IN INFLUENCE: Character is reflected in a station's influence with its listeners. It's a priceless intangible, and it is a corner of our Square Deal policy.

New Advertisers are constantly joining us with new and finer programs. We welcome you to this important market.

TABLE 4.—NETTED GAINS
METROPOLITAN COUNTIES

U. S. BUREAU OF CENSUS
Report on
SHIFT IN POPULATIONS
Metropolitan Counties

To Marching Through Georgia!

Eighty years after Sherman's famous "March to the Sea", *another* army is marching on Georgia. This time, however, they've marched TO Georgia rather than THROUGH Georgia.

This is an army of men and women who have come to Georgia's Cities to take jobs in Georgia's industries. They like Georgia,—its climate, its people, its working conditions—and when the war is over, they're going to stay in Georgia!

The phenomenal increase in population of Georgia Cities is shown by the U. S. Bureau of Census report on changes in civilian population of metropolitan Counties, between April 1st, 1940, and March 1st, 1943, based on actual registrations for Ration Book Two.

While many American cities were showing a net loss in population, due to loss of men and women to the Armed Services—Atlanta, Albany and Columbus all showed large net gains. Bear in mind that this covers *civilian* population alone, and does not take into consideration the hundreds of thousands of soldiers sta-

tioned in Georgia, whose purchases go to swell Georgia's ever-mounting total of retail sales.

Now's the time to sell your product in Georgia's prosperous *urban* markets. In making up your list, pick stations that give you *concentrated coverage* in Georgia: Cities, where the pay-roll dollars are.

pioneer!

LEAVES FROM WSB'S NOTEBOOK • 1922 TO 1945

Since the early days of earphones, W S B has made radio history in the South. Conservative in policy and progressive in program direction, the services of this station rank high with our commercial friends and with our large listening audience. The leaves of achievement through the years are countless . . .

FOR QUALITY !
AP

PRESS ASSOCIATION, Inc.

50 ROCKEFELLER PLAZA
 NEW YORK, N. Y.

**—read the staggering
facts on listening
habits in America's
2nd biggest market!**

We asked: "What station do
you listen to most?"

42% SAID
WMAQ

MORE PEOPLE ANSWERED

"WMAQ"

**THAN THE NEXT 3
STATIONS COMBINED!**

**WMAQ
CHICAGO**

*The station most people
listen to most*

670 ON YOUR DIAL — 50,000 WATTS

REPRESENTED BY NBC SPOT SALES

In a recent nation-wide, all-county survey,
people were asked:

*"What radio station do you
listen to most?"*

In the Chicago area—America's second
largest market—42% of the thousands who
answered named WMAQ. This overwhelm-
ing choice of WMAQ is greater than that
accorded to all other Chicago network out-
lets combined.

This fact is a fitting tribute to the great
shows, the expert production and the fine
transmission which are characteristic of
NBC's key Midwest outlet.

To blanket the 2,855,700 families in the
Chicago area—to cut a cash slice of this
\$3,500,000,000 market—astute advertisers
place their local and spot campaigns on
WMAQ.

THE VOICE OF THE PEOPLE

Through this medium of communication flows a constant stream of human action and emotion expressed in the shape of news—music—sports—drama—comedy—pathos—science—homemaking—mystery—and all things affecting and reflecting the lives of a host of faithful WGN listeners.

Since 1924 Radio and WGN have been synonymous in the Midwest.

WGN is truly the radio institution that evolved into the Voice of The People.

Waste paper collected when WLS played Ottawa, Illinois, provides relaxation for WLS comic Pat Buttram.

Our premiere of Paramount picture based on WLS National Barn Dance drew huge crowds.

Helen Joyce of WLS Feature Foods (center) in one of many WLS broadcasts from national political conventions.

Microphones at Work in Midwest America

"We'll be there" is the phrase heard over four states, as WLS microphones bring direct to WLS listeners the important, the human, the profitable and new. It *might be possible*, in this *entire* yearbook to picture every WLS special broadcast of 1944. On this one page, we can only suggest a *very few* highlights. Basically, it is the WLS policy to cover every

part of the vivid life in Midwest America; to bring our listeners *all the voices* that can inspire, entertain or help. This policy, in practice more than twenty years, has built an audience that LISTENS and ACTS! WLS microphones are at work in Midwest America. Put them to work for *YOU*. Find out why we say so often: WLS GETS RESULTS!

A Clear Channel To A Bigger Market

The advertiser who wants the broadest coverage of the rich Central Indiana Market will unquestionably select radio station WIBC as his medium. The lower frequency of this station, 1070 Kilocycles, on a clear channel, and with 5000 Watts power, covers a wider radius than any other Indianapolis station. Write or wire for information about the intensive merchandising support this station offers to its advertisers.

WKMO

INDIANA'S
 PUBLIC SERVICE
 STATION Plus
 Columbia
 Broadcasting
 System Programs

**Solidly Entrenched
 in The Hearts
 of the folks in
 The Heart of Indiana**

WKMO offers the advertiser one of the most powerful audience-loyalty-wise stations in radio. In the heart of Indiana—1400 isn't just another spot on the dial—it is the friendly voice of a loyal public servant, known—and loved—and listened to—by more than half a million Indiana folks. And there's a double plus—the plus of Columbia Broadcasting System attractions and the plus of great signal strength provides strong, clear reception throughout the WKMO area.

All of which adds up to SUPERIOR SALES POWER in this rich market.

Write or call
 John Carl Jeffrey, Gen. Mgr., WKMO, Kokomo, Ind.,

HELP

THE

RED CROSS

GIVE YOUR SALES A LIFT

For almost 20 years, WIBW has been lifting sales for its advertisers—and *keeping* them lifted. We can do the same for you! Here's why.

WIBW is the "easiest heard" and "most listened to" station in this area. (Personal surveys by Dr. F. L. Whan as reported in "Kansas Radio Audience, 1944").

We have the confidence and good-will of more than five million farm and small town listeners. We have it because our programs and entertainment are deliberately keyed to their *known* preferences . . . our services to the promotion of their interests and welfare.

That's why WIBW advertisers get immediate, wholehearted buying response. It's why we're absolutely certain that we can do the same for you and your product. Let us prove it!

★

24 HOURS A DAY

KCKN is the only Kansas City station broadcasting day and night—all night.

★

"THIS IS MUTUAL"

At 6 P. M. KCKN becomes a BASIC station of the Mutual Broadcasting System.

★

Except for Los Angeles, San Francisco and Seattle, there's no greater concentration of effective buying income in the entire western half of the United States than is to be found in Greater Kansas City.

And directly upon this nine hundred million dollar market KCKN concentrates ALL of its effort—no attempt whatever being made to program for the thinly-spread farm and small town audience surrounding Greater Kansas City. KCKN is strictly a metropolitan station for metropolitan listeners.

KCKN offers you the all-important MASS MARKET BUYING POWER of Greater Kansas City *without* the rate penalty of out-state coverage.

Contact your nearest **Capper** office for availabilities.

GREATER COVERAGE IN A MARKET WHERE

**effective
buying
power**

**SHOWS
A 102%
GAIN***

Few markets can boast of so great an increase in the effective buying power of its people as this tri-state area comprising sections of Louisiana, Texas and Arkansas.

This increase in income of \$573,000,000 over 1940 is from basic industries industries such as oil, gas, lumber, minerals, livestock and agriculture which have long contributed big incomes to this intensely active market.

Though there has been no increase in population figures since the 1940 census, retail sales show a gain of 58% with food and drug sales up 74.7% and 81.2% respectively.

Yes, today this market is prosperous, but there can be no doubt as to its stability in the postwar period. To get your full share of present and future sales opportunities you need only KWKH for it offers greater coverage than any other single medium.

**Based on latest figures as compared with 1940 census.*

*In its primary area alone,
KWKH serves 49 counties
with a total population of
1,456,167.*

Fish Make Poor Customers!

History tells us Demosthenes practised while walking back and forth along the sands, making his speech to the ocean.

But he delivered his famous orations before tremendous crowds. Thus, he gave some of the masterpieces of oratory to posterity.

The story of

Demosthenes is the story of radio. No matter how excellent your program, unless the public is tuned-in . . . *you're broadcasting to the ocean.*

Baltimore's
Listening Habit

**NATIONAL
NETWORK
ORIGINATIONS**

**MAKE
W X Y Z**

**A
GREAT
STATION**

**1700 STROH BUILDING
DETROIT, MICHIGAN**

YOU MAY BE ABLE TO "CAST"
422 FEET* —

**BUT—YOU CAN'T BROADCAST INTO WESTERN
MICHIGAN FROM CHICAGO OR DETROIT!**

Pardon the pun—but it really *isn't* possible to throw a "plug" into Western Michigan, from ANY outside station, with ANY hope of adequate or consistent performance.

The reason is an actual physical barrier in the matter of geographical location, which gives Western Michigan an almost impenetrable fading condition. Distant stations simply can't put a dependable signal into the area. But WKZO and WJEF *can*—and *do*.

WKZO in Kalamazoo and WJEF in Grand

Rapids—both CBS, both programmed especially for their specific areas—do the kind of job that these two big markets deserve. Sold in combination at a bargain rate per thousand radio homes covered, they are by long odds your best choice for *real coverage* in Grand Rapids, Kalamazoo, Battle Creek and all of Western Michigan. Let us send you the whole story—or just ask Free & Peters!

* Wm. J. Lovely of St. Louis did it at Chicago in Sept., 1943!

WKZO

**CBS - FOR KALAMAZOO, BATTLE
CREEK, AND WESTERN MICHIGAN**

network YOU NOW REACH
A FARM MARKET OF

\$7,039,223.00

76 stations
offering you a
blanket coverage
of

- Missouri
- Montana
- Nebraska
- North Dakota
- South Dakota
- Wisconsin
- Illinois
- Indiana
- Iowa
- Kansas
- Michigan
- Minnesota

ONE NETWORK TO REACH ONE FARM AUDIENCE

NCBS is now ready to offer you a farm network exclusive of anything that has previously been available in the way of a rural audience. Thru the combination of Mississippi Valley Network, which is operated by North Central Broadcasting System, Inc., you have an agricultural coverage of 1,598,762 farm radios. Potential customers for all farm products. Programs presented will be created exclusively for the farm population eager for your advertising message.

The Mississippi Valley Network will give blanket coverage of the principal sections in the United States which produce more than three-fourths of the agricultural products, grain and livestock each year. North Central Broadcasting System presents a maximum rural coverage over this exclusive agricultural network.

Mississippi Valley Network..

WE KNOCKED THE TOP OFF YOUR POST-WAR HUMP— THREE YEARS AGO! . . .

No matter how complete your post-war plans, you won't be over the hump until you've successfully marketed your product.

KSTP can take care of that for you here in the vital Twin Cities Market. Because for the past three years we have been busy carrying out our "Pre-War Plan for Post-War Selling." For the past three years we have been busy building increased station acceptance throughout our coverage area. For the past three years we have been busy building a merchandising machinery that really works.

We've promoted an even greater audience in the Metropolitan Twin Cities area. We've greatly increased our audience in Rural Minnesota. And we've developed Planalyzed Promotion—the exclusive KSTP plus merchandising service advertisers and agencies tell us is outstanding in the country. If you're not personally familiar with Planalyzed Promotion, ask any agency or advertising executive for whom it has worked.

We, or our national representatives, will be glad to tell you more about this "Pre-War Plan for Post-War Selling." Give us the opportunity when you're planning your next schedule.

In 1945

**GO PLACES IN KANSAS CITY
WITH**

KCMO

KCMO offers as bonus without cost to KCMO advertisers, the most vigorous program promotion campaign in town:

OUTDOOR POSTER SHOWINGS in Kansas City, Missouri, and Kansas City, Kansas, reaching an audited net advertising circulation of 3,555,405 people every week.

SPOT MOVIE SHORTS, each showing to an estimated audience of 335,250 entertainment seekers in leading Kansas City theaters.

These are given further impetus by KCMO broadcast contest tie-in and newspaper advertising. Get full details from your nearest John E. Pearson Company office . . . check KCMO availabilities, and find out why KCMO is the best time buy in Kansas City for '45.

We PUT it there!

Gardner Advertising Company
NEW YORK SAINT LOUIS
915 OLIVE STREET • ST. LOUIS 1, MO

November 3, 1944

Mr. Dal Wyant, Promotion Director
Radio Station WHEB
Portsmouth, New Hampshire

Dear Mr. Wyant:

Thank you for that splendid brochure you sent us reporting on your WHEB "Tom Mix Party!" Frankly, we have been very much impressed with it.

You may be interested to know that your report has been passed around to everybody at The Ralston Purina Company. They have all been lavish in their compliments. The whole affair was one of those grand jobs that mere words cannot repay.

To you goes our sincere appreciation for all the co-operation you have given us. We feel that the substantial increase in the Tom Mix Hooperating for the month of October is due in no small part to such grand promotional achievements as yours.

Cordially yours,

GARDNER ADVERTISING COMPANY

Clair Carl Carl
(Mrs. J. E. Carl-Carl)

CCC:ACB

BLUSHINGLY, we sunshine
this page of praise.

- Typically, it attests both as to Quality and Quantity of WHEB Pro-MOTIONS. "Tom Mix Party" for Ralston Purina Company serves active proof of how it's done. Inset photo proves kids liked it, too!
- Yes, WHEB puts the MOTION in Pro-MOTION!

ON WLIB YOU'LL *Never* HEAR...

CUSTOM-PROGRAMMED to the Cream of the New York Market!

▶ **WLIB** carries your advertising message into the homes of New York's solid middle income families.

▶ **WLIB's** civilized programs avoid irritating its listeners with what they don't want. Gives them plenty of what they do want. "The Popular Classics with a Blend of the Modern" . . . a winning combination, not consistently duplicated by any other New York station

▶ **RESULTS:** 66% of WLIB's listeners are over 30 years of age ("Pulse of New York")* 69% of WLIB's listeners are middle income ("Pulse of New York")* . . . 61% of WLIB's listeners do not tune in on any other station 15 minutes before or after listening to WLIB ("Pulse of New York")* . . . WLIB gained 20% greater share of total audience (Jan. 1944 to Oct. 1944) †

* "Pulse of New York" † Hooperatings

WINS

NEW YORK

Ever stop to consider New York as a city of *Homes*?

Well, it is...3,000,000 of them within the WINS primary coverage radius. 3,000,000 homes is more than the *Combined Total* of homes in the next *Three* largest cities...*Chicago, Philadelphia and Los Angeles.*

How does WINS attack this bonanza *Home Market*?

By "*Home Programming*"; a simple, yet sound formula of *Listenable* radio designed for whoever's home at any specified time of day. *Resultful?* WINS' *Audience Ratings Are Climbing Every Day.* WINS' *List Of Happy Advertisers Is Longer Than It's Ever Been...And Getting Longer Daily.*

3,000,000 radios...3,000,000 *Salesmen*...are ready to go to work for you over WINS.

Here's one reason

WHY NEW YORK TUNES TO WNEW 24 HOURS A DAY!

WNEW knows how to pick the winners! Yes! After eleven years, **WNEW** knows just the type of radio entertainment New Yorkers enjoy.

Here are six "winners" who have found a loyal audience in the millions of listeners throughout the Metropolitan area—listeners who buy the products these stars recommend!

These are sales-producing programs! But they are only a part of **WNEW's** 24-hour-a-day power-packed schedule. If you like picking a winner, let **WNEW** go to work for you!

TWO GOOD GRIPS ***on the NEW YORK MARKET***

WOV's firm hold on two great and responsive audiences gives this important station a continuous, impressive, around-the-clock audience that results in satisfied sponsors anytime of the day or night • In the daytime, according to January Pulse, WOV dominates metropolitan New York's Italian-speaking audience, reaching as many as 76% of the 520,000 Italian radio homes • And in the evening, between the Hooper checking hours of 7:30 and 10:00 p.m., WOV reaches more radio homes, at the lowest cost per listener, than any other New York Independent station.

YOU'VE got to get price, coverage and audience when you buy spot radio. In Central New York, you get more of all three when you buy WAGE. For WAGE costs less than other Syracuse network stations. It gives equal or greater coverage. And audience—well, ask to see the last special Hooper report on Syracuse radio listening. Your Edward Petry & Co. representative will show it to you—or write or wire WAGE.

620 Kilocycles * 1000 Watts * Syracuse, N. Y.

THE STATION OF THE STARS

WFBL

SYRACUSE, N. Y.

*the Greatest Selling -
Power in Central New York*

More listeners . . . day or night . . . make WFBL the powerful selling force in the rich Central New York Market.

Nearly 50% of the daytime listeners prefer WFBL . . . the remainder is divided among the three other Syracuse stations. The same predominance prevails among night time listeners.

WFBL sells more potential buyers in this "post - war - prepared" market than any other station. (Figures available if you want them.)

MEMBER BASIC NETWORK
COLUMBIA BROADCASTING SYSTEM

FREE and PETERS ★ Exclusive National Representatives

FIRST FOR WFBL

Always a leader in its field, WFBL today enjoys the reputation of holding many "firsts" in the world of radio.

WFBL was instrumental in forming the early New York State Network, a pioneer step in improving radio's service.

The station is one of the 16 charter members of the great Columbia Broadcasting System, and is the only station in Syracuse that has been affiliated with the same network throughout its history . . . resulting in local CBS ratings being consistently above the national ratings. It was the first station in Syracuse to use 5,000 watts and is the only 5,000 watt station with a non-directional radiation daytime.

It is the only station in this area employing the facilities of a mobile unit, broadcasting Central New York events "on the spot."

Central New York's leading station is first in the introduction of new local programs and the development of radio personalities.

WFBL is the only radio station to own and occupy its own building . . . a smart, modern structure in the heart of Syracuse.

These are but a few of the "firsts" that make WFBL the progressive, preferred station.

The William B. Lewis Award of 1942
and
The Billboard Citation of 1943
speak for themselves

However, the 1944 World Series promotion was something phenomenal as far as the 400,000 listeners in the Utica-Rome, N.Y., area were concerned. It was these folks who asked us to broadcast the World Series; they knew that if WIBX failed them, they would not hear the series (no other station carrying the series being audible in the territory). So through the co-operation of the late Judge Kenesaw Mountain Landis, the Gillette Safety Razor Company and their agency, Maxon, Inc. (as well as the CBS Network and P. & G. and Standard Brands in relinquishing their time), the World Series of 1944 was heard in all its glory over WIBX. Thousands of letters, cards and messages came from far and near.

Yes, things like these do make WIBX your super public service station in the Mohawk Valley.

YUSIF ... THE CAMELS' CHOICE!

In Bagdad-on-the-Cuyahoga, which is also called Cleveland, one Yusif ibn Usif presided over a filling station for camels. He had fresh, sparkling well water, the delight of dry dromedaries. Yet the camel trains disdainfully passed him by. And he eked out a miserable existence, one eke at a time.

On the caravan road, beyond the city gates, he placed an inscription which said, "Stop at Yusif's place. Good drink for man and beast." And another scroll at his station praised the celestial cleanliness of his rest rooms. But, though he also purveyed exotic viands, such as hamburgers, nothing availed.

Then spoke unto him a friend saying, "Listen, droopy burnouse! Hundreds of contented camels drink at city filling stations. For the camel drivers are lured thither from afar — by the magic of wireless — over WHK. Do thou likewise, and the camels will walk a mile to you." And Yusif did. And the camels did. And WHK scored another merchandising hit.

Simply because it sells like crazy,

WHK

COLUMBIA BROADCASTING SYSTEM

WKBN TRANSMITTER

PIONEER WITH VISION

In September, 1926, WKBN began broadcasting as the pioneer station of the Youngstown Area, one of the top industrial regions of the nation . . . ranking third in steel production, alone. Foresight, vision and continuous endeavor in behalf of sponsor and listener have created and retained the leadership enjoyed in the entire area served by WKBN.

The Youngstown Market, unlike many, will not be materially affected by reconversion since the products produced for war are substantially those products which will con-

tinue to be in tremendous demand in the peace time to which we are all looking forward.

With confidence in the future of America we accept the responsibilities our position demands and pledge even greater opportunities to the radio advertisers and listeners of tomorrow.

An
 Outstanding
 Audience
 in
 Toledo
 Says
 WTOL

*An
outstanding audience
in the Toledo area*

*Women follow
its department store programs*

The listener audience of WTOL throughout the Toledo area is exceptionally department store conscious. For a far higher percentage of leading department stores use radio advertising in Toledo than in most major markets. 5 out of the 6 department stores in Toledo use WTOL. So do *all* of the drug chains and *all* the bread companies. This acceptance signifies the primary influence of WTOL in the Toledo market. Locally owned and operated... it's "The Biggest Little Station in the World".

BREAKING NEW GROUND

"To sell 'em—tell 'em over KGW." That's the keynote of something new in radio—a spot announcement campaign launched some months ago by KGW, Portland, Oregon, over WQXR New York and its FM affiliate WQXQ, introducing timebuyers to the vast market potentialities of the Pacific Northwest area KGW serves. This unique experiment in radio selling radio has won plaudits from the entire radio industry.

WQXR Announcements tell story of the KGW MARKET

<p>AGRICULTURE</p> <p>"Oregon's amazing growing climate puts the state in the lead in production of many farm products. According to agricultural bulletins, over half the area planted to hops in the U.S. is in Oregon. The Willamette Valley—included largely in the KGW area—produces nearly all the fiber flax grown in the nation."</p>	<p>PAYROLLS</p> <p>"A great story about the KGW market area is told by the November payroll report of the Oregon State Unemployment Compensation commission. Portland and Multnomah county payroll figures for the fourth quarter of 1943 alone amounted to more than the whole year of 1940."</p>
<p>PURCHASING POWER</p> <p>"The per capita income of Portland residents is twice the national average. In the KGW area retail sales have steadily shown the effective purchasing power of this \$2,196 per capita figure. Yet, the ratio of net after retail purchase to income is 57.5, according to figures from Sales Management Magazine."</p>	<p>ELECTRIC POWER</p> <p>"A magic word has stirred the KGW area ever since the vast Bonneville dam was built. The word is POWER. The Columbia river is producing with Bonneville and Grand Coulee as much electricity as was used in 1929 in the entire United States."</p>

*It's the Character of a
radio station which counts!*

TO

the listener

power, coverage,

millivolt contours, audience

measurement means little. It's the

character and purpose . . . the ideals and

courage . . . the personality and vigor . . . the

spirit of sincere public service which counts most. ★ ★

Since its inception WFIL has striven ably and effectively . . . has spared nothing . . . to bring to Philadelphians the type of radio entertainment which they prefer. It's because of this WFIL is deep-rooted in the hearts of Philadelphians. ★ ★ What gives a radio station character?

Not necessarily the cold, insensitive figures which appear in audience ratings—most of which are due to network situations beyond the control of the individual station

—but the warmth and sincerity which people feel. Ask a Philadelphian which

station they feel is *their*

station—invariably

they answer,

WFIL.

In Rhode Island

WFCT

HAS A TIME BUYER'S DREAM AREA IN THE SHADOW OF ITS TOWERS!

LATEST available figures show 550,298 of Rhode Island's 713,364 souls happily compressed into Providence County . . . "happily," because of per-capita saving deposits approximately **TWO AND ONE-HALF TIMES HIGHER** than the nation's average! Here's a Utopian proving ground — compact, and with money to spend for more than mere necessities. What a post-war market!

- **SPOT-SELL** the vociferously-loyal army of youngsters who listen to Hop Harrigan, Dick Tracy, Terry & The Pirates, Jack Armstrong, Capt. Midnight, and the Lone Ranger. Their product-preferences control much of the buying in most of the homes.

WCSC thinks CBS is tops...BUT!

Good as CBS sports coverage is (and we think it's tops) we know we need more than the best in network programs to click with Charleston sports fans. We need locally planned, locally produced programs. Programs that reach the heart, the civic pride of Charleston. We think we have them.

Programs like our "Sports Reporter", sponsored six days a week at 6:05 p.m. since 1938 by Royal Crown Cola. Our sports reporter, Johnny Ostrom (he used to teach English at the Citadel) isn't content to read the national sports news right off the wire. He interviews visiting and local sports celebrities. He's a part of the Coastal Carolina's local sports: basketball, baseball, boating, golf, track, tennis and swimming; the high school, semi-pro and service teams; and he ties his listeners in with his predictions of the results of games from big-league baseball

to the middle-aged teams of local business firms. Johnny Ostrom is Charleston's "Sports Reporter."

The "Sports Reporter" is another of the programs that have made WCSC a Coastal Carolina institution. Another example of WCSC planned, produced, *successful* programs. These programs sell products, too. Just ask Royal Crown Cola!

KTEM -- Temple	KBWD-- Brownwood

*T.S.N. area covers 140 Texas Counties,
11 in Oklahoma and
7 in Arkansas.

To cover this immense area with
maximum effectiveness you
need "T.S.N."

When you get away from the 4 major cities in Texas (which embrace only 17.3% of Texas population) you are in the small communities and rural area comprising 82.7% of the radio listeners in Texas.

And, any type of survey will bear out the fact that the folks in the "Texas State Network" area* listen more hours of the day to their nearby home-town "T.S.N." station because of the high quality programs fed by "MUTUAL" and the "BLUE" (and delivered with less interference) to the strategically located "T.S.N." stations.

Here are the facts about the area you can cover on the 15 Texas State Network Stations in one simple operation.

Population	4,255,000
Families	1,107,260
Native White	3,478,700
Retail Outlets	54,629
Retail Sales	\$1,030,794,000
Food Stores	16,257
Food Store Sales	\$245,567,000
Gen. Mdse. Stores	2,044
Gen. Mdse. Sales	\$159,595,000
Apparel Stores	1,835
Apparel Sales	\$60,835,000
Lbr. & Hdw. Stores	2,464
Lbr. & Hdw. Sales	\$86,858,000
Drug Stores	2,166
Drug Store Sales	\$49,639,000

Why It's Basically Sound to Use WISN

BASICALLY SOUND

... because WISN has achieved and is maintaining the ideal 1-1-1 distribution of commercial programs. (One-third national; one-third local; one-third network.)

BASICALLY SOUND

... because each year since 1940 business on WISN has increased and each year the increase HAS BEEN GREATER than in the previous year.

BASICALLY SOUND

... because more advertisers are placing more business with WISN year in—year out. If YOU want results in the Milwaukee area, you can get them on the station with the listener (and the advertiser) preference. Try us and see. You'll be glad you did.

It's so Good and True—Again We Advise

Get into America's newest, undeveloped market through

KFQD

ANCHORAGE, ALASKA

790 KC

1000 W

*First in
Alaska!*

Here's the opportunity you've dreamed about—a booming territory with large buying power and a need for every kind of product. Reach it through Station KFQD.

KFQD blankets Alaska's most important metropolitan - industrial area. Anchorage, the "News Center of Alaska," is the hub of a heavily populated railbelt . . . headquarters of the Alaska Railroad, Alaska Airlines,* Civil Aeronautic Authority, Alaska Defense Command and many other major industries of Alaska which include: Fishing, canning, fur trapping, mining, lumbering, shipping and transportation.

The oldest station in Alaska (May, 1924), KFQD has proved to be the Territory's most outstanding adver-

tising medium. It's a "must" on the list of every forward-looking advertiser

*Government figures show that the Anchorage Municipal Airport handled in one month recently 7,695 airplane landings and departures. This exceeded the air travel handled by LaGuardia Field (N. Y.), Los Angeles, San Francisco and many other leading airports for the same period.

SITKA

1220 Kc. 15 Watts, American Expeditionary
 Station

72% OF PUERTO RICO'S POPULATION

With great pleasure we quote a paragraph from one of the letters received daily by Station WNEL.

"WE BELIEVE YOU WILL BE INTERESTED TO KNOW THAT WE RECENTLY MADE A HOUSE TO HOUSE CHECK ON THIS PROGRAM DURING ITS BROADCAST. OUR SURVEY SHOWED 72% OF THE RADIO LISTENERS TUNED TO THIS PROGRAM. WE FEEL THE RESULTS ACHIEVED THIS YEAR WITH THIS PROGRAM ARE MOST GRATIFYING AND, IN ACCORDANCE WITH OUR RECENT CONVERSATION, WE ARE PLANNING TO CONTINUE IT IN THE SAME FORM NEXT YEAR."

Puerto Rico

**IS MORE THAN JUST AN ISLAND
SURROUNDED BY WATER . . .**

Here indeed is a market that should not be overlooked. There are 2,000,000 **American Citizens** in PUERTO RICO. Their yearly purchases from the United States amount to the impressive figures of \$125,000,000.00. And more impressive is the fact that their preferred dial spot is WIAC. WIAC offers **Full Coverage of Puerto Rico, The Virgin Islands** as well as partial coverage of all the West Indies.

STATIONS OF CANADA

The following list of stations is arranged in call letter alphabetical order giving page number for complete station data.

Every effort has been made to present accurate and complete information in a self-explanatory method. Data was obtained from questionnaires sent to the stations early in the year and corrections were made up to the time of going to press to insure the inclusion of late developments.

for Regional... Local... and National Advertisers

WITH LOCALIZED SELLING PLANS

NBC Radio-Recorded Shows

● When you consider the quality of talent . . . writing . . . and production behind each and every NBC Radio-Recorded show . . . you will quickly understand why they are in such demand by *regional* advertisers whose distribution precludes the use of networks . . . *local* advertisers who want network calibre programs at a modest cost . . . *national* advertisers who wish to put extra sales pressure in certain markets.

Among the outstanding shows produced and recorded by NBC . . . and now reaping excellent results in spot markets for many well-known advertisers . . . are those listed here.

The Weird Circle . . .	78	30 min.	1-a-week
Come and Get It . . .	78	15 min.	3-a-week
Destiny Trails . . .	78	15 min.	3-a-week
Betty and Bob . . .	390	15 min.	5-a-week
Modern Romances	156	15 min.	3-a-week
Stand by for Adventure			
	78	15 min.	2-a-week 1-a-week
Through The Sport Glass			
	52	15 min.	Optional
Time Out with Allen Prescott			
	26	15 min.	Optional
Time Out with Ted Steele and Grace Albert . . .	26	15 min.	Optional
Carson Robison and his Buckaroos . . .	117	15 min.	Optional
The Name You Will Remember			
	260	5 min.	3-a-week or more
Let's Take a Look in your Mirror with Stella Unger	156	5 min.	3-a-week
Getting the Most Out of Life Today with Dr. Wm. L. Stidger			
	117	5 min.	3-a-week
Five Minute Mysteries			
	66	5 min.	Optional
Happy the Humbug . . .	39	15 min.	3-a-week

*The number of programs in each series is as-of-press-time.
Additional programs frequently added, so check with us*

● For advertisers who want their own custom-built program . . . anything from a Station Break to a Musical Variety Show . . . NBC's complete staff and facilities are available to do the entire job . . . from script to finished pressing. For agencies with their own programming staffs, studio and technical facilities are available.

**Just
playing hours—**

**or
Paying hours?**

ASSOCIATED offers MOST Hours of the Best RADIO Music... program material that really pays off!

WHEN YOU COMPARE transcribed libraries, it's not just the big names that count...it's topnotch showmanship *all along the line*. That's how a library helps *you sell*—helps your *clients sell*!

Break down the number of playing hours into *paying* hours and you'll find ASSOCIATED ranks first! For ASSOCIATED gives you these powerful advantages:

1. You can offer advertisers *greater program value* than other local stations...more and

bigger proven attractions, on ASSOCIATED'S incomparable, *vertically-cut* transcriptions.

2. With these features, you can hold big audiences *at low cost* against high-budget network competition.

Yes, there are a lot of good reasons why ASSOCIATED has gained more new subscribers in the past few months than in any period in its history. Today, write for the new ASSOCIATED BOOKLET. Plenty of worthwhile information—no obligation.

Associated Program Service

THE THEATRE OF FAMOUS RADIO PLAYERS . . .

A series of ½ hour once-a-week dramatic programs with fine musical background. Each program is a complete story. UNIVERSAL listening appeal for teen agers and adult groups.

PHANTOM INDIAN . . . produced for ¼ hour 5 times-a-week broadcasts. One of the finest of adventure shows ever created for youngsters. Develops genuine story interest plus daredevil action. Excellent musical orchestration.

FLANAGRAMS . . . A 15 minute, 3 times-a-week dramatized sports feature. Pat Flanagan, the "Dean of American Sports Commentators," recalls the "Greats of Sports" in memorable programs of intense human interest. Background music is by Milton Charles, nationally known organist.

MR. FIXIT . . . A most unusual ½ hour comedy detective show. Completely different from "the formula" now so hackneyed, MR. FIXIT combines comedy with unique, down-to-earth characterizations in amazingly actual situations and thrilling plots. Each story is complete with suspicion and intrigue.

THE EDWARDS . . . A 15 minute, 5-times-a-week daytime strip. A tested radio program which garnered a phenomenal rating of over 20. THE EDWARDS is based upon the human and lovable characters who are continually confronted with believable and absorbing problems.

"First Mate Bob"

TIME IS OF THE ESSENCE!

AND that is particularly true of radio.

To you production men whose mad race against the clock is never-ending, Ray-Tele brings a new and worthwhile time-saver—the Voice Library.

The Voice Library is an integral part of our all-inclusive talent service. On Master Discs we have a permanent file of hundreds of voices, broken down into 117 different classifications according to dialects, types and so on.

Many of these recordings have been made by old friends of yours—many were made by promising newcomers who up to now have not been able to get to you. Now, for the first time, you can hear and judge them—at your leisure in comfortable surroundings.

Audition as many people as you want on these recordings, make your selection for the part or narrow your search to the two or three who seem best suited to the role you are casting. This will simplify your job and do away with the hours formerly consumed by a deluge of applicants for every part.

We heartily invite you to drop in on Ray-Tele at 604 Fifth Avenue. Look over our facilities. Above all make use of them as time saving, patience saving innovations devoted to your service.

AN UNBEATABLE PRODUCTION PROBLEM?

RAY-TELE SAYS "NO SUCH THING"! Bring your tougher-than-usual production problems to Ray-Tele for a commonsense, workable solution. Years of experience in writing, directing, producing and casting radio shows has given us the "know-how" in the field which can be one of your greatest assets. We are prepared to assist you with the solutions to problems arising from your own shows or to offer you a selection of ready-made shows of an exceptional caliber. Four participating shows—two in Chicago and two soon to be heard in New York. Two half-hour dramatic shows; one half-hour variety show; two half-hour quiz shows; two daytime serials. These are all live shows, most of which can be readily converted to syndicated transcription series. They all are either proved successes or have the elements that make for greatness.

Come in or call Ray-Tele at any time for guidance or help in all matter pertaining to radio or television.

NBC Thesaurus

FOR 10 YEARS

"The Treasure House of Recorded Programs"

NBC Thesaurus after ten years *still* is . . . and will *continue* to be . . . "The Treasure House of Recorded Programs." Small wonder when you consider NBC's pride in perfection . . . its vast modern technical facilities . . . its skilled directors. For further evidence take a look at the outstanding artists listed here. And there are many, many more!

NBC Thesaurus offers . . . in addition to radio's best and largest selection of great recorded musical shows . . . unequalled service to station program directors and sales managers. For example:

Basic Library—of more than 4000 selections . . . every type of music for effective programming . . . recorded NBC Orthacoustic.

Variety of Artists and Music in the 52 or more individual selections supplied each month . . . continuous flow of new and interesting music.

Long-term programming with THE-**SAURUS** is easy because there are *enough* selections by *every* performer to run a continuous schedule of each featured artist.

Sound effects and production aids for locally produced shows—more than 370 individual cuts.

Publicity material furnished to each subscriber . . . program portfolios, sales manual, publicity releases, photos of artists and other selling ammunition.

Most complete indexing system . . . comprehensive cross-index to make fullest use of the library . . . complete record and index cabinets supplied.

Throughout 1945, NBC Thesaurus will be adding new artists, new music, new types of programs—all designed to give THESAURUS subscribers a program service that is exclusively theirs—with advantages and features not obtainable from any other source. If you are considering a new library of transcribed music, be sure you have all the facts about America's No. 1 Musical Program Service—NBC THESAURUS.

**...but YOU are a
good customer, too**

*... for the fastest
transcription ser-
vice in the world!*

**TREASURY
CO-ORDINATOR
OF INTER-
AMERICAN
AFFAIRS**

MUZAK today is producing *three times* as many transcriptions as before the war...with specially heavy government orders for the Armed Forces and war agencies.

But YOU are a good customer, too...working hard in advertising agencies and radio stations.

And we are serving both!

Through this trying period of war-orders and war-shortages, there has been no deviation in the quality of our *Vertical Cut* and *Lateral Cut* transcriptions.

And in 1945, we hope to be able to continue our original standards of service: *the fastest transcription service in the world.*

To our loyal clients, new and old, a sincere "thank you" for your continued patience and continued business.

SERVICES OFFERED: Keystone Broadcasting System is a transcription network principally covering beyond-Metropolitan markets from coast to coast. Its affiliated stations are joined together in a national system by means of transcriptions, eliminating wire charges. At time of going to press, the network includes 210 affiliated stations. The network supplies its stations with 84 fully scripted sustaining shows per week filling 4 hours per day, seven days each week, to a total of twenty-eight hours per week. This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to cover the beyond-Metropolitan

RAY-TELE AND THE PACKAGED SHOW:

READY now—today. A baker's dozen of live and transcribed shows of every type and description. All available in packaged form. All shows of proven merit, worthy of the best sponsors and certain of a wide listenership.

Among these shows are: two half-hour dramatic shows; one half-hour variety show; two half-hour quiz shows; two daytime serials. Also four big participating shows, one of which is already a smashing success in Chicago. Two of these participating shows will soon be aired in New York and deserve your immediate attention as the number of sponsors will, of necessity, be limited.

Ray-Tele will build complete shows around your product or develop a show to satisfy your particular needs. We have everything necessary for the production of the precise show you have in mind—our facilities are at your disposal at all times and for any purpose.

By **DEEMS TAYLOR**

President, American Society of Composers, Authors and Publishers

THE American Society of Composers, Authors and Publishers, the leading performing right society in the United States, is an unincorporated, non-profit, voluntary association. The Society, which is the oldest American performing right society, has a total membership of 1,629 writers and 218 publishers; during the past year more than 39 writers and 15 publishers have become active members.

ASCAP has continued to cooperate with the war effort to the fullest extent of its ability. The ASCAP scripts, which have been so successfully used by more than 600 of the 929 licensed radio stations, have been definitely slanted to emphasize civilian participation in war activities.

Our script department was utilized during the United States Treasury Department's Sixth War Bond drive, when we prepared eight 15-minute broadcasts. These programs were transcribed, and featured not only some of the music from the Society's tremendous repertoire, but also some at-the-front interviews with our service men on Guam, Saipan, and many other theatres of operation. The transcriptions were used by radio stations throughout the entire country.

With the launching of the Liberty Ship Ethelbert Nevin, sponsored by Local 802 of the American Federation of Musicians, the ASCAP board of directors voted to purchase a complete library for the use of the ship's crew.

It is significant that the majority of leading ASCAP songwriters have been tremendously active not only within the organization, but on their own in bringing entertainment to wounded service men in various military hospitals. Through the cooperation of its membership, the Society has furnished entire units for service men's shows at the National Press Club at Washington, D. C.

Last March, ASCAP, in collaboration with the American Theatre Wing Music War Committee, sponsored a concert in tribute to its member, the late Larry Hart. The proceeds from this concert, as well as the proceeds from the concert given last January in conjunction with the Los Angeles Times, were donated to the Armed Forces Master Records, Inc. Some of the money from the Larry Hart concert has been used to establish a "contemporary music" room in the New York Public Library System.

In the field of industrial music ASCAP, in close cooperation with production officials of the war effort, has issued licenses for its entire repertoire in industrial plants for the nominal fee of \$1 per year for the duration.

* The catalogues of Southern Music Pub. Co., Inc., and La Salle Music Publishers, Inc., available under the Society's license, are limited to those compositions which were owned by Southern Music Pub. Co., Inc., and La Salle Music Publishers, Inc., on and after January 1, 1941. A list of such compositions will be furnished to any licensee upon request.

ASSOCIATED MUSIC PUBLISHERS, INC. (AMP)

By **CLINTON M. FINNEY**

President

FOUNDING OF AMP: Associated Music Publishers, Inc., was founded as a private corporation in the State of New York on December 22, 1926. Radio licenses have been issued since August, 1928. The corporation conducts a music publishing business and is exclusive agent for numerous foreign music publishers.

Scope: The AMP repertoire, representing 45 U. S. and European catalogs, has now been increased to include 500,500 titles, of which approximately 18,500 are copyrights. Copyright registration in Washington is in the name of AMP as owner. Ranging from symphonic works to dance music, including concert works for ensemble, solo instruments and voice, its repertoire constitutes a flexible and rich source of distinctive music for radio program builders.

AMP licenses: Licenses cover performing rights, "small" (i.e., strictly musical) and "grand" (i.e., musical-dramatic.) AMP's radio license is unique in that it covers "small" and "grand" rights under a single fee. The radio license stipulates that: (1) the monthly fee shall be equal to a station's highest quarter-hour rate card; (2) that AMP will sell the licensee any music (covered by the license) which is for sale, and rent such music as is not for sale; (3) that AMP will indemnify the licensee against claims arising from the use of music covered by the license.

AMP licensees: The national networks, the principal regional networks and most of the important independent radio stations are holders of AMP licenses.

AMP headquarters: 25 West 45th Street, New York City. Telephone BRyant 9-0845. Cable address: MUSICPUB—NEWYORK.

AMP officers: C. M. Finney, President; John R. Andrus, Vice-President and Treasurer; Ben Selvin, Vice-President; Anna M. Kerner, Secretary; Gretl Urban, Manager, Music Department.

HELP THE
 RED CROSS

BROADCAST MUSIC, INC.

By M. E. TOMPKINS

Vice-President and General Manager

NINETEEN HUNDRED AND FORTY-FIVE is the twenty-fifth anniversary of radio. BMI wholeheartedly celebrates this great event in the history of the industry which created it, and celebrates at the same time its own fifth anniversary. The broadcasting industry can well be proud of its great record of public service during the past twenty-five years, for radio now occupies an invaluable place in the life of the nation.

More than 600,000 titles are listed as available for use in the latest BMI catalogue. These titles range all the way from arrangements of the classics to the hottest swing.

Bulletins are sent out periodically listing vital changes in the catalogue, so that the Index is always kept up to date. In addition, the Research Department which does this work is always at the service of BMI licensees.

The BMI FIELDMEN are specially trained to be of use to stations. They call on broadcasters with helpful suggestions for better programming, and are continually gathering opinions and suggestions from station men with an eye to making improvements in BMI's service.

The STANDARD DEPARTMENT continues to add music which never falls out of public favor to station libraries.

One of the highlights of standard music service in 1944 was the completion of BMI's affiliation with the American Composers Alliance to which most of America's leading serious composers belong. Through this agreement, broadcasters now have available, without additional cost, symphonic, orchestral and chamber music works, and are able to obtain scores and sets of parts without charge.

BMI's new record catalogue lists approximately 30,000 phonograph records performable exclusively by licensees of BMI.

The Script Department sends out weekly releases of shows that really sell. These programs range all the way from five-minute shows to thirty-minute productions. A sizable sheaf of letters from delighted commercial managers indicates that these programs are a salable product.

According to a station's needs, it receives regular shipments of concert, popular, hillbilly and other music.

The NEWSLETTER carries a weekly message on music to program directors and musical directors.

The BMI MUSIC MEMO is issued weekly to keep the record programs up to the minute on the latest releases, and provide background material on the artists who appear on the discs.

In North America today there are 970 commercial stations licensed by BMI—and a long list of national and regional networks.

This is but a partial list of the many BMI services to its licensees.

More and better service to the broadcasting industry is BMI's keynote for 1945.

By PAUL HEINECKE

President

SESAC celebrates its fifteenth anniversary as a leading performance rights organization in 1945.

In the years in back of us, we take pride in the growth of our organization and particularly in the confidence in which we are held by the entire radio industry. With practically every one of the 900 odd stations enjoying long term agreements with us, we are facing 1945 and the years to come with but one resolve uppermost in our plans: **To Be Of Service.**

To carry out this watchword of our organization we pledge:

1. Our station relations staff will continue to visit every radio station in the country during the year and assist station executives with their operational problems and music requirements.
2. To augment and pass on to the stations proven sales plans. This work made available by our station relations staff without cost was inaugurated last year and met with the thanks of many operators.
3. To continually improve the service features of our Program Service Department. In addition to helping stations with their programming problems, its main accomplishment of the past year was its preparation and publication of the SESAC PROGRAM BUILDER. This 160 page volume was sent to every station executive in America and met with enthusiastic and unstinted praise and commendation.
4. The past year saw the inauguration and the production of SESAC transcriptions. These transcriptions met with the approval of the many stations throughout the country which purchased them at practically cost. The success of these transcriptions has led us to plan for further developments in this new field.
5. We pledge to continue our liaison work for the United States Treasury in furthering the sale of War Bonds. Since the War started, we have been closely allied with the War Finance Division and our station relations staff, through its voluntary endeavors, has been able to assist the industry with its reports containing constructive suggestions obtained from the stations throughout the country and reporting on the outstanding War Bond programs.

SESAC's vast repertory of music from the catalogs of more than 100 publishers covers the full gamut of the art, from standard tunes to hillbilly. Our First Service feature to the industry is the simplicity of our system of licensing. There is no complicated bookkeeping entailed, no copyright clearance headaches, extra fees, restrictions or making out of troublesome logs.

We want to continue to merit our position and enjoy the industry's confidence in the future as in the past, hence—SESAC is at **Your Service.**

HOW CAN RAY-TELE GIVE TALENT SO MUCH FOR SO LITTLE?

THAT question is asked of us not once but many times daily—usually accompanied by an air of pleased surprise. Because Ray-Tele actually does offer more than any talent service has ever before dared to offer.

The answer lies in Ray-Tele's wide appeal to all in the acting profession. What one person, alone, could not possibly finance we can offer because of our hundreds of clients. The determination, imagination and business ability which recognized the need for this expanded service has also made it a reality. Naturally we are delighted that so many fine actors and actresses have recognized the merit in all we have to offer.

THESE SERVICES INCLUDE:

THE VOICE LIBRARY—a permanent record of your abilities in all characterizations in which you feel competent.

HOSPITALIZATION—a standard plan at group rates.

TELEPHONE SERVICE—24 hours a day.

LAWYER AND ACCOUNTANT — for advisory purposes and at lower than regular fees.

MODEST FEES—an introductory rate of \$3.00 a month for the first ninety days. \$5.00 a month thereafter.

STRICT MONEY GUARANTEE — Here is an innovation of great worth to actor or actress. Ray-Tele agrees to compensate at scale any client who loses an engagement through Ray-Tele's negligence. Incredible? Well, almost. True? Definitely! While we have never yet been guilty of such negligence, Ray-Tele none-the-less stands ready to make good on this guarantee should it ever become necessary.

MAXINE KEITH

"From Me to You"

"ENTERTAINING EVENT!"

"Always an entertaining and helpful event for her listeners."

—RADIO DAILY

"NOVEL ANGLES THAT APPEAL!"

"She touches a wide assortment of subjects treating them with amiable informality. Is a ready talker with an easy delivery. Has many novel angles that appeal to listener."

—VARIETY

"ONE OF RADIO'S MOST VALUABLE LASSIES!"

"Besides those exciting interviews she is director of television shows and her knack of writing, staging and directing make her one of radio's most valuable lassies!"

Home Economics Directors of Stations in United States

WITH food and other commodities facing more stringent rationing, millions of women depend upon their home economics director to transmit to them and explain the status of the market and ration points.

Ever-changing conditions on the home front makes the woman director important in the life of nearly every family as she interprets the government's messages and the steps needed for complete cooperation between government and civilian.

Musical Directors of stations in the United States,—Canada

NONE in the studio is more conscious of the morale-building qualities of a radio program than the musical director who must keep in mind every facet of his listening audience. He selects his music for the war-worker, the housewife and the business man as well. In war as in peace he has always sought to broadcast a well-balanced series of popular or serious musical shows; now it is that vital type of fare that soothes the war-weary listener in the shortest possible time, and he is doing his job well.

**In meeting
the challenge of the future,
Western Electric
equipment leads the way**

War's end will bring a challenge to everyone. To those identified with communications and transportation, faster, better interchange of ideas and goods will be the order of the day.

We at Western Electric—with our 75-years heritage of leadership in communications equipment—believe we are peculiarly qualified to accept this challenge.

In world-wide telephony, broadcasting, aviation, marine and mobile radio—in every field where sound-transmission apparatus plays a part—Western Electric has led and will continue to lead the way. In these fields as well as in television, Western Electric will play a dominant part in the future.

To speed Victory, buy more War Bonds—and keep them!

Radio Equipment Manufacturers

Serving a Great Industry...

RADIO today is a major force in our national life. We turn to radio for information and instruction, for inspiration and for pleasure. Radio speaks to all ages and all degrees of men. It fills our homes with the beauty of music, the tonic of laughter, the brightness of truth. Radio is everyman's window on the world, an indispensable factor in the culture of America.

To serve such a great industry is both a privilege and a responsibility. For ten years, PRESTO has enjoyed that privilege, has been keenly aware of the responsibility. As the world's largest manufacturers of sound recording equipment and discs, we have striven to serve the radio industry as faithfully and with as high integrity as the radio industry has served the American people.

...and a great nation at war

PRESTO sound recorders are being used today to train Army and Navy personnel; to bring music and news to our front-line troops; to counteract enemy propaganda the world over. In addition, the PRESTO plant

has become a major supplier of electronic equipment for the armed forces. In these ways, and to the limit of our ability, PRESTO is contributing to our war effort.

PRESTO

RECORDING CORPORATION

WALTER P. DOWNS LTD., *In Canada*

WORLD'S LARGEST MANUFACTURERS OF INSTANTANEOUS SOUND RECORDING EQUIPMENT AND DISCS

EQUIPMENT MEN EYE THE PEACE

By H. N. Willets

Commercial Contract Service Manager, Radio Division, Western Electric Co.

THE full resources of the Western Electric Company, in peacetime the manufacturing and supply unit of the Bell System and a leading factor in the production of radio broadcasting equipment, are now centered on the production of communications and allied electronic equipment for the prosecution of the war. The company has become the nation's largest supplier of communications and electronic equipment to the Armed Forces.

War Production

Up to a recent month, for example, Western Electric had produced more than 5,000,000 military telephones and 300,000 sound powered telephones for war. It has been particularly active in the production of carrier telephone apparatus, a first cousin of radio. This includes some 55,000 miles of so-called Spiral-4 cable and associated carrier terminal equipment. In addition the company has delivered \$19,000,000 of "C" carrier systems whose terminal and intermediate equipment are housed in trunks with removable front and back covers especially for war purposes. The type "C" carrier sends three telephone conversations simultaneously over one circuit.

Additional Figures

Other war production figures of interest include 2,652,000 miles of wire in exchange cable of various sizes, 848,000 miles of wire in toll cable, 583,827 airplane radio receivers, 414,836 airplane radio transmitters, 33,101 combination airplane radio receivers and transmitters, 1,247,422 headsets for aviators and tank crews, 1,365,244 microphones, huge quantities of Radar, gun directors, control apparatus, switchboards and teletypewriters, including many adapted for radio. But for sheer numerical magnitude, perhaps no production record of the company compares with that of its quartz crystal output. As of the first of the year Western Electric's five crystal shops had completed and shipped some 12,000,000 crystals!

The above figures provide but a partial index to Western Electric's war business

as nearly half of it is now the manufacture of restricted equipments.

Peacetime Job Ahead

Although its production at present is concerned solely with winning the war, Western Electric has not forgotten the peacetime job which lies ahead. F. R. Lack, vice-president in charge of the company's Radio Division, announced last year Western Electric's intention to participate actively in postwar television. On that occasion he called attention to the company's huge production of both frequency and amplitude modulated radio equipment for the military. He said that the company intended to manufacture television broadcasting equipment after the war and to initiate an active program of television development as soon as war conditions permit. Distribution of this equipment, he said, will be undertaken by the Graybar Electric Co.

Other indications of the company's continuing interest in the broadcasting and allied industries is given by the resumption during the year of the Western Electric publication, "Pick-Ups," now called "Western Electric Oscillator." Its initial issue, late in the year, carried significant articles on FM, the military applications of broadcasting techniques and a particularly revealing feature entitled "A. T. & T. Plans for Television."

Perhaps Western Electric's present policy is best summed up by a statement made last year by Mr. Lack before the annual meeting of the FMBI:

Policy Outlined

"I am happy to say that we have nothing new to show you and nothing new to talk about. I am happy because I do not have to tell a soldier named Joe, who needed a radio very badly last month, that we could not deliver it because we diverted some engineers and some shop people to building the model of a new super-dooper FM equipment to show you and thus strengthen our postwar position. I am sorry that I can't tell you when we will be able to talk. But then, no one can tell me when the war will be over."

History of Communications. Number Twelve of a Series

COMMUNICATION BY THE BLINKER

The Blinker, an adaptation of the Heliograph with its own source of light, has been found invaluable for night and day Naval Communications. While limited by "line-of-sight" transmission and the elements of weather, it has been an aid to our cautious convoys during "radio silence."

When Victory is ours and the days of "radio silences" are gone forever, private citizens again will have electronic voice communication equipment for their yachts and other pleasure craft. With the release of civilian radio bands Universal will again offer the many electronic voice components for use in marine craft.

INSTANTANEOUS RECORDINGS

By Ralph C. Powell
Sales Manager, Presto Recording Corp.

THE commercial development of instantaneous recording started with the introduction of the coated disc in 1934 by the Presto Recording Corporation. Prior to that time recordings had been made on celluloid and sheet aluminum by an embossing process and such recordings were suitable for reference and filing, but not of sufficiently good quality to be used for reproduction of programs on the air.

It was not until the Spring of 1936 that the coated disc and the recording equipment with which it was used were developed to a point where instantaneous recordings could actually be broadcast with a quality comparable to live studio programs.

Accepted as Adjunct

The acceptance of instantaneous recording as an adjunct to radio station operation is in a large part due to outstanding news events which were recorded for broadcasting. Among the earliest was the broadcast of conversations between Professor Jean Piccard during his stratosphere balloon flight which took place in Detroit on October 23, 1934.

Charlie Atwater, along with other NBC engineers, set up recording equipment at the scene of the balloon ascension to record the transmissions from a small radio transmitter in the balloon. The ascension took place at 6:30 a.m. and recordings were made until the time of the maximum ascent of the balloon, which was over 50,000 feet above the earth's surface. The recordings were later broadcast by a number of stations.

Another dramatic event which was brought to the radio audience through the medium of recording was the Hindenburg disaster which occurred on May 6, 1937, at Lakehurst, N. J. Herbert Morrison, announcer, and Charley Nehlson, engineer, of WLS, Chicago, had conceived the idea of bringing recording equipment to the hangar at Lakehurst to record interviews with celebrities who were among the passengers of the first commercial trans-Atlantic flight of a lighter-than-air ship.

The Hindenburg, after being delayed for twelve hours by adverse winds, finally arrived at Lakehurst at 7:23 p.m. on the evening of May 6th, and had just

come into position for over the field with the crew lowering the mooring lines when there was a sudden burst of flame from the stern of the ship, followed by violent explosion.

Herbert Morrison gave one of the most dramatic accounts of the tragedy ever heard in the history of broadcasting and Nehlson managed to keep the recording equipment in operation in spite of the numerous explosions which often caused the cutter to jump off the disc.

The recordings were flown to the National Broadcasting Co. in New York for transmission over the wire lines to WLS. Officials of NBC were so impressed by the account that a rule of ten years' standing was set aside and the recordings broadcast through all of the stations of the NBC network.

Presidential Speeches

One of the first instances of recording a presidential speech occurred when President Roosevelt made an address at Roanoke Island commemorating the 350th anniversary of the birth of Virginia Dare. At the presidential request the speech was recorded by WBT for the archives. Today all presidential speeches are recorded for re-broadcast to the larger radio audiences during the evening.

Other historic recordings followed, among them the Abdication Speech of King Edward VIII, recorded from the broadcast of the British Broadcasting System and rebroadcast here over the net works. During the war the Canadian Broadcasting Corporation Overseas News Service has been recording interviews with Canadian servicemen on the many battle fronts and transmitting the disc recorded material by shortwave to the CBC network stations in Canada.

During the past six years over 500 U. S. broadcasting stations have become engaged regularly in the production of instantaneous recordings since it provides the only means for unscrambling the present crowded program schedules. Radio stations having recording facilities have made investments running from \$600.00 to several thousands dollars, depending upon the program activity and the frequency with which the programs are required.

The revenue from delayed broadcasts pays for itself many times each year. Technical developments in recording equipment have made it possible for stations to produce recordings which cannot be distinguished from live studio programs, except for the transcription announcement required by FCC regulations.

Since 1936 the Federal Communications Commission has used recording equipment at their various monitoring stations for the study of fading and interference conditions among AM broadcasting stations. Recently the FCC recorded the signals of an FM station, presumed to have a range of 50 to 60 miles at a point over 1000 miles away, proving the existence of sky wave transmission in the 40 to 50 megacycle channels. These recordings formed a basis for the FCC proposal that FM stations be shifted to the higher frequencies.

Date lines of any newspaper during wartime have shown leading press associations, as well as the FCC, daily recording broadcasts of enemy propaganda originating in Tokyo and Berlin and occupied countries.

Development in Equipment

Developments in recording equipment have been along numerous lines depending upon the user's requirements. In 1937 Presto placed on the market an inexpensive portable home recorder which revived an interest that had been dormant since the days of the RCA pre-grooved discs introduced in the late twenties. By 1940 at least 50 prominent radio set manufacturers were offering combination radios which included in addition to the radio receiver an automatic record changer and a recording mechanism that permitted making records either from a microphone or "off the air." Inexpensive discs were developed for home use and recording became a hobby with hundreds of thousands of set owners. An unusual commentary on public interest was the well known comic strip, "Pa's Son-in-Law," which appeared in the N. Y. Herald Tribune and other papers on June 6, 1937.

This interest has appeared in another form during wartime. When military preparations first started, the United Service Organizations installed sound recorders in their various clubhouses located near army training camps to enable servicemen to send recorded messages to their families and friends. The Pepsicola Company has extended the same service to outposts on the foreign battle fronts.

Recording studios in operation in all of the larger cities are now providing a service for those who wish to send recorded replies back to the men and women in service. Many radio stations were at one time making recordings at army training camps for local interest programs.

The commercial airlines have found it a necessity to record all plane to ground conversations from airliners to principal airports so that they may review reports of unexpected weather or operating conditions or events leading up to an accident.

Wire Recordings

Magnetic wire and tape recording are receiving considerable attention at the present time. The advantages of magnetic recording are several. In the first place there is no material cost of operation. Recordings may be made on the magnetic material and played back for transcribing. The wire is then rewound and, as it is recorded a second time, the previous sound is "erased" from the wire just before the application of the new recording. Such recorders are available either for recording a short message lasting a minute or two on an endless steel tape or fifteen or twenty minutes continuously on a wire passing between two reels similar to motion picture film. Magnetic recorders are not seriously affected by shock or vibration and have, therefore, found uses on the battle fronts where recordings are made under actual battle conditions. The tonal range of present commercial magnetic recorders is suitable for reproduction of intelligible speech only, variations in the wire speed during recording and reproduction making it unsatisfactory for musical reproduction. These faults will undoubtedly be eliminated in postwar magnetic recorders, but there is a further disadvantage that it is difficult to find any particular portion of the sound recording without playing back other parts leading up to it and while the tape may be speeded up for rewinding to reduce the time required to return to the start of the recording, there is a definite limit to the safe speed at which a wire four thousands of an inch in diameter can be rewound.

Post-war developments already announced include magnetic recording facilities in home radio sets. A magnetic juke-box to be installed in the dashboard of automobiles and high quality disc recorders capable of recording 15 minute continuous programs from the home radio.

Radio Manufacturers Association

Officers and Executive Personnel—1944-1945

Headquarters: 1317 F. St., N.W., Washington, D. C.

President

R. C. Cosgrove, The Crosley Corporation, Cincinnati 25, O.

 Other members: M. F. Balcom, Monte Cohen, R. C. Cosgrove, W. P. Hilliard, W. F. Hosford, E. E. Lewis, E. A. Nicholas, Percy L. Schoenen, A. S. Wells, and Fred D. Williams.

Chief Engineers

Of Stations in United States and Canada
As of January 1, 1945

UNDoubtedly, radio's real man behind the gun is the chief engineer of the station. Charged with keeping the outlet on the air come hurricane, power failure or overworked equipment, in fact what-have-you, the engineer proceeds to make the best of what he has and does a highly commendable job of it. Manpower drainage has hit him hard, but the station must broadcast as per schedule, and nowhere in the world does the technical side of broadcasting operate so efficiently as in the United States. Apart from this responsibility, the engineer keeps abreast of the times as to FM and television.

REL is Ready

FOR A FUTURE — BUILT UPON A PAST OF ACCOMPLISHMENTS

REL has long been the leader in the development of fine FM Broadcast Equipment employing the Armstrong Crystal Controlled Phase Shift System of Modulation. The record speaks for itself! Numerous REL FM stations—1 KW to 50 KW—have been in continuous, successful operation over a period of years.

REL pioneering has resulted in some vitally important "FIRSTS" in FM...

FIRST

(and only one) to ever successfully install a 50 KW. FM transmitter. Four of ours are operating daily and have been since 1941.

FIRST

to develop and install a studio to transmitter radio relay.

FIRST

to develop and install transmitter to transmitter radio relay, thereby making possible the FM networks.

Our pre-war successes have been the result of specialization in FM installations. FM is not an REL sideline . . . it is the actual basis of our operations! Our staff of engineers have unique experience . . . experience that enables them to plan and carry through the most difficult FM installations . . . experience that assures REL of a tremendous future in FM. The groundwork—the pioneering—is complete! We are ready to reassume our major role in FM broadcasting as soon as conditions permit.

RADIO ENGINEERING LABS., INC.,
LONG ISLAND CITY, N. Y.

PROGRESS OF FM DURING 1944

By Myles L. Loucks

Managing Director, FM Broadcasters, Inc.

NINETEEN FORTY-FOUR was the year in which FM took its rightful place as the next big step forward in entertainment radio. It was a year of re-birth, of furious planning, of growth so rapid that the rosy-hued predictions of January were drably conservative by July and had to be made all over again in October.

The static-free, full-fidelity system of broadcasting had its re-birth at the Fifth Annual Meeting of FM Broadcasters, Inc. An unprecedented throng of 750 broadcasters from all over the nation turned up in New York in January to hear the FM story through one of the most serious radio conventions in history.

It was at this session that the trade association decided to re-open its offices in Washington. As the new year begins these offices are being expanded. The two-room suite at 711 Colorado Building is being replaced by a spacious five-room layout at 1730 Eye Street, N. W., in the capital city. The staff has been expanded from two to five.

At the beginning of 1944 there were 42 FM commercial stations on the air, ten firms held construction permits and there were 62 applications on file with the FCC. Five experimental stations were operating.

Estimated Production

It was on the basis of these figures that industry leaders at the FMBI January session predicted 5,000,000 sets would be built in the first year of peace. They foresaw 500 FM stations operating within 10 years. By September these predictions were corrected to indicate 10,000,000 sets and thousands of FM stations. Manufacturers presented a solid front in their intentions to include FM in the sets they will build.

During 1944 four more commercial FM stations took to the air. In January, Head of the Lakes Broadcasting Company, obtained a commercial license for WDUL at Superior, Wisconsin. In May, WTAG-FM was finally given the commercial nod at Worcester, Mass. The Worcester Star Telegram Publishing Company was one of the pioneers on experimental FM operations. KMBC-FM, the Midland Broadcasting Company's station at Kansas City, aired its first

commercial broadcast, June 24. NBC's experimental station W2XWG became WEAF-FM in August and was the 46th commercial FM to go on the air.

But it was the FCC's pending file which turned out to be the real FM barometer of progress. A steady flow of FM requests began reaching the Commission following the January FMBI convention. By March there were more than 100 on file. The 200-mark was passed in August. By December the number had grown to more than 300.

At the end of the year FM stations existing and proposed represented coverage for 200 different localities in all but seven of the less densely-populated states. It has been estimated that these will provide FM's service to more than 100,000,000 Americans or approximately 80 per cent of the nation's buying power.

Applicants Serious

The seriousness with which these people approach the FM future is evidenced by the fact that all but a few of the applications are accompanied by full engineering data. More recently this seriousness has also been reflected in the cooperation the Commission is getting from some of the applicants through the setting up of developmental stations.

During the Summer the Commission began dropping hints that it would welcome investigation of this type. Volunteers responded quickly and today more than a dozen developmentals are setting forth on studies in as many different parts of the nation. They aim to solve the problems which always crop up in a rapidly expanding field.

But perhaps the most important planning from an engineering standpoint was that done by Panel 5, the FM panel of the Radio Technical Planning Board. All year this group went energetically about the review and development of standards for FM broadcasting. It was one of two RTPB panels to complete its report in time for the FCC General Allocation Hearing upon the record of which the Commission will allocate the entire radio spectrum for all post-war communications. The recommendations of this panel were eventually endorsed by the entire planning board, the radio manu-

Functions

FMBI is a non-profit association of FM boosters founded to see that frequency modulation advances in a coordinated logical manner; to guarantee that its interests are furthered and protected and to represent the FM industry in Washington; to provide an advisory service for its membership stations; to offer liaison between broadcasters and manufacturers interpreting the problems of each; to conduct a program of promotion and publicity aimed at stimulating public interest, and to provide a competent and accurate service for the truthful dissemination of information concerning FM. Membership includes individuals and companies who have an FM station, a construction permit or an application on file with the FCC for one.

(Continued From Preceding Page)

facturers and FMBI only recently ratified its endorsement on the basis of the record and supplementary data.

Another important phase of FM planning and growth took place among the educators of the nation. Seeing in FM a second and better chance to utilize radio in education, the educators have embarked upon an ambitious program to attain what FCC Commissioner Clifford J. Durr has called "a whole new radio kingdom."

The U. S. Office of Education, Federal Security Agency, has been coordinating this work with nearly all of the important educational organizations of the country participating.

Aiming for the most economical use of whatever frequencies will be assigned to them (they now have five), the educa-

tors have been planning state-wide broadcasting networks. Thirty of the 48 states have such networks in some phase of preparations. Unlike the commercial people who must necessarily concentrate their signal strength to serve the greatest possible number of people, the state educational nets are being designed to provide a listenable FM signal to every resident no matter where he may live.

Commercial and educational FM combined is bound to provide service to the nation, the equity of which has never before been approached.

FM enters 1945 with the hope that an early victorious peace will congeal all this planning and that to come into a broadcast structure befitting the greatest democracy and the greatest nation in the world.

FM NEWS HIGHLIGHTS—1944

From RADIO DAILY

Increasing interest in frequency modulation broadcasting is indicated in an appraisal of the FM news carried in RADIO DAILY during the past year. Following pages chronologically record the highlights of the year's FM news developments.

JANUARY

- Jan. 19—Application for an FM station was filed with the FCC today by the New York "Times." This application, coming right after the FCC sanctioned the ownership of radio stations by newspapers, indicated the matter had been under consideration for some time.
- Jan. 24—NBC issued a statement to the effect that the network had investigated the possibilities of FM from every angle.
- Jan. 26—The fifth annual meeting of the FM Broadcasters Inc. opened today at the Hotel Commodore in New York City, with record attendance indicated.
- Jan. 27—James Lawrence Fly, head of the FCC, commends FM and the FMBI. Addressing a luncheon gathering of more than 600, he declared that FM "stands on the threshold of tremendous developments." He also brought a letter of greeting from President Roosevelt.

FEBRUARY

- Feb. 7—FM programming was expanded by CBS over WABC-FM with the announcement that the New York Philharmonic Symphony and the Philadelphia Orchestra will henceforth be heard as a regular feature.
- Feb. 9—Phamlets are to be released shortly by the Office of Education entitled "FM for Education." They are for the purpose of disclosing to the public the post war plans for the FM channels reserved for education.
- Feb. 16—Seventeen out of the 77 FM applications pending with the FCC at the start of this week were from newspapers, a study of the list indicates.
- Feb. 24—Applications were filed with the FCC today for 5 FM stations by the National Broadcasting Company. Two FM applications by NBC are already pending.

MARCH

- March 17—An FM station to carry on "research to foster the development" of that type of broadcasting will be built in the Capital area, with its transmitter located at Olney, Maryland, according to Columbia University's department of public information, which further states that the new station will be a replica of Major Armstrong's outlet at Alpine, N. J.
- March 21—Full expansion into both the field of FM and that of television by the Blue web, was forecast by Mark Woods, president, in an address to 47 departmental heads at a recent managerial meeting held at the Waldorf-Astoria hotel. Woods also revealed that applications for several FM stations have been filed.

APRIL

- April 13—According to the files of the FCC, applications for FM stations have been more than triple the number of applications for AM stations during the first three months of the year.
- April 18—A recent survey in the New York and Metropolitan area to determine what makes people listen to FM reveals that about 18 per cent desire the better reception on classical music, while another 11 per cent like the fact that there is less advertising and commercials on FM programs.
- April 25—Growing interest of the nation's newspaper publishers and editors in postwar FM and television was indicated at the convention of the American Newspaper Publishers Association which opened yesterday at the Waldorf-Astoria.
- April 26—FM broadcasting will replace AM broadcasting entirely within eight to ten years after transmitters and receiving sets are made available to the general public, according to a prediction by Walter J. Damm, president of FM Broadcasters, Inc., at the final session of the American Newspapers association convention, yesterday.

MAY

- May 12—The practical use of tele will be delayed at least five years in favor of the further development of FM, was the theory advanced by Edward W. Wood, Jr., general sales manager of Mutual, in a speech made this week before members of the New Orleans Advertising Club.
- May 23—A discussion of FM and tele will be included on the agenda of the spring meeting of the CBS Affiliates Advisory Board which will be held at the network's headquarters in New York City May 24th and 25th.
- May 24—Yesterday the FCC questioned all national and regional networks in regard to their policy on net shows for FM. Full replies of present policies and future plans were asked for by the commission in an effort to determine how closely the FM program will adhere to the AM program line. The survey was inspired by recent NBC and CBS contracts with their affiliates, to wit: stations having FM outlets could carry net FM shows free of charge providing the AM outlet also carried the show.
- May 26—Arrangements have been completed between the Mexican government and that of the United States to present the new uses of FM in a special exhibit in Mexico City from June 1 to the 8th. It was indicated that FM provides the solution to the Mexican Ministry of Education's problem of carrying their education program into the sparsely settled mountain areas.

JUNE

- June 1—Raymond F. Guy, NBC radio Facilities Engineer, addressed the Institute of Radio Engineers in Indianapolis recently on the merits of FM. Stressing the greater value of FM as compared with AM broadcasting, he demonstrated his talk with records made in the field, mainly in the higher frequencies, and brought out the ability of FM to reject interfering signals on the same frequencies.
- June 9—In a detailed technical report released today, the FCC sought to explain the cause of the "bursts" they have on many occasions recorded. They are at present unable to define the cause, but the report gives much data on the rate of occurrence, etc. A "burst" is a sudden increase in signal strength of very short duration, and is frequently noted on sets from 300 to 700 miles from the transmitter, those nearer being protected by the steady groundwave, and those further away, for some reason, not being strongly affected.
- June 15—A new map issued recently by the FM Broadcasters Association reveals that there are 44 FM stations now in operation in 36 states, and at the present time there are 163 applications pending with the FCC in

Washington. It is estimated that the applicants may spend over \$10,000,000 for equipment.

JULY

- July 3—Three new applications were filed with the FCC yesterday, all from standard broadcasters. The applicants are KTRH, Houston, Texas; WBIG, Greensboro, N. C.; and WFCI, Pawtucket, R. I.
- July 18—The Winston-Salem, N. C., high schools with the cooperation of WMIT, North Carolina's pioneer FM station, have proposed a plan for use of FM stations for educational purposes throughout the state in the post war period. As an experiment, four speakers have been installed by WMIT in four of the leading high schools, and the station's staff is working with the school board to create special programs in various educational fields, which will be fed directly to the schools.
- July 19—An announcement by the FCC reveals that the commission plans to carefully scan all future requests for FM stations for educational purposes with a view to state educational plans. This survey results from the great interest shown in the proper use of the five FM bands set aside for educational purposes.
- July 27—The Trans-Canada Air Lines has taken a step which may be a forerunner for all commercial air lines, by installing complete two-way FM equipment at their various airports and travel bureaus. The aim is to speed up communications regarding tickets, reservations, etc., as much as possible. The new equipment is of ultra high frequency, and is the first such equipment to be installed either in Canada or in the United States.
- July 31—Wide distribution to the public is planned for the forthcoming FM book being published jointly by the FM Broadcasters, Inc., and manufacturers of FM equipment. In order to insure as wide a distribution as possible, the FMBI has issued an initial print order of 200,000, with the equipment companies expected to raise the number considerably.

AUGUST

- Aug. 24—Post-war planning in the field of FM broadcasting will come up for discussion at the final session of the NAB convention, Thursday, Aug. 31. Because of the rapidly growing interest in this field, the NAB officials announced that the entire afternoon would be turned over to this subject.
- Aug. 30—"One of the most fundamental problems of all Blue Network affiliates at the present time is FM broadcasting." This was the statement made by Mark Woods, president of the Blue web, before a group of

network affiliate managers at the NAB convention. Predicting great post war expansion of that type of broadcasting, Woods said that there would be 20,000,000 sets in operation within four years after the war. The change from AM to FM will be gradual, and will take from 5 to 10 years. In view of these facts, Wood urged all Blue affiliated stations to make immediate application with the FCC for FM outlets.

SEPTEMBER

- Sept. 7—In order to increase WOR's news services, WBAM, WOR's FM outlet, will extend their broadcast schedule to seven days a week, Alfred J. McCosker, president, announced yesterday.
- Sept. 11—The FCC announced Friday that it is preparing its own FM station, a portable affair in a trailer, which should be ready for operations next week. The outfit will be used to gather information in and around Washington for use in the coming frequency allocations hearings to be held here at the end of the month. The new station's call letters will be W3XFC, and it will operate variously on from 42 to 50 megacycles, both wide and narrow bands.
- Sept. 22—Operating under newly assigned call letters, WEAJ-FM, NBC's FM outlet in New York City, begins operations Sunday on a seven-day-a-week basis. The FM station will carry, wherever possible, regular NBC commercial shows, including the commercials, free of charge.
- Sept. 26—The importance of the need for the Blue network to look into the field of FM broadcasting and to catch up with the other webs in this phase of electronics was stressed by Edgar Kobak, executive vice president of the web, at a luncheon for the press in the lounge of the Waldorf-Astoria yesterday.

OCTOBER

- Oct. 2—A settlement of the differences of opinion between FM and tele interests was reached Friday at the FCC allocations hearings. After various conflicting claims and other disputes were ironed out, the FM bands decided upon were from 41 to 43 megacycles for educational and other non-commercial FM outlets, and from 43 to 56 megacycles for commercial FM. These results are not final, however, and the matter will come under further discussion.
- Oct. 13—Lengthy questioning concerning the anticipated post war construction of FM receiving sets at the FCC allocations hearing

today lent added weight to the impression that FM service may eventually be moved up to about 90 megacycles with room for 100 or more 200-kilocycle channels.

- Oct. 17—In a poll conducted by General Electric, post war purchase lists include an FM receiving set at least nine times out of ten, according to the replies turned in by 16,635 GE stockholders, and 1,538 dealers.
- Oct. 23—Trend of the testimony given at the FCC's frequency allocation hearing today showed no desire on the part of FM broadcasters to move up the spectrum, apparently upsetting plans of the commission to move the service up.

NOVEMBER

- Nov. 3—William B. Lewis, vice-president and radio director of Kenyon & Eckhardt predicted the formation of a fifth major network to be FM and press-owned. At the same time he intimated that the present four major AM nets would eventually transform themselves into FM webs.
- Nov. 6—J. Harold Ryan wrote a letter to the FCC opposing the proposed FM subscription plan, stating that it would be inadvisable to "sacrifice" our present broadcasting industry for what is, in effect, a "multiple address system." Ryan also stated that radio had served the public well, and planned further expansion in the future.
- Nov. 22—CBS began their new improved FM service today when they put into operation their new 800 foot antenna located on the roof of 500 Fifth Ave. The new antenna has three kilowatts and extends the broadcasting radius from less than 50 miles to about 60 miles.

DECEMBER

- Dec. 8—It is anticipated that the subject of Mutual's future expansion into the field of FM broadcasting will come up for extensive discussion tomorrow at the web's board of directors meeting at the Ambassador Hotel. This is regarded as most likely, due to Ed Kobak's, Mutual's new president, well-known interest in FM.
- Dec. 14—Walter J. Damm, general manager of WTMJ, Milwaukee, and president of the FM Broadcasters, Inc., in New York this week for radio conferences, revealed that the total applications for FM stations had reached 310, and that the industry was very optimistic about the post-war market.

FM ALLOCATION PROPOSALS

AT THE Allocation Hearings held before the FCC and prior to the one held late in February of this year, it was decided that existing FM stations would not be required to move upward until new receivers capable of tuning in the new wave lengths are generally available.

According to the FCC the cost to the public "would not be great" and that the present 500,000 FM sets are mostly combination sets capable of receiving both AM and FM. These, said the Commission, are several years old and some of them could be converted. In any event, the FCC stated, the existing receivers or attachments would become partially obsolete if the recommendations of the FM industry to widen the band were followed. Cost of remodeling FM transmitters would not be substantial, the FCC held.

Disputing the FCC findings along this line and the frequency swap believed to benefit television out of proportion to that received by FM, the FM interests marshalled their forces at the latter hearing. After explanatory remarks on the status of FM as brought up at the original hearings, the FCC issued the following re Temporary Allocations For FM Stations:

FM Temporary Allocations

"The Commission is desirous of establishing FM in its new place in the spectrum as soon as possible in order that the 42 to 50 mc. band can be made available for use by other services which are being assigned to these frequencies. It is recognized, however, that very few receivers for reception in the proposed 84 to 102 mc. band will be available for some time after materials and manpower become available for this purpose. Accordingly, existing FM stations will not be required to move to new assignments in this band until such time as new receivers are generally available and in the hands of the public. At that time, the Commission will assign a frequency in the 84 to 102 mc. band to each existing licensee who will then be expected within a reasonable period of time to make the necessary arrangements for operation on the newly assigned frequency. It is believed this procedure will great facilitate

the transition of FM stations to their new location.

"As pointed out in Section 10 on television 44 to 50 mc. will be assigned as the first television channel. Accordingly, in order that this space may become immediately available for use by television broadcasters, existing FM licensees will be given new assignments within the 42 to 44 megacycle band to operate on such channels until, as stated above, they are moved to a higher frequency in the 84 to 102 mc. region. No hardship should result from this change since existing FM sets are capable of receiving in this range which is already part of the FM band. In the congested areas sharing time may be required temporarily. This will permit change over of frequency of one transmitter to the new frequencies while maintaining operation on the lower frequencies.

Economic Factors

"The cost to the public as a result of moving FM from its present band to the proposed higher band will not be great. There was testimony that approximately 500,000 FM receivers are now in the hands of the public consisting principally of combination sets capable of receiving both AM and FM. (Damm, Tr. 1047). These sets are, of course, several years old.

"Even if the present FM band were retained, these receivers would become partially obsolete insofar as FM reception is concerned since an expansion of the existing 42 to 50 mc. band would place a number of stations out of range. In some cases, old FM receivers can be converted for reception on the higher frequencies. Moreover, present AM receivers can include FM detachments which will not be appreciably more costly in the 84 to 102 mc. band than in the present band (Cotter, Tr. 1107).

"Insofar as transmitting equipment is concerned, the shift to the higher frequencies will not cause a substantial loss to the respective licensees in that a large part of the existing investment will not be affected, such as buildings, towers, power equipment, which will remain unchanged. Also, most of the transmitting

equipment can be modified to operate on the higher frequencies without unreasonable cost."

In connection with issuing the temporary allocations, the Commission said in part ". . . the large percentage of AM licensees among the present FM applicants and the economic advantage which AM licensees have in building and operating FM stations more cheaply raise serious questions as to whether, unless some special measures are taken to that end, this objective will be accomplished. The Commission recognizes that until a substantial number of receivers are in the hands of the public, FM broadcasting will not be a self-supporting operation.

"To keep the door open for later applicants, the Commission is considering the adoption of the following plan: 50 FM commercial channels will be available for assignment both to present licensees and to newcomers in the radio field. This policy will afford existing AM licensees an opportunity to enter FM if they so desire, and in addition will enable some new persons to participate in FM's early development. The remaining 20 FM commercial channels will be reserved from assignment at the present time to be licensed in the future in accordance with rules and regulations subsequently to be promulgated."

THE N A B CODE

ADOPTED BY THE 17th ANNUAL CONVENTION OF THE NAB

JULY 11, 1939

(Amended April 28, 1943)

RECOGNIZING the importance of radio broadcasting in the national life and believing that broadcasters have sufficient experience with the social side of the industry to formulate basic standards for the guidance of all, the National Association of Broadcasters hereby formulates the following revised Code:

Children's Programs

Programs designed specifically for children reach impressionable minds and influence social attitudes, aptitudes and approaches and, therefore, they require the closest supervision of broadcasters in the selection and control of material, characterization and plot.

This does not mean that the vigor and vitality common to a child's imagination and love of adventure should be removed. It does mean that programs should be based upon sound social concepts and presented with a superior degree of craftsmanship; that these programs should reflect respect for parents, adult authority, law and order, clean living, high morals, fair play and honorable behavior. Such programs must not contain sequences involving horror or torture or use of the supernatural or superstitious or any other material which might reasonably be regarded as likely to over-stimulate the child listener, or be prejudicial to sound character development. No advertising appeal which would encourage activities of a dangerous social nature will be permitted.

To establish acceptable and improving standards for children's programs, the National Association of Broadcasters will continuously engage in studies and consultations with parent and child study groups. The results of these studies will be made available for application to all children's programs.

Controversial Public Issues

As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

Time for the presentation of controversial issues shall not be sold, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussion and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to

pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discussion on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topics to be discussed would be surrendered. Third, and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it.

The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.

Nothing in the prohibition against selling time for the presentation of controversial public issues shall be interpreted as barring sponsorship of the public forum type of program when such a program is regularly presented as a series of fair-sided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network.

Educational Broadcasting

While all radio programs possess some educative values, broadcasters nevertheless desire to be of assistance in helping toward more specific educational efforts, and will continue to use their time and facilities to that end and, in cooperation with appropriate groups, will continue their search for improving applications of radio as an educational adjunct.

News

News shall be presented with fairness and accuracy and the broadcasting station or network shall satisfy itself that the arrangements made for obtaining news insure this result. Since the number of broadcasting channels is limited, news broadcasts shall not be editorial. This means that news shall not be selected for the purpose of furthering or hindering either side of any controversial public issue nor shall it be colored by the opinions or desires of the station or network management, the editor or others engaged in its preparation or the person actually delivering it over the air, or, in the case of sponsored news broadcasts, the advertiser.

The fundamental purpose of news dissemination in a democracy is to enable people to know what is happening and to understand the meaning of events so that they may form their own conclusions and, therefore, nothing in the foregoing shall be understood as preventing news broadcasters from analyzing and elucidating news so long as such analysis and elucidation are free of bias.

News commentators as well as all other newscasters shall be governed by these provisions.

Religious Broadcasts

Radio, which reaches men of all creeds and races simultaneously, may not be used to convey attacks upon another's race or religion. Rather it

should be the purpose of the religious broadcast to promote the spiritual harmony and understanding of mankind and to administer broadly to the varied religious needs of the community.

Solicitation of Memberships

Solicitations of memberships in organizations, except where such memberships are incidental to the rendering of commercial services such as an insurance plan either in respect to casualty to life or property, or for membership in the American Red Cross or like organizations engaged in charitable work, are deemed to be unacceptable under the basic theory of the Code and therefore time should be neither given nor sold for this purpose.

Commercial Programs and Length of Commercial Copy

Acceptance of programs and announcements shall be limited to products and services offered by individuals and firms engaged in legitimate commerce; whose products, services, radio advertising, testimonials and other statements, comply with pertinent legal requirements, fair trade practices and acceptable standards of good taste.

Brief handling of commercial copy is recommended procedure.

Member stations shall hold the length of commercial copy, including that devoted to contests and offers, to the following number of minutes and seconds:

Daytime

Five-minute programs	2:00
*Five-minute news programs	1:45
Ten-minute programs	2:30
Fifteen-minute programs	3:15
Twenty-five-minute programs	4:15
Thirty-minute programs	4:30
Sixty-minute programs	9:00

Night-time

Five-minute programs	1:45
*Five-minute news programs	1:30
Ten-minute programs	2:00
Fifteen-minute programs	2:30
Twenty-five-minute programs	2:45
Thirty-minute programs	3:00
Sixty-minute programs	6:00

Exceptions:

The above limitations do not apply to participation programs, announcement programs, "musical clocks," shoppers' guides and local programs falling within these general classifications.

Because of the varying economic and social conditions throughout the United States, members of the NAB shall have the right to present to the NAB for special ruling local situations which in the opinion of the member may justify exceptions to the above prescribed limitations.

* Further restriction by individual stations is recommended.

Be It Resolved

Adopted by the 17th Annual Convention
National Association of Broadcasters

To clarify the phrase "Accepted Standards of Good Taste," and the canons of good practice set forth in the NAB Code, therefore be it RESOLVED:

That member stations shall not accept for advertising:

1. Any spirituous or "hard" liquor.
2. Any remedy or other product the sale of which or the method of sale of which constitutes a violation of law.
3. Any fortune-telling, mind-reading, or character-reading, by hand-writing, numerology, palm-reading, or astrology, or advertising related thereto.
4. Schools that offer questionable or untrue promises of employment as inducements for enrollment.
5. Matrimonial agencies.
6. Offers of "homework" except by firms of unquestioned responsibility.
7. Any "dopester," tip-sheet or race track publications.
8. All forms of speculative finance. Before member stations may accept any financial advertising, it shall be fully ascertained that such advertising and such advertised services comply with all pertinent federal, state and local laws.
9. Cures and products claiming to cure.
10. Advertising statements or claims member stations know to be false, deceptive or grossly exaggerated.
11. Continuity which describes, repellently, any functions or symptomatic results of disturbances, or relief granted such disturbances through use of any product.
12. Unfair attacks upon competitors, competing products, or upon other industries, professions or institutions.
13. Misleading statements of price or value, or misleading comparisons of price or value.

Asst. Treas. Richard Turnbull
Director of Service L. W. MacKenzie
Counsel McKercher & Link

FUNCTIONS

The American Association of Advertising Agencies was formed in 1917 by the amalgamation of the New England, New York, Philadelphia, Southern and Western Advertising Agency Associations—to promote the interests and raise the standards of advertising and of the advertising agency business.

It welcomes to membership any advertising agency qualified to aid in this purpose by reason of its ability to serve the cause of advertising, its financial soundness and its demonstrated desire to adhere to sound and ethical business practices.

The aims of the Association are partly ethical and partly economic. It is a professional body and also a trade association. It aims to raise standards, to improve technique, to ascertain values, to safeguard relations, and to cooperate with other organized effort in related fields.

One of the major aims of the Association is to keep advertising agency practice on a high level, in order that it may be most useful to the advertiser, most helpful to the publisher and respected by business men.

Early in its career the Association adopted for the guidance of its members two official statements. One is entitled "Agency Service Standards," in which agency service is defined, so that advertisers and publishers may know what to expect and agencies may know what should be required of them, thus discouraging the incompetent and encouraging those equipped to render effective service.

The other statement, entitled "Standards of Practice," deals with agency relations with media, clients and the public, with fair and ethical agency competition, and other professional ethics.

 Acting Communication Manager.....Carol K. Witte

FUNCTIONS

The American Radio Relay League is a non-commercial association of radio amateurs, bonded for the promotion of interest in amateur radio communication and experimentation, for the relaying of messages by radio, for the advancement of the radio art and of

the public welfare, for the representation of the amateur in legislative matters, and for the maintenance of fraternalism and a high standard of conduct. The League publishes QST, a publication devoted solely to amateur radio, issued monthly. It also publishes The Radio Amateur's Handbook annually and other publications.

Johnson, Director of Developmental Programs, WBNS; John Moses, Production Manager, WHKC; H. W. Nisonger, Chairman, University Radio Education Committee; I. Keith Tyler, Director of the Institute.

FUNCTIONS

This annual national conference was established in 1930 at the Ohio State University to provide for joint discussion, by broadcasters, educators and civic leaders, of the problems of educational broadcasting. The program is devoted chiefly to consideration of the policies and techniques of radio and is developed from the suggestions and recommendations of those attending the Institute in previous year. No resolutions are passed. The Institute also sponsors the American Exhibition and Citations of Educational Radio Programs which gives awards and honorable mentions to outstanding program series.

Institute of Radio Engineers, Inc.

330 West 42nd St., New York 18, N. Y.
MEdialion 3-5661

OFFICERS

Assistant Secretary-Treasury O. B. Hanson

DIRECTORS

Dr. Allen B. DuMont, Allen B. DuMont Laboratories, Inc.; F. J. Bingley, Philco Corp.; Curtis W. Mason, Earle C. Anthony; Jack R. Poppele, WOR, New York,

• • • ORGANIZATIONS • • •

FUNCTIONS

Founded January, 1944, as a non-profit organization of television broadcasters and others engaged in any business directly connected with television broadcasting. Objects are "to foster and promote the development of the art of television broadcasting; to protect its members in every lawful and proper manner; to foster, encourage and promote laws, rules, regulations, customs and practices which will be in the best interest of the public; to protect the interests of the members of the Association by opposing the enactment of adoption of any laws, rules, regulations, customs or practices which would discriminate against or in any way injure the members of this Association."

Television Press Club of New York

c-o Miss Elizabeth Forsling
Radio Editor, Newsweek
152 West 42nd St., New York, N. Y.

BOARD OF GOVERNORS

Chairman, Stanley Kempner, Retailing Home Furnishings; Vice-Chairman, Lewis Winner, Communications; Secretary, Elizabeth Forsling, Newsweek; Treasurer, Clifford E. Denton, Daily News; Committee Chairmen: Publicity, T. R. Kennedy, Jr., New York Times; Membership, Ben Kaufman, Television Magazine. Other Members: M. H. Shapiro, Radio Daily; Bruce Robertson, Broadcasting; Wanda Marvin, Billboard; Patricia Murray, Printer's Ink.

FUNCTIONS

A non-profit, unsponsored organization, this informal group was formed in 1944. Membership is limited to the professional television press—writers covering tele for newspapers, magazines, the trade press, books, films and radio. Purpose is to foster the sound development of television by serving as a focal point for members of the tele press to meet regularly and discuss current trends. Prominent figures in television are invited as guest speakers for the luncheon meetings.

Twenty Year Club

167 East 64th St., New York, N. Y.
REgent 4-3344

Founder H. V. Kaltenborn

FUNCTIONS

To provide a means for marshalling the forces of advertising so that they may be of maximum aid in the successful prosecution of the war.

War Food Administration

Office of Distribution
Radio & Market News Section
Washington 25, D. C.
Republic 4142—Extension 6373, 5707

OFFICERS

Chief Elwyn J. Rowell
Chief, Radio Unit Joe Tonkin

BRANCH OFFICERS

CHICAGO: 5 So. Wabash Ave.; Jim Chapman, Chief, Radio $\frac{7}{8}$ Market News.
ATLANTA: Western Union Bldg.; Jim Romine, Chief, Radio & Market News.
NEW YORK: 150 Broadway; Donald C. Lerch, Chief, Radio & Market News.
SAN FRANCISCO: 821 Market St., J. D. Walsh, Regional Chief.
DALLAS: 425 Wilson Bldg.; Harold Bryson, Chief, Radio & Market News.

FUNCTIONS AND ACTIVITIES

This Section is responsible for all radio dissemination through national, regional and local programs of information from the Food Distribution Administration on Food Orders, Nutrition, Conservation, School Lunch, Food Supplies and Price Trends, and Farm Market Reports. It issues "Radio Round-Up On Food" weekly for Women's Program Directors, and in 20 cities issues Wartime Food Bulletins for use over local stations. Also prepares daily or weekly material for U. P., P. A. and I. N. S. radio wires. Writes and co-produces "Consumer Time," weekly broadcast over NBC now in its 12th year.

ORGANIZATIONS

Washington State Association of Broadcasters

207 East Market St., Aberdeen, Wash.
Aberdeen 4098

OFFICERS

President.....Harry R. Spence
(KXRO, Aberdeen)
Vice-President.....Loren Stone
(KIRO, Seattle, Wash.)
Secretary-Treasurer.....Robert Priebe
(KRSC, Seattle)

FUNCTIONS

The Washington State Association of Broadcasters is an organization formed for the mutual protection, the exchange of commercial ideas and the education of its members in matters pertaining to radio.

Western Association of Broadcasters

109 C. P. R. Building
Edmonton, Alberta, Canada
Telephone 22101

OFFICERS

President.....G. R. A. Rice
(CFRN, Edmonton, Alberta)

DIRECTORS

R. H. Elphicke, G. Gaetz, A. A. Murphy.

FUNCTIONS

At the 1944 Convention the constitution of the W. A. B. was changed to eliminate regional directors. Three directors are now elected by ballot, and these three, in addition to the president, constitute the nominees from the Western Association of Broadcasters to the Board of Directors of the Canadian Association of Broadcasters.

Writers' War Board

122 East 42nd St., New York, N. Y.
MUrray Hill 3-6800, Ext. 293

Chairman.....Rext Stout
Executive Secretary.....Frederica Barach

MEMBERS

Franklin P. Adams, Carl Carmer, Robert T. Colwell, Russel Crouse, Clifton Fadiman, Paul Gallico, Jack Goodman, Samuel Grafton, Alan Green, Oscar Hammerstein, II, Rita Halle Kleeman, Robert J. Landry, Margaret Leech, John P. Marquand, Katharine Seymour, William L. Shirer, Luise Silcox.

ADVISORY COUNCIL

Louis Adamio, Frederick Lewis Allen, Faith Baldwin, Margaret Culklin Banning, William Rose Benet, Roark Bradford, Louis Bromfield, Van Wyck Brooks, Katharine Brush, Sidney Buchman, Pearl Seidel Canby, Mary Ellen Chase, Marc Connelly, Norman Corwin, Bernard DeVoto, Walter D. Esmonds, Edna Ferber, Dorothy Canfield Fisher, Corey Ford, Rose Franken, Lewis Gunther, John Gunther, Langston Hughes, Fannie Hurst, Marquis James, Owen Johnson, MacKinlay Kantor, George S. Kaufman, John Kieran, Manuel Komroff, Joseph Wood Krutch, Christopher LaFarge, Howard Lindsay, Edna St. Vincent Millay, Edward R.

Murrow, Robert Nathan, Allan Nevins, Clifford Odets, Eugene O'Neill, Donald Culrose Peattie, Fletcher Pratt, Marjorie Kinnan Rawlings, Quentin Reynolds, Elmer Rice, Mary Roberts Rinehart, Kenneth Roberts, Frank Sullivan, Dorothy Thompson, Sophie Kerr Underwood, Carl Van Doren, Mark Van Doren, Hendrik William Van Loon, Walter White, William L. White, Margaret Wildmer, Thornton Wilder.

FUNCTIONS

The Writers' War Board is a private organization. It is financed by private contributions. Its chairman and members receive no salary or reimbursement for expenses incurred, from the Government or any other source. However, the Government, through the Office of War Information, maintains a liaison office for the use of the Writers' War Board in its co-operation with various Government departments. An accountant, the author of two books on taxation, has calculated that in this manner these Government departments have secured two tons of manuscripts at two per cent of the market price. Since it is a reasonable assumption that the scripts have been a factor, not negligible, in the struggle for the victory we are sure of and the lasting peace we are determined to get, certainly no writer will begrudge the Government the bargain it picked up.

Woman's National Radio Committee

113 West 57th St., New York 19, N. Y.
Circle 7-4110

OFFICERS

Chairman.....Mme. Yolanda Mero-Irion
Vice-Chairman.....Mrs. D. Leigh Colvin
Second Vice-Chairman.....Mrs. Marion M. Miller
Secretary.....Miss Helen Havener
Treasurer.....Mrs. M. D. Jackson
Executive Secretary.....Mrs. Rosalie Wolf
Members-At-Large.....Mrs. Sidonie M. Gruenberg,
Mrs. Mary F. Larkin, Mrs. Marion M. Miller, Mrs. Emory Ross, Mrs. Jesse M. Bader, Mrs. Bettina Gunczy.

FUNCTIONS

This committee has for its purpose to raise the standard of radio programs for adults, young people and children by: (1) retaining on the air the finer type of program; (2) removing objectionable features; (3) improving advertising content of broadcasts; (4) encouraging the production and presentation of more fine programs, worthwhile from the educational, cultural and entertainment viewpoint.

FCC REGULATIONS

The term "non-commercial educational broadcast station" means a station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public.

Operation and Service

The operation of, and the service furnished by, non-commercial educational broadcast stations shall be governed by the following regulations:

(a) A non-commercial educational broadcast station will be licensed only to an organized non-profit educational agency and upon a showing that the station will be used for the advancement of the agency's educational program particularly with regard to use in an educational system consisting of several units.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the general public.

(c) Each station shall furnish a non-profit and non-commercial broadcast service. No sponsored or commercial program shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements and commercial references in the continuity are eliminated.

Power Requirements

The operating power of non-commercial educational broadcast stations shall be not less than 100 watts or greater than 1000 watts unless a definite need for greater power is shown.

The transmitter of each non-commercial educational broadcast station shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.01 percent of the assigned frequency.

Non-commercial educational broadcast stations are not required to operate on any definite schedule or minimum hours.

The transmitting equipment, installation, and operation as well as the location of the transmitter shall be in conformity with the requirements of good engineering practice as released from time to time by the Commission.

Frequencies Allotted

The following frequencies are allotted for assignment to non-commercial educational broadcast stations:

42,100 kc.	42,300 kc.
42,500	42,700
42,900	

Stations serving the same area will not be assigned adjacent frequencies.

Frequency modulation shall be employed exclusively unless it is shown that there is a special need for the use of amplitude modulation.

Only one frequency will be assigned to a station.

TWO NETWORKS
HEADED BY

XEW AND XEQ

Key Station to N. B. C. Key Station to C. B. S.

In Mexico where radio ownership exceeds the combined total circulations of all newspapers and magazines . . . radio advertising means two great chains. Headed by NBC's outlet (XEW) and CBS' (XEQ) they handle, between them, 85 cents out of every radio dollar spent in this land of 20,000,000 customers . . . 90% of the recorded programs . . . 90% of the telephone hook-ups . . . and 70% of the spot announcements. Obviously, if you're entering the Mexican market, there can be no question as to the right starting point!

A BASICALLY NEW IDEA IN

FM

TRANSMITTERS...

PLUS ALL THE EXTRAS OF SPECIAL WESTINGHOUSE RESEARCH FOR FM

*For harmonics up to 30 kc/s at ± 75 kc/s swing, distortion is less than 1.5% rms for modulating frequencies between 50 and 15,000 cps.

Here in a smartly-styled package is a basically new approach to FM transmitter design . . . combined with all the performance extras of special Westinghouse research for frequency modulation.

Built in 1, 3, 10 and 50 kw ratings, this new design provides direct generation of the modulated carrier by a simple and straightforward circuit. Frequency corrections are independent of critical tuning. Distortion is low.*

Metal-plate rectifiers—first introduced by Westinghouse for high-voltage, high-current AM applications—virtually eliminate outages caused by rectifier (tube) failures. Space and cooling requirements are reduced, operating costs are lowered.

Your nearest Westinghouse office has complete details of this new triumph in FM transmitter design in booklet B-3529. Or write Westinghouse Electric & Manufacturing Company, Radio Division, Baltimore, Maryland. J-08103

www.americanradiohistory.com

RCA has pioneered for twenty-five years in the science of radio and electronics . . . from world-wide wireless to international short-wave broadcasting . . . from electron tubes to electron microscopes . . . from the hand-wound Victrola to the automatic radio phonograph . . . from television to radar.

RCA has developed and expanded its "know-how" in skilled engineering and production so vitally needed to meet the demands of war . . . these qualities will be reflected in the peacetime products of RCA.
