America's No. 1

...STATION LIST

...MARKET LIST

TIME BUYERS IN THE "KNOW"... buyers of precious minutes for the nation's most successful advertisers . . . have long recognized the NBC Spot list as *basic* for any major market campaign.

Eleven of America's great AM stations in eleven of the nation's great markets . . . markets containing 52.5% of the country's total radio audience . . . markets where 55% of the total national retail, food and drug sales are made. That's the NBC Spot story in a nutshell.

National Spot radio pays off. Wisely bought, it's advertising at a high level of economy and effectiveness. Individually or in any combination, NBC Spot stations are indisputably the No. 1 choice for 1948.

PREVIEW OF 1948

RADIO is again on the march. No force in the world can match its dramatic progress during the past twelve months. January 1st saw the authorization of some two thousand AM stations. Half that many authorized FM outlets. This may be overdoing it. Time will tell. Television has moved into the picture and is destined to change the entertainment complexion of the face of the Universe. A mighty revolution is in progress over the air waves. From this the great listening audience is bound to profit. What about the Broadcaster? The strong, the progressive, the alert, will survive. The timid, the reactionary, as usual, will probably find rough going.

* * *

CONSTRUCTIVE highlights of the past year include a larger and more powerful National Association of Broadcasters under the dynamic leadership of Judge Justin Miller, a reasoning and more cooperative spirit between labor and management, a satisfactory volume of sponsor revenue and a steady climb in the number of sets in use. It is not unlikely that seventy million radio sets blanket the Nation as this is being written. With the addition of hundreds of new independent stations the Transcription industry has definitely come into its own. It is now an important team in the Radio Major League.

* * *

THE twelve hundred pages that follow represent not only the year round effort of a staff of Radio Annual editors but the intimate and enthusiastic cooperation of key men and executives from every facet of Radio and Television. Radio Annual is constantly in preparation. As the ink drys on this volume the 1949 edition will be in work. If, during the year new data, statistics or information becomes available it is yours by calling Information Department of Radio Daily. We are as close as your telephone. And now, with enthusiastic appreciation the editor respectfully dedicates this Volume to all, from far and wide,

who have helped in its preparation.

JACK ALICOATE
Editor.

10,000 WATTS

The Swing is to WHB in Kansas City

WHB is swinging high because . . .

Throughout every period of its broadcast time, WHB is the area's highest Hooperated station.

In the vast and incredibly rich Kansas City Marketland, WHB, reaches effectively the greatest number of listeners per advertising dollar, has the *lowest cost per thousand listener rate.*

WHB will soon be offering greater power, a better frequency and full-time operation!

See your John Blair man today, and join the Swing to WHB in Kansas City!

You can judge a radio station by the

Clients it Keeps!

The KROGER GROCERY & BAKING COMPANY has been a consistent WHAS advertiser since 1935.

★

Month in, month out since 1933 WHAS spots have been used to sell BEECH-NUT CHEWING GUM.

★

WHAS has been telling Kentuckiana listeners about BALLARD'S OBELISK FLOUR since 1930.

WHY judge a radio station by the clients it keeps? The answer is simple. Radio advertisers keep coming back, year after year, to the same station to sell the same market *because they get results!* A growing list of consistent adverisers testifies to the *proctical selling power of WHAS*

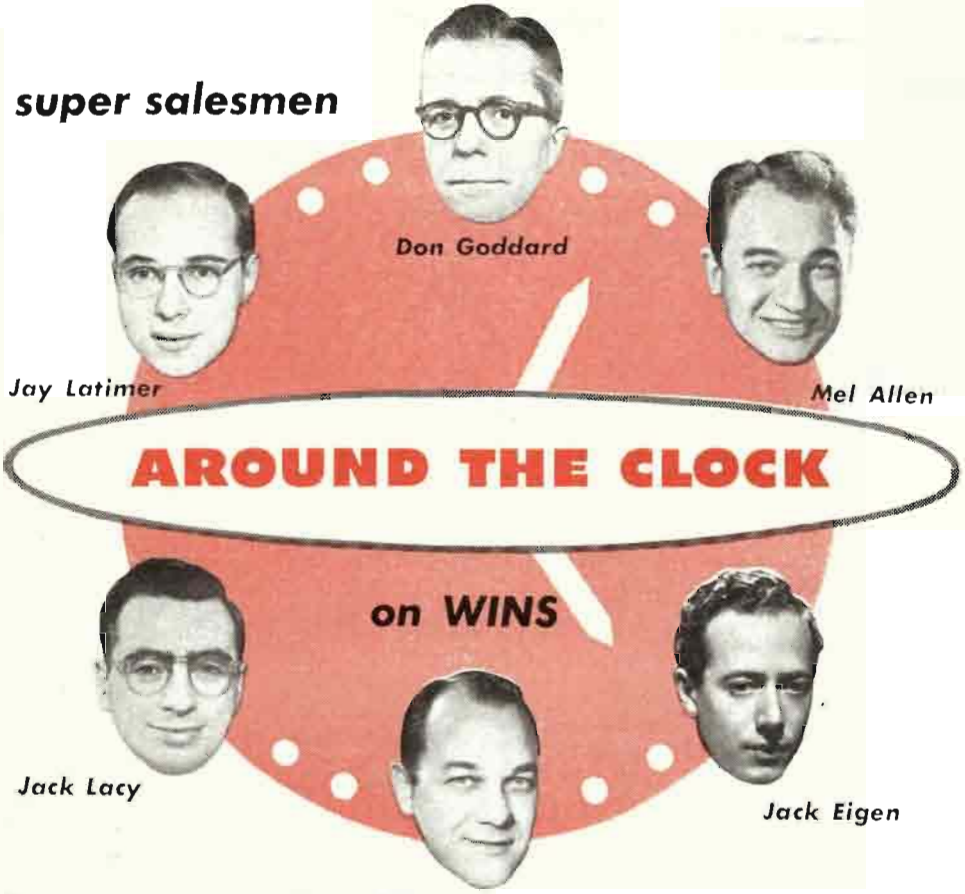
super salesmen



Now not one but six ace personalities are taking an active part in WINS 24 hour programming, thus resulting in a winning combination all day (and night) long.

Forming these blocs of shows that mean better than ever listening are (in order of air appearance): Johnny Clarke, the wake up man who gets listeners off to work on time; Jack Lacy, the lady's man who brightens up daily chores with his recorded musical sessions; Don Goddard, the news man who twice a day—at noon and early evening—reports latest world developments; Jay Latimer, the special events man who gives New Yorkers an inside glimpse of daily events in their town; Mel Allen, the popular sportscaster who emcees a three hour record program, the "Mel Allen Show", every afternoon; and last, but not least, Jack Eigen, the Broadway-Hollywood reporter who takes the all-night stand as he invites listeners and celebrities to "Meet Me At The Copa."

This around-the-clock spotting of live talent plus WINS stronger, clearer signal over New York proves that more than ever before WINS means business! Regardless of what time of day best suits your needs, WINS now offers you top performance morning, noon and night. But these personalities can speak for themselves. Put one—or a combination of them—to work for you and let them show you results of their salesmanship. See why more and more advertisers are finding that 1010 on the dial is the buy.

This is CHARLES STARK, Your Announcer!

No doubt, you've heard this many, many times.* On the networks for 18 years I've learned a lot about radio—yes, a lot about what makes a show tick. I'm expressing this knowledge in my production business. Of course, the proof is in the pudding. . . . .

Double Promotion With A Punch For Your Radio Station

LARGE ILLUMINATED CLOCKS AND NEWSPICTURE DISPLAYS AT NO COST TO YOUR STATION

Attention Getters

ATTRACTIVE CHROME WINDOW DISPLAY, APPROXIMATELY 16 x 24

- Your Station's Call Letters, Publicity and Frequency prominently displayed in bright attractive colors.
- Large two color, clear, visible newspictures mailed directly to subscribers, three times each week.
- Each station under contract has 52-week exclusive to World Photo News Service in its city.

WORLD PHOTO NEWS DISPLAYS AND NEWSPICTURES

are placed with the merchants in your primary area. No telephones are used. The merchants are contacted personally by our representatives. These displays and illuminated clocks are a fine PROMOTIONAL MEDIUM FOR BOTH AM AND FM STATIONS. Your Station's only obligation is one short announcement each week to each subscriber to World Photo News Service.

We also have an interesting plan through which your station receives a revenue from us for each subscription sold in your area by our representatives.

• SELF ILLUMINATED CLOCKS •

A beautifully colored, illuminated time piece of unusual design, playing up the Radio motif. Your Call Letters, Publicity and Frequency are permanently displayed wherever these clocks are placed. You can secure these clocks for your radio station without cost by contracting for World Photo News Service Promotion and you may place them with whomever you desire.

IF YOU WISH FURTHER INFORMATION, WRITE, WIRE OR PHONE COLLECT, or if you wish, we will have one of our representatives call on you personally.

1948—YEAR OF GREAT PROMISE

EXPANSION FORECAST FOR ALL SERVICES

By WAYNE COY
Chairman
Federal Communications Commission

IF the volume of work handled by the Federal Communications Commission in 1947 is any yardstick, the new year will see radio continue its unprecedented expansion on all fronts.

As far as broadcasting is concerned, frequency modulation is setting an unabated pace. More than a thousand FM stations are now licensed or authorized. Of this number, nearly 400 are on the air and are being added to almost daily. The coming year should bring this high-fidelity and static-free service to more than 500 metropolitan and adjacent rural areas throughout the Nation.

Standard (AM) stations have topped 1,500, with nearly 500 others under construction. It is significant that most of the new stations are in small communities, many without previous local broadcast service.

Television licenses and authorizations are nearing their first 100 goal. The more than 70 television stations which have already been given the green light propose to serve over 50 cities in some 30 states. An uncertainty in that industry was removed last March when the Commission decided that color television requires further experimentation before being given commercial status.

Facsimile broadcasting is destined for commercial operation as soon as the industry resolves some difference of opinion on technical problems. This will permit the drafting of engineering standards and rules and regulations to cover regular service.

The advantages of FM transmission have given an impetus to non-commercial educational broadcasting. Two score of these stations are built or under way.

Thirty-seven international broadcast stations continue to beam their programs overseas under State Department auspices.

To facilitate these broadcast services, approximately 700 miscellaneous radio stations are in operation. These include experimental, remote pick-up and studio-transmitter links.

The broadcast industry is so busy with its own affairs that it may fail to appreciate the equally important advances being made by radio in other fields. Yet these developments are an important part of this era of communication progress. Many affect broadcasting either directly or indirectly.

It may surprise some to realize that about 115,000 non-broadcast stations are now authorized, not including many thousands of mobile transmitters. Amateur stations have increased to 75,000. Some 40,000 other stations are devoted to the protection of life and property—such as aeronautical, marine, police, fire, forestry, railroad, utility, etc. These, too, are undergoing phenomenal expansion.

On the basis of the record of the year just closed, 1948 holds great promise for the radio industry—in all its ramifications.

YEAR OF GREAT EXPECTATIONS

PROGRESS OF CODE HIGHLIGHTS REPORT

By JUSTIN MILLER,
President
National Association of Broadcasters

NINETEEN forty-eight is a year of great expectations for broadcasting, because the pattern of past years is encouraging.

Looking back over the year just ending, the NAB finds, among others, one outstanding sign of progress. During 1947, the long awaited Standards of Practice for American broadcasters began to take shape and to move toward a final reality. Not yet completed, because a document so important and so varied in content needs intensive study and careful drafting, nevertheless, the process of preparation and adoption of Standards is well on its way.

•

The proposed Standards of Practice have been debated, reviewed, and again referred for further study and revision. They will be revised again when the NAB Board of Directors meets in February. They will be returned once again to the membership for approval or suggestions, in order, thus, to pursue the most democratic procedure possible.

Considering the many years it has taken other professions to produce such Standards, progress to date is heartening. It is a symbol of a growing sense of responsibility on the part of the broadcasting industry.

•

In a closely related field, a possibly historic test may arise at the beginning of 1948, when the Federal Communications Commission comes to review the "Mayflower" decision. Some broadcasters, like some newspaper and magazine publishers, may not want actively to exercise the right to editorialize. But, like all Americans who value their Constitutional freedoms of speech and press, as safeguards of other basic liberties, broadcasters cannot passively accept so flagrant an abridgment of their rights.

•

In other fields, much remains to be done in 1948. New radio legislation will probably come before the Congress. Much of the expected progress in legislative fields went unachieved in 1947. Our decision, early in the year, to stand upon the firm ground of the Constitution's First Amendment when encroachment threatened in Congressional hearings represented real progress. The unity we achieved then will be carried over intact into 1948.

THE CODE TOPS 1948 AGENDA

By FRANK BURKE, *Editor, RADIO DAILY*

Burke

THE Code — more formally referred to as the proposed Standards of Practice —was No. 1 on the industry's agenda as 1948 loomed on the horizon.

Presented by NAB's special committee on Standards and Practice, adopted by the organization's board in convention last September at Atlantic City, the Code ran into rough going when a committee of independent broadcasters challenged the right to its adoption without consultation with their group.

Committees were appointed, including leaders among the independents, to meet with NAB officials in Washington. Meetings were held and grievances were given a thorough airing. After due deliberations it was recommended that the Code be turned over to the NAB board for further refinements at the February meeting and then submitted to the membership for final adoption at the May, 1948, convention of NAB at Los Angeles.

The section of the Code which has been the center of most criticism is that which covers "Time Limitations on Commercials." Specifically this section said: "The maximum commercial time, including station breaks, allowable in any 15 minutes of broadcast time, regardless of type of program, or sponsorship, or how such 15-minute segment is divided into program units or announcements, should not exceed three minutes."

This section was the verbal bombshell that set off the criticism of independent stations whose life blood is participation programs, disc jockeys, musical clocks and shopping guides. These programs, according to later revisions of the Code on "time limitations," were allowed additional time for commercial participation of sponsors.

On the business side 1948 shapes up as a challenging year for those who guide the destiny of both network and independent station operations. With nearly 2,000 AM stations on the air or authorized and prospects of 1,000 FM stations being in operation by the end of 1948, the broadcasting industry presents a highly competitive picture with emphasis on local sales.

It has been estimated that broadcast advertising in 1947 totalled $356,690,000, a new high in radio time sales. This is an increase of 7.9 per cent over 1946, and prospects are that the gross will go still higher by the end of 1948.

In governmental circles the most important development of 1947 was the resignation of Charles R. Denny, chairman of the FCC to become vice-president and general counsel of NBC. Denny's decision was made during the NAB convention in Atlantic City and took effect in December when President Truman sent the name of Wayne Coy, general manager of WINX, Washington, to the Senate as successor to Chairman Denny. Coy was confirmed, without opposition in January, and became chairman of the commission.

Television and FM holds great promise for expansion as 1948 gets underway. Already 19 television stations are operating in the United States and a well-established network carries programs to five cities on the East coast. By the end of the year 50 television stations may be in operation and the expansion of coaxial cables and relays may bring so-called network television to the middle west and possibly the west coast.

The growth of FM has been sparked by the activities of the Frequency Modulation Association which fostered negotiations with Petrillo for duplication of AM network programs on FM and the fixing of scales for FM station operators. With approximately 400 FM stations now on the air, FMA officials are predicting that the total station operations will reach the 1,000 mark before year's end.

1948 will probably go down in record as the most progressive year of the industry. The AM, FM, television and facsimile expansion, ready markets for all types of receivers, and increasing advertising budgets are signs that point to a big year.

TEN OUTSTANDING RADIO NEWS EVENTS OF 1947

Following radio news events of the past year is the consensus of opinion by network and station news directors as polled by RADIO ANNUAL:

1. The Cold War: President Truman's Doctrine for Aid To Europe and Secretary Marshall's Plan.
2. Texas City Disaster.
3. British Royal Wedding.
4. Broadcasts of Congress' activities regarding Taft-Hartley Law.
5. War Investigation Hearings (Hughes, Meyers probe).
6. Congressional Investigation of Communists in Hollywood.
7. UN Partition of Palestine.
8. Florida Hurricanes and Mississippi-Missouri Floods
9. Communist Uprisings in France, Italy.
10. Foreign Ministers confabs in Moscow, London. First direct uncensored news broadcasts from Soviet Capital by NBC.

Outstanding Broadcasts

"Fear Begins at Forty" on CBS.

ABC's "School Teacher, 1947."

NBC's Series on United Nations.

"The Joyful Hour" on Mutual.

Network Pickups of British Royal Wedding.

THE TELE RECEIVER MARKET

By JIM OWENS, Associate Editor, TELEVISION DAILY

Owens

PERHAPS the most inspiring of the many historic developments noted in television's second year of commercial operation was the growth of the receiver market — the veritable nucleus of the greatest communications medium known to man. Unlike many other major industries, which reached maturity in segments and with some degree of independence, television was no better than the size of its audience, since here was the source of its life blood—the buying public.

It was an auspicious beginning. Although the wheels of production had begun their long grind haltingly in the beginning of 1947, the output at the year's end was the result of a well-oiled instrument of industry. It held such promise as to provide the basis for greater expectation during this year by the nation's broadcasters—the men whose business depended completely upon the distribution of television receivers. At least a half-million new sets are predicted to reach the retailers' showrooms in 1948, and indications are that the charmed circle—1,000,000 sets in use—will be a happy reality before another winter has passed.

David Sarnoff, president of RCA, made a statement at the year-end which reflects the attitude of top industry management toward the further development of television. "By the end of 1948 television, in consumer prices, will approach a $500,000,000 a year industry," he said. And to emphasize its present and future importance to the American public, the RCA official added: "For the first two years of commercial television, the public will spend four times as much for television sets as they did for radio receivers in 1921 and 1922, the beginning of radio broadcasting."

According to a consensus of authoritative opinion drawn from top levels in the industry, production of receivers during 1947 exceeded that of the previous year by 20-fold. Approximately 200,000 sets came off the production lines—a tremendously encouraging margin over the anemic output of the year before when only 10,000 models were placed in the hands of the public.

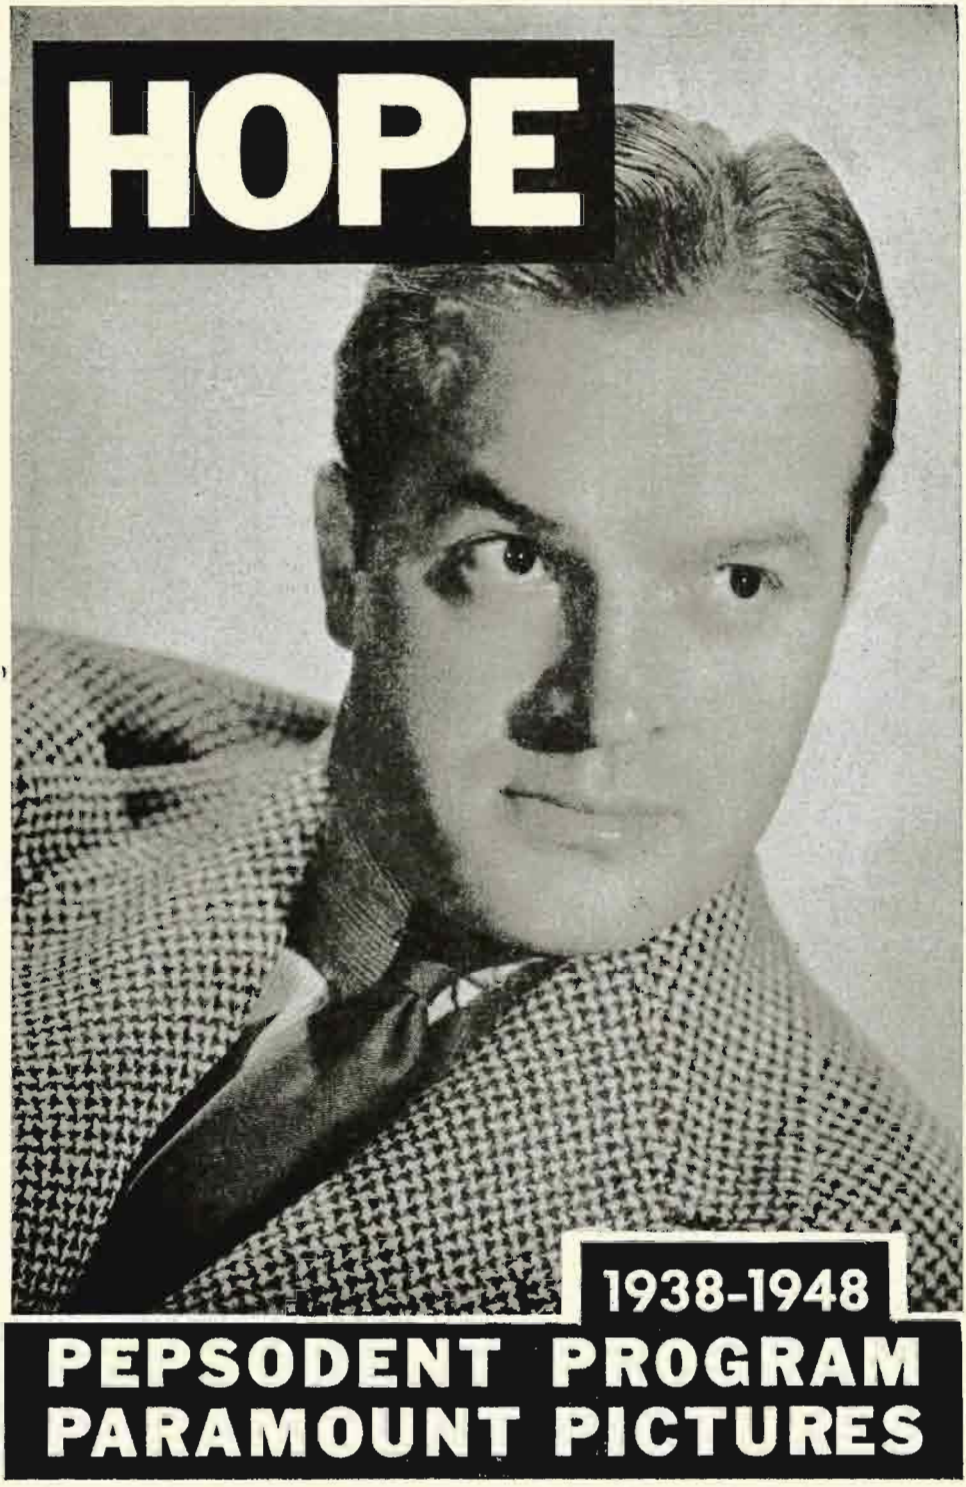
The production side of the picture was one which shattered precedent after precedent, and indeed assumed mushroom proportions at the year's end. According to the Radio Manufacturers Association, average monthly production throughout the year was 15,000 sets, and this trend continued its accelerated ascent through December when a total of 28,000 receivers were crated for delivery—an increase of 97 per cent! Perhaps the most significant phase of this surge was the fact that production of table model television receivers totaled nearly 120,000—twice that of straight video consoles and TV console combinations, indicating that manufacturing techniques had at last been geared to satisfy the demand for low-priced sets—America's mass market and the backbone of the future television audience.

Although its development was often referred to in terms of the nation-wide audience and its coast-to-coast network possibilities, television in 1947 continued to be a strictly local industry—with the exception of the New York-Philadelphia-Washington-Schenectady area. In the latter region it had reached major proportions during this period since "network" service had become almost a daily feature through working arrangements between stations in each of the three cities.

New York, universally considered the center of television, had somewhere between 50 to 75,000 sets in operation by the end of the year. Philadelphia and Washington were far behind numerically but not proportionately, and Chicago, with only one station on the air, achieved highly promising gains during the 12-month period.

In the light of this sweeping expansion, which render statistics obsolete as quickly as they are charted, it would appear that even the most optimistic predictions of television's importance in our way of life, in both the physical and economic sense, will be considered conservative when the industry reaches its full potential

www.americanradiohistory.com



www.americanradiohistory.com

The Outstanding Events In Television—1947

TELEVISION covered an opening session of Congress for the first time in history,—the 79th Congress. Pickup also included the first telecast of a Presidential "State of the Union" Address.

Federal Communications Commission rejected a proposal of color television standards (by CBS.) Decision keynoted first all-out development of monochrome tele, including station building, set manufacture, etc.

AT&T opened a radio relay circuit between New York and Boston, thereby extending the Eastern tele network 450 miles northward. WBKB set up first midwest network linking Chicago with South Bend, Ind.

RCA demonstrated its system of large-screen color television. Paramount Pictures unveiled its system of theater television, involving rapid processing and reproduction of films taken from a video tube.

Motion picture industry evidenced first combined interest in theater tele,—and its potential box office threat. Plans were laid to begin study of tele, including reservation of video channels for theater tele.

First nation-wide tour of television was made by RCA and Allied Stores Corp. department store association, via jeep units in 22 major cities.

New York was first city to have all TV channels (7) allocated by FCC.

Industry opposition eliminated two serious threats to development: proposed amusement tax on tele in public places, and proposed ban on erection of antennas on rooftops by landlords in New York area.

Television covered the World Series for the first time in history. Estimated 3,000,000 persons saw the classic on the Eastern web.

Philadelphia was chosen by Republicans and Democrats as '48 convention site, largely because of tele coverage available.

Newsreel organizations officially entered television via servicing of member stations with special films for video.

BBC announced plans for establishment of a network in the United Kingdom. Web would service six provinces and 70 per cent of the population.

THE FUTURE OF TELEVISION

By BRIG. GENERAL DAVID SARNOFF, *President, RCA*

Sarnoff

IN speaking of television for the past twenty-five years or so, we have been accustomed to say that "television is around the corner." I should like to bury that phrase. Television is no longer around the corner. It is beyond the doorstep; it has pushed its way through the door into the home!

The Federal Communications Commission has authorized to date a total of 69 television stations, and 16 applications are pending. This means that 85 television stations already have decided to lead the way. I believe that many more will follow. As of November 15, there were 13 stations on the air with regular television programs. In 1948, the list of stations will increase as transmitting equipment becomes available.

My estimate is that by the end of 1948 there will be approximately 50 television stations on the air in this country with regular programs. There may be more.

All kinds of figures have been mentioned about television receivers, and here is my estimate. By the end of 1948, I foresee a total of 750,000 receivers in use. This means that for 1948 our estimates are approximately 600,000 above the number that were installed at the end of last year.

Surveys have been made of the number of people within range of present television programs. Approximately 40,000,000 people lived within the areas covered by television broadcasts at the end of 1947.

Surveys indicate that seven viewers constitute the average audience at each television receiver. Therefore, if you multiply 750,000 by seven you will see that by the end of 1948 there will be a large audience for television—somewhere near 5,000,000.

The broadcaster must build his own television circulation as does a new magazine or newspaper. That is the broadcaster's job. He cannot toss that responsibility to the television set manufacturer, any more than the magazine or newspaper publisher can transfer his problem to the printer.

A newspaper or magazine spends a substantial part of its initial investment in building circulation; the job of the broadcasting stations, likewise, must be to build circulation in television.

Television programming can be started by local stations in a small way with a minimum of facilities and expanded as receiving sets and commercial sponsors increase. In the meantime, until nationwide networks are available, films of live shows and newsreels can be flown to stations throughout the country to add to their program variety.

Like the many independent local broadcasting stations which are successful and profitable, television stations also can thrive upon local talent and community service. There is no end to local program possibilities, for the small town is a natural television stage. People like to see their friends and neighbors on the screen. I can foresee many uses for television in religious and educational activities. Television can be a great aid to good government in city, town and country by making citizens better acquainted with their local leaders and their work.

Local merchants will find television an effective means of advertising. Dramatic groups, county fairs and community sports events will enlarge their audiences. Often a local baseball or football game or a prizefight is as interesting to a community as a professional sports event in a distant city. Civic and fraternal organizations and women's clubs also are sources of programs for local television stations.

Imagine the interest that would be shown in a local community if, for example, one or more department stores were the scene of a shopping hour in the morning or afternoon. The television camera would show the merchandise and the shopper at home could see what each store had to offer before she left home for her marketing. This should be an interesting experiment in advertising.

Automatic relay stations, either alone or in combination with the coaxial cable, show great promise for speeding extension of television program service throughout the nation. Radio relay stations are now

AWB EXPANDS ACTIVITIES

By RUTH CRANE, *President, Association of Women Broadcasters*

Crane

HAPPY over progress made and prominence achieved in five short years of existence, the Association of Women Broadcasters of the National Association of Broadcasters looks forward to greater achievements in 1948.

The Association of Women Broadcasters was formed in 1942, its Active Membership comprised of women on the staff of, or broadcasting over radio stations that belong to the National Association of Broadcasters. Associate Members are women engaged in executive phases of radio work outside of NAB radio stations.

•

Objects of the Association are to promote the interests of women broadcasters and executives and to increase their opportunities for service.

National officers elected by AWB in the spring of 1947 were Frances Farmer Wilder, CBS, President; Ruth Crane, WMAL, First Vice-President; Eleanor Hanson, WHK, Third Vice-President; Ann Holden, KGO, Fourth Vice-President; Nell Daugherty, WSTC, Secretary, and Norma Richards, WSPD, Treasurer. Dorothy Lewis, Coordinator of Listener Activity of the National Association of Broadcasters, is permanent Second Vice-President of AWB. In September 1947, Frances Farmer Wilder left the radio business and resigned from AWB, and the First Vice-President was designated to succeed her as President at the AWB Jan. 1948 Convention in Washington.

•

Following the NAB pattern of division into seventeen districts, the AWB has held a number of regional meetings and program clinics throughout the year. Among these were District Number Two, which met at Albany, District Number 13, which met at San Antonio, District 10 convened at Kansas City, District 9 at Chicago, District 1 at Hartford, Conn. and District 16 at Los Angeles. At the San Antonio meeting Governor Jester of Texas proclaimed Saturday, November 15th, Women Broadcasters' Day in Texas. These local meetings provide inspiration and help through an exchange of ideas for the improvement of program service, through helping the AWB member to a broader knowledge of radio's purposes and problems, and through the recognition accorded AWB by national, civic, and private agencies. The AWB members of Washington inaugurated the first of a series of Radio Institutes for Club Presidents and radio chairmen, a pattern to be used throughout the country.

•

Again in 1947, the Association of Women Broadcasters conducted a nationwide letter contest during National Radio Week, with outstanding response. Listeners were asked to write on the theme, "What Is Your Favorite Program and Why?" The thousands of letters will be used to analyze listener preferences and to assist broadcasters in building effective programs.

Cooperating with Women United for United Nations, Observer Group at Lake Success, New York, the AWB prepares a monthly United Nations News Bulletin for women broadcasters, reporting matters discussed at the General Assembly and providing answers to listener questions.

Our seventeen district chairmen are: District 1—Fay Clark, WBRY, Waterbury, Conn., District 2—Gertrude Grover, WHCU, Ithaca, NY, District 3—Kaye Witmer, WKBO, Harrisburg, Penn., District 4—Elinor Lee, WTOP, Washington, D. C., District 5—Dorothy Horsfall, WPDQ, Jacksonville, Fla., District 6—Marjorie Cooney, WSM, Nashville, Tenn., District 7—Katherine Fox, WLW, Cincinnati, Ohio, District 8—Mildred Grace, WELL, Battle Creek, Mich., District 9—Nancy Grey, WIMJ, Milwaukee, Wisconsin, District 10—Anne Hayes, KCMO, Kansas City, Mo., District 11—Darragh Aldrich, WCCO, Minneapolis, Minn., District 12—Julie Benell, KOMA, Oklahoma City, Okla., District 13—Violet Short, KTSA, San Antonio, Tex., District 14—Louise Hill Howe, KSL, Salt Lake City, Utah, District 15—Frances Quinn, KFRE, Fresno, Calif., District 16—Martha Gaston, KFOX, Los Angeles, Calif., District 17—Vernice Irwin, KVI, Tacoma, Wash.

BMB DATA—ONE YEAR IN USE

By **HUGH FELTIS**, *President, Broadcast Measurement Bureau*

Feltis

OVER 700 subscribing stations received their BMB audience data in the fall of 1946. The following spring the Area and Network Reports were published. Since then BMB station and network audience information has been tested in the crucible of use.

Just as experiment had to precede the measurement of station and network audiences, so too did experiment have to precede the use of the resulting data by broadcasters, advertisers and agencies. 1947 was largely a year of experimental use.

Agencies with highly developed coverage estimated methods analyzed the BMB figures carefully in the light of these methods before basing time buying decisions on BMB. Other agencies and advertisers scrutinized the figures against known sales effectiveness.

Meanwhile the stations and networks compared BMB with other data, engineering and otherwise. In some instances they found a remarkable degree of correlation. Where comparisons were made with data that measured other dimensions of listening, such as average number of listeners per minute, there was often less correlation. These instances only served to point up the difference between the total number of families that listen to a station and the number who listen during the average minute. Both pieces of information are important. Neither is a substitute for the other.

All this testing and analyzing and experimenting with the BMB figures by advertisers, agencies and broadcasters led to one over-all conclusion: The BMB figures make sense.

And this conclusion in turn has led to an ever-increasing use of BMB by all three groups. More and more stations feature BMB figures in their trade press advertising, sales promotion pieces and presentations. More and more agency recommendations are based on and supported by BMB data. More and more advertisers are instructing their agencies to use BMB figures as an important buying tool.

What's more, BMB data are being used with increasing discrimination. They are used in specific ways to meet specific situations. BMB findings are being used in conjunction with other facts—facts about markets, distribution, station rates, competing media and other media used by the advertiser.

These buying uses have shown broadcasters that advertisers and agencies are interested not only in the stations with the biggest BMBs; they also use stations with small BMB figures just as they use smaller circulation newspapers and magazines. And they often favor BMB subscribers for the simple reason that it is easier to evaluate and justify the use of stations for which BMB figures are available.

Organizationally, 1947 marked the inauguration of a 15-point long range program based on the premise that BMB as an organization is more important than any individual project it undertakes. Broadcasters now subscribe to the Bureau rather than to a particular audience study, with full assurance that the Bureau's studies will meet the industry's needs.

The Bureau's program includes the examination and evaluation of all available radio research, the refinement and improvement of BMB's audience measurement and the investigation of other services that BMB might perform.

In March 1947 BMB conducted an Interim Station Audience Measurement, designed particularly for new stations and those which had changed power, frequency or network affiliation since the 1946 audience survey.

The next nationwide survey, in March 1949, will not only measure subscribers' total weekly audiences but will also show finer detail such as their average daily audiences.

The first year's use of BMB data has proven beyond question the value of its measurement. More important still, it has proven the value of cooperative, tripartite research in the development of radio advertising.

NATIONAL TELEVISION SERVICE

By J. R. POPPELE, *President Television Broadcasters Association, Inc.*

Poppele

TELEVISION in 1948 will take on the proportions of a national giant, striding through areas heretofore untouched by the magic of the visually-inspired electron; riding the crest of millions of cycles into the homes of hundreds of thousands of families, and bouncing along a series of microwave relay stations that will hoist views of Manhattan into homes out Chicago way—and, perhaps, beyond.

Television was a strapping youngster a year ago; today it has achieved a measure of maturity which scoffers only a short time ago were ready to concede was merely a twinkle in the eye of the "fathers" of the new art.

From 5,400 post-war receivers available by December of 1946, television production soared close to 30,000 a month a year later, with the total output for 1947 reaching nearly 200,000.

From a handful of television stations catering to a limited audience 12 months ago, television was being wafted from 17 stations as 1948 was born, with the prospect of twice that many operating before 1949 arrives.

In 1946 there were very few manufacturers geared to produce television sets and only a trickle of receivers reached the market. Last year 36 companies, large and small, producing sets with screens ranging from 4 by 6 inches to 15 by 20 inches, were in full blast production; many more will be added to the roster this year.

Dollar-wise, television receivers at retail levels did not top $3,485,000 in 1946. Last year, 1947, the figure soared to $74,000,000 and industry leaders are convinced that by June of this year the dollar value of television receivers will exceed that of AM radio—a remarkable stride forward, considering television's status less than 18 months ago.

Is it any wonder that the former chairman of the Federal Communications Commission, Charles R. Denny, has characterized television as an industry "destined to become the greatest mass communication medium of them all."

Probably no facet of television development is as vital to television broadcasters as that of facilities for network operations. The very life of the industry—commercially and otherwise—depends upon the ability of all stations to provide high-calibre programs to an audience large enough to attract advertiser's capital.

Hence, every new link in the web of facilities available for network operations is enthusiastically accepted by broadcasters. Last year the New York to Washington network route was expanded to include Boston. This year it is hoped that Chicago, Detroit, Cleveland, Cincinnati and Milwaukee will be tied to the east coast, a prelude to wider expansion of the ultimate national television service.

Last year events such as the first telecast of a President of the U. S. addressing Congress; major league baseball games televised in New York, Philadelphia, Chicago, Detroit and St. Louis; World Series baseball televised on an extensive east coast network, helped arouse public curiosity and acceptance of the art of visual broadcasting.

This year the two greatest political events of the year—Republican and Democratic National Conventions in Philadelphia—will be televised by every station that can hook its cables onto a network along the east coast. It is to be hoped that those in the mid-west will also be able to carry the conventions on a direct pick-up basis. If not, films will be flown to these stations and others on the west coast for immediate telecasting.

The year 1948 should see television receiver sales surpass the 750,000 mark.

The year 1948 should see network television move from the east coast into the mid-west and, perhaps, beyond.

The year 1948 should see television attain a position of prominence that will equal other forms of communication to which the public has become accustomed.

The year 1948 will bring scores of advertisers into television, particularly as the video art expands.

BROADCASTING FOR PEACE—1948

By BENJAMIN COHEN, *Ass't Sect'y Gen.—Dept. of Info., U. N.*

Cohen

SECRETARY General Trygve Lie has stressed in all his recent addresses that the U.N. must surmount in the coming months some of the most critical problems in the field of international relations and will require the fullest measure of support from an enlightened world public opinion.

In the already substantial experience gathered by the Department of Public Information radio appears as one of the most effective media to disseminate information, since it is not beset by newsprint shortages, transmission or transportation bottlenecks, foreign exchange scarcities, and is capable of reaching directly an audience several times larger than that served by the printed word or the projected images.

1948 is a vital year for the peoples of the United Nations and one of untold possibilities for all who work to bring them news and opinions—principally for you, the broadcasters of the United States, speaking daily to a nation endowed with tremendous power to influence the future of international relations and wherein dwells a large fraction of the world's three hundred million radio listeners.

Has any one yet measured fully the power for good that lies in broadcasting? I doubt it. Quite beyond doubt, however, is the increasing support which U. S. radio—networks, independent stations, educational stations, broadcasters' associations, the trade press and radio councils— have given to the United Nations. Some of you, I hear, plan to do still more to bring into your communities the purposes, day-to-day work and fascinating human side of the United Nations. The Department of Public Information is ready and able to help you.

First, let me try to answer the question which Mr. Frank Burke was good enough to put: What are the plans of the United Nations Radio Division for 1948, both here at headquarters and overseas? Briefly, the Division plans to promote, and itself to offer for relay, more programs on the work and progress of the United Nations, using more languages and acting in cooperation with still more broadcasting agencies.

Nowhere are the various kinds of assistance the Radio Division can offer better illustrated than in the case of your own United States. The good reaction to its Radio Kits, for example, (scripts, spot announcements, and perhaps a transcription) has guaranteed that this service will continue. Further, all broadcasters interested receive without charge the semi-monthly "United Nations Bulletin", background releases and other material for special programs, while the Division distributes to over one thousand women commentators a monthly U. N. newsletter prepared by women observers working with the Association of Women Broadcasters.

Why has "The United Nations Today", a Radio Division program, been taken up so rapidly by over one hundred stations, forming a coast-to-coast "Network for Peace"? Primarily because it brings listeners, Mondays through Fridays, an up-to-the minute report of all the principal activities of the United Nations. In fifteen minutes it presents with a short bridging narrative voices of delegates recorded from the day's debates or in special interviews, together with dispatches from U. N. Information Centers or Missions overseas. In 1948, for example, "The United Nations Today", will continue to provide newscasts from Havana, Salonika, Geneva, and carry special reports from Jerusalem, Seoul, and from the Autumn General Assembly in Europe.

More perhaps than any other medium, radio has the possibility—and therefore the clear responsibility—of spreading, as the General Assembly with one voice requested, information expressing "the undoubted desire of all peoples for peace." May the Year 1948 see all U. S. networks and stations bring their listeners still further news of what is, after all, everyone's United Nations.

www.americanradiohistory.com

REPORT ON CANADIAN RADIO

By HARRY SEDGWICK, *Pres., CFRB and Board Chairman, CAB*

Sedgwick

ENCOURAGING measurable gains were made by the independent broadcasters of Canada at the 1947 sessions of the Parliamentary Radio Committee. Represented by their Canadian Association of Broadcasters, the 89 member stations asked for fundamental changes in broadcasting and radio law in Canada. Their brief was a painstaking analysis of such law and regulation, together with comments on its results, inequalities and injustices.

The CAB brief pointed out that the Radio Act, written in 1902 and not amended in major respects since, still governs operations of modern-day broadcasting stations. It also pointed out that the Canadian Broadcasting Corporation, a "Crown Corporation," competes directly with the independent stations for audience and business, nationally and locally, has a monopoly of networks by its own regulations, and can place stations on or take them off those networks at will and on its own financial and other terms, writes and enforces the broadcasting regulations, and that meetings of its Board of Governors to recommend on applications for licenses and to deal with matters of regulation, were being held in camera. The brief also protested the "power-freeze" regulation holding down power of all independent stations, by which valuable actual and potential coverage was being lost to Canada, and the apparent slowness of CBC to recommend licenses for experimental and actual broadcasting in new broadcasting fields, particularly television and facsimile.

To correct this situation, the independent broadcasters asked lifting of the power freeze, and that powers of licensing and regulation be transferred to an impartial tribunal, which would hold meetings open to press and public, and be required to give reasons for its decisions. The CAB asked that this Board be responsible in large measure to the legislative arm of government, rather than so directly related to the executive branch as is the case at present; pointing out that the CBC and the Cabinet conjointly possess the power to censor all broadcast material in advance.

For the first time, the independent broadcasters carried their case this year directly to the public, through means of special programs and announcements, speeches by station personnel to groups and organizations, a series of quarter page ads in all daily newspapers, and wide public distribution of our brief to the Parliamentary Committee.

That this policy had its effect appears obvious. Public opinion surveys (one of which was presented to the Committee) showed a marked trend of opinion toward the side of the independent broadcasters. The Canadian Daily Newspapers Association appeared officially before the Committee to press for somewhat similar action to that suggested by CAB, and support was forthcoming in large part from the Association of Canadian Advertisers and the Canadian Chamber of Commerce, who sent letters to the Committee suggesting a wide review of broadcasting legislation and practice by an impartial, non-political body appointed for the purpose.

The year witnessed an increase in the number of broadcasting stations in Canada, both independent and CBC. CBC proceeded with construction of its additional clear channel 50 Kw. stations, taking channels previously occupied by independent stations to do so, and removing several stations from its networks in the process. The state system also entered the local field, selling directly against individual stations in competitive areas. The membership of the Canadian Association of Broadcasters rose to its all-time high. The Association instituted a policy of holding regional meetings, for the first time, which have had gratifying results. Since the Committee's recommendation, the number of FM licenses applied for, and granted, has increased tremendously; and interest is being expressed now in both television and facsimile.

During the year ahead, the independent broadcasters of Canada will extend their service to the community and to the business operations that provide its lifeblood. They will also continue their struggle for treatment identical to that accorded other classes of citizens in a democracy.

PROGRESS REPORT ON FM

By J. N. (BILL) BAILEY, *Executive Director, FM Association*

FM's biggest year of development will unfold during the first six months of 1948.

Bailey

Having hurdled many obstacles, technically and otherwise, this improved method of broadcasting which the FCC has termed the "finest aural broadcast service attainable in the present state of the radio art," has become firmly rooted the past year.

The FM Association, the only organization devoted to the development of FM broadcasting and to the protection of the millions of dollars invested in FM facilities, foresees this expansion on a five-point front:

1. Establishment of numerous FM regional and state networks, presaging wide use of relays for network purposes.
2. Availability of live music to FM networks.
3. Keen competition programwise.
4. Much greater set production.
5. Availability of established AM network musical programs to FM stations.

Rounding out its first year, the FMA is taking the lead to insure fruition of each of those five points.

•

The year 1947 saw establishment of the first major commercial FM network—the Continental. Several state and regional FM chains were organized, including the Dixie Network and Arrow Network. The year 1948 will see many more. Eventually —perhaps before another year—these regional networks will be linked to form larger chains.

Because relay and rebroadcast have proven feasible and since the AT&T has not yet delivered 15,000-cycle land lines, these FM networks will be linked almost entirely by radio. The FMA has pending before the FCC, as this is written, a request that Television Channel No. 1 (44-50 mc) be set aside for FM relay purposes.

•

The FM Association's attitude towards programming of FM is reflected in a resolution adopted unanimously at our First Annual Convention, September 12-13, in New York. The resolution:

"Whereas it is believed that public acceptance of FM will be considerably facilitated by diversified program schedules carefully planned and expertly executed, be it resolved that all broadcasters strive to improve the program quality of their broadcasts and devote a greater portion of their time to live talent."

•

The FMA has taken an affirmative step to prevent any discrimination against FM. Pending before the FCC, as this is written, is a petition filed by the FMA asking that the Commission call a legislative hearing to determine whether a rule should be adopted denying a license to any FM or AM station which enters into an agreement with a network organization which would prevent the simultaneous broadcast of network programs over FM and AM facilities.

•

Popular network programs on FM would stimulate listening to the new, improved medium, more than 92% of the nation's FM broadcasters (both independent and those with AM affiliates) believe. Only a small minority think FM should be programmed entirely independent of AM, at least for the time being.

The FMA will continue to be alert, maintaining close liaison with the FCC, the Congress and other industry organizations to protect the investment in FM. The FMA is under mandate of the membership, through its by-laws, "to act as liaison between its members, the FCC and other agencies and organizations on the continuing overall problems affecting FM broadcasting."

THE FUTURE OF TELEVISION—By BRIG. GENERAL DAVID SARNOFF

in operation between a number of cities, and others are being erected. Eventually these microwave channels will reach out further to connect additional communities in television network service, especially cities not reached by coaxial cables.

Many broadcasters have heard about the experiments being conducted from time to time with coaxial cables and radio relays which can carry not only television, but ordinary speech, telegraphy at high speeds, and of course FM and television programs. Because these new cables and relays can handle several services simultaneously, they are likely to be completed sooner than we expect. I should not be surprised, if it is possible to have a television coast-to-coast network within the next few years.

•

In considering home-television, we must recognize that good programs are the master key to public acceptance of the art. Television's popularity, as well as its speed of advance, will be governed by the caliber of the shows. That is the important responsibility of the broadcaster. The success of television and the popularity of the video station will depend upon it.

The telecaster will, of course, have the problem of talent. He cannot depend solely upon the radio, motion pictures, and other established sources of entertainment for his performers. Television is a new art form that calls for new techniques and for the development and encouragement of new talent to supplement present radio entertainers. Many well-known radio artists will adapt themselves to television as successfully as the artists of the silent screen adapted themselves to the talkies.

News and sports already have proved natural drawing features for television. Films also will play an important part in the flexibility of television programming. But timeliness is the great advantage which television has over all other forms of visual entertainment. Those who watched the Davis Cup tennis matches, and big league baseball games throughout last summer, can attest to this. News associations are studying methods of television news service to supplement the service they now perform for sound broadcasting. The presidential nominations and election in 1948, with political candidates competing for public attention, will stimulate public interest in television on a widening scale.

It is an interesting fact that broadcasting received its first real impetus in 1920, when the Harding-Cox election returns were broadcast and picked up by amateur stations. It was the presidential election that really put broadcasting in the news and stirred public interest. Then came the Dempsey-Carpentier fight in 1921, which gave tremendous impetus. And strangely enough, the same factors are asserting themselves in these early days of television.

•

Today, international television may seem far off. But let us recall that five years after sound broadcasting started as a nation-wide service, we had international broadcasting. While the technical problems of international television are more difficult to solve, nevertheless, I believe we shall achieve international television in about the same period of time. The scientific knowledge for doing the job exists. In fact, I know of no problem in international television that money cannot solve.

•

Television is moving forward rapidly and is destined to become one of the major industries of the United States. In addition to serving the home, television has application to the theater, the motion picture studio and entertainment film. In the manifold processes of industrial life, television also is destined to play an important role.

The possible size of the television industry is indicated by the following figures: In the first two years of sound broadcasting, that is, 1921 and 1922, the sales of receiving sets amounted to approximately $100,000,000. In those two years, more than 500 broadcasting stations were on the air.

Now, for the first two full years of post-war television operation, namely, 1947 and 1948, with approximately only ten percent as many stations on the air, that is, 50 instead of 500, it is estimated that the public, during this two year period of television, will spend approximately $375,000,000 for receiving sets—$375,000,000 in television, as compared to $100,000,000 in sound broadcasting. This does not take into account the additional expenditures on television transmitters, the cost of erecting and operating them and the cost of programs. Therefore, in round figures, within a year and a half or so from the present time, we shall approach a $500,000,000-a-year industry in television. And that will be only the beginning.

U. S. STATE DEPT. RADIO

By CHARLES W. THAYER, *Chief, IBD, Dept. of State*

INTERNATIONAL broadcasting from the United States to other nations of the world underwent rigid scrutiny and curtailment by the Congress during the calendar year of 1947.

Thayer

The operations of the International Broadcasting Division of the Department of State came close to annihilation by the Congress, when the House Appropriations subcommittee, at budget hearings, eliminated funds proposed for this activity, standing on the technicality that there was no authorizing legislation. Meanwhile the so-called Mundt Bill, authorizing a world wide information and cultural service by the government, passed the House. On that basis the Senate restored funds to include a continuation of international shortwave broadcasting.

The funds budgeted, however, forced the curtailment of broadcasting from approximately sixty-three hours per day, to approximately thirty-two hours per day. The production of transcribed programs and script material for distribution by United States missions overseas was virtually abolished. The shortwave program structure, though, was revised at the time of the curtailment into a block schedule. Thus the scattered program structure in vogue previously was changed so that the output to each area was grouped for proper balance, and scheduled to reach each area at the best possible evening listening time. The appropriations further carried the stipulation that the Department of State was authorized to broadcast only to certain strategic areas, and that the major portion of the programming was to be done by private broadcasting companies under contract to the Department.

The end of the year therefore left the International Broadcasting Division of the Department broadcasting to Russia, Poland, Czechoslovakia, the Balkans, Germany, Greece, China, and Korea. The National Broadcasting Company and Columbia Broadcasting System, under contract to the Department of State, were preparing the programming to France, Germany, Italy, Spain, Latin America, the Netherlands East Indies and Southeast Asia.

Of the total of thirty-two hours of programs being broadcast daily, the two private companies were preparing approximately 75 per cent of the output.

Before budget curtailments in June, international broadcasting was conducted as follows:

To Europe—34 Hours daily.

To Latin America—18 Hours, 45 Minutes daily.

To Far East—9 Hours, 45 Minutes daily.

These programs were in 24 languages, with approximately 55 per cent of the output prepared by the Department; NBC and CBS prepared the remainder.

After budget cuts, the daily output was as follows:

To Europe—17 Hours, 30 Minutes daily.

To Latin America—9 Hours daily.

To Far East—6 Hours daily.

The language output was curtailed to 22, with the Department preparing approximately 25 per cent of the programs; NBC and CBS preparing the remaining 75 per cent.

In addition certain portions of transmitter time, by arrangement with the Department of State, were being used by United Nations, and by the Information and Education Division of the Department of the Army for troop entertainment abroad.

The Department maintained thirty-six shortwave transmitters in the United States, and overseas relay points at Munich, Honolulu, and Manila. Programs were also being relayed by local networks and stations in Korea, China, France, the BBC in Great Britain, and other countries.

MIDWEST PICTURE BRIGHT

By NAT GREEN *Staff Correspondent, Radio Daily*

Green

WHILE some of Chicago's projected television plans did not mature in 1947, there was much activity in the video field and it was only because of the difficulty in obtaining materials that there still was but one television station operating regularly in Chicago at the start of 1948. The local picture will be materially changed during 1948, although the promise of seven stations before the end of the year is overly optimistic.

Materials for new stations for which permits have been issued were coming through at a fair pace in January and one station, WGN's WGNA, was expected to be in operation by March 1. Some $400,000 worth of equipment was ordered in the summer of 1947, and most of it had been delivered by January 1.

Most ambitious of the local tele station plans to date are those of NBC, which expects to have its station, WNBY, in operation about September 1. At the turn of the new year NBC was considering three separate budget plans, lowest of which involved a million dollars, while the top budget contemplated a theater in Chicago's Loop. A theatre on the roof of the Merchandise Mart also was under consideration. NBC was in a most favorable position for establishing a midwestern tele network, as its affiliates in St. Louis, Detroit and Milwaukee already had television stations in operation.

ABC's local executives, actively planning their tele station, which will have the call letters WENR-TV, have set no date for start of operation but say it will be under way some time in 1948. It seems unlikely that there will be a CBS station in Chicago in '48, and an official of Zenith Radio Corporation stated that there was little likelihood that its experimental sation would go into commercial operaion, as Zenith is concerned mainly with manufacturing television sets. Zenith continues to actively promote its Phonovision, which would be a pay-as-you-see proposition. WJJD, the Marshall Field-owned station, and WIND have television applications on file, but as of January 1 no definite announcement concerning their plans for the year had been made.

Meanwhile, the Balaban & Katz station, WBKB, under the direction of Capt. Bill Eddy, continues to make rapid strides. Its Chicago-South Bend relay system has proved practicable, and by the time this is in print important innovations will have been announced. As of January 10, the Chicagoland area has over 12,000 tele sets in operation, and Capt. Eddy was confident that by February 1 more than 15,000 would be in use, and he was revising the WBKB price schedule to meet that figure. A steady improvement in the station's programs has been made during 1947 and a large number of sponsored programs is carried.

Altogether, Chicago's television picture for 1948 is bright. The television audience is increasing rapidly. Set manufacturers are conducting heavy promotional campaigns, and WBKB is making every effort to improve and diversify its programs to attract a larger clientele. With new local stations entering the field, competition undoubtedly will bring further improvements. It seems likely that, for a while, sporting events will continue to predominate. They have proved exceedingly popular and have been the mainstay of WBKB. But a large percentage of the tele audience would like more dramatic, musical and other fare, and are asking for it. Toward that end, television men are at work developing programs that can be presented in the studios on a scale that was not possible with past limitations. New equipment and new techniques of presentation are being tested, and the year will see many refinements in studio programs.

THE AGENCY'S FUTURE IN VIDEO

By RALPH B. AUSTRIAN, *V.P. Chg. of Television, Foote, Cone & Belding*

Austrian

TELEVISION is a great challenge to the advertising agency. It is no longer a challenge of the future—it is a challenge that is here now, right on the doorstep of the agency.

Radio too was a challenge to the advertising agency. After a period of fumbling (though not too long) the agencies turned to with a will and transformed radio from a challenge to a valuable high income-producing medium.

I have no doubt that television will follow the same pattern, but the fumbling period may be a little longer. I am sure, though, that television will be a bonanza for those agencies who approach it with intelligence and who develop a real understanding of its requirements and varied problems.

I think every agency should adopt as a basic concept the fact that television is not radio with pictures added. First, last and always it should be remembered that television is a visual medium. I ask all agency people who read this to discard *for the moment* the question of the commercial message. Let us think only about the program—for if the program falls on its face, the commercial—no matter how good—falls with it.

To create an audience-building program which basically is visual, the agency must have in its television department people who know how to put together the three basic elements of visual entertainment: stage technique, variety technique, and motion picture technique. I think I can prove that these three elements are basically visual. Think of the last dramatic stage production you saw. If it were performed without any light in the theatre or on the stage would you have been able to understand and enjoy it? Think of the last vaudeville show you saw. Would it have been enjoyable in pitch darkness? Would you sit still for two hours or more if GONE WITH THE WIND was played in a movie house with the projector turned off and only the sound track functioning?

I think a pretty good test for a television program would be to turn off the picture and see if you can get some real enjoyment out of the sound alone. If you do, then I believe in most cases you can assume that what you thought was created as a television program is really a radio program. Put it on radio and save your sponsor money!

This visual appeal, therefore, is what constitutes the challenge to an agency's television department. Visual appeal encompasses stage settings, properties, costumes, lighting, actors and their photogenic qualities, memorizing of long parts, stage business, gestures, how to walk, how to sit, how to edit for the camera—in other words, the agency is going into the business of producing variety shows, legitimate stage productions, and movies. Hard? Yes, indeed. Can it be done? Yes, but not by amateurs or unqualified people. Will the agency undertake to create and produce its own shows? Yes. Will it buy network packaged shows? Yes. Will it buy independently packaged shows? Yes.

Why will it do all these things? Because if an agency had to produce all its own shows, from script to completed telecast, it would probably go broke. Some agencies have twenty or more clients using radio shows—every week for thirty-nine or more weeks a year. On the present 15 per cent commission basis I do not think an agency could possibly keep enough competent people on the payroll to produce a like number of television shows. Furthermore, I think every client now using radio will eventually use television, and many clients whose products are not suited to radio will be using television.

Those agencies who lay their foundations carefully, who employ specialists—really qualified specialists to create their program structure—will reap huge rewards. There is no longer any doubt that television has arrived. It has captured the pulic's fancy wherever a television picture has been shown. In 1948 we will have networks covering the whole eastern half of the country. Those who really know promise that by 1950 we will have transcontinental networks.

WEST COAST EXPANSION NOTED

By RALPH WILK, *Manager of West Coast Bureau,* RADIO DAILY

AS EXPECTED, the year 1947 set a record for the number of new stations that went on the air in the Southern California area. A few FM outlets started operating and it is expected several more will be broadcasting before the end of this year.

Wilk

KUSN, owned by the San Diego Broadcasting Co., and affiliated with the Union-Tribune of that city, tossed its hat into the highly competitive situation there.

Another highly competitive city is San Bernardino, which has three new stations. Carl E. Haymond, veteran Northwest broadcaster, is operating KITO, full time, 1,000 watts, while Van Newkirk, formerly of Los Angeles, is head of KRNO, full time, 250 watts. Woodrow Miller is the owner and operator of KCSB, daytime only, 500 watts. KFXM, which is affiliated with Don Lee, has had its power upped from 250 to 1,000 watts.

The American-Pacific Broadcasting Co. has established KBUC, at Corona, 500 watts, full time. Another new outlet is the Radio Sangor Company's KSGN, Centerville, day time only, 1,000 watts.

KVVC, Ventura, managed by John Swallow, veteran member of the Los Angeles radio colony, went on the air in January of this year and is operating full time, 1,000 watts. KUEN, owned by the Coast Ventura Co., is operating full time, 250 watts.

KWIK, Burbank, which went on the air in late 1947, is a full time operation, 250 watts, while KGIL, San Fernando Valley, is also operating full time, 1,000 watts. KPAS, Banning, which was also launched in late 1947, is operating day and night, 250 watts.

The Daily Report Co., Ontario, put KOCS on the air in 1947 and it is a full time operation, 250 watts. KPMO, Pomona, also started broadcasting last year and functions day and night, 500 watts.

Harry Butcher, nationally known broadcaster, is operating KIST, Santa Barbara, 250 watts. It is affiliated with NBC.

Arthur H. Croghan, former Detroit and Minneapolis broadcaster, placed KOWL in operation in Santa Monica late last year. It is a day time operation, 5,000 watts. George B. Croma established KAFY at Bakersfield. It has 250 watts, as has KWTC, Barstow, recently launched by the Mojave Broadcasting Co., as a day and night operation.

KUCB is the Broadcasting Corporation of America's newest outlet in Imperial Valley. It has 250 watts power and is on the air day and night. Les Hacker opened KPRL, Paso Robles, last year as a Don Lee affiliate. It operates day and night, 250 watts.

KVECS, San Luis Obispo, which is affiliated with Don Lee, has had its power boosted from 250 to 1,000 watts daytime and 250 to 500 nights, while KVOE, Santa Ana, another Don Lee affiliate, had its power upped from 250 to 1,000 watts.

KHJ, the Don Lee station, and KFI, operated by the Erle C. Anthony Company and affiliated with NBC, are Los Angeles stations that have been providing FM programming for some time. At this writing, KNX, CBS's Los Angeles outlet, is also slated to furnish FM programs soon.

In addition to its television plans, the Los Angeles Times plans to place KTML, its FM station, on the air late this year. KMPC, Los Angeles, has been granted an FM permit, as have KFAC, KRKD, and KFSD, also of Los Angeles. FXLA and KWFM, of Pasadena, have also been granted FM permits, as have KPOR, Riverside; KOCS, Ontario; KFSD, KFMB, KSON, KSDJ, San Diego; KVOE, Santa Ana; KFXM-FM, KBMT, San Bernardino. KLAC, Los Angeles, withdrew its application for an FM permit.

The Unity Broadcasting Company of America was granted a permit to operate KUUN as an FM station and the Beverly Hills Broadcasting Company KHRB.

KGFJ, Los Angeles, has had its power boosted from 100 to 250 watts. KFVD, Los Angeles, became a 5,000 watts station in February, 1947, going from 1,000 to 5,000 watts. KMPC's power was increased from 10,000 to 50,000 watts and KFAC's from 1,000 to 5,000. KLAC's power was boosted to 5,000 watts.

SET PRODUCTION AT NEW HIGH

By BOND GEDDES, *Executive Vice President, Radio Manufacturers Association*

Geddes

THE Radio Manufacturers Association enters 1948 better equipped than ever before in its history to serve the radio industry and to help manufacturers solve some of the post-war problems that have come with a return to normal peacetime operations.

An expanded headquarters staff, with staff assistants for the Transmitter and Parts Divisions, enables RMA to provide all of its members with authoritative and timely information. Through its Board of Directors and many active committees, RMA is able to take prompt and effective action in behalf of the industry whenever necessary. Its statistical and other services and its engineering standards enable RMA members to keep well informed on production and industry progress.

With radio exports at a peak, RMA also is providing export managers of its member-companies with special data on American exports and reports on foreign markets for U. S. radio products.

●

Radio set production in 1947 appears likely at this writing to establish a new high for the industry. Indications are that the total net output will approach 17 million sets or two million more than in 1946 which in turn surpassed all prewar years. Moreover, due to a larger proportion of radio phonograph consoles, an increasing number of television receivers and proportionally fewer table models, radio set production in 1947 represents an even greater gain in dollar volume than it did in units.

Likewise, with a steady growth in FM and television broadcasting, plus an unusual expansion in AM or standard broadcasting stations, transmitter production was also at a peak in 1947 and seems likely to remain at a high level for several years at least.

●

RMA spent more money on merchandising sales promotion for the radio industry in 1947 than ever before in its history. Close to $100,000 was expended in the interest of RMA members and the industry to broaden the markets for radio equipment in the home, outdoors, and in public and private schools.

"A Radio-in-Every-Room—A-Radio-for-Everyone" was the dominant theme of a continuous promotion program which reached its climax during National Radio Week, which RMA co-sponsored with the National Association of Broadcasters Oct. 26-Nov. 1. By introducing a new concept of "saturation," based on an average of four radios in every home instead of one, RMA pointed the way not only to a vastly larger potential market for radio receivers but showed broadcasters how listening audiences can be correspondingly expanded.

●

With FM and television increasing steadily in importance and coverage, RMA and its member-companies have done much to promote these new broadcasting services.

Through a special RMA-FMA Liaison Committee RMA cooperated with FM broadcasters in keeping the industry and the public informed on the progress of FM set and transmitter manufacturing and the factors limiting volume production.

Both FM and television set production, according to all indications, will establish new records in 1948. The radio industry is now geared to produce both of these types of receivers as rapidly as public demand for them is created through extension and improvement of the broadcasting services.

●

RMA, through its five divisions and its Engineering Department, is organized to serve all factors in the radio manufacturing industry and to keep abreast of technical and economic developments which affect the industry's current operations and its future. RMA will continue to serve the industry as it pushes further into the fields of radio-communications for individuals, as provided in the Citizens Radio Service, as well as of mobile equipment on land, in the air, and on the sea.

SPORTSCASTERS—AN APPRAISAL

By TED HUSING, *President of the Sports Broadcasters' Association*

Husing

THE SBA has finally shaken loose from its pleasurable, lethargic state, and stepped into a fearless, vigorous front. For almost its entire seven years, the SBA managed to survive its regular Monday luncheon meetings (conducted through ten months of every year) which cemented the overall relations between the sports broadcaster and the promoters of all events, as well as the friendships of the members. Since the nation's most famous mike-men are listed in its roster (Bill Stern, NBC; Harry Wismer, ABC; Red Barber, CBS; Don Dunphy; Stan Lomax, et al), this weekly get-together, with famous guests visiting the meetings to discuss sports problems in candid fashion, proved to be a boon to the sports announcer in the metroplitan area, as it furnished him with an "inside" close-up of the doings in the world of athletics.

From time to time, attempts were made to add greater value to the objectives of the organization, and these proved adrenalin-shots in keeping the SBA firmly before the public. The annual SBA award to the nation's stadia (college or club), for service, facility and comfort for the sports broadcaster assigned to do a football game, became a sought-after one, and to Notre Dame, Michigan and Princeton, have gone these coveted honors. The association cooperated with government agencies throughout the war, and in this postwar period, supplying tailor-made recordings for hospitals, army posts and battlefronts, as well as furnishing live broadcasts beamed only to army zones of combat, and flying its members, on their own time, to posts in the States where they entertained or visited hospitals. It worked closely with the Attorney-General in aiding the national fight against juvenile delinquency, and brought the Mayor's office, in New York City, to the fore in aligning all New York City boys' welfare agencies into one big group for cooperative publicity by way of sports programs and sports participation.

The services rendered by the SBA through those seven years, earned for it innumerable awards from government and private agencies, citations from various civic groups, and plaques from a number of charitable organizations, for which the SBA group worked with great zeal.

This year, however, SBA decided to conduct an annual dinner, honoring the man who benefitted sports the most, with the First Annual Graham McNamee Memorial Award.

Branch Rickey, Mahtma of the Brooklyn Baseball Club, by majority vote of the members of the SBA, won the First Annual McNamee Award, and was gifted with the plaque by the distinguished New York Attorney, Louis Nizer, while Ex-Governor Harold Hoffman of New Jersey presided as Master of Ceremonies.

This occasion placed the SBA squarely in the nation's front rank as an organization anxious to enroll the country's sports broadcasters into a tightly knit group, available for every opportunity to benefit the world of sports, the general public and the youth of the land.

For now, in 1948 and henceforth, the national association will endeavor to improve the broadcasting of all sports, and encourage the increase, in the rank and file of men qualified to broadcast, either by radio or television, the rapid flow of all play-by-play accounts of sports events.

The SBA now branches out into a cohesive group fighting impurities in sports, seeking beneficial aids to young athletes, and crusading for better conditions for play-by-play reports. The SBA seeks the earnest cooperation of the men who place athletics before the nation's fans, and of the officials who place the broadcasts before the listening and seeing audiences.

Last year, in the RADIO ANNUAL, Ex-president Stan Lomax messaged the golden era of sports—1947 style. The year 1948 will demand platinum and platina—and the sports announcers anxiously want to keep apace of the wide scope of radio and television. Hence, the SBA's current race for a permanent place in the radio sun.

MAIN STREET MEMORIES

By SID WEISS, *Staff Writer, RADIO DAILY*

Radio in America—Uncle Samaritan!

Weiss

● ● ● As the year rolls around, it's always a policy of our to look back at the radio realm and make note of the good that has been done by microphobia and its people. In short, while the gagmen prattle about radio's insanities from the soap operas to the jingles of the rhyming commercials, we are one student of the mike and its activities who maintains that the good radio does is far-reaching, vital and worthy of recognition here. Only a few weeks ago, Jack Benny, one of the leaders in the Who's Hooper in our time, took his entire radio show to Denver where scads and scads of money was raised for the March of Dimes. Likewise, laughable, lovable Judy Canova, the lady who's become known as radio's rural Jenny Lind, was chosen March of Dimes girl for '48, made countless appearances on shows from the coast, in person and at hospitals—the result meant more and more do re mi in the coffers of the Infantile Paralysis Fund.

☆ ☆ ☆

● ● ● Biggest interest raiser of the year was the "Miss Hush" goings-on which paraded another fancy figure into the charity cups. Radio, in short, like no other field of entertainment, is proving that Mr. America is Uncle Samaritan. Next time you're bored by a program which doesn't tickle your fancy, you may well ponder the thought that the program is supporting this wonderful instrument which is doing so much good in he interests of the needy. Nor does it all stop here with personal appearances, shows or stunt promotions.

☆ ☆ ☆

● ● ● Take Peter Donald, the bright young comic whom CCNY students chose as the man who tells a story better than anyone else in radio. Because he is one of radio's busiest gents, appearing on the nets no less than 18 times per week, his mentors hit upon the plan of recording his gag telling and sending the discs to hospitals and vet institutions. At places like Halloran Hospital currently over the inside amplifying system, hospital disc jockies spin these witty platters intermingled with the latest musical renditions. Another way which radio "sets a record" as samaritan.

☆ ☆ ☆

● ● ● In the inspirational dep't, the brains behind the weekly CBS "Mr. and Mrs. North" series, a five-year-old constant air favorite, came up with a theme which will henceforth serve as an all-year-round inspiration to the men in blue. Each year in the key cities, "Mr. and Mrs. North" placques are being awarded, with the full co-operation of local police and civic officials, to the outstanding Detectives of the Year. The value of such plans is threefold: It encourages the individual—it makes for a safer country—and it allows for radio to be used for a worthwhile cause.

☆ ☆ ☆

● ● ● To,, radio's people in their unending trips to the hospitals to entertain the still bedded vets hasn't let down in the slightest. Jimmy Savo, himself an amputee now, leaves no stone unturned in his journeys to these institutions. Jane Froman, veteran of the Clipper crash, is another. And so it goes. The field which started with a crystal set some two decades or so ago has proven it has a heart of gold. Most of its good deeds are performed quietly because they remain deeds encouraged merely by a will to help out—with no personal gains considered. Topmost in the radio field as far as gaining help for the needy funds of our times stands the Damon Runyan Cancer Fund which will be doing widespread good long after most of us have taken a final stroll on good ol' earth. For this, not only Walter Winchell, the guiding genius behind same, rates some of his own orchids but Uncle Sam, too, gets our citation of gratitude.

DISK JOCKEYS—WRITERS' MESSIAH

By PINKY HERMAN, *Staff Writer, RADIO DAILY*

Herman

WHEN Jimmy Durante first gave out with his famous "Everybody Wants To Get Into The Act," he could very easily have been talking about John Q. Public's inherent propensity to write the Nation's songhits . . . there is probably no calling which stirs and/or whets the secret ambitions of so great a number of Americans, as that of songwriting. From all walks of life, from all parts of the country, would-be songwriters, descend yearly upon Tin Pan Alley with bulging briefcases, filled with manuscripts. However, we can safely say that 99 per cent, after heart-breaking setbacks, return to their homes, perhaps crestfallen and disillusioned but definitely undeterred, for their manuscripts still deluge Music Publishers daily.

●

This fact may not mean much to those thousands of disappointed songwriters, as far as encouragement to continue writing is concerned, but they might better understand the reason why their manuscripts are returned, UNOPENED, if they realize that competition today is so keen, that of the 3,000 professional songwriters, (2,000 of whom are members of the American Society of Composers, Authors and Publishers) a very small group enjoy comparative success. They read of the successful writers such as Irving Berlin, Sigmund Romberg, Richard Rodgers, Oscar Hammerstein, Johnny Mercer, Hoagy Carmichael, Johnny Burke, Jimmy Van Heusen, Frank Loesser, Ray Henderson, W. C. Handy, Jimmy McHugh and a few others, but never hear of the struggles, heartaches and disappointments of the lesser fry of Tin Pan Alley. Every year new names come to the fore, but they, too, were not overnight sensations, but in their own ways had to overcome the most difficult of obstacles. In this category we can name writers including Dave Mann and Redd Evans (There, I've Said It Again), Carl Sigman and Bob Hilliard (Civilization), Bob Russell (Ballerina), Joan Whitney and Alex Kramer (Love, Love, Love), Sammy Gallup and Guy Wood (Shoo Fly Pie and Apple Pan Dowdy), Ross MacLean (Too Fat Polka), Sammy Mysels and Dick Sanford (Red Silk Stockings), Jack Owens (How Soon?), Francis Craig (Near You), Evans & Livingston's (To Each His Own). These fellows have been on the stem for years and have just broken through.

●

There, is, however, one ray of hope for the free-lance songwriter and that is, the Disk-Jockey. For years these announcers-turned-record emcees, had been making progress in the Radio firmament and, during the Second World War, finally came into prominence. Unlike orchestra leaders, who, when asked for a plug, often said, "When the song gets on the Peatman (compiled weekly lists of most played songs) or on the Hit Parade, I'll do your number," Disk Jockeys listened to recordings and if they liked a number, often plugged obscure songs to Hitdom. Kurt Webster, a DJ at WBT, Charlotte, is responsible for the revived hit, "Heartaches." Martin Block, Maurice Hart, Dick Gilbert, Johnny Olsen, Rush Hughes, Bea Wain and Andre Baruch, Sherman Feller, Graeme Zimmer and others plugged Frankie Laine's recording of "That's My Desire" onto the Hit Parade. They also were responsible for the success of Harmonicats' novel arrangements of "Peg O' My Heart," the Bullet record of "Near You," the Tower record of "How Soon" and Vaughn Monroe's Victor platter of "Ballerina."

Thus a new angle has been discovered which gives the free-lance and amateur writer a chance to move into the charmed circle. A fine recording of a new tune, if plugged enough by the Disk Jockeys, can assert itself. The Petrillo ban on the recording of new songs, however, temporarily keeps this gate shut but we are optimistic and feel that a compromise between the powers-that-be will be effected and once more the field will be wide open for those with good songs. The DJ has been responsible for many an orchestra leader playing a song which he had previously rejected. The DJ has done a great service to songwriters, publishers and recording companies and rates the gratitude of all Tin Pan Alley.

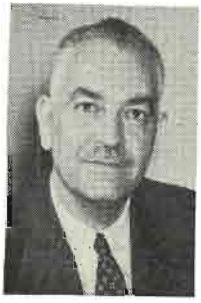
TELEVISION NETWORK FACILITIES

By M. E. STRIEBY, (Staff Executive, Long Lines Department, AT&T)



Strieby

TELEVISION has finally emerged as a big business and is perhaps the most rapidly growing industry in the country. With receiving sets in the hands of the public counted in six figures, and a potential viewing audience of more than 20 million people now within range of network programs, all of us connected with this new industry are faced with serious problems in meeting the demand for equipment or service.

Television is communication. As such, it is certainly a business in which the Bell Telephone System has a real interest. Furthermore, television's requirements for network facilities and the know-how of network operation fit in as a natural by-product of the very large scale communication services which the Telephone Companies now furnish all over the country.

●

At the T.B.A. Conference a year ago L. G. Woodford, General Manager of the Long Lines Department of the American Telephone and Telegraph Company, told you about the television facilities which the Bell System had at that time and of their plans for future extensions. During the past year the television broadcasting industry has made notable growth and, similarly, the Bell System has made progress in providing facilities which will be needed by this new industry. I will give you a report of the progress we have made and of our further plans for providing television network facilities.

On the subject of inter-city facilities, it seems clear that the larger the audience reached the greater the value of television broadcasting. Large scale networks will not only spread the cost of program production, but will make it possible to view important events as they happen in different parts of the country. It would appear, therefore, that inter-city networks are very important—perhaps more important to television than they are to sound broadcasting.

The Bell System plans to provide the same sort of reliable network service for the television broadcasting industry as we do now for sound broadcasting. We will make use of two kinds of facilities—coaxial cable and radio relay. Both of these types are being developed and installed between major cities to provide needed circuits for telephone, sound program, television, and other private line services.

●

The radio relay system between New York and Boston was officially opened for experimental purposes on November 13. The demonstration at the opening ceremonies included operation of the system for multi-channel telephone purposes and television transmission. The television demonstration consisted of a special program, arranged for broadcasting by all stations connected to the network—three stations in New York, three in Washington, two in Philadelphia, and one each in Baltimore and Schenectady, N. Y. The program started with a television pick-up in New York, was next switched by radio relay to a pick-up in Boston, and then —via coaxial cable from New York to a pick-up in Washington. The arrangement thus demonstrated the adaptability of both the radio relay and coaxial systems for network operation.

●

Later, the New York-Boston radio relay system was used to demonstrate television transmission before the Institute of Radio Engineers on December 3 and the Television Broadcasters Association on December 10. On these occasions transmission included two loop circuits to Boston and back, for a total distance of 900 miles. The first use of this system by commercial broadcasters occurred on December 5 when the Louis-Walcott fight was carried to Boston.

JOHN GART

www.americanradiohistory.com

TRANSCRIPTION PROGRAM TRENDS

By JOHN L. SINN, *Executive Vice-President, Frederic W. Ziv Company*

Sinn

THERE is usually a tendency — and a not unnatural one at that — to be pontifical and/or pompously prophetic when any discussion of trends and tomorrows is aroused.

To be sure, we admit to a formidable knowledge of the transcription score, but we also own up to having been shocked on our own solid grounds during 1947. On the basic of that atomic wallop, we want to say here and now that there is no program trend worth the mention as far as E.T.'s are concerned. The only trend worth considering at all for this year of grace is the trend toward Programs wth the proverbial capital "P."

●

The proof? It's in the results, the most eloquent expression in any language and beyond challenge by the most astute. When we decided to create the most elaborate and costliest transcribed dramatic show, built around the extremely expensive and highly cultivated triple-A star, Ronald Colman, and supported by the very finest in cast, full-blown orchestra and technical-production-script values, all wrapped up in classical and semi-classical finery as inspired by the works of the greatest authors of all time, some of our severest critics and even some of our best friends, said that this time we had sure blown our top.

When the sponsor-station-listener response to our fabulous half-hour package proved overwhelming, our critics and friends did only a little backtracking; they said, "Oh, well, you were very lucky; the trend is toward quality drama and you came out with the product at just the right time." Or words to that effect.

●

We think our being lucky purely coincidental. The proof? The Colman-starring "Favorite Story" was managing to struggle along to the tune of some 300 stations, including airings in 46 of the "Top 50" cities in the country, and by many of the top-top local and regional sponsors (including a bunch of plenty smart companies who had seldom or never presented their own programs before but who could not resist the irresistible), when we decided, after the usual due consideration, upon a reverse play.

The play was Guy Lombardo—The Guy Lombardo Show—one of the two or three great names in the pop music business, and to the musical savants who know about such things, also one of the most durable. This was another dollar-dizzy adventure because we operated on the theory that if Lombardo measured 100 per cent in value, a couple of six added fillips would brand the show at least double in value. So we brought in master dictionist David Ross as narrator, the best craftsmen (writers, technicians, etc.) and the whole Lombardo crew—the Twin Pianos, Don Rodney, Kenny Gardner, The Lombardo Medley, the Vocal Trio and, for a topper, "The Famous Lombardo Picture Story" in which nostalgia joined the Muse in the building of a beautiful and tender, richly integrated narrative pattern.

Our severest critics and even some of our best friends said that this time we would fall flat on our face. They said the kilocycles were cluttered up with music —big and little orchestras, local and network disk jockeys, and all kinds of musical razzle-dazzles at a dime a dozen, some literally, others figuratively. Also, the trend was way from big name orchestras, and too expensive, anyway, for local and regional sponsorship.

●

It is true we fell flat on our face—after being loaded down with contracts for the Lombardo Show to the point where the man with "The Sweetest Music This Side of Heaven" was annexing better than 250 outlets and threatening Colman's crown.

Of course, two eggs don't make a full basket, a truism we cannot deny. So what about the other eggs? While Colman's Favorite Story (quality drama) and Lombardo's 30-minute confection (quality music) were acting like crazy on the sales barometer, our other packages, virtually all of them dissimilar, and all of them older than "Favorite" and the Lombardo production, were being grabbed by local and regional advertisers at a clip that made them record-breakers on our books.

IN THE AIR

Wherever you go by air, the chances are that your flight will be timed by a Benrus watch, for BENRUS is the official watch of famous airlines and airports!

ON THE AIR

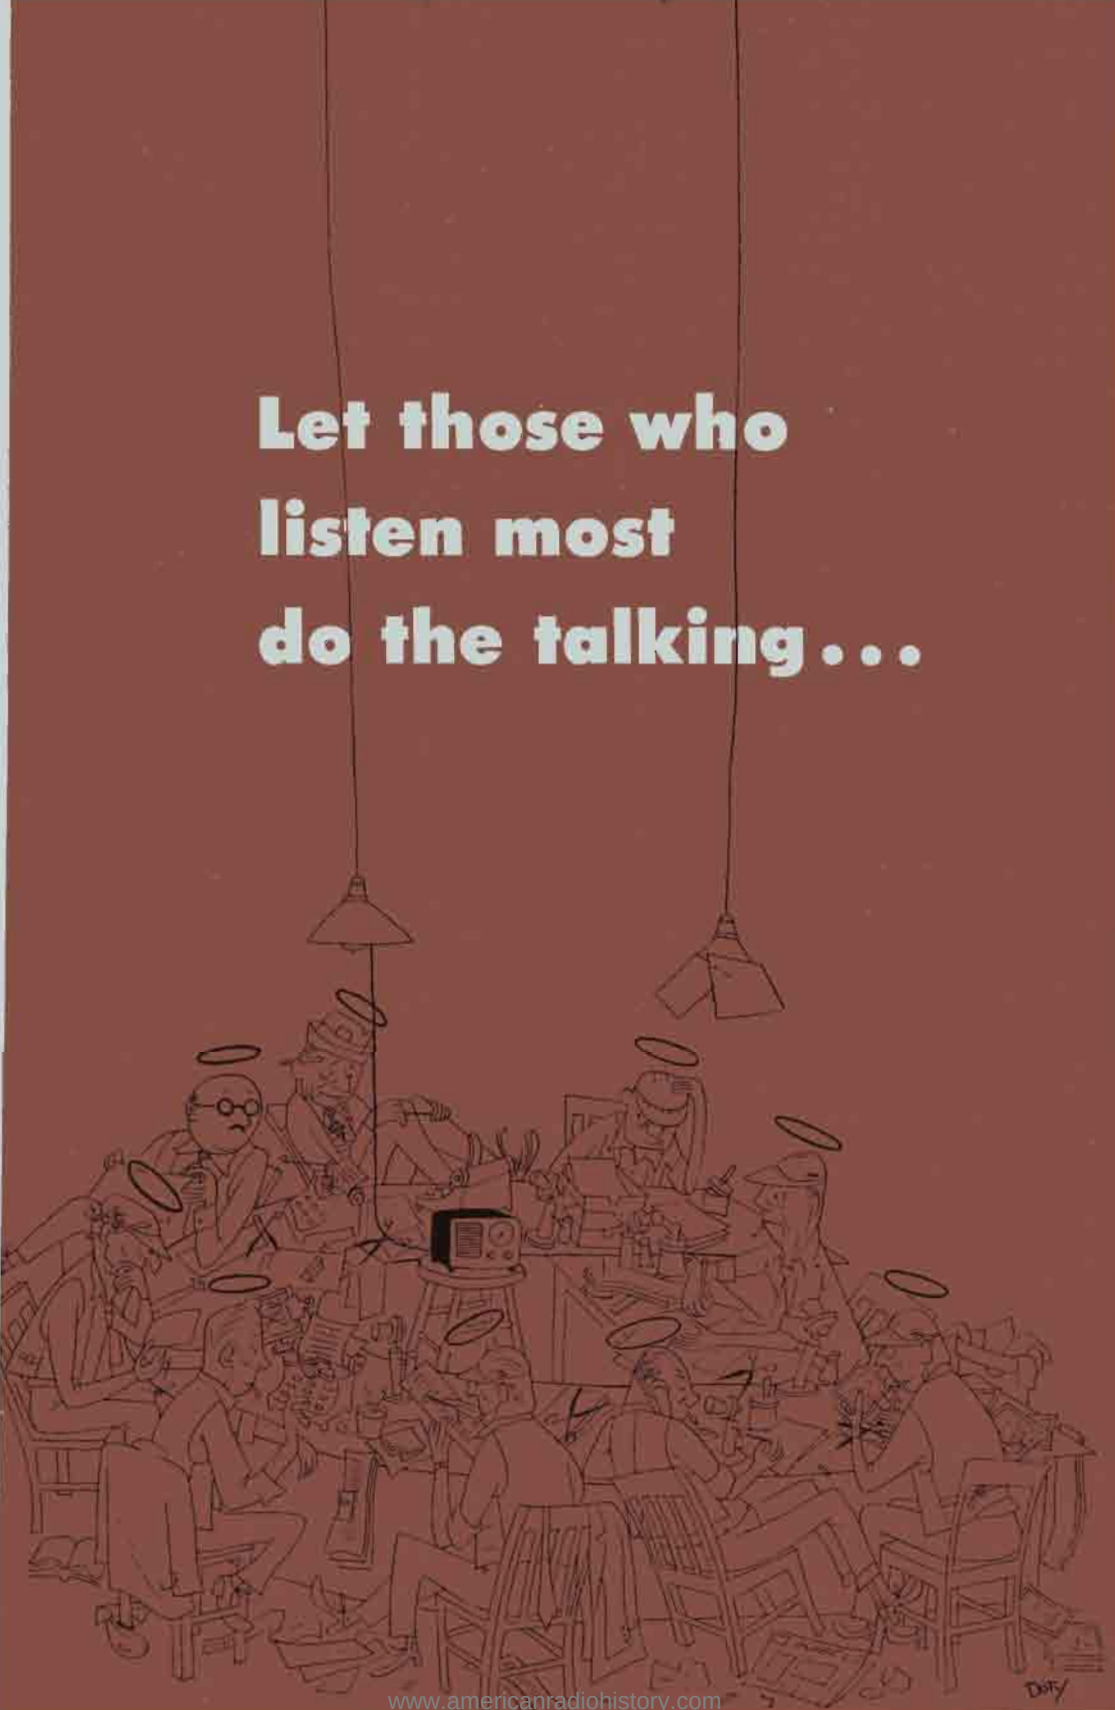
Over 100 stations — coast to coast — broadcast BENRUS time signals that reach approximately 23,000,000 radio homes daily A salute to these stations!

BENRUS

Official Watch of Famous Airlines

www.americanradiohistory.com

Let those who listen most do the talking...



www.americanradiohistory.com

"Original Programming: In this most important of all classifications, the Columbia Broadcasting System was far and away the leader. In a year marked by much vapid talk about lifting radio's standards, CBS actually did something creative."

—The New York Times

"CBS shows are...achieving a distinction all their own..."

—New York Herald Tribune

"CBS, which created that wonderful new comedy show, My Friend Irma, deserves credit for experimenting more than any other network."

—New York Post

www.americanradiohistory.com

"CBS program department coin splurge is probably unequalled among any of the other networks or among the top agencies . . . . but the web is also cognizant of one of the swiftest payoffs in network annals — "Irma" and Godfrey, both moderately-budgeted, hitting the top 15 bigtime within three months after bowing in commercially."

—Variety

"CBS is the most imaginative of the networks . . ."

—PM

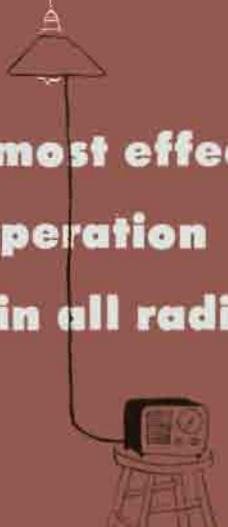
www.americanradiohistory.com

And the new hit shows of 1948 will keep coming from CBS

. . . because CBS has more skill *and* more manpower concentrated in producing top-flight, air-tested programs than any other network

. . . because only at CBS does top management work closely on programming

. . . because CBS shapes its shows to bring advertisers large audiences at *lowest* cost



CBS . . . the most effective program operation in all radio

www.americanradiohistory.com

TELEVISION ARRIVED IN 1947

By GEORGE L. MOSKOVICS, *Commercial Manager, CBS Television Station WCBS-TV*

Moskovics

NINETEEN forty-seven can be put down as the year when television really started to turn the corner; the year when circulation in merchandiseable quantities began to emerge; the year when commercial television networking was born and the year when advertisers began to get sales in addition to "experience" and "franchises" for their television dollars.

To be sure, when compared with other mass media, the merchandising accomplishments of television are modest. But, television has sold all manner of products from high priced automobiles to razor blades; there has been a sound, healthy beginning. During the year the number of advertisers using television increased six-fold, from 23 in March to 139 in October. While, as was to be expected, the major schedules were run by members of the "100 largest", many much smaller advertisers, both retailers and small distributors, used television to advantage.

●

A noteworthy development of 1947 was the emergence of sports as the most popular program type. Because sports shows are put on by the most experienced producers (the sports promoters) in the most ideal settings (the arenas, ball parks, etc.) with the greatest casts (the country's proficient and colorful players), sports naturally achieve a peak of program excellence not yet attainable by other program forms.

It was not surprising, therefore, that in almost every survey of relative program popularity sports took first place. A striking confirmation of this popularity is found in the extent to which advertisements of television receivers show scenes on the screens of the pictured receivers.

Nor was it any less surprising that many of the country's largest and shrewdest advertisers used sports for their television programming. Whereas in 1945-6 many sports shows were carried as sustainers, in 1947, sponsorship of sports events grew to the point where during the latter part of the year almost all available sports packages carried an advertiser's sales message.

1947 saw the inauguration of regular daytime television. Several daytime programs, broadcast principally between the hours of 1 and 2 p.m., directed to the interest and entertainment of housewives made their debuts. And from the enthusiasm with which they were received, it is evident that daytime programming has made a vigorous start.

Another striking note of 1947, was the marked improvement in the development of commercial techniques. The year saw a rapid growth in the recognition of the tremendous sales potentialities of the living sight and moving sound of television. Building on the earlier experience in the medium, many advertising agencies began to develop marked proficiency in devising and executing commercials of increasing effectiveness.

●

There was a noticeable trend away from the merely "cute" commercial to more direct and thoughtful demonstrations and other presentations of the true values of goods and services. Studies among viewers indicated a preference for informative advertising and away from the devious concealed approach.

Numerous case histories came to light during 1947. They range all the way from gratifying records for low costs per inquiry and noteworthy sales for established lines through normal dealer outlets, to successful use of the medium to obtain distribution for new products.

As a result, there is a healthy degree of interest in television marked by some competition for favorable availabilities of both time spots and programs. Tardy and lethargic advertisers, complacently comparing television with radio, are finding it increasingly difficult to satisfy their requirements in the comparatively limited field of television, certainly a wholesome situation for the medium.

All in all, 1947 has been a year of great progress for this dynamic new medium. It has learned many good lessons from its own past experience. Beyond question, it is taking on the stature and stability.

Our Job at BMI is SERVICE in MUSIC

BMI emphasizes its *Service in Music* through a wide variety of practical aids to the broadcaster . . .

BROADCASTERS today receive regularly such special aids as CONTINUITY – COPYRIGHT RESEARCH BULLETINS – HOLIDAY MUSIC LISTS – PIN UP SHEETS – NEWSLETTER – SONGS OF THE MONTH – PIN UP PATTER – RECORDATA – MUSIC MEMO – GRATIS MUSIC – RECORD PURCHASING ASSISTANCE. These special services are provided without cost to all BMI licensees.

MUSIC FOR EVERY NEED – BMI which had enough music for the entire needs of broadcasters in 1941, today has increased its repertoire of performable music by more than 400%.

In American folk music BMI surpasses any other licensing agency. In Latin-American music BMI is equally outstanding. In every classification – current popular songs, dance music, hot jazz, serious and semi-classical – the BMI repertoire provides sufficient music to fill every program need.

INDUSTRY OWNED AND OPERATED – BROADCAST MUSIC, INC. was established and is maintained and operated by and for the broadcasting industry. *Management of BMI is directed and guided by a Board of Directors elected by the broadcasting industry, and functions solely in your interest as a broadcaster.*

When It's BMI . . . It's Yours

- Every bar of music in BMI's versatile and enormous catalogue is yours.
- Every service offered by BMI to improve music programming is yours.
- Every BMI song performed over the air is yours.
- Because, you see, BMI itself is yours. Broadcasters established BMI. Broadcasters maintain and operate BMI. It functions only to serve you and the interests of our great industry.

BROADCAST MUSIC, INC.

BMI BOARD OF DIRECTORS—*Left to right:* Frank K. White, Leonard Kapner, John Elmer, Robert D. Swezey (standing), J. Leonard Reinsch, Sydney M. Kaye, Justin Miller, Carl Haverlin, Joseph A. McDonald, Paul Morency, J. Harold Ryan, William S. Hedges.

BMI Reports to the Industry

From its very inception BMI has had the full support and cooperation of the broadcasting industry. As a result its growth has kept pace with the general progress of the industry as a whole.

Today, all but four of the broadcasting stations in the United States and Canada, as well as all the national and regional networks are licensees of BMI. And all of them make a very substantial use of the BMI music repertory.

Conservatively, 99% of the dollar volume in the industry is represented by BMI licensees.

Of the total number of BMI licensees (there were 1,966 as of January 15, 1948):

1,029 are stations affiliated with the national networks
591 are independent stations
211 are F-M, Television and Short-wave broadcasters
115 are Canadian stations
20 are in U. S. territorial possessions

At the start of 1948 BMI granted licenses to 1,693 hotels, night clubs and other establishments where music is performed.

BMI's strength comes not alone from its large family of licensees. An equally great number of affiliate publishers, more than 1,000 to date, combine their catalogs to provide hundreds of thousands of selections whose radio and other performing rights, including television rights, are held exclusively by BMI. Thousands of modern arrangements of favorite compositions in the Public Domain further enhance the BMI library.

In foreign music, the works of the composers and publishers of performing rights societies of Brazil, Chile, Columbia, Cuba, and Mexico is made available to broadcasters through BMI. In addition the BMI repertory includes important catalogs of Canada and Italy.

Through a variety of practical services to broadcasters, BMI has been accepted as indispensable to the industry. Consequently, broadcasters throughout North America are demonstrating their preference in the performance use of BMI-licensed music.

In all fields of music — popular, folk, educational and standard — BMI has opened new sources of music by having developed a vast repertoire that might never have existed. BMI has stimulated and encouraged hundreds of talented young composers and new publishers.

Through its own publishing activities, those of its newly acquired subsidiary, Associated Music Publishers, Inc, (AMP), and those of its affiliate publishers, BMI continues to expand its music library and its services so that it will continue to play a vital role in music and radio.

most popular . . . according to Hooper Program Surveys. Year after year NBC has carried an overwhelming majority of the most popular programs on the air.

most listened to . . . according to the Broadcast Measurement Bureau, the industry's official listening gauge. BMB, in a completely impartial survey of actual listeners to all networks, found that each week NBC reaches nearly 3,500,000 more radio *families* in the evening and over 2,500,000 more radio *families* in the daytime than the second network.

most effective . . . last year the one hundred largest radio advertisers, in gross expenditures for broadcast facilities, spent nearly $13,000,000 more with NBC than with the second network. Furthermore, NBC not only delivers larger audiences and more popular shows, but on a straight comparison of facilities, cost, and BMB families, NBC *delivers more listeners per dollar*, both day and night, than the network with the second largest audience.

PROGRAM TYPES PREFERRED

By TOM FITZSIMMONS, *Night Editor*, RADIO DAILY

Fitzsimmons

LOOKING back in retrospect over the programming of the past year, and permitting this retrospection to be buttressed by the opinions and findings of more than 600 program executives from coast to coast, we are impressed principally by the demand of radio audiences in all sections of the land for, first, MUSIC and, secondly, NEWS.

In these two programming categories are grouped the established preferences of the bulk of the American listening public. In these preferences are mirrored the innate culture, intelligence and discrimination of the nation's average audience. In this fact we will find, if we but look, the refutation—the emphatic refutation—of those who would have us believe that our country's sitters-by-the-radio are infantile, even moronic, in their quest for entertainment.

•

The American public has unjustly been called fickle, indecisive. It is neither. The preference of the majority for music and news during 1947 is not a "trend." It is a fixed course, a continuation of a demand which was felt with equal strength in 1946, a social and cultural force which was vital in war as in peace, and which undoubtedly will be dominant on the airwaves of the years to come. It is a healthful condition, one of which the industry and the nation can well be proud.

Actually, music—both live and transcribed—was most in demand. This is natural, because of the many and varied forms in which this "food for the soul" can be presented, and which makes it adaptable and acceptable to so many groups, from lovers of symphony and opera down through the various divisions of semi-classical, standard, popular, dance, hill-billy and folk tunes.

The news broadcast, the value of which was so firmly established during the war, has maintained its popularity almost undiminished. The demand for the "newscast," while not nearly so strong as for music, is, nevertheless, far more emphatic than for the categories which follow. These categories, in their order, are: Variety, Dramatic Shows, Quiz Programs, Comedy, Sports.

In the third and fourth classification—Variety, and Dramatic Shows—the matter of transcriptions moves strongly to the fore. Generally, it seems, the transcribed show is accepted as readily as the live program, quality being the one criterion by which the listener will judge. There is, however, an audience group which feels that it is getting a transcribed production "second hand." It is not a large segment of the public, however, and its size, such as it is, now is decreasing.

In fifth place we find the quiz show, followed by comedy. The margin of leadership for the quiz is very slight, however, and all indications point to a switch in the order of these groups during the coming year. While the popularity of the quiz show still is strong, the demand for *new* programs of this type is very slight.

•

On the other hand, the demand for new comedy shows is strong and widespread. This is not to say that the public is tiring of the tried-and-true top-flight comedians who have risen to international fame during the past decade or more; on the contrary, the call for more of the same is distinctly a tribute to those now on the airwaves.

The giveaway show, that strange growth within the program structure of the industry, condemned by the majority, and even by its proponents looked upon as a necessary evil, is, happily, on the way out, heading very slowly, but steadily, for oblivion.

Sports, in the form of on-the-spot broadcasts of athletic events, boxing bouts, etc., at the time they occur, are, of course, popular when of sufficient importance as a news event.

In summation, it can truly be said that America's taste in program preference is generally sound, cultural. For this, the station program directors of the nation must share credit. A vital, indispensable force behind the scenes, their influence in the uplifting of the industry should be appreciated by all who have the best interests of that industry at heart.

These are the shows . . . the stars . . . the sponsors who have made 1947 such an outstandingly successful year for ABC. They are good reasons why, in '47, ABC was the *only* network whose share of audience substantially increased!

CO-OPS CAPTURING CUSTOMERS

By ERNEST E. STERN, *Associate Editor, Radio Annual*

Stern

IN rounding out 1947's report on radio in all its many phases, it would be a serious omission not to include the strides made by the network co-operative programs. If anything, this was the year when the co-op shows came into their own with the four major networks airing a total of 51 co-operative programs at year's end. Of these 51 shows, Mutual Broadcasting System accounted for 18; American Broadcasting System for 14; Columbia Broadcasting System for 13, and National Broadcasting System for 6. This amounts to a 59 per cent increase in co-op shows over the period ending the year 1946.

•

Conjecturing on the reasons for this spurt in co-operative programs, the obvious answer lies in the fact that the sponsors advertising dollars for radio programming are going further and giving better programming. It is safe to assume that the number of co-operative programs will see a continued increase during the year 1948, with every likelihood that by the years end, some 100 co-op programs will be in force via the four major networks and many of their affiliates.

In all cases, news programs were the most sought-after, substantiating the fact that such programs are in the top listenability spot on the air. This is easily accounted for by the impact the war years had on news broadcasts and continued world unrest. News programs still rate the highest percentage of radio listeners by the majority of the American radio audience.

The advantages of multiple sponsorship is not always immediately measurable in a dollar and cents return to the advertiser. The prestige impact of local sponsors being able to bring a top rated news program to an audience who might otherwise have to do without, cannot accurately be measured. Likewise, such sponsorship has untold good effect upon the affiliates offering this program to their audiences, and herein perhaps lies the secret of better program building nationwide, at a cost which enables a number of sponsors in any one community to bring quality programming to their customers.

•

As far as can be best traced, the inception of network co-operative programming originated with Fulton Lewis, Jr., (MBS), who is credited with having first commenced the co-operative program idea. His first paying sponsor was the American National Bank in Denver, Colo. This same bank has been sponsoring the Lewis broadcast ever since.

A revolutionary departure for "Information Please," another Mutual program, took place in 1947, when that program went co-op, allowing it to be heard over 107 stations by the end of the year.

Among ABC's top co-operative shows are the "Abbott & Costello" show, now sponsored over 65 stations of ABC, covering the major markets in the U. S. The weekly cost of such a program varies according to the affiliate using it, but a good example is Station WFVA, a 250 watt outlet in Fredericksburg, Va. This station pays $38 for this top comedy program, which includes cost for time and talent. WJZ, ABC's key outlet in New York, a 50,000 watt station, pays $1929 for the same program. Another ABC co-op program which rates high is Martin Agronsky, ABC's news commentator, which incidentally, is the network's leader in co-op sales, with 101 advertisers sponsoring the program on 85 stations.

NBC's "World News Roundup," heard Monday through Saturday, remains in that network's No. 1 spot, with 31 sponsors on 53 stations. Next in line is their "News of the World," program, with 19 sponsors, heard over 58 affiliates. A new-comer to the NBC co-op list of programs is Robert Ripley's "Believe It Or Not" program, heard over 79 stations with 14 sponsors.

Among CBS' top co-op shows is their "World News Roundup," heard over many of the CBS affiliates throughout the country. "Bill Henry and the News," another leading CBS co-op show is a news program much in demand by radio advertisers.

All told, the co-operative program is very much in evidence, with the co-operative program departments of each network accountable for a goodly portion of their increased business for 1947.

BUSINESS TREND NOTED

By VAL ADAMS, *Staff Writer*, RADIO DAILY

Adams

ONE of the outstanding events in the expansion of commercial radio in 1947 was the fact that gross revenue of stations from local retail advertising exceeded network revenue for the first time in history. According to an NAB estimate, the station figure surpassed the gross revenue of the national networks by over $10,000,000. Local retail advertising brought stations about $136,000,000 during 1947, an increase of 17 per cent over the previous year.

The nearly $20,000,000 increase in local retail advertising, however, is due in part to the fact that there were 1400 stations in 1947 compared with 953 in 1946. But NAB said its survey clearly reflected the "increasingly local character" of radio and its growing importance as a "community" medium.

While the 17 per cent increase is impressive, let's look for a piece of information with a little more significance. It'll be found in NAB's estimate of an average eight per cent gross revenue increase in 1947, for all types of stations, and an increase of nine per cent in operating costs. This in no way, however, means that total profits took a dip in 1947 but it does point out that the broadcasters' apprehension that gross and operating increases would run neck and neck has all come true. Reasons given for rises in operating costs ranged from operation of non-profit FM outlets to meeting further wage demands of new labor contracts.

●

Trend toward a lower rate of profit in broadcasting, reported by the FCC in its analysis of 1946 financial statements of licensees, continued on into 1947. Percentage-wise, small stations of 250 watts or less were the best bet in meeting the economic crises. Their average gross was up 10 per cent, higher than any other type of station, while their operating costs went up only five per cent, less than any other type of outlet. Medium stations (500 to 5,000 watts) were caught right in the middle of the trend. Their average gross revenue increase was the lowest of all types (six per cent) while their operating expenses went up more than any others (11 per cent.)

From all advertisers—network, local and spot business—radio got over $357,000,000 (gross revenue) in 1947, according to NAB estimates. This hike of around seven per cent came to some extent from the increasing number of stations on the air and the fact that national spot business went up some nine per cent. National and regional web revenues held pretty steady but did show a slight decline in the combined figures.

Getting specific about national networks, ABC's gross network time sales went up 7.2 per cent in 1947. The take was $43,548,057 compared with $40,617,130 in 1946. ABC's 7.2 per cent jump last year was far above the only 1.4 per cent gain noted in 1946.

Mutual's gross billings were down about three and one-half million last year but the network reported such was to be expected since in 1946 the jump had been an outstanding 25 per cent. MBS billings were $22,372,711 in 1947 compared with $25,907,202 in 1946.

●

The CBS financial statement for 1947, omitting a few items of the previous year, revealed only gross income and didn't talk about gross billings. Trade circles immediately speculated that time sales must have been down in '47, particularly since several big holes showed up in the commercial program schedule. However, gross income for CBS last year was slightly above that in 1946, a figure which includes sale of Columbia Records and income from other operations. Gross income in 1947 was $9,520,100 compared with $9,355,900 the previous year. CBS net income was also a wee bit up in 1947.

In the way of dollar volume time sales, NBC remained at the head of the list and there were periods in 1947 when it came to as near being sold out as a network can be. NBC declined to give figures, although admitting that 1947 was its best year in history and that goes for several of its owned and operated stations. Such being the case, NBC gross billings continued upward of $66,000,000

MIDWEST RADIO OPTIMISTIC

By NAT GREEN, *Chicago Representative of* RADIO DAILY

CHICAGO radio started the year 1948 with a healthy optimism based upon concrete achievements of the past year and promising indications that the new year would see substantial expansion of advertising budgets, with radio getting an agreeable share of the advertising dollars. An excellent example of what to expect in '48 was the announcement of the Toni Company, makers of a hair beauty aid, that the firm's advertising budget for the year would be $6,000,000, approximately $4,000,000 of which would be devoted to radio. With approximately 125 other advertisers having budgets exceeding a million dollars each annually, and all of them having found radio a profitable medium, both local and network sales departments feel sure that they will keep pace with the upward sales curve.

Green

•

Substantial progress has been made in programming and production by Chicago radio stations, which have been making a sincere effort to improve their shows—with considerable success. A number of programs in the public service category have received high commendation. In common with the trend elsewhere, Chicago has seen a tremendous increase in disc jockey shows, some of which have gained astonishing popularity. New disc shows continue to pop up, although in the opinion of many radio men they have been overdone.

•

Activities in all branches of ABC's central division showed marked improvement in 1947, according to E. R. Borroff, vice-president in charge of the Chicago operations, and give promise of further progress during 1948. Borroff pointed to the additional business sold through the division; the increase in Chicago originations, and the huge success enjoyed by the sponsors of the "Jack Armstrong" and "Sky King" programs which were expanded from quarter-hour daily segments to 30-minute broadcasts on alternate days. Two long-established New York ABC programs, "Ladies Be Seated" and "Terry and the Pirates," moved to Chicago in '47, and a new audience participation program, "Welcome Travelers," started last summer, quickly became a favorite. Commenting on the record made by the division last year, Gil Berry, sales manager, said: "The tremendous strides made by ABC in 1947 will continue on an even greater scale in 1948."

NBC and its local station, WENR, started the new year with many new accounts and important renewals on their books, and I. E. Showerman, NBC manager, said '48 promised a steady increase in business. In programming and production, NBC has kept pace with the times. A prosperous 1948 for WGN and Mutual is seen by Ade Hult, Mutual's midwest manager. A new WGN program, Lou Cowan's "R.F.D. America," launched late in '47, was zooming to popularity by mid-January.

•

The CBS station, WBBM, won commendation and several awards for public service programs such as "Report Uncensored," "Democracy, U. S. A.," and "Assignment Home," and for the work done by the WBBM-FM Studio Theater. Both commercially and from a program and production standpoint, 1948 promised to be a successful year.

Chicago's independent stations carried more business in 1947 than during the previous year and entered the new year with excellent prospects for greater increases. WJJD, the Marshall Field station, and WIND reported heavy billing, and WGES carried a record amount of local business.

FM radio has made progress in the Chicago area. WEAW in suburban Evanston went in operation in 1947 and has become firmly established. WENR-FM started operation January 1, and WOAK, in suburban Oak Park, was scheduled to go on the air about March 1. Evanston also has a new AM station, WNNP, and a new AM station, WVON, was in the works early in the year for Chicago's South Side.

HOW WOULD YOU LIKE TO EXPERIENCE

Real Imaginative Selling

IN THE NATIONAL SPOT FIELD?

Are you buying prestige, service, reports at a rate that is too high when what you need is a true analysis of your national selling problems and *Real Imaginative Selling?*

When you go out to sell someone a proposition yourself whether it be in your radio business or in any other type of business with which you are connected, you first analyze your situation. You do not hope to make a deal through fast talk but rather through your presentation of a strong case.

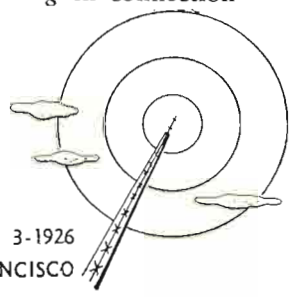
These things are very much the same in selling time to advertisers in the national spot field. A study of the advertisers' problems must be made, an analysis of how the stations' facilities can be best used, must be made and a *Real Imaginative Selling* presentation must be made.

We'll go along with you and admire your fine advertising campaign, we'll even go along and admire the fine ads of your network and representative. We'll even agree that your present method of approach to the national spot field is considered acceptable to the trade. However, the test is—are you getting results?

Is your dollar volume high enough to pay for the ever increasing cost of operation? Is all of your salable time sold?

We started out a little more than three years ago with a sound idea and a number of highly experienced radio people. The results, station by station, are more than we can put into this space, but these facts are available. (A survey made by one of our stations before selecting us showed our organization as one of the first three in every agency queried.)

Our presentation is a simple one. It shows our analysis of a station's problem and the results. There is nothing to be lost and perhaps something to be gained by hearing our experience of three years summed up in forty minutes. There is no obligation and we may give you an idea for *Real Imaginative Selling* in connection with your station.



Adam J. Young Jr.

Aggressive Activity

In 1946 and again in 1947 Avery-Knodel pledged "Aggressive Activity" to meet the ever increasing competitive situation. We renew the pledge for 1948.

"Aggressive Activity" is the vision to plan, the knowledge and experience to present the plan intelligently, and the follow-through to carry the plan to successful fulfillment.

We're still young . . . we're still growing . . . we're still imbued with the "Aggressive Activity" that pays dividends for the properties we represent.

A RECORD THAT SPEAKS FOR ITSELF!

Seventeen consecutive years of successful broadcasting

The techniques of success are discovered through long arduous years of experience and just plain hard work. After 17 consecutive years of successful broadcasting, we are proud to give our clients, on a silver platter, OVER 1,500,000 ITALO-AMERICAN DAILY LISTENERS. We will deliver YOUR Message to them the way they understand it, like it, and ACT on it.

STANDING COMMITTEES
NAB
1947—1948

FOLLOWING committees and sub-committees were appointed by the NAB President since the Annual Convention in Atlantic City in September 1947. To facilitate the important business of the committees, liaison groups have also been appointed geographically, with a Board member as one of the personnel on each committee.

BY-LAWS

George D. Coleman, Chairman, WGBI, Scranton, Pa.
Wiley P. Harris, WJDX, Jackson, Mississippi.
G. Richard Shafto, WIS, Columbia, S. C.

CONVENTION SITES AND POLICY

Howard Lane, Chairman, WJJD, Chicago, Illinois.
Harold E. Fellows, WEEI, Boston, Mass.
Robert T. Mason, WMRN, Marion, Ohio.
William B. Smullin, KIEM, Eureka, Calif.
William B. Way, KVOO, Tulsa, Oklahoma.
T. A. M. Craven, WOL, Washington, D. C.

FINANCE

Clair R. McCollough, Chairman, WGAL, Lancaster, Pa.
T. A. M. Craven, WOL, Washington, D. C.
C. Bruce McConnell, WISH, Indianapolis, Indiana.
John F. Meagher, KYSM, Mankato, Minn.
Paul W. Morency, WTIC, Hartford, Conn.

MEMBERSHIP

John J. Gillin, Jr., Chairman, WOW, Omaha, Nebraska.
Charles C. Caley, WMBD, Peoria, Illinois.
Gilmore N. Nunn, WLAP, Lexington, Ky.

INTERNATIONAL ADVISORY

Campbell Arnoux, Chairman, WTAR, Norfolk, Virginia.
Paul W. Morency, WTIC, Hartford, Conn.
T. A. M. Craven, WOL, Washington, D. C.
Clyde Rembert, KRLD, Dallas, Texas.
John J. Gillin, Jr., WOW, Omaha, Nebraska.
Campbell Arnoux, Chairman, WTAR, Norfolk, Virginia.

EDUCATIONAL STANDARDS COMMITTEE

Ralph W. Hardy, Chairman, KSL, Salt Lake City, Utah.
Dr. Willis F. Dunbar, WKZO, Kalamazoo, Michigan.
Armand Hunter, WFIL, Philadelphia, Pennsylvania.
Hazel Kenyon Markel, WTOP, Washington, D. C.
F. C. Sowell, WLAC, Nashville, Tennessee.
Judith C. Waller, NBC, Chicago, Illinois.

EMPLOYER-EMPLOYEE RELATIONS EXECUTIVE COMMITTEE

John Elmer, Chairman, WCBM, Baltimore, Maryland.
Charles C. Crutchfield, WBT, Charlotte, North Carolina.
Thad Holt, WAPI, Birmingham, Alabama.
Leslie C. Johnson, WHBF, Rock Island, Illinois.
O. L. Taylor, KGNC, Amarillo, Texas.
C. L. Thomas, KXOK, St. Louis, Missouri.
Linus Travers, WNAC, Boston, Massachusetts.
W. A. Wilson, WOPI, Bristol, Tennessee.
William Pabst, KFRC, San Francisco, Cal.

BOARD LIAISON MEMBERS

Michael R. Hanna, WHCU, Ithaca, New York.
Henry P. Johnston, WSGN, Birmingham, Alabama.

SPOT THE TOP EXECUTIVES

You wouldn't try to sell ice cubes to a penguin nor diamonds to a Bowery Billy . . . and you can't draw a national audience with a ten-watt transmitter.

You have to reach top buying power for top results!

In ADVERTISING & SELLING you sell to the nation's key executives the audience penetration value of spot time on *your* station. You reach the men who *count*—the time buyers, account representatives, advertising and sales managers—through the only *monthly* marketing magazine with proved selective circulation, proved continued readership.

A & S IS YOUR BEST SPACE BUY TODAY . . .

Because its important radio studies are written by the industry's top executives, A & S is read by the men who influence millions of dollars worth of radio time.

Because it carries two every-issue departments written specifically for and about spot radio, A & S has high news and interest value to the radio field. These departments are RADIO and LISTENING IN, a special feature by Bob Foreman, in charge of radio commercials and spot division at BBD&O.

Because its editorial policy is *major subjects by major writers*. A & S has a high policy-making executive readership.

Because it is a monthly, advertisements have thirty days in which to be seen and studied—dollar for dollar, advertising value is higher.

In return for a telephone call or a letter, we will be pleased to have one of our representatives give you further details.

PILLSBURY MILLS, INC.

MINNEAPOLIS 2, MINNESOTA

ROBERT J. KEITH
DIRECTOR OF ADVERTISING

November 25, 1947

Mr. Manuel Rosenberg
Publisher and Editor
11 West 42nd St.
New York, N. Y.

Dear Mr. Rosenberg:

I think all of us in A.N.A. appreciate the way you have put the thoughts of the meeting in capsule form on the cover of the November issue of your magazine.

Without meaning to detract in the least from your effort, I do want to call to your attention the fact that I work for and get paid by Pillsbury Mills and not General Mills.

The fact that this error on the cover of your magazine has been called to my attention by at least ten people here in Minneapolis would indicate that "The Advertiser" carries a pretty strong "beam" into Minneapolis.

Yours very truly,

Robert J. Keith

Ask your national representative

You're on the verge of a decision, and a problem. What trade papers to pick for your station promotion?

It's no problem to kiss off, for your choice can have a telling effect on your national spot income this year. But where to get the facts? The answer is simple.

Ask your national representative.

He knows. His salesmen get around. They learn which trade papers are appreciated, read and discussed by buyers of broadcast time.

His is an expert opinion.

Don't overlook your national representative.

We're 68 Years Young!

But we are not resting on our laurels as an outstanding reportorial and analytical magazine in the music field. Despite our notable international achievements in music journalism, we are more alive to the present and future activities and accomplishments in music than ever.

We're just as interested in Schoenberg and Hindemith now as we were in Brahms and Tschaikowsky when the Musical Courier was a baby. Not that we're not interested in Brahms and Tschaikowsky today—our columns contain articles and critiques of all music that is played, and much that isn't. It's just that we pride ourselves on keeping abreast of the latest developments in music.

Musical Courier's international coverage, features, special departments for piano, voice and organ, dance, recordings, ballet, motion pictures, radio and television, and interviews with leading musical personalities have been of vital interest to professional, student and layman alike for the past 68 years. Now that music is assuming an even more important role in American life (thanks to the film and radio), Musical Courier is still more necessary to all music-lovers.

So, if we're only as old as we feel, we're good for another 68 years.

To the Radio Stations of America —

Our Sincere Thanks

In 1947—with spot radio the principal advertising medium—the Bulova Watch Company enjoyed its most successful year . . . *the most successful year ever experienced by any watch company in America!* This was due, to a large extent, to the magnificent cooperation of the radio stations and their representatives throughout the country.

To all of you—once again—our heartfelt thanks. We look forward to many more years of pleasant and profitable association.

6 BIG REASONS why you'll sell more in '48 with WMT * in Eastern Iowa

"...the station of the stars" is your best bet to cover Eastern Iowa's Twin Markets.

You get:

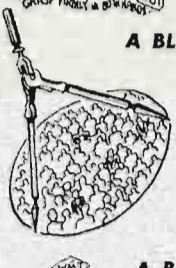
A WEALTHIER MARKET

Iowan wealth is the highest per capita in the U.S.A. ($4,322: almost *twice* the national average!)

A RADIO-CONSCIOUS MARKET

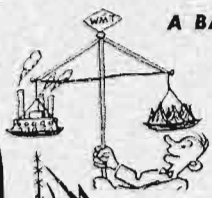
Even Iowa's farms have more radios than do farms in other states. Iowans depend on their radio for news and other public service as well as for entertainment.

A BLANKETED MARKET



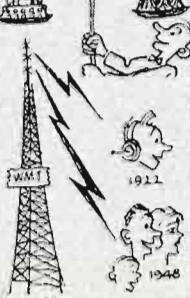
WMT reaches the largest primary area in the state at the lowest rate per radio family . . . 1,131,782 persons within the 2.5 MV line—greater than any other Iowa station.

A BALANCED MARKET



Smokestacks are going cornstalks better than 50-50 in Iowa. Income is almost evenly divided between city and farm.

A LOYAL MARKET



Eastern Iowans on city and farm have been listening to WMT for more than a quarter of a century. *Because* WMT brings them programs they like!

THE UNIQUE MARKET

Only WMT delivers CBS Network shows to Eastern Iowa. And only these shows, plus WMT's fine local programs, deliver the prosperous twin market audience to you.

Get on WMT and get your share of the millions WMT listeners will spend in '48

MARK WOODS
President

American Broadcasting Company

TO borrow an expression from the armed services, 1947 for the American Broadcasting Company was a most interesting "testing and proving ground."

During the year our network established and developed its theory of "planned programming"—of the presentation in prime listening time broadcasts intended to appeal to and hold the interest of a large, continuing audience and so to give the advertiser the benefit of a cumulative audience response. Exemplifying this theory was our rearrangement of the Tuesday night listening pattern to offer, in contiguous time periods, such programs as "Youth Asks the Government"; "America's Town Meeting"; the Boston Symphony; and "Labor USA" in which both labor and management can offer their views on current problems affecting the nation.

●

Similarly, we realigned our Wednesday night schedule to offer in the same way such outstanding programs as "Mayor of the Town"; "Vox Pop"; "Abbott and Costello"; "Groucho Marx"; the Bing Crosby and the Henry Morgan programs to make that night a top listening "must."

We intend, in 1948, to extend and amplify this system of programming; but we certainly do not feel that we or any other network has yet hit upon a formula which will answer all the demands of an ideally balanced program schedule. To my way of thinking, that ultimate will never be reached. From the standpoint of the listener, ideal programming would offer hour after hour of similar broadcasts—music, drama, variety. But we have also the problem of the advertiser, who naturally wants something different to attract an ever greater audience and thus attain a wider market for his product. I feel that there must always be a compromise point between the ideal of the advertiser and that of the listener and I feel that we have made an excellent approach to what might be termed an ideal compromise.

During the past five years, the network has more than doubled its coverage in the leading markets of the nation. At the close of the year, our affiliates numbered 265, carefully selected to further the network policy of giving our advertisers coverage of listeners and not merely of territory. Among the leading developments in the station field during 1947 was the operation of our owned and managed outlet in San Francisco, KGO, as a fifty kilowatt station as of December 1, making it the most powerful outlet on the West Coast between the Canadian and Mexican borders.

●

During the year we also received television and FM grants in the five cities where we currently own and operate standard band stations—New York, Chicago, Detroit, Hollywood, and San Francisco. Television sites have been acquired in all cities and sometime in 1948 we expect to begin television operations, probably starting on the West Coast. It is probable that in the coming year we will also begin FM operation in connection with one or more of our owned and operated stations. In this connection, I should like to say that when we do begin FM operations, it will be through duplication of programs already being broadcast on our AM stations. We believe that only in this way can FM be developed to its full stature. It is not a separate industry and we think it cannot be developed as such.

●

To return to 1947 for a moment, the year saw a substantial number of new-to-radio advertisers using the facilities of our network, one result of which was that ABC was completely sold out during the 9 a.m. to 6 p.m. period, Wednesday and Friday nights completely sold and comparatively little prime time available elsewhere.

No sir, I think that the coming year will be a good one for all advertising media and that radio will have its equitable share of the advertising budget of the manufacturer intent on selling products. While operating costs are steadily rising, we at ABC feel that we have no reason to look toward 1948 with anything but an optimistic outlook for the progress of our company.

Look at the figures in that headline again

They reveal the tremendous impact of The Nation's Station within the WLW Merchandise-Able Area, as shown by the Nielsen Radio Index for February-March, 1947.

During the four measured weeks of listening, WLW reached more than four-fifths—81.2%— of the 3¼ million radio homes within the area, between 6 AM and midnight. *That's coverage!*

During the same four weeks, a total of 175 stations received listening within the area, yet WLW received one-fifth—19.3%—of *all* listening to *all* stations. *That's dominance!*

How much did these homes listen? Taking all 3¼ million radio homes within the area, WLW received an average of 375 minutes of listening per home per week between 6 AM and midnight. But, among that 81.2% of the homes which were classified as WLW listeners, the average was 550 minutes of listening to WLW per home per week between 6 AM and midnight. *That's penetration!*

These are just a few of the vital facts revealed by this NRI study. For complete details—and for the figures on the 15 leading competitive stations—contact the WLW Sales Office in Cincinnati, New York or Chicago. On the West Coast, the Keenan & Eickelberg offices in Los Angeles, San Francisco, and Portland will be glad to serve you.

WLW

THE NATION'S MOST MERCHANDISE-ABLE STATION

CROSLEY BROADCASTING CORPORATION

www.americanradiohistory.com

FRANK STANTON
President

Columbia Broadcasting System

UNLESS I miss my guess 1948 will go down in the books as the most significant year in the history of American radio to date.

Let's take a look at the problems that the radio industry faces during the next 12 months.

First, there is the problem of prompt acceptance of a strong code for the self-regulation of the industry. At CBS we have given full endorsement to the NAB code proposed last September in Atlantic City. And we will give our full endorsement and active support to any revised code that retains what we believe are adequate safeguards of the public interest. We are hopeful that the nation's broadcasters will work out such an agreement and have it in effect well before the end of 1948.

Second, there is the matter of new legislation to amend the Federal Communications Act of 1934. Hearings began in 1947 on the White Bill. Further legislative action is expected during the coming year. The industry should welcome this new opportunity to urge enactment of its fundamental belief that radio should be as free as the press and motion pictures.

At the same time, on another front there is the matter of freedom for editorial expression on the air. This Spring the Federal Communications Commission has scheduled hearings on the right of broadcast licensees to "editorialize." The resolution of this important issue may well have great impact on the whole future of broadcasting.

As this is being written, an urgent and immediate problem is the negotiating of a new contract between the American Federation of Musicians and the radio industry. There are many compelling reasons why this should be settled with dispatch. The immediate future of FM is at stake here. The reappearance of live musicians on television programs is essential to the successful development of this newest medium of mass communication. The output of the recording and radio industries is now so closely interwoven that anything affecting the output of one is bound to have a direct effect on the other. A prompt settlement of these issues on a basis equitable to all, while not easy to encompass, is vital to broadcasting's growth in 1948.

Audience research should come in for hard examination this year. Today's product will not do for tomorrow. It's inadequate and too costly.

And, of course, the problem that overshadows all others is the constant need of improved programming. Here bold steps must be taken if we are to increase radio's position in the American community.

During the past year, at CBS we placed the greatest emphasis on our product. Our program operations, both in Hollywood and New York were significantly intensified. And the new year finds Columbia with the largest program department in the industry.

We plan to launch in 1949 a number of new and, we believe, exciting entertainment programs. Several new and richly talented personalities will be brought to CBS microphones. We plan that Columbia-built programs—CBS' own "package" shows—will continue to be the focus of attention.

A series of significant reports on today's problems and institutions are planned for Columbia's Documentary Unit, which recently rounded out its first full year of operation.

A new code, an amended radio act, the reappearance of live music on FM and television, improved listener research, new and fresh programs—these are now problems confronting us.

They can become achievements of 1948.

EDGAR KOBAK
President

Mutual Broadcasting System

EACH year, when I am asked to prepare an article for RADIO ANNUAL, I like to take a look at what I said the previous year, just to see how I came out. This is pretty good mental discipline for anybody who is called upon to discuss a future outlook, whether it be in business, politics, or any other phase of living.

For 1947, I prophesied a year of "noses to the grindstone," of buckling down to competitive selling, the laying of secure foundations for postwar business, and the development of better programs as well as the careful study of facts. I also said something about our efforts to make the advertising dollar more productive. So far as Mutual is concerned, that is the sort of year we have put in during 1947—and from present indications, I feel confident that we shall be doing much the same in 1948. Perhaps, more so.

We have been busy building our network, facilities-wise, and now we are turning to the task of building up our audience, program-wise. For both tasks, we believe the right attitude is to start at the beginning, tackle first things first, build slowly, carefully, and methodically—and then start talking about it.

A couple of months ago we started to talk about the Mutual network's daytime coverage as it is today, following the many new improvements and additions which have been taking place during the past year or so. In doing this, we have been discussing our network in terms of the audience it serves—the millions of people who now can receive Mutual programs reliably, satisfactorily, and without the annoyance of static, man-made electrical noise, or the interference of other stations. This is SERVICE in terms of the listener's reception rather than in terms of the engineer's output. It is the first requisite of "radio circulation."

We have said that this new conception of "listenability" is something that you are going to hear a lot about from now on. In 1948, we think that "listenability" will be more and more studied, discussed, and used.

We believe that the use of "listenability" measurements—and naturally the improvement and refining of the "listenability" technique—will keep a lot of people busy during the next year. We are going right ahead with the job at Mutual, and we expect to make "listenability" techniques available to our Mutual affiliates. If it proves out to be a valuable tool for time-buyers as well as for station managements, it seems certain that the use of this method of measurement will be extended to other stations and, perhaps to other networks.

Perhaps, "listenability" is a symbol of the progress which broadcasting is making in its search for bedrock measurements and standards to help advertisers buy time more efficiently and more economically. The BMB is an indication of this desire for better and more universal measurements to be applied to radio listening, but unfortunately during 1948, according to present plans, the BMB's activities will be restricted to an interim study and not to a complete, nation-wide job, which is being postponed until 1949.

Broadcasting is a fast-moving business and we have to find measurements which can be kept up to date, which can reflect changes and which can be used as a guide to the immediate future. Advertisers want facts, more facts, and up-to-date facts. They don't like to buy on hunches and in 1948, more than ever, we think that they are going to re-examine all of their advertising activities very closely.

During 1947, we have seen a marked tendency on the part of big national advertisers to analyze the cost of their network broadcasting. We have seen excellent presentations of a competitive nature from the other mediums, and we know that competition between radio and the other mediums is increasing rather than abating.

Over at Mutual, we believe in advertising, and we believe in broadcasting. We believe that there is a real place for broadcasting in the over-all advertising picture, and we are not particularly worried by clean, healthy competition. We realize that competition is the lifeblood of free American enterprise and if we are to make any New Year's resolutions, one of them will be to reaffirm our constant belief that there is no need to get panicky, and to resolve that we will not fall into the mistaken notion that we have to lash out at the other guy or tear down our competitors.

MAKES GOOD ADVERTISING BETTER

It's Planalyzed Promotion. This exclusive KSTP merchandising service adds the pay-off punch to your radio campaign in the important Minneapolis—St. Paul market. In all likelihood you have already received KSTP Planalyzed Promotion reports in the familiar red folders... most advertisers and agencies in the country have. If you haven't, learn how KSTP Planalyzed Promotion can hasten and increase the effectiveness of your radio advertising. Any Edward Petry and Co. man will be glad to tell you how Planalyzed Promotion works and how it will work for you.

NILES TRAMMELL
President

National Broadcasting Company

THE year 1948 will have great meaning for both radio and television. Broadcasters, without further equivocation, must decide in the next year whether to adopt a new and revised code of standards which they will *all* follow, or whether different elements of broadcasting are to go different ways in their broadcasting practices, probably to the detriment of all.

●

It is still the view of the National Broadcasting Company that an industry-wide code is the best means of improving our service to the public. We were keenly disappointed that final action on a firm code was not taken in 1947. We will continue to urge adoption of such a code in 1948. But if a code for all broadcasters is not forthcoming in 1948, it may be that NBC will find it expedient to establish its own new set of standards, so urgently do we feel the need of one.

However, a code for only the networks would not materially correct the conditions which are annoying some listeners. The listener condemns all radio for the offenses of a few operators. He concludes that if one station broadcasts offensive material or devotes too much time to commercial matter, then all must do the same.

That's why NBC feels that in 1948 standards of practice must be raised by all operators originating programs and not by a scattered few.

●

And what of public service?

The National Broadcasting Company expects great things in the coming year of its new Public Affairs and Education Department. The six-man Public Affairs Board headed by Ken R. Dyke is exploring anew the question of programming in the public service area. We expect their forward planning to reach full fruition in 1948 with new and provocative programs concerning subjects of world and national import. It is too early to report exactly what these programs will be or what form they will take. However, one period of prime time has been set aside for the presentation of a documentary type program which will treat with important world problems.

It seems to us at NBC, vitally important that we develop programs that will get more persons interested in the issues of the day, inform them about all sides of those issues, and arouse them to thoughtful, intelligent action.

That is what we plan to do more diligently and, we are sure, more effectively in 1948.

●

In television, 1948 will find this new medium for entertainment and advertising moving from its adolescent stage of the past few years into full-fledged maturity. In the next year, video will become an exciting commonplace in hundreds of communities. It will begin to spread its diverting and real life presentations in all directions as networks expand further and further over the United States and independent stations mushroom in cities not yet connected by coaxial cable or relay systems. Television's big push in 1948 will be materially assisted, too, by the set manufacturers whose production will reach all-time highs in the coming weeks.

The economics of television also will "look up" in 1948. Advertisers, attracted by the greater message-impact on the consumer which video provides, are expected to use this medium in increasing numbers in the new year.

NBC has always led in television. And it intends to maintain that leadership in 1948 through the development of new network facilities, through refinement of production techniques and through development of new and finer programs in all fields of entertainment and education.

SERVICES OFFERED: Keystone Broadcasting System is a transcription network principally covering BEYOND-METROPOLITAN markets from coast to coast. Its affiliated stations are joined together in a national system by means of transcription, eliminating wire charges. At time of going to press, the network includes 325 affiliated stations. The network supplies its stations with 24 fully scripted sustaining shows per week filling 1 hour per day, seven days each week, to a total of 7 hours per week. This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to cover the BEYOND-METROPOLITAN markets exclusively, in a single transaction, by means of electrical transcription. The system offers its facilities in group network time periods from one hour down to five minutes, and also makes available announcement periods of one-minute, half-minute and twenty-five words in length.

AVAILABLE NOW

CHALLENGE OF THE YUKON

RE-CREATES the stirring era of ambition, adventure and excitement of the Klondike Gold Rush days. Sgt. Preston of the Northwest Mounted Police and his dog, King, fight for law and order in the gold-mad Klondike.

Each half-hour program combines the excitement and drama of "The Lone Ranger" with the suspense, mystery and intrigue of the Frozen North. "Challenge of the Yukon" appeals to every age group. It's a "natural" for alert advertisers. Hear it *now* on ABC (sustaining) each Saturday, 7:30-8:00 P.M.

THE CHALLENGE OF THE YUKON . . .

WRITTEN AND PRODUCED BY THE CREATORS OF . . .

THE GREEN HORNET

. . . a favorite for nearly 8 years. As a movie thriller "The Green Hornet" has been second in popularity only to "The Lone Ranger." While broadcast locally, "The Green Hornet" successfully sold all types of merchandise, from dairy products to men's shirts. Now it's sponsored coast-to-coast ABC by General Mills.

THE LONE RANGER

. . . the half-hour program that has built a Hooper ranging from 9 to 12 for over fifteen years. More than ten million people eagerly await the cry of "Hi Yo Silver" three times each week. No half-hour dramatic program has ever topped this record! That's why General Mills has it coast-to-coast on ABC.

MUSIC IS NO PASSING FANCY A love of fine music is no passing fancy. It is intense, devout, ever-growing . . . makes the music lover a special kind of radio listener . . . a listener devoted to the programs of WQXR-WQXQ. More than half a million music loving families in and around New York listen habitually to WQXR-WQXQ . . . to the extent that no other station can reach them as effectively. Leading advertisers are concentrating more and more on this huge audience . . . selling their products through the interest created by good music. For greater sales in the world's greatest market, use WQXR-WQXQ . . . the stations distinguished for good music and the news bulletins of The New York Times.

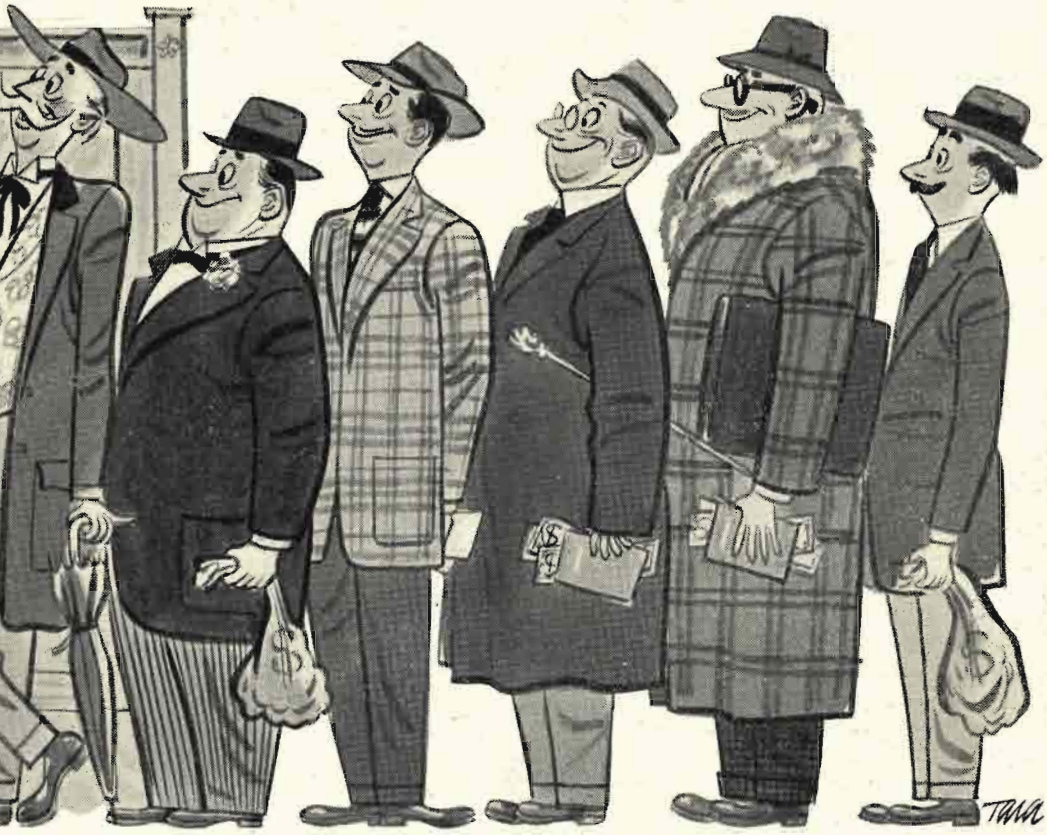
TRUST DON LEE to line up the wealthy customers! Over 5½ billion dollars of yearly buying income circulate in the *exclusive Don Lee outside market*, the area outside the metropolitan trading areas of the cities regularly surveyed by C. E. Hooper: Los Angeles, San Francisco, Oakland, San Diego, Portland, Seattle and Spokane. Only Don Lee completely covers this outside market—a C. E. Hooper 276,019 coincidental telephone-call survey proves

THOMAS S. LEE, *Pres.* • LEWIS ALLEN WEISS, *Vice-Pres., Gen. Mgr.* • SYDNEY GAYNOR, *Gen. Sales Mgr.*

The Nation's Greatest Regional Network

www.americanradiohistory.com



it. 44 *local* Don Lee stations, two and three times as many stations as any of the other networks, bring your sales messages to every one of the 44 important Pacific Coast markets... markets not influenced by long-range broadcasting because of the thousands of high mountains on the Pacific Coast. For results you can bank on, buy Don Lee. Don Lee delivers the *inside* market plus the *exclusive Don Lee outside market* at a lower cost per thousand radio families.

20,000 Watts FM

Yes, W-W-D-C was a pioneer in Washington AM programming. Now it's the powerful FM pioneer. To cover Washington, it's smart to use W-W-D-C 1450 on the regular dial . . . 101.1 on the FM dial.

For Prestige . . .

COLUMBUS GEORGIA

5000 Watts
DAY *and* NIGHT

WRBL is the key to low-cost selling in Columbus a METROPOLITAN MARKET of 159,800 people. WRBL delivers a "tailored-to-listen" audience built up through 20 years of Community Leadership.

also WRBL — FM

ATLANTA GEORGIA

WATL represents a commanding coverage—in one of America's prime markets .... comprised of 594,000 people .... and 116,480 RADIO HOMES. WATL'S program leadership accounts for a loyal, ever-growing audience.

ALBANY GEORGIA

WGPC serves a growing, thriving section of Georgia. Federal Reserve statistics for September 1947 reveal .. "The ALBANY Market showed a greater increase in bank debits than any city in the country"

One of America's Great Stations in One of America's Great Markets

Licensed Mar. 15, 1922

WSB

Owned and Operated by

THE ATLANTA JOURNAL CO.

50,000 WATTS

750 KC

NBC for 21 Years

POWER

ATLANTA ★

The 50,000 Watts of "The Voice of the South" is greater than the total night-time wattage of *all other Georgia stations* combined.(*)

PLUS

Unquestioned dominance of the greater Atlanta market area(**) with a blanket coverage of the rich rural areas of Georgia and surrounding states.

PRESTIGE

25 years of broadcasting "in the public interest," with active support of one of the South's great newspapers. The homes in Georgia tune to WSB as a trusted medium of information and entertainment.

**S.R.D.S.—Nov. 1, 1947*

***Any Hooperating.*

NOTE TO TIME BUYERS: In 1948 (as in previous years) WSB can provide your clients with *audience* in Georgia at less cost per thousand listeners than any group or combination of stations. Ask any Petry man for the facts.

"We're One of the Family in Midwest America!"

A few of the thousands of "local" news stories that show how WLS is "One of the Family in Midwest America." It is our intimate interest in these folks and thousands like them—in their events—in the service and entertainment we give them, that have made us "One of the Family"—have made them such loyal listeners to WLS . . . and upon loyal listeners depend advertising results.

JERSEYVILLE, ILL.—DEMOCRAT-NEWS
Friday, August 22, 1947

Former Resident Interviewed On WLS

Miss Erma Cottingham, a resident of Jerseyville, Jersey County, Illinois, until she moved to Carbondale, was among those interviewed last Monday on the WLS "Dinnerbell" program, broadcast last week direct from the state fair at Springfield.

MOWEAQUA, ILL.—NEWS
Wednesday, October 1, 1947

Mr. and Mrs. Frank Scrabner and Mr. and Mrs. Ira Hanley returned Saturday from a very pleasant vacation trip through the Eastern States and Canada. Points of interest visited were Niagara Falls, The Grand Canyon of Penna., A tour of the Ford Plant in Detroit, Mich., and the WLS National Barn dance in Chicago.

NECEDAH, WIS.—REPUBLICAN
Thursday, August 28, 1947

RUSSELL ROBINSON, MAUSTON ON THE WLS DINNERBELL PROGRAM AT STATE FAIR

The 4-H and FFA members participated in a big way at the state fair again this year. Among Wisconsin's most outstanding Future Farmers of America who were there, was Russell Robinson of Mauston, Juneau county, who spoke on the WLS Dinnerbell program last Monday, in an interview by Russell Park, assistant farm program director of Prairie Farmer WLS.

MONTICELLO, IND.—HERALD-JOURNAL
Wednesday, October 8, 1947

ENJOY TRIP TO CHICAGO

Mr. and Mrs. Russell Sigman of Monticello, and Mr. and Mrs. Walter Whiteman and daughter Loretta of Idaville spent Saturday and Saturday evening in Chicago the guests of Mr. and Mrs. Ted Koepke. The afternoon was spent in sightseeing and then they all attended the WLS Barn Dance program in the evening.

NILES, MICH.—STAR
Friday, October 3, 1947

LETTER IS READ

A letter submitted to radio station WLS by Donald Hoover, of Mrs. Pauline Klopfenstein's junior high school 8-B English class was read at a broadcast yesterday. Pupils at the class submitted letters on "How I Spent My Vacation."

PRINCETON, ILL.—REPUBLICAN
Thursday, October 9, 1947

GERDES WILL TALK ON STATION WLS

Reinhard Gerdes, route 1, Princeton, will tell how he found success under America's free enterprise system when he speaks at 6:30 a. m. Thursday over radio station WLS on the "Let's Go Visiting" program.

The story to be told over the air starts when Gerdes was in Germany and decided that Amerida was the place to find his freedom and best living. He will tell how he came here 19 years ago, rented a farm and married in 1933, and acquired his own farm. Gerdes now has one of this territory's outstanding herds of Brown-Swiss dairy cattle, including one cow which may establish a world's record in butterfat production. In another two months, if the cow calves, she will be rewarded an official butterfat record certificate.

BROOKFIELD, ILL.—ENTERPRISE
Thursday, October 2, 1947

WLS RADIO BRDADCAST TO HIGHLIGHT OBSERVANCE OF FIRE PREVENTION WEEK

Highlighting a program of instructive information for the observance of Fire Prevention Week in Brookfield will be a fifteen minute broadcast from the Grosse School on Thursday, Oct. 9. The broadcast will begin at 1:15 p. m. and will be carried over the nation by radio station WLS.

CASEY, ILL.—REPORTER
Wednesday, August 13, 1947

Attending State Fair

Bill and Ina Malcom of Casey, attended the Illinois State Fair last weekend and were guests in the Prairie Farmer WLS tent.

EXTRA

RESEARCH IN EASY WIN OVER GUESSWORK

Anytime—anyplace—Research beats guesswork every time the two compete. Because of that fact, there is an ever-increasing number of radio advertisers today who base their decisions on the solid support of research.

WGN, in an effort to help advertisers and agencies choose times and programs which can do the best possible job, offers *more* radio research material than any other Chicago station. In subscribing to all Hooper reports in both Chicago and Milwaukee, as well as to the Chicago area Nielsen Radio Index, and the Broadcast Measurement Bureau, we offer the continuing guidance of radio research throughout the year to our clients.

We believe that this service, together with our unequaled coverage, preferred dial position, and top Middlewestern acceptance, puts WGN in a position to do a better advertising job for *you* in Chicago.

A Clear Channel Station . . .
Serving the Middle West

The Clock Struck One...

EVEN before we were one year old, we were honored with our first award—the Billboard award for outstanding achievement in single campaign promotion.

But the award was not for isolated promotion of a single sponsored show. Rather for WSUA's ability to draw from the community concerted community response to a WSUA objective. (We'll do it for your product, too.)

Southern Indiana's most important event since the war was the Centennial Celebration of the Monon Railroad. WSUA was the only Southern Indiana station selected to cooperate in furthering its success. WSUA worked in Bloomington. It worked in towns up and down the railroad. In short, the power and progressiveness of WSUA was felt in *all* its eleven primary area counties. Counties which spent, in 1946, $143,470,000 for retail purchases.*

We don't consider award winning an end in itself. Rather, an indication of what a young station with able management, sincere blending of all its skill and energy, can do to encourage community response. Response? We got it. And before the clock struck one.

** Sales Management, Survey of Buying Power, May, 1947.*

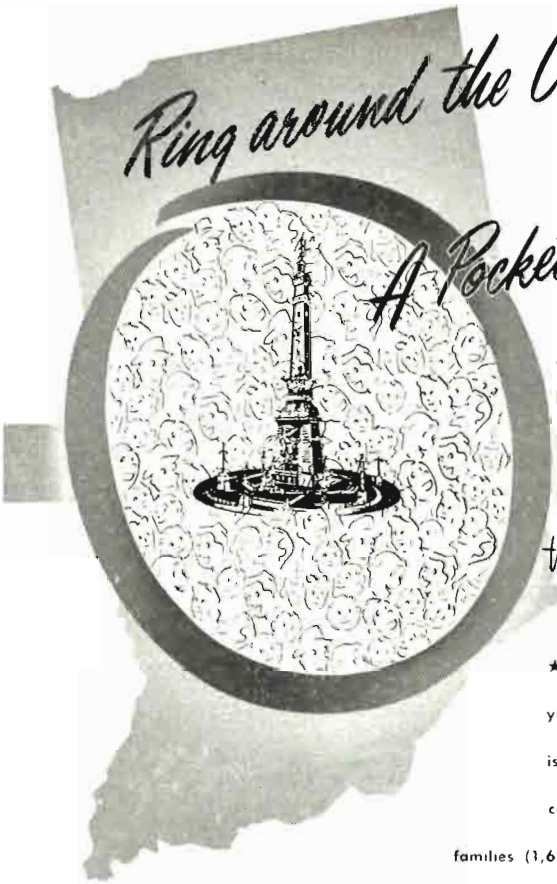
A Pocket Full of Sales!



THE NATION'S BEST SALESMEN
PUT THE NATION'S BEST SHOWS
ON *Live* WIRE
to Sell the Great Hoosier Market!

★ Central Indiana—not just Indianapolis—is your primary market when your sales message is broadcast over WIRE. In the populous 44 counties that comprise this area, over 464,000 families (1,629,435 individuals) have buying power of more than one billion, seven hundred million dollars —nearly fifty percent of the entire state's!

Indianapolis, the sales Mecca of the Hoosier State, plays daily host to hundreds of purchasers who come by automobile, train, bus and air to shop in the Capital City. At home their radios—like those of Indiana's urbanites—are tuned to WIRE and NBC—the nation's most "listened to" network.

IOWA'S MOST POWERFUL ABC OUTLET

KXEL

CHANGES IOWA'S LISTENING HABITS

Exhaustive Telephone Survey of 14,083 telephone calls prepared by Robert S. Conlan and Associates, Inc., Kansas City, reveals that KXEL's Voice of Agriculture dominates listening homes in Iowa's richest Industrial and Agricultural area of "The KXEL Rural City."

DAY TIME LISTENING

Distribution of listening homes among 21 most-listened-to stations in Rich KXEL Rural City.

	Morning	Afternoon
KXEL	38.7%	30.4%
Station A (Des Moines 50,000 Watt NBC outlet)	20.8%	32.0%
Station B (Cedar Rapids 5,000 Watt CBS outlet)	16.8%	13.3%
Others (Over 18 stations)	23.7%	24.3%

NIGHT TIME LISTENING

Distribution of listening homes among 21 most-listened-to stations in Rich KXEL Rural City.

	Evening
KXEL	32.1%
Station A (Des Moines 50,000 Watt NBC outlet)	36.6%
Station B (Cedar Rapids 5,000 Watt CBS outlet)	20.7%
Others	10.6%

TOTAL OF ENTIRE SURVEY

KXEL	32.9%
Station A (Des Moines 50,000 Watt NBC outlet)	31.5%
Station B (Cedar Rapids 5,000 Watt CBS outlet)	17.1%
Others	18.5%

These are just a few of the facts contained in the Conlan Survey. Complete details on KXEL's Great Listening Audience can be obtained by writing Josh Higgins Broadcasting Company, Waterloo, Iowa, or contacting your nearest Avery-Knodel representative.

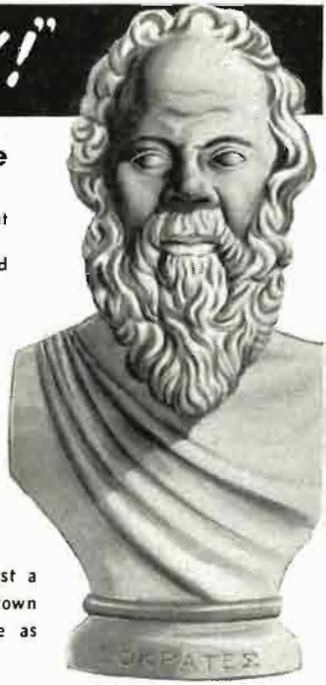
SOCRATES HAD "SOCK!"



Sound old Socrates would present time buying facts in this logical manner.

- **PREMISE I**—Kansas farmers have more money to spend than at any other time in history.
- **PREMISE II**—WIBW, by actual survey, is the station most preferred and most listened to by these ready-to-buy farm families.
- **CONCLUSION**—To sell more of your goods or services to more families in Kansas and adjoining states . . . use WIBW.

Darned good logic, Soc! And it's equally good business reasoning for 1948 or any other year because—

WIBW HAS SOCK!

. . . selling sock, Mr. Advertiser, and here's why! For almost a quarter-century we've faithfully served a farm and small town audience. Today, we're as much a part of their daily life as their ultra-modern farm equipment.

Our buying recommendations are acted upon . . . quickly . . . because these First Families of Agriculture are rich. Years of bumper crops were climaxed in 1947 by the largest wheat crop in history sold at record prices. This staggering new purchasing power is a PLUS . . . a value over and above WIBW's ability to startle you with sales even in average times.

Carefully Planned Farm Service Builds Audience, Confidence, Sales

Long ago, our listeners learned that WIBW was always first with farm news, market reports, and sound information on advanced farming methods. WIBW cooperates closely with 4-H Clubs, county agents, and men's and women's farm organizations.

WIBW's "Flying Rooster" plane covers the Midwest, making on-the-spot tape recordings at important farm meetings, demonstrations, or in the fields and barns of successful farmers. Flown back to the studio immediately, our vast farm audience "attends" these meetings later, at a more convenient time. Years of such "one step ahead" service has built outstanding listener acceptance for WIBW and equally outstanding sales results for our advertisers.

By Logic and by Facts—It's WIBW

In Kansas and adjoining states, independent surveys show that WIBW is the station most preferred and most listened to by farm and small town families. Plan your sales attack accordingly.

Serving the First Families of Agriculture

HOW MUCH GOLD
in a minute's worth of radio?

Let's not kid ourselves another day. Radio time buying and production are going to be on the spot with advertisers in the battle for brands.

Radio is no longer a device to introduce the Sales Manager to the Hollywood stars. Radio is no longer in the business of making a show producer out of the man who can run a factory better. Time buyers can no longer buy radio station power and call letters and coverage maps and station personalities.

Radio must have an answer to the big questions when the advertiser asks: "How much does it cost to reach my listener? How much goods does my radio sell?"

And the advertiser is asking you! Every dollar of radio time has got to work harder. Reach more people. Produce more sales at lower costs.

That means radio time buying has got to be smarter if agencies are to keep accounts happy. They'll have to dig deeper for more facts. Sift the costs with a finer screen. Unscramble those 5, 6, 7, 12 and 13 station towns that have cropped up, if they're going to get the smartest return for the client's money.

The glamour has gone out of radio time buying. From here on in, it's just plain hard work!

The successful independent station in Baltimore that delivers more listeners-per-dollar-spent than any other station in town is . . .

WITH AM FM

Tom Tinsley, President **Represented by Headley-Reed**

WBAL

Means Business in Baltimore

Where there's smoke, there's business! In Baltimore, industrial chimneys are smoking. Shipbuilding...steel...automobiles... manufacturing...*everything* is humming! Baltimore has money to spend.

It is an important market for you to reach. Thanks to our powerful programming—you get ready-made audiences...more listeners to hear your message...therefore the sales results you're looking for in this important area.

In Detroit . . . it's

WWJ—The Detroit News

FIRST in PUBLIC SERVICE features for more than 27 years . . . tirelessly working in the public interest, constantly retaining community confidence.

TOPS in TALENT . . . with Detroit's best-known, best-liked personalities, combined with the world's finest through WWJ's 20-year-old NBC affiliation.

FOREMOST in PIONEERING and PROMOTIONAL policies that have kept WWJ on top all through the years, and trail-blazed the way for both FM and Television "firsts" as well.

WWJ's leadership in PUBLIC ACCEPTANCE is evidenced by the results continually obtained for its advertisers . . . adding prestige to their products, force to their sales messages, and increasing sales through lowered sales resistance.

FIRST IN DETROIT . . . *Owned and Operated by* THE DETROIT NEWS

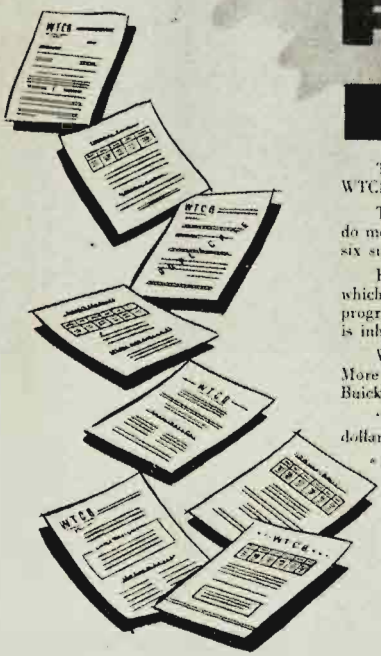
NO NBC CONTRACT IS COMPLETE WITHOUT

WTCB
FLINT

. . . in the Nation's 62nd city*



To "complete" an NBC contract . . . what does it take? For one, it takes WTCB-NBC.

Three metropolitan trading areas, dominated by Flint, Bay City and Saginaw, do most of the business for East Central Michigan. Until WTCB, these areas and six surrounding counties had no adequate NBC coverage.

Here are over a million people . . . over 300,000 radio homes . . . most of which are tuned most of the time to WTCB. It's NBC. The long-experienced programming of Trendle-Campbell, of "Lone Ranger" and "Green Hornet" fame, is inherent in every WTCBuilt local show.

WTCB's primary area is part of the power and progress of industrial America. More automobiles are manufactured in Flint than anywhere except Detroit. Every Buick and Chevrolet starts in Flint. Effective buying income: *over a billion dollars.*

"Complete" your NBC contract with WTCB . . . completely cover this billion dollar market with its *plus* purchasing income.

* *in population*

YOU MIGHT FALL A MILE, AND STILL LIVE*—

BUT . . .

"LUCK" WON'T GET YOUR OUTSIDE BROADCASTS INTO WESTERN MICHIGAN!

No, you just can't be heard satisfactorily in Western Michigan when you broadcast from any outside point. The entire area is surrounded by a "wall of fading" which virtually stops reception of outside stations.

But inside this wall the combination of WKZO in Kalamazoo and WJEF in Grand Rapids has achieved a standing of such importance that — morning, noon and night — better than *one out of each three sets in use* is tuned to these CBS affiliates. In other words, if you were to use *every other one* of the 30 stations "heard" in the Kalamazoo and Grand Rapids areas, you would still lose over one-third of your potential audience!

These facts are verified by the latest Hooper Report (Spring, 1947). May we send you a copy? Write us, or ask Avery-Knodel, Inc.

*On January 6, 1916, Capt. J. H. Healey, Chicago, fell out of an airplane at a height of 15,000 feet. At 10,000 feet the plane dived under him, and he fell back into it!

WKZO *first* IN KALAMAZOO and GREATER WESTERN MICHIGAN (CBS)

WJEF *first* IN GRAND RAPIDS AND KENT COUNTY (CBS)

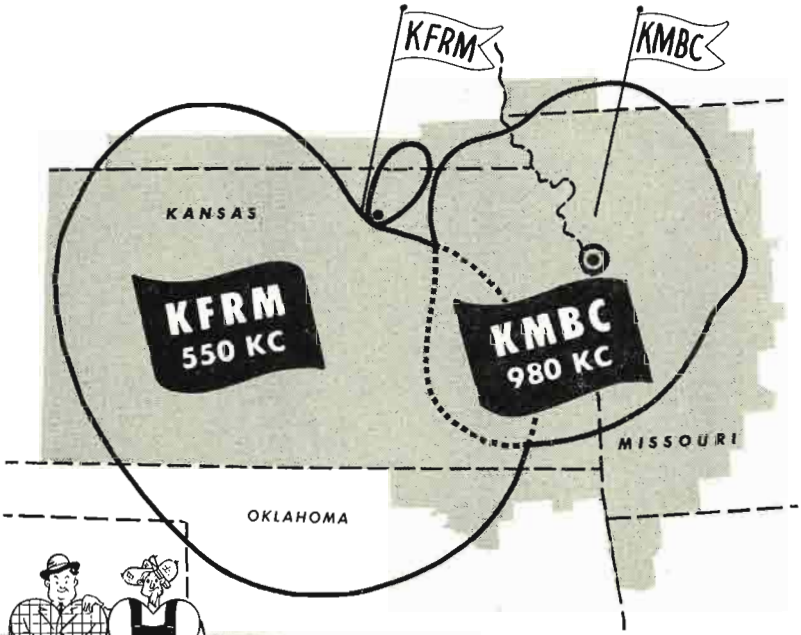
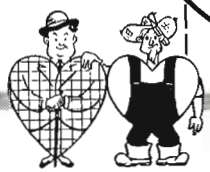
NOW FOR THE FIRST TIME

One Kansas City Broadcaster Covers The Entire Kansas City Trade Area





KMBC

of Kansas City

KFRM

for Kansas Farm Coverage

Represented Nationally by FREE & PETERS, Inc.

The KMBC-KFRM Team offers simultaneous, complete coverage of the Kansas City trade area, and is the only single broadcaster to do so. The map above shows KFRM's estimated half-millivolt contour and KMBC's proved half-millivolt contour superimposed on a map of the Kansas City trade territory as surveyed by Dr. W. D. Bryant, researchist. Complete coverage. No waste.

KCMO ½ millivolt contour map
50,000 Watts Non-Directional — Daytime
superimposed over actual mail count map*

One *station*

One *set of call letters*

One *spot on the dial*

One *rate card*

50,000 Watts Day . . .
10,000 Watts Nights—on 810 kc

National Representative:
John E. Pearson Co.

Base map courtesy Broadcasting Magazine

*387 COUNTIES—174 more than the 213 in the KCMO ½ Millivolt area—that's KCMO's mail response for the first 4 months at 50,000 watts. This includes 100 counties in Missouri, 79 in Kansas, 51 in Nebraska, 70 in Iowa, 21 in Oklahoma, 33 in Arkansas, 33 in Illinois. And mail came in from 20 other states! We'll gladly send details of this mail response. Write or call.

3,730 more square miles ... with KSD's increase in nighttime power!

Every Advertiser Whose Products Are Sold in the Greater St. Louis Area Will Be Interested in These Facts:

1. Beginning on or about April 1, KSD will broadcast with a power of 5,000 watts *day and night*—on 550 kilocycles.

2. KSD's new transmitter and antenna-towers are located on a 68-acre tract less than five miles from downtown St. Louis.

3. KSD's new antenna system consists of four towers—each 450 feet in height.

4. KSD's new 5,000-watt transmitter incorporates the latest developments for the highest quality reception.

5. KSD's power increase plus the new antenna system will enable KSD's nighttime signal to cover an additional 3,730 square miles of interference-free service area.

6. KSD's effective nighttime power, in the direction of the City of St. Louis, will be increased to 15,000 watts.

7. KSD is the National Broadcasting Company's basic station for St. Louis. It is 225 miles to the nearest other NBC basic outlet.

8. KSD is the only broadcasting station in St. Louis with the full service of the Associated Press — the AP news wires plus the PA radio wire.

9. KSD is recognized throughout its listening area for its high standards of programming and advertising acceptance.

10. Now, more than ever before, for the advertiser who has goods to sell in the Greater St. Louis Market, KSD-NBC-AP is "The Combination That Clicks."

growing
. . . in the granite state!

From the busy coastal area of New Hampshire to the rich industrial capitol of the Granite State, listeners and advertisers alike turn to WHEB Portsmouth and to WKXL Concord for radio leadership.

WHEB with many radio years of "firsts" attributes its growth in leadership to the loyalty of its listeners and the confidence of its advertisers.

WKXL, voice of the state capitol, grew like Topsy, in the footsteps of big brother WHEB, with loyalty and service the watch word.

wFMi, powerful FM big sister, now bands all New Hampshire together with a common voice. Singly managed they'll grow together.

maine and massachusetts too!

WHEB with one thousand clear channel watts is the listening habit in Maine's prosperous seaboard and the northern counties of Massachusetts. wFMi, high in the mountains of New Hampshire spreads its powerful signal over all of New Hampshire; covering one-third of the population of Maine and into Massachusetts' most heavily populated counties.

and now 20,000 watts

WOR

— heard by the most people where the most people are★

★WOR is heard regularly by 34,057,161 people, 1/4 of the nation, in 430 counties in 18 states.

WOR will be glad to send you copies of its official daytime and nighttime BMB audience maps — and other pertinent data — which more than amply support the startling statements made above.

The NEW LOOK comes to WHN!

FIFTH AVENUE . . . Style Center of the world . . WELCOMES WHN . . . Style Setter for radio!

711 FIFTH AVENUE becomes WHN's new home early in 1948. New studios and offices set a pattern of smartness that shines everywhere . . . from the number on the doorway to sumptuous Studio A (depicted above); from gleaming, all-new speech input equipment to a model control system that the engineers love like the ladies love Schiaparelli! All the latest developments in acoustical treatment and faithful reproduction of sound have been incorporated . . . for both AM and FM.

EVERYTHING'S NEW! Especially designed studios to accommodate every broadcasting requirement . . . luxurious sponsors' audition rooms . . . efficient program facilities ...modern offices streamlined for the utmost in service. All that's old is a quarter-century of radio know-how!

WHN'S MOVING DAY is a red-letter day in radio. Better facilities mean better programs . . . better service to the public . . . greater audiences . . . a better medium for advertising in the Nation's Number One Market.

'How Friendly Can You Get?' WNEW's Industry Soundoff

Bernice Judis, who has parlayed her WNEW (N.Y.) management into one of the most lucrative indie operations in the country, finally resolved last week that running a station is one thing; operating a cuffo consulting service is another.

Requests from station operators around the country—and outside the country—for gratis permission to duplicate the New York indie's programming and administrative formula have reached a point where stations were overstepping the bounds of good neighborliness. It was a case where WNEW was confronted with the necessity of setting up a post of Vice-President in Charge of Station Relations, or going on record with a blanket nix to stations seeking to duplicate the indie's pattern. Miss Judis, in a "how-friendly-can-you-get" stance, threw in the sponge last week, and publicly went on record in favor of the latter course.

Although the requests date back years, when Martin Block first inaugurated his "Make Believe Ballroom," it was only in the last year or two that the station found itself expending a considerable portion of its time and labor dishing out—for free—carbon copies on program-operational techniques. Requests for tolerance spots or organizational public shows were one thing (station still wants to be helpful on that score), but the thumbs-down decision was reached when the management did a fast take of the mutiple requests received in recent months for cuffo duplication of station's programming.

Deep in the Heart Of

For example, there was the southern station that recently asked for nothing short of a complete outline of WNEW's "formula for success" to counter the strong local competition. Or the equally frank request from a Texas operator who wanted to establish a music-news pattern similar to WNEW's, "so will you please send us your complete schedule."

Other samples: a 50,000-watter in the south asked for an air-check of the "Hollywood Newsreel" show, "so we can analyze it here" in preparation for a similar program; the Pennsylvania station wanting to revise its schedule and asking for a swap deal on schedules "and we'd appreciate your suggestions"; midwest outlet that wanted outright permission to use a WNEW-developed commercial "because its cute angle would fit our needs."

Also the New Orleans station that thought "The Spoken Word" would go down there, "so do you mind if we copy it," although acknowledging it will give WNEW a credit tag; the station in Rome, Ente Italiano Per Gli Sambi Teatralia, that wants to exchange programs with WNEW; or the nimble-witted gent in Copenhagen, who, pointing out there is no commercial broadcasting in his country, would be interested in making a deal with the New York indie to set up a transmitter on a boat and beam stuff in to Denmark commercially.

Take the GUESS out of Buying

WITH WOV'S 5 Audited Audiences

WOV CAN TELL YOU THE DIFFERENCE IN PEOPLE, TOO. Not from a crystal ball, but from sound, basic facts . . . known, proven, tested facts—Specific Market Information on each of 5 Audited Audiences.

Now you can know where listeners live and shop; what they earn, spend and buy; what they like and dislike. All this and other pertinent data on specific listening groups available on WOV's 5 Audited Audiences.

We want you to have the knowledge of 5 Audited Audiences, each a different group of purchasers; each the result of a penetrating, accurate and continuing listener survey. Ask for the facts that will help you to "TAKE THE GUESS OUT OF BUYING."

WOV's Pantry Survey . . . new, accurate, informative . . . shows you where you and your competitors stand in the New York Market.

★ WAKE UP NEW YORK *with Bill Williams*
★ 1280 CLUB *with Fred Robbins*
★ BAND PARADE *with Bill Gordon*
★ PRAIRIE STARS *with Rosalie Allen*
★ ITALIAN MARKET OF 2,100,000 **Italian-speaking** Americans. *More than the combined population of Baltimore and Washington.*

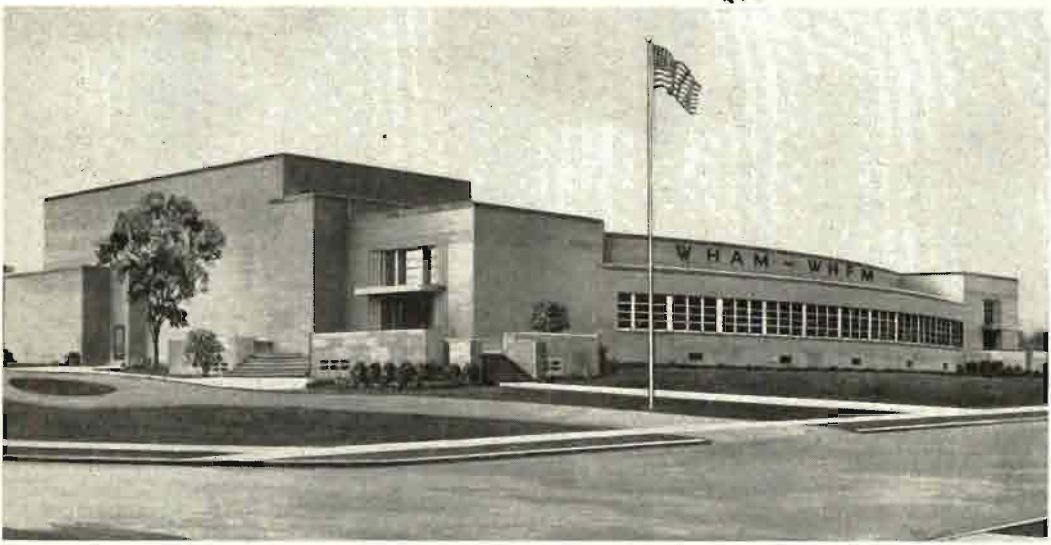
WHAM *tops*

THEM ALL WITH ROCHESTER RADIO CITY....



New Million Dollar Home of Stations WHAM-WHFM

In Western New York, Station WHAM, year after year, has "topped" them all for listeners, coverage and audience buying power.

Now, Here is a new WHAM "TOP"...
ROCHESTER RADIO CITY

★ **FOR THE LISTENER** . . . Rochester Radio City means broadcasting at its best . . . the combination of NBC, America's Number One Network, plus WHAM's leadership in local program originations.

★ **FOR THE ADVERTISER** . . . Rochester Radio City is the focal point of listener interest in Rochester and Western New York with a unique opportunity for sponsorship of audience participation programs.

★ **FOR THE RADIO INDUSTRY** . . . Rochester Radio City creates a new broadcasting center, one of the few outside of New York, Los Angeles and Hollywood.

★ **ROCHESTER RADIO CITY** . . . plus a 50,000 watt, clear channel signal makes Station WHAM the Number One Station not only in Rochester and Monroe County but in ALL of the rich Western New York 43 county market.

"MARKETS ARE PEOPLE WITH BUYING POWER"

WHIO DAYTON COVERS

The No. 1 Market of the Miami Valley

WHIO, Dayton, listeners are solid citizens. 57% of 108,000 dwelling units in Dayton and Montgomery County are owner occupied. 97.5% of Dayton families and 97.1% of Montgomery County families are radio owners. Their effective buying power, estimated at $4,903 per family in 1947 ($1,263 higher than the national average), rests solidly on regular employment by manufacturers of world famous products like cash registers, business and accounting machines, electric refrigerators, electric motors, rubber tires, and many others.

BMB and Hooper reports show most folks in Dayton and Miami Valley listen to WHIO. Local and national advertisers know this. Fine programs, accurate newscasts, plus *real* public service keep WHIO first among Dayton stations.

Accent on Youth!

You profit twice when you buy time on WMRN. Teen-age acceptance of WMRN and the products it advertises is the *extra* dividend added to the proved high adult audience response among WMRN'S more than 200,000 prosperous listeners in seven of Ohio's richest farm and home counties.

Get the facts about this responsive audience! For results right now this well-to-do section of Ohio can be easily and economically sold on your product, and an exceptionally large number of teen-age listeners can be reached at the same time. Both adults and teen-agers stay tuned to WMRN. Address inquiries to Robert T. Mason, general manager, WMRN, Marion, Ohio.

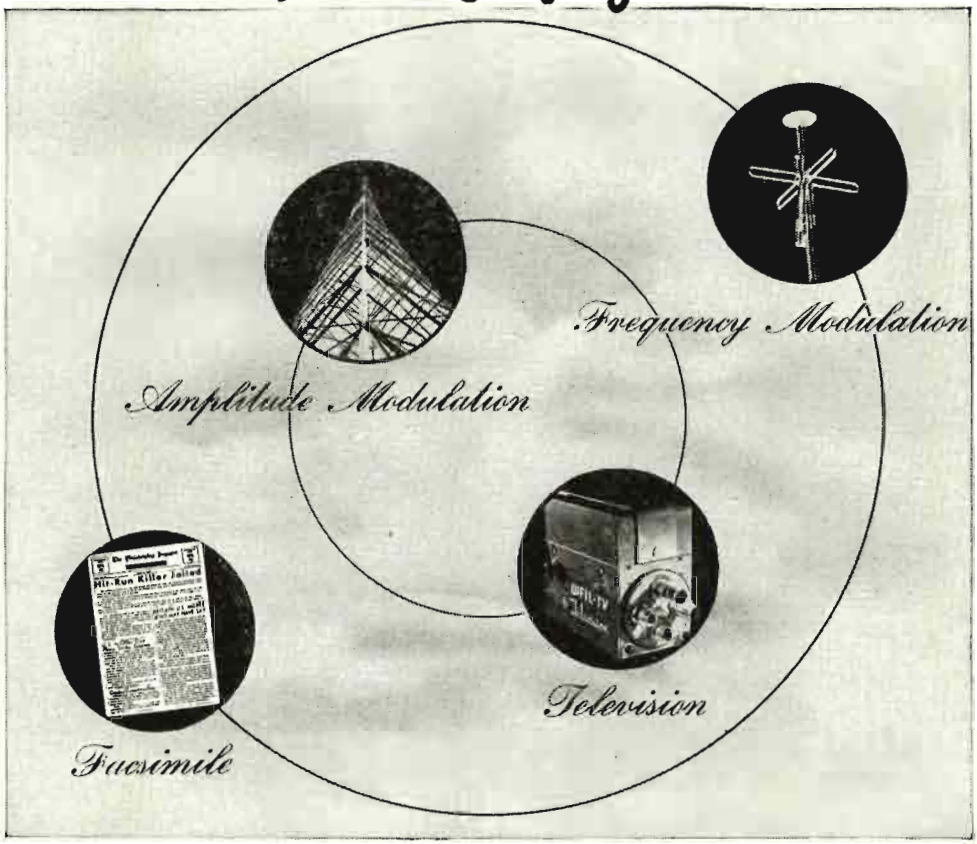
pattern for progress..



For twenty-five years, progressive planning has kept WFIL in the forefront of the broadcasting industry. Now, new developments have placed fresh emphasis on radio stations as instruments of public expression. Frequency Modulation, Television, and Facsimile offer new and wider opportunities for public service. And—once again—WFIL has taken the lead. WFIL-FM, Philadelphia's First Commercial FM Station, has been in operation since 1941. September, 1947, saw the inauguration of service by WFIL's television station, WFIL-TV. First demonstrations of WFIL facsimile were held in May of that same year.

The station's wholehearted entrance into these new phases of broadcasting is typical of the spirit which has highlighted WFIL's twenty-five years as a local institution. It is this same spirit which goes into the building of every WFIL program and plan of promotion ... the spirit which assures the success of your WFIL program.

WPEN does more than "speak your piece" for you

Advertising does not end with the fade of a commercial's final word—not at WPEN!

Program and product promotion is a vital WPEN activity, pursued in cooperation with sponsors.

In addition to its own promotion and merchandising activities, WPEN, owned by the Sun Ray Drug Co., is able to use the parent company's merchandising facilities for display of promotional posters, distribution of program pamphlets and special window and counter displays throughout the Sun Ray Drug Co.'s 140 stores. These not only build larger audiences, but build SALES for WPEN sponsors.

DOWN TEXAS WAY... use Station WFAA

RADIO SERVICE OF THE DALLAS MORNING NEWS

TO MAKE Sales the Easy Way!

★ Advertisers who use WFAA to cover the Dallas-Fort Worth market get what they want—*complete coverage* from *one Station*, on *two frequencies*, and with the top attractions of *three networks*, to provide greater audience appeal and *sales impact* on the Southwest's greatest market.

It's as simple as

1·2·3

to make the rich DALLAS - FT. WORTH market *PAY!*

1 STATION WFAA

2 FREQUENCIES 820 + 570

3 NETWORKS NBC-ABC-TQN

Station **WFAA**

DALLAS, TEXAS

and **WFAA FM**

★ Now—WFAA-FM is operating with 14,000 watts, radiated power at 98 Megacycles—Channel 250, bringing to the Dallas-Fort Worth markets this new form of radio service with all of the advantages this finer, better broadcasting offers.

QUIZ QUICKIES

(FOR SHREWD TIME-BUYERS)

1. Why do we use a double-barrel shotgun?

To get the bird! Two shots *double* your chances of getting the big ones.

2. Why do we use the KFJZ-WRR combination in Ft. Worth-Dallas?

To get the sale! Two stations for one price give you a *double* shot at this rich market.

RING COWBELL RING

A Favorite Airmark in Texas For Over 25 Years . . .

The musical clang of the cowbell has guided worried Southwest farmers and ranchers to lost or strayed livestock for many decades.

By the same token, the cowbell airmark on WBAP has guided listeners to 820 kcs. since 1922 and 570 kcs. since 1938. Here they know they're finding the very cream of radio entertainment.

So it is with WBAP's long, quarter-century list of prestige clients. To them the cowbell means RESULTS--results obtained by these millions of loyal listeners, lasting production and a truly great coverage.

Check the facts with WBAP or Free and Peters today. Put a cowbell around the neck of your lost or strayed sales in this rich Ft. Worth-Dallas market area.

In operation this year--WBAP-TV and WBAP-FM.

ESTIMATED POP. 1947
51,607

YOU SHOULD INVESTIGATE

KSEL'S CASH REGISTER-ABILITY

Any survey will prove that cash results are what count! While making the survey, ask the merchant if he is listening to his cash register. (He invariably answers "yes".) Then ask which program he has on, and he'll say a program of sales and expansion.

You're invited to survey any of our accounts. You'll very quickly get the complete story concerning KSEL's Cash Register-Ability.

Popularity of KSEL's programming throughout our entire coverage area is attested by the tremendous station mail. One of our Disk Jockeys . . . Wayne Allen . . . pulled 7,845 letters while plugging one song in a recent contest.

KSEL can Sell for YOU!

TEST CAMPAIGNS INVITED . . . PREFER THE DIFFICULT TYPE

1000 DAY

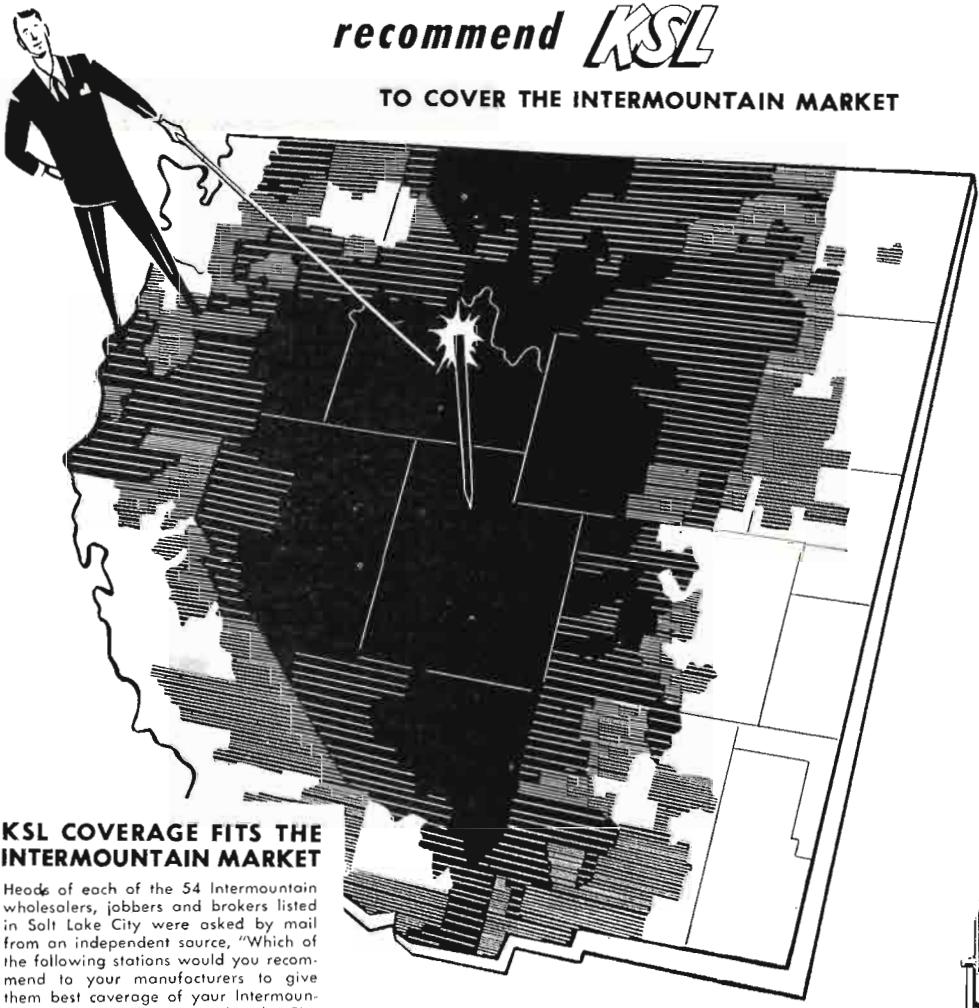
4 out of 5 Salt Lake Wholesalers

recommend KSL

TO COVER THE INTERMOUNTAIN MARKET



KSL COVERAGE FITS THE INTERMOUNTAIN MARKET

Heads of each of the 54 Intermountain wholesalers, jobbers and brokers listed in Salt Lake City were asked by mail from an independent source, "Which of the following stations would you recommend to your manufacturers to give them best coverage of your Intermountain Market?" (The five Salt Lake City stations were listed alphabetically). **4 out of 5 named KSL as their choice.**

BUSINESS MEN concerned with the Intermountain area realize that KSL serves their needs most completely and most economically, that, in fact, KSL is the only single medium reaching every portion of this important western market. When planning your next campaign, see your nearest Radio Sales representative for KSL figures and availabilities.

YOU CONTROL TIME AND AUDIENCE WITH SPOT-BROADCASTING!

'SPOT-BROADCASTING' means simply putting on your radio show at *desirable times* over individual stations.

It is the opposite to buying stations 'holus-bolus' (either regionally or nationally), without regard for different time zones or listening habits.

When you *spot-broadcast*, you are really building your *own* network . . . tailor-made to suit your time, coverage and budget needs. You select the stations that cover *your markets*, choosing from twenty-nine All-Canada stations across the country. You select the peak *local times* you want for best effect, unhampered by time-zone troubles.

Whatever the nature of your radio problem: timing, coverage, budget or all of these—ask the ALL-CANADA man to help you with spot-broadcasting!

YOUR ADVERTISING DOLLAR...

on CFRB each advertising dollar buys

2,795 potential radio homes after 7:00 p.m.
3,475 potential radio homes between 6 and 7 p.m.
5,195 potential radio homes at other times.

ON CFRB you reach more listeners per dollar than on any other Toronto station. That's why CFRB's advertisers keep on using the station year after year.

Ask them why they stay! Perhaps they won't quote figures or facts . . . but they'll give you the *real* answer. They stay because they get results! They stay because they reach *more* radio homes, *more* prospects for their product . . . selling an audience that's been growing for twenty years!

THREE LITTLE WORDS

"All In One"

EVERY BROADCASTING STATION strives to capture a larger share of its potential audience.

EXPERIENCE proves the importance of selecting your library service with great care . . . if it is to produce the results *you* want.

• **More and more stations have found after careful comparative analysis that Associated is THE basic-plus service—a service which can do a full time programming job . . . broad in scope, skillfully balanced, flexible for programming and strong in commercial utility.**

• **The Associated family of subscribers *has more than tripled* in size during the last two years alone!**

• **Associated produces only *one* transcribed radio program service . . . no "partial" libraries . . . a *complete* service for every station budget . . . ALL IN ONE.**

• **We invite you to write for complete details.**

Alan Ladd

starring in
Radio's New Half-Hour Adventure Thriller

BOX 13

Alan Ladd—Paramount Pictures' great star—plays a part tailor-made for him . . . a man of action . . . a daring, versatile fiction writer who *advertises* for *adventure* . . . and gets it the *hard* way! 39 shows in series.

FOR RATES AND AVAILABILITIES
WRITE, WIRE, OR TELEPHONE

Mayfair TRANSCRIPTION CO.

8511 SUNSET BOULEVARD
HOLLYWOOD 46, CALIFORNIA

*It happened in San Francisco, where the first Hooper on "Box 13" was taken. The time—10-10:30 P.M. The station—ABC's KGO. The Hooperating (and get this) — 8.0 — That's 33 1/3% of the total audience. And this was only the seventh show of the series! There's proof that given a great name motion picture star in the right vehicle with superb acting, direction, music and stories, you can get hordes of people to listen—it's happening in dozens of markets.

15 Minute Programs
5 Times Weekly

COMEDY!
SONG!

At a price you won't turn down

Ready to go to work for you, that nationally known network star Tommy Riggs and his lovable Betty Lu in a new series of open end fifteen minute transcriptions for five-a-week spotting. You can program this series day or night. They will sell for you, they will get and hold an audience for you. Each program a show in itself with typical Tommy and Betty Lu comedy situations along with favorite songs by both of them. National accounts that have used these two on the networks know their pulling power. Now you can use them for local or national accounts, and here's the pay off, arrangements can be made to have Tommy & Betty Lu transcribe personal commercial messages that will do a real selling job for your client.

ATTENTION ADVERTISING AGENCIES!

Many of you have used Tommy and Betty Lu on the networks, now you can use them for national spot campaigns, let us know now the markets you wish protected.

SERVICES OFFERED: Keystone Broadcasting System is a transcription network principally covering BEYOND-METROPOLITAN markets from coast-to-coast. Its affiliated stations are joined together in a national system by means of transcription, eliminating wire charges. At time of going to press, the network includes 325 affiliated stations. 24 fully scripted sustaining shows per week, filling 1 hour per day, seven days each week, to a total of 7 hours per

www.americanradiohistory.com

week. This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to cover the BEYOND-METROPOLITAN markets exclusively, in a single transaction, by means of electrical transcription. The System offers its facilities in group network time periods from one hour down to five minutes, and also makes available announcement periods of one-minute, half-minute and 25 words in length.

used time to merchants, industrial and professional business firms on short term contracts who ordinarily never use or buy radio time from their immediate station. NRF is the house of specialized campaigns known from coast to coast as one of the finest and cleanest cut concerns in the feature business. Ask the stations that have used NRF service. A repeat performance every time. NRF has worked with more new stations opened or just opening than any other concern. "Veterans of Victory," "Boost and Buy" and "Radio on Call" are feature presentations. Spot announcements and half hours make up great programs. Coast to coast.

For all your music needs

all the time

ASCAP

For more than a generation* the American Society of Composers, Authors and Publishers has helped to build great commercial enterprises whose life blood is music.

Radio program builders long have known that ASCAP is an unfailing source of music—that the vast repertoire of the Society and its associates the world over yields material for their every possible music requirement.

Members of ASCAP are proud that their creative work has been a potent factor in the great development of radio in the United States. Now, on the threshold of radio's greatest year, they unite in a salute to the entire industry.

A·S·C·A·P

By DEEMS TAYLOR

President, American Society of Composers, Authors and Publishers

THE American Society of Composers, Authors and Publishers now is in its 35th year of service to commercial users of music and to its members. It begins the year 1948 with a writer membership (composer and author) of 1888, and a publisher membership of 306. When Victor Herbert and eight associates formed the Society in 1914 the entire membership was a little more than 100. Its licensees number more than 37,000. Its chief purpose is the protection of its members' music performing rights. This is done through a system of licensing commercial enterprises making use of music.

Perhaps the most significant trend of the Society in recent years has been its amplified service to the symphonic, concert and recital field. In the early years the Society's licensees were chiefly in the popular music field, with its membership largely men and women creating music of the popular type. The Society now follows the pattern of similar Societies in other countries, including in its repertoire music of the standard or serious type as well as popular music. The trend is reflected in the increasing proprtion of standard composers within ASCAP's membership. The ratio of the standard to popular members is one to two.

The users of serious music in steadily increasing numbers are finding the ASCAP repertoire a valuable source of important program items, and the simple machinery of the ASCAP license a highly desirable asset.

In radio's increasing use of serious music the enlarged ASCAP repertoire has been found particularly helpful. ASCAP, including the creators of every conceivable type of music for every conceivable use, has grown to be truly a national institution, its membership representing every state and territory of the U. S., as well as other lands whose creative talent has found a home in America.

There are 159 women members of ASCAP, the proportion of women in the serious field being larger than that of men. Whereas there is one serious music composer for every two in the popular field, the division of women is about equal in the two fields.

In January 1948 the Thomas Y. Crowell Co. published the ASCAP BIOGRAPHICAL DICTIONARY which includes data covering every member of the Society.

ASCAP has headquarters in the RCA Building, Radio City, with 25 branches throughout the country. Deems Taylor is President. A Board of 24 directors through its revolving Executive Committee of three members exercises supervision of the affairs of the Society. Administrative executives include Herman Greenberg, Sales Manager, in charge of all licensing activities; George A. Hoffman, Comptroller, in charge of accounts, finance and general personnel; Richard F. Murray, Manager of Foreign Relations, in charge of foreign matters, all internal statistical departments and publicity department; Herman Finkelstein, Resident Counsel. Schwartz & Frohlich are general counsel.

BROADCAST MUSIC, INC.

By CARL HAVERLIN

President

IN EXISTENCE but seven years, BMI is a symbol of an industry's initiative in creating the competition which freed it from a monopoly that once threatened its very economic life. During this time, broadcasters have not only carried out their original competitive plan but have brought into being an organization of international musical importance.

Today all but four of the broadcasting stations of the United States and Canada, as well as national and regional networks are BMI licensees. In addition, there are close to 2,000 hotels, night clubs and other establishments where music is performed, licensed by BMI.

Apart from its affiliations with established societies and music publishers, BMI as a matter of policy has opened and developed new sources of music by American composers, creating a vast repertoire that otherwise might never have seen the light of day. BMI has stimulated and encouraged in this way, hundreds of talented young writers and new publishers, thus building up its reservoir of music in all fields—popular, folk, educational and standard. The acquisition of new properties is a continuing process in the realm of American music. Available for BMI licensees are nearly 50,000 recorded and transcribed compositions of every description.

In August of 1947, Associated Music Publishers, Inc., became a wholly owned subsidiary of BMI, making its vast store of music of the world available to BMI licensees. Early this year seven leading Italian publishers assigned their U. S. performing rights to BMI, the deal involving some 5,000 compositions and copyrights, adding to the BMI store of Italian popular, operatic and other serious music.

BMI's foreign reservoir of music has been built on a practical foundation. The house of Breitkopf for instance, is not only the greatest music publishing firm in Germany but the oldest known publishers of music, dating back to the days of Bach. Apart from Continental affiliations, BMI has the largest catalogue of Latin-American music-rights extant, including that of the societies of Cuba, Chile, Colombia, Mexico and Brazil. These foreign rights are supplementary to the catalogues of more than 1,000 American and Canadian firms affiliated with BMI, a well rounded repertory.

OFFICERS of BMI are: Carl Haverlin, president; Sydney M. Kaye, vice-president and general counsel; Charles A. Wall, vice-president in charge of finance; Robert J. Burton, vice-president in charge of publisher relations, and Claude C. Boydston, controller.

DIRECTORS (elected annually): Justin Miller, chairman; Sydney M. Kaye, vice-chairman; John Elmer, WCBM; William S. Hedges, NBC; Leonard Kapner, WCAE; Joseph A. McDonald, ABC; Paul Morency, WTIC; J. Leonard Reinsch, WSB; J. Harold Ryan, Fort Industry, Inc.; Robert D. Swezey, MBS, and Herbert V. Akerberg, CBS.

ASSOCIATED MUSIC PUBLISHERS, INC. (AMP)

By M. E. Tompkins

President and Secretary of AMP

ON August 1, 1947, Broadcast Music, Inc. purchased the capital stock of Associated Music Publishers, Inc. The purchase involved only the music publishing and foreign affiliated publisher relations. The purchase did not include Associated Transcription Library Service or the wire service to hotels, restaurants, etc., known as Muzak.

Associated Music Publishers, Inc. as of August 1, 1947 became the sole selling agent of fine standard and serious music catalogs which were built up by BMI throughout its publishing life. Those catalogs are now merged with the exccellent catalogs of AMP, and all activity, promotion and distribution of these catalogs will take place from Associated Music Publishers, Inc., 25 West 45th Street, New York City.

Broadcast Music, Inc., 580 Fifth Avenue, will continue in the popular music publishing business, popular music not being involved in the merger.

All broadcasting station licensees of BMI may now use all of the materials, the performance rights of which are vested in Associated under the license they enjoy with BMI without payment of any fee to AMP, and without additional fee to BMI.

AMP Board of Directors: Carl Haverlin, President, BMI; William Hedges, NBC; Sydney M. Kaye, Vice-President, BMI; Paul Morency, WTIC; J. Harold Ryan, Fort Industry Co.; M. E. Tompkins, Prsident, AMP.

AMP officers: Sydney M. Kave, Chairman of the Board; M. E. Tompkins, President & Secretary; Karl Bauer, Vice-President; Earl B. Hall, Vice-President; Charles E. Lawrence, Treasurer.

S E S A C, Inc.

By PAUL HEINECKE
President

SESAC is pleased to announce that 1948 marks the 18th year of service to the broadcasting industry and all allied fields in the entertainment business. We are grateful, too, in having been able to grow with the industry and that mutual experiences have made it possible for us to meet each individual broadcaster's specific music requirements; simplify his music licensing problems; and prepare to assist him, as in the past, through any music copyright crisis which may arise.

As radio has expanded, so has SESAC, with many new publishers whose large catalogs have been added to our repertory, embracing well over 120,000 copyrighted compositions of every type of music—music needed daily, never dated, but of lasting value and appeal.

Such prominent American composers as Victor Herbert, Rudolf Friml, Edward MacDowell, Charles Wakefield Cadman, Bruno Huhn, Mrs. H. H. A. Beach, Cuthbert Harris, Virgil Thomson, Frank Grey and many others, through their compositions, enrich the SESAC music enjoyed by millions.

•

SESAC, in keeping with its long range plans for the future, began years ago to obtain for the broadcasters' use, a wide diversification in the music catalogs of its imposing list of American and foreign publishers. SESAC went further, in a realization that the spoken word, with or without music background, would play an important role in radio in the form of dramas, plays, sketches, musical comedies, operas, operettas. The SESAC catalogs contain hundreds of dramatic and comedy vehicles, now ready to serve our licensed stations in AM and FM, but more importantly, in greater measure, in television.

SESAC is further expending its full co-operation to FM and TV stations by making available its complete repertory under a gratis performance license valid until further notice. Meanwhile, special consideration is being given to the particular production and programming requirements of television.

•

Another important phase of SESAC's service is a high quality, modestly priced transcribed library-program service, which, at the end of 1947, only two and a half years after its inception, is being used effectively by over 300 AM, FM and TV stations. This unique library, containing only SESAC compositions, is recorded with an expertly-balanced one-quarter hour musical program made up of separate cuts on every vinylite record face. As a time-saver and a money-maker, the service has far exceeded every expectation of our subscribers.

All of our facilities, our services and the catalogs of our affiliated publishers are geared to meet the current music needs of the entire industry as well as keep pace with every programming and production requirement which may develop in the future. Whether your broadcasting medium is audio or video, SESAC is ready to serve you with The Best Music In America.

DEAR ANYBODY (and that means you!):

In case anybody cares who reads this, I'd like to go on record as reminding you that I am CREDITED with having brought more "FIRSTS" to radio than any other guy.

So?—so nothing!—While the others CASH IN ON MY BRAINSTORMS AND TALENTS, I don't even get the chance to swipe back my own ideas!

But I don't care. TELEVISION IS COMING IN . . . AND THAT'S WHEN I'LL BRING BACK RADIO!

ALAN COURTNEY
WNEW—12 NOON DAILY

P. S.—CALL ME ANYTIME.

EXECUTIVE COMMITTEE

John Daly, John MacVane, Caesar Saerchinger, William Hillman.

FUNCTIONS

• ARNA was founded during the war years by news analysts who agreed to a code of ethics designed to establish professional standards in news commentating over the air. The restricted membership facilitated confidentiol contacts with the Armed Services, the State Department, and Allied governments at the highest levels. This off-the-record policy continues to assure ARNA members the closest possible professional relations with our own and foreign governments. ARNA works to improve the professional status of news analysts in relation to the networks and independent station manogements, as well as setting forth our views on such rulings of the Federal Communication Commission and Congressional legislation os affect the news aspect of broadcasting. (Annual elections take place April of each year.)

FUNCTIONS

The Federal Radio Education Committee was appointed in 1935 by the Federal Communications Commission with the recommendation at that time that the broadcaster, on one hand, and the educator, on the other, combine forces which would: (1) eliminate controversy and misunderstanding between groups of educators and between the industry and educators; (2) promote actual cooperative arrangements between educators and broadcasters on national, regional and local bases. Some two dozen printed publications are described in a free folder entitled, "What the FREC Offers You." Most of them are sold at 25 cents per copy. The monthly FREC Service Bulletin, a four-page publication giving news of current educational radio programs, sources of program material and other information of interest to teachers broadcasters, is available free on request. Other free publications include a monthly list of Selected Programs for Student Listening and a Directory of College Radio Courses.

MEXICO

THE NEW SALES FRONTIER IS *SOUTH*

MEXICO . . . *4th Largest U. S. World Market*

KNOWLEDGE
of the people and their buying habits.

EXPERIENCE
with successful campaigns of U. S.'s most successful sponsors.

FACILITIES
to reach all Mexico's 22 million consumers and more . . . economically.

MEXICO is a *mighty* good neighbor in dollar-volume purchases of U. S. goods: 5 times more in 1946 than in 1940, totalling nearly a half billion dollars. Mexico, 4th largest market in U. S. world trade, is a new world of trade for advertisers like Bayer, Canada Dry, Colgate, Parker, Sidney Ross, GE, Coca Cola and scores more. They sell Mexico's 22 million consumers through Latin America's most important network—the 116 stations of Radio Programas de Mexico. RPM covers *all* the Mexican (Central and South American) market. Its 50,000 watters pour into centers of population; its 250 watters conserve power (and your budget) where buying centers are smaller.

Here is a market equal in population to Ohio and New York combined. But, unlike the U. S., where channels of distribution are filling, Mexican demand is never-ending. Competition is almost unknown. Investigate your opportunity for mass distribution in this virtually untapped mass market. *YOUR* new sales frontier is South . . . through the 116 stations of RPM.

RPM
RADIO PROGRAMAS DE MEXICO

1948 'scope

FOCUS OF THE YEAR...

When NBC announced network television on the first business day of 1948, remarkable things began to happen. Within two weeks, one manufacturer oversold a carload of sets in a southern city. A station in that same city found itself with sudden new contracts for $1,000 worth of time a week. The station was not yet on the air with television and the people who bought the sets couldn't view any programs for a few months to come. These are just two items among many that happened because people were ready for television. NBC's culminating achievement of network television clicked with what the public wanted precisely when they wanted it. The eye of that public is clearly and enjoyably focused today on NBC's conviction and performance in . . . *1948—Television's Year.*

FOCUS OF ANOTHER YEAR...

Television had a long infancy, an enthusiastic boyhood and a smartly paced entry into its year of grown-up action. And now it's possible even to be nostalgic about it. Remember *Business Week's* Special Report of 1939?

"Ending years of rumor and premature conjecture, television's birth was officially scheduled for the year 1939, when David Sarnoff, president of the Radio Corporation of America, announced two months ago that home receiving sets would be put on sale by April and that the National Broadcasting Company, RCA's subsidiary, would begin a regular television broadcasting service when the New York World's Fair opens April 30, 1939."

For year-after-year top performance, money-making commercial telecasting . . .

IT'S DU MONT FROM A to Z

From camera to high-gain antenna system—including control units and consoles, film projectors and film cameras, portable image orthicon chains and relay transmitters, studio cameras, video and audio transmitters, etc.—it's DU MONT equipment all the way for that coordinated, smooth, economical performance. Du Mont installations in daily service best illustrate that story.

A decade and a half of outstanding engineering, actual telecasting and electronic craftsmanship second to none, stands behind equipment bearing the famous DU MONT name. *No other organization can match this pioneering saga.*

Whatever your telecasting plans—low-power or high-power; modest or big investment; single station or network—regardless, make it DU MONT from A to Z for the "First with the Finest in Television."

Bring your telecasting plans and problems to us for Du Mont "know-how." Visit our model station at Clifton for leisurely inspection and test—or the Du Mont Network in New York for the world's largest television studios in action.

First with the Finest in Television

TELEVISION

Add a new dimension, perhaps the most important, to the dynamic field of entertainment. Television is HERE. While Motion Pictures, Opera, the Stage and Concert Field are having a trying time to hold their own, TELEVISION, the mightiest facet of all is moving forward with the grace of a rocket and the force of an atom bomb.

Not so many years ago Gen. Sarnoff knowingly told us that practical television only awaited circulation. With a cyclone of sets and a nation wide coxial network in the developmental stage it can now be said that the future of television is unlimited. And so the stage is set. From those now in television we can expect more maturity in production. To those in allied fields we suggest most serious attention to this thundering giant.

The pages that follow, in somewhat abridged fashion, reflect the past and present picture of video, as well as an enlightening and constructive look-see into the television crystal ball of the future. This is the Third edition of the Year Book of Television. To those who have so cheerfully helped in its preparation the editor extends his grateful appreciation.

JACK ALICOATE,
Editor.

The eyes of the world are on Hollywood

and Hollywood's eyes are on **KTLA**

In Hollywood there starts a custom, a fad, a fashion. First thing you know, you find it spread to the far corners of the earth. But where does Hollywood get its ideas? Well, here's one clue: Hollywood's great, absorbing interest today is television—and in Los Angeles, television means KTLA, on the air seven days a week with a wide variety of excellent programs.

KTLA *sells Hollywood*

HOLLYWOOD *sells the world*

SCANNING AND PANNING

By FRANK BURKE, *Editor, Radio Daily and Television Daily*

TELEVISION programming techniques both from an advertising and entertainment point of view progressed during 1947 but there is still need of showmanship in the development of the sight and sound art.

Program progress of the past year included improvement in special events coverage; more intelligent use of visual commercials; the advent of daytime programs designed for kiddie viewing and the use of documentary, news and educational films.

Some of the major advertising agencies such as Foote, Cone and Belding, J. Walter Thompson, and N. W. Ayer have made excellent use of movie commercials in the television field. The use of films to sell Lucky Strike cigarettes, the Ford film commercials and U. S. Rubber's treatment of sports events on film are some of the notable examples of good taste and excellent merchandising using movie techniques.

•

Another important step on the progressive side noted the past year which holds promise for further expansion this year is the increasing number of program hours on stations. The complaint that television gave little or no daytime programming is being answered by increasing schedules of daytime shows—afternoon programs of special appeal to women and children. Also by adding daytime special events coverage of events in Washington and New York.

The coming of the Republican and Democratic National conventions to Philadelphia in July are heralded in television circles as two events that will give great impetus to the new art. Extensive plans for network and station coverage on the Atlantic seaboard and tele film coverage for stations in other sections of the country have been worked out. In addition the major manufacturers of television receiving sets in February made plans for an extensive advertising and promotion campaign designed to step up the sale of receivers for the forthcoming political conventions.

•

Greatest problem from an audience standpoint in 1948 is the installation bottleneck which the major manufacturers up till now have not been able to solve. The demand for receivers, particularly the table models produced by Du Mont, RCA, Philco, Farnsworth, Emerson, General Electric and others have been great but the distributors and dealers have not been geared to handle the installation and servicing in many instances.

Despite the set installation bottleneck the television industry made amazing progress during 1947 and will climb to still greater heights in 1948. With prospect of nearly 50 television stations in operation before the end of 1948 and nearly a million sets in the hands of the growing video audience the new industry will become a nation-wide entertainment and commercial enterprise this year.

Two organizations have done much to further the new art the past year. These are the Television Broadcasters Association and the American Television Society. The TBA under the leadership of Jack Poppele, president, have represented both the manufacturers and the broadcasters and the ATS with Don McClure as president and have brought together all segments of video into a closely knit progressive society of television experts and newcomers to the field. Their impact, unquestionably, have been of immeasurable value in establishing television as a dramatic, growing industry.

•

Probably one of the biggest needs of the new art is the establishment of an authoritative survey system which will give broadcasters, manufacturers and advertisers alike a true picture of the growing television audience from month to month. Broadcast Measurement Bureau, industry sponsored research organization, has plans for rendering this service and both the Hooper and Nielsen organizations are working to the end of providing such a service. The only figures available at this writing are the monthly estimates of the Radio Manufacturers association on set production by their member manufacturers and the fluctuating figures of the Federal Communications Commission on station applications, CPS and commercial licenses. These figures are available from day to day at the FCC as the television actions are disposed of by the commission.

Television is no longer around the corner. It's here and growing daily. By the end of 1948 it may enter the charmed circles of the first fifteen major industries in the United States.

Television Today — Facts and Figures

NINETEEN television stations are now operating in 12 key cities of the United States. Thirty more stations were expected to begin regular video service this year.

•

Cities having daily TV program service were: New York, Schenectady-Albany, Philadelphia, Baltimore, Washington (D.C.), Cincinnati, Cleveland, Detroit, Chicago, Milwaukee, St. Louis and Los Angeles.

•

Major manufacturers report production of approximately 225,000 receivers during 1947 with prospects of 750,000 sets being produced during 1948.

•

It is estimated that upwards of 200,000 receivers are in use in private homes, with an approximate audience of 1,500,000.

•

Price of television receivers range from around $200 for small table models to $2,500 for deluxe all-purpose models.

•

Coaxial cable now links New York with Philadelphia, Baltimore, and Washington with an extension to Richmond, Va., in prospect during the spring of 1948.

•

Radio relay links now in operation include one from South Bend, Ind., to Chicago; another from New York to Schenectady, a third linking Philadelphia with New York City, and a fourth connecting the latter with Boston, Mass.

•

Top programs during '47 included telecasts of the World Series, Louis-Walcott heavyweight championship fight, and first video pickup from the White House.

•

Plans were made to televise the national conventions of the Democrats and Republicans in Philadelphia. Proposal involved all broadcasters on the eastern network who will participate via an industry pool.

•

Over 200 top national advertisers were using television on a regular basis, several of which were represented in all 12 cities with video service at the start of the year.

•

AT&T announced plans to link the east and midwest with coaxial cable and radio relay by December of 1948. Plan called for regional network service to be expanded in both areas, with connections extending from Buffalo in the north through Cleveland and west to St. Louis, Mo.

TELE SPONSORS SHOW INCREASE

By DON McCLURE, *N. W. Ayer & Sons*

McClure

ABOUT a year has passed since the first *new* long-awaited post war television set has been enthusiastically received to a home. The ever alert manufacturer optimistically forecast fantastic figures as to the number of sets that would be made for the coming year. Considerable increase in new sponsors' expanding activities, as well as the old standbys, was a logical follow up. In order, success story after success story, although ever so small as to the number of people reached, proved what *we* in Television have long believed—"It's here to stay!" Long before this new era was twelve months old, Crosley's, Hooper's, Roslow's, audience panels, Televisor and Television Magazine surveys piled up evidence so complete that even the hardest headed anti-video diehad had to admit the new electronic child was far from anemic.

•

This first firm step into a new era was not unlike the first firm step of a child . . . solid, positive, with an objective in view . . . then back to crawling. As the months rapidly dropped from the calendar, so did the earlier set estimates—so did program experimentation—so did station applications—so did opening dates for new stations. Even many so called far seeing and daring advertisers took the easy and short way out—"Let's wait." The public, when the chips are down, are the only ones that count, and they continued to buy every set the manufacturer produces. At this late date it's rather foolish to observe that John Q. (in this country at least) usually gets what he wants . . . and commercial happens to be on his list.

With the coming of spring, the long promised sets in quantity began to be a reality. Baseball, the national sport, was for the first time tried in all cities having television and big league teams on a regularly scheduled basis. Some of the experienced television sponsors—and many new ones—became even more aware of the genuine interest the public had in this new bill of fare. By the end of the summer, almost every ball park where television was permitted to telecast games admitted that turnstile attendance had reached an all-time high.

Comes the spring, besides being necessary to a "young man's fancy", there was a stimulating effect on *other* types of *professional* programming. Some national advertisers bought top professional talent only to find it paid off. Other producers offered types of television programs that were a logical step from sport and news events into entertainment in the home and at a cost that made economic sense even at this stage of the game.

•

At this point, we feel it advisable to indicate that spring also offered encouragement to what we believe can become a menace in station programming—the minute spot!—not too obvious a pitfall, but from a station's programming standpoint, once they break their time into segments of one minute—in the extreme it could well become a problem of public relations to prevent 59 one minute commercials during an hour of programming. The second, and by far the most serious as far as the sponsor is concerned, once a one-minute spot has been shown, the impact and remembrance of a good commercial is pretty complete. It's second showing begins to create a nuisance in the mind of the viewer. The 3rd, 4th and 5th showings can easily cause the audience to switch to another station. Naturally, this is a negligible problem in radio but, unfortunately, some sponsors are already treating television like radio—with pictures attached.

•

The 1947 World Series—topped in interest probably only by the Louis vs. Conn fight, drove set demands into the stratosphere. The request for time on stations reached a peak, Advertisers and their agencies began to speak of television in terms above a whisper. Segwaying into this annual baseball classic was another top American sport—football! Sponsors were fighting for positions, options, renewals—and sets were still miles behind the demand.

Looking into television's future at this time, the view is reasonably clear. With little effort on the manufacturers' part, all sets can be sold to an eager public.

www.americanradiohistory.com

In every field of radio
LOOK TO THE GENERAL ELECTRIC COMPANY

AM Among the first to design, build and operate transmitters in the AM field, General Electric has always maintained its interest in advancing the art and technical development of this phase of broadcasting. The 250 watt AM transmitter shown here is the first of General Electric's completely new line that includes all types, from the lowest to the highest power ratings.

AVIATION To the pilot, the radio equipment is the most valuable instrument in his plane, since his life may depend upon it. In designing the complete General Electric line of Aviation Electronic Equipment, reliability far beyond accepted standards was demanded. The high quality that is being built into these entire lines is assurance of dependability under the most critical conditions.

FM As a pioneer in the development of FM broadcasting, General Electric has acquired the background and experience which has proved so invaluable to the newer stations entering this field. As a leader in the development of FM, General Electric has a complete line of FM transmitters for broadcasting stations of every size.

TELEVISION For years General Electric has pioneered in television. Station WRGB has provided outstanding facilities for both technical and program experimentation. This union of engineering with studio production supplies General Electric with experience of incomparable value to those entering the television field.

COMMUNICATIONS

In the broad field of communications, General Electric has placed emphasis on the importance of quality, reliability and simplicity of design in this type of equipment. Since many of the applications for radio communications equipment are in the nature of public services, extreme care has been exercised to design each unit for maximum utility. Complete systems for the bands available to these services are provided, both station and mobile.

MARINE RADIO

During the war General Electric was one of the largest producers of radar for the Armed Forces. Many of these developments have been refined and simplified for use in peace. The Electronic Navigator, a radar development, is one of these peacetime applications which is now being used in navigation to protect shipping. Other equipment now being developed will aid in saving untold millions of tonnage and numbers of lives in the future.

TELEVISION-LEADERS
— 1947 - 1948 —

Thumbnail sketches of industry executives whose activities during the past year have contributed to the dramatic development of the new art, whose leadership assures television of early maturity.

ALLEN B. DuMONT

An early industry pioneer, Dr. DuMont, president of Allen B. DuMont Laboratories, Inc., gives active leadership to the company's five divisions: research, cathode-ray tubes, cathode-ray oscillographs, television receivers, television transmitters, and the DuMont television network. His name is synonymous with television through his contributions to the industry.

DAVID SARNOFF

A name synonymous with all phases of advancement in the communications field for the past quarter-century and one of America's most respected and influential business men. Sarnoff's career is as dramatic as the story of radio itself, having risen from the ranks to his present post as president and chairman of the board of RCA. He's also distinguished himself in two wars, presently holds the rank of brigadier general.

FRANK E. MULLEN

One of the most influential and widely-known executives in the business world, Frank Mullen, executive vice president of NBC, is responsible for much of the present degree of progress made in the medium by the network. At the helm of NBC's television activities the past year, Mullen is responsible for plans and development for the network's establishment of a coast-to-coast video hookup.

LAWRENCE W. LOWMAN

Operational head of CBS Television and a board member of the Television Broadcasters Association, Lowman is celebrating his 16th year as a CBS vice-president and his 20th with the organization. WCBS-TV has made great commercial strides and has won industry-wide recognition for imaginative programming, experimentation and research in the short time Lowman has been at its helm.

JOHN F. ROYAL

One of America's great showmen and most popular industry leaders, he's held top posts in all segments of broadcasting, including programs, news and now—television. Closely associated with show business during much of his career, Royal's far-flung contacts have played a vital role in helping NBC build top-quality television standards. He is an NBC vice-president.

MARK WOODS

Dapper, dynamic and one of the best-liked men in the industry, ABC's Mark Woods is the main driving force behind the network's activity in television as well as radio. In the thick of the race to establish a nation-wide video network, Woods early in '48 outlined ABC's plans to connect New York and the Coast.

J. R. POPPELE

One of the industry's pioneers, Jack Poppele is also one of television's leading figures. He is vice president, secretary and chief engineer of the Bamberger Broadcasting Service, a member of the board of directors of the Mutual Broadcasting System and president of the Television Broadcasters Association, Inc. Poppele was instrumental in staging many broadcasting "firsts."

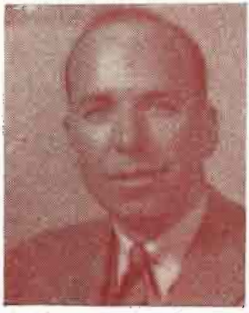
DR. PETER C. GOLDMARK

Young physicist and inventor who joined CBS 11 years ago, Goldmark is accredited with that network's achievements in ultra-high frequency television, including color video transmission. For his work in this regard and in electronics research he was awarded the Morris Liebmann Memorial Prize in '46 by the Institute of Radio Engineers. Currently heads CBS' tele engineering research and development.

DR. V. K. ZWORYKIN

Internationally acclaimed for his achievements in all phases of electronics, Zworykin is a pioneer in the development of all-electronic telvision. He invented the iconoscope, video's sensitive "eye," and developed the kinescope—picture tube of the tele receiver. A member of every important engineering society and recipient of numerous major awards, Zworykin contributed heavily to World War II in science.

JAMES H. CARMINE



Nationally-known sales and merchandising expert, and a leading industry executive since 1923, Carmine is vice president in charge of distribution for the Philco Corporation. As such he is responsible for all Philco sales, merchandising and advertising, including the firm's complete line of television receivers. He has a keen business sense and unrivaled knowledge of the American market.

WALTER J. DAMM

Vice president and general manager of radio for the Milwaukee Journal Company, Damm directs entire operation of WTMJ-TV, WTMJ and WTMJ-FM in that city and WSAU in Wausau. A pioneer in radio for many years, and an early enthusiast of television, Damm has applied the same intelligence and industry to the new medium.

G. EMERSON MARKHAM

Manager of GE's pioneer station in Schenectady (N. Y.), WRGB, and a company executive since 1923. Joined GE's WGY in that city in 1925, established two of the oldest farm radio services in broadcasting. Responsible for much of WRGB's success as one of the first video outlets in the east, Markham is also vice president of the TBA.

LAWRENCE G. PHILLIPS

Widely-experienced business exec and one of the best-known showmen during the war as head of the USO, Phillips brought an impressive background to tele when he took over the reins of the DuMont television network last year. He sharpened up the web's operation in a short time, hypoed program activities and is credited with DuMont's recent surge to the fore in New York and Washington.

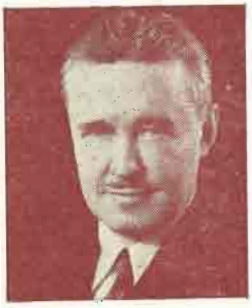
FRANK M. FOLSOM

As executive vice president in charge of RCA Victor, manufacturing division of Radio Corp. of America, Frank Folsom translated television blueprints and laboratory developments into receivers and broadcast equipment to establish television on a national scale. Under his direction, RCA brought out in quantity the super-sensitive Image Orthicon pickup tube, new bright-picture kinescopes and other video advances.

HARRY BANNISTER

Veteran salesman in many competitive fields since World War I, he brought a wide and experienced merchandising talent to radio in 1930 when he joined WMBC, Detroit. Later joined WWJ in the motor city, helped increase its commercial operation to new highs, and in 1941 became its general manager. Has supervised its WWJ-TV's operations since its inception.

PAUL RAIBOURN



One of the first motion picture execs to recognize the tremendous future of television, Paul Raibourn, as vice president of Paramount Pictures in charge of budgets and planning, heads up the company's entire tele subsidiary, Television Productions, Inc. An active and influential participant during video's pioneering stage, Raibourn is a director of the Television Broadcasters Association.

www.americanradiohistory.com

BACK TO SCHOOL!

"We are now in the initial stages of the greatest marketing and merchandising effort in the history of the industry. In anticipation of this, the servicing fraternity is grooming itself to meet new problems arising from television, FM, higher frequencies and higher voltages. The industry and trade will have to go back to school. Of new techniques and new technology, there is plenty of both to be learned. The old chit-chat about tone, selectivity tuneup, feedback, etc., will have to make room for a new lingo about di-poles, rasters, turrets, blanking, focusing, picture areas and a new world of other terms and methods."

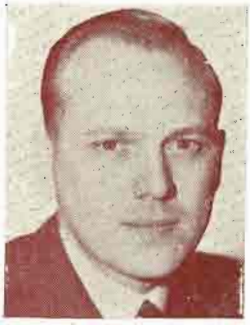
LEWIS ALLEN WEISS

When Lew Weiss, chairman of the board of Mutual and executive vice-president of the Don Lee Network, began in radio in 1930, he saw in it a new and potent advertising medium that fascinated him. Now, as one of the pioneers in the development of television, he is still concerned with the great potentialities of the visual-video art media.

WILLIAM CRAWFORD EDDY

Holder of more than 100 radio and electronic patents, Eddy brings to video a career as full of drama as the medium itself. A graduate of the U. S. Naval Academy, he spent several years with the submarine service, later joined Farnsworth Labs, NBC, then WBKB, Chicago. In the Navy during the war, Eddy rejoined WBKB in '46 as its director.

NORAN E. KERSTA



An NBC exec for more than 12 years, he's the network's director of television operations and one of the industry's youngest and most energetic officials. Pioneer in video statistical research and development of business methods for the new art, his work has run the gamut of all matters video-wise. Marine Corps radar officer, Kersta took his present post in '47.

CHARLES C. BARRY

On the husky shoulders of "Bud" Barry, ABC's vice-president in charge of programs and television, fall the herculean task of programming the network's television stations. A former Presidential announcer, the 36-year-old Barry is responsible for the development of many of the network's top AM shows, will transfer much of his programming savvy to tele.

ERNEST B. LOVEMAN

Vice president of Philco Television Broadcasting Corp., which operates WPTZ, (Phila.) for the past three years, his career dates back to the early 20's when the company entered radio. For 18 years was ad manager of Philco, contributed heavily to the firm's surge to the top in the industry. Loveman is one of the men who have made Philadelphia a vitally important video center.

WORTHINGTON C. MINER

Director, CBS Television, Miner handles over-all programming and film activities for the network's outlet, WCBS-TV, in New York. A prominent actor-producer-director for the legitimate theater and motion pictures from 1925-'39, during which time he produced 27 Broadway shows, Miner handled the station's operation through the war years, last year inaugurated station's "on location" shows.

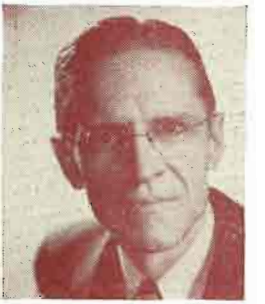
NOW READY FOR IMMEDIATE RELEASE: NINE MUSICAL MOODS

www.americanradiohistory.com

PAUL B. MOWERY

Few industry executives have done more to promote tele as an advertising and entertainment med than ABC's fireball, Paul Mowrey. A "young old-timer" in his early 30's, Mowrey has spent a decade in the industry, broke in with CBS as a lighting expert back in '38. Joined ABC in 1944, is now its national director of television.

J. R. DUNCAN



Actively engaged in television engineering since 1931, Duncan is acting director of television operations for the Crosley Broadcasting Corporation. Supervising activity at WLWT when it operated under the experimental tag of W8XCT, Duncan expanded the station's sked from one program a week in July of '47 to 20 hours weekly in January.

GEORGE M. BURBACH

General manager of the St. Louis Post-Dispatch broadcasting stations KSD, KSD-TV and KSD-FM, Burbach is one of the industry's pioneers. His early and intense interest in the development of television resulted in the inauguration of KSD-TV as the nation's first completely post-war equipped television station on February 8, 1947. He was recently elected to the Board of TBA.

DR. LEON LEVY

Acknowledged industry leader for the past two decades, Levy heads activities at WCAU-TV (Phila.) as well as its AM, FM and facsimile interests. He and his brother, Isaac D. Levy sold their holdings in WCAU in '46, but remained as operators for new owners, Philadelphia Record, and last year, The Bulletin. Born and bred in the Quaker City, he's a vet of both wars. Is on the CBS board.

ROGER W. CLIPP

One of the industry's top executives, Clipp runs a huge enterprise in the Quaker City for the Philadelphia Inquirer, including its video outlet, WFIL-TV. Influential in getting both national political conventions for Philadelphia in '48, Clipp is a live-wire broadcaster and businessman, enormously active in all phases of industry. He's also a committee member of NAB, BMB, and a member of the stations planning and advisory committee of ABC.

DR. W. R. G. BAKER

Pioneer in the communications and electronics industry, he's vice president of General Electric. Joined the firm in 1917, helped set up its AM operations in Schenectady, Denver and Oakland, (Calif.), later joined RCA-Victor to head radio engineering. Returned to GE in 1935, was elected a vice president six years later, now heads the electronics department in Syracuse.

LEONARD F. CRAMER

Vice-president of the Allen B. DuMont Laboratories, Inc., and a member of its board of directors, Cramer's work for DuMont has been highly varied, including sales, promotion, advertising and station management. Although he was originally interested chiefly in sales, diversified and thorough training and experience has also made him a top-notch production man.

DON McCLURE

One of the most energetic execs in the business, Don McClure was one of the first agency men to plan and set up an extensive tele campaign for a national advertiser, when the medium was still considered in the "experimental" stage. Head of the television bureau of N. W. Ayer & Son, Don is also president of the American Television Society.

GEORGE T. SHUPERT

In television since 1943 as an executive assistant of Paramount Pictures Inc. and Television Productions Inc., Paramount's wholly owned television subsidiary, Shupert's duties include overall planning of Paramount's broadcast and theatre television operations. He is also New York sales representative for Paramount's Chicago station, WBKB, and Los Angeles station KTLA.

ROBERT S. PEARE

Vice president in charge of advertising, broadcasting, and general publicity for GE, Peare joined the company in 1922. In 1940 was named manager of GE publicity, chairman of the Company's general advertising committee, and a vice president in 1944. Peare supervises the operations of WGY, GE's standard-AM station in Schenectady, and WRGB, its TV outlet.

FRANK P. SCHREIBER

Head of broadcast activities of WGN, Chicago, one of the Mutual network's key outlets, and is a member of the web's program board. Schreiber's had a wide career in the industry and newspaper work, broke in as a sports writer after the first World War. He's been an important factor in air coverage of sports, now directs WGN-TV's operation.

EDGAR KOBAK

President of the Mutual network, and one of the most widely known men in the business world. Kobak's activities in video will expand this year with debut of several MBS stations in the medium, including WOR in New York. Was instrumental in acquiring video rights for the World Series last year, an occasion which bolstered the medium's importance to a high degree.

www.americanradiohistory.com

G. BENNETT LARSON

Director of tele operations for WCAU-TV, outlet owned by the Philadelphia Bulletin, and an executive with over 20 years experience in all phases of broadcasting. Has been with NBC as producer and director, later with such top agencies as Y. & R., Ruthrauff and Ryan, was director of video for the former for some years. Re-entered the station field in '42, was with the Bulletin's WPEN until accepting his present post.

JOHN McNEIL

A veteran network sales and management executive, John McNeil brought to the Du Mont Television Network a wealth of know-how when he picked up the reins of commercial operation in May of 1947. His authority and responsibility embraces a wide area in the Du Mont operation, overseeing all commercial activities of WABD as well as the network itself.

REYNOLD R. KRAFT

Sales manager of NBC's tele department since 1945, he was named to his present post following heavy background as a time salesman for the web. Since he's headed the sales department Kraft has expanded it from a local operation to one of the most effective sales operations in the industry. He's been responsible for obtaining many of NBC's top national video accounts.

ROBERT L. COE

Manager of WPIX, New York Daily News tele station, Coe is one of the nation's top-flight radio and video executives. Joined the St. Louis Post-Dispatch in 1924, became chief engineer of its radio outlet, KSD, in '33. Assisted in preparation and debut of KSD-TV last year, later came to New York to assume his present post.

SAM CUFF

One of the first broadcasters to direct the early destiny of tele in the east, Cuff last year carved another industry milestone -- supervision of the first nation-wide "road show." In cooperation with RCA, Cuff arranged a special tour for the Allied Stores Corporation, exhibited the medium in 22 key cities. Before and during the war general manager of WABD.

KLAUS LANDSBERG

First commercial station on the west coast is headed by a young man whose career in radio and tele occupied most of his adult life. After a varied and active career in Europe, Klaus Landsberg came to the U. S., worked for several top firms, including NBC and Du Mont. In 1941 he was named director of Paramount Pictures' division and has headed KTLA's operation.

www.americanradiohistory.com

HARRY R. LUBCKE

Much of the history of television development on the west coast is a reprint of the career of Harry Lubcke, whose early work in the medium goes back to 1931 when he participated in reception of video images in an airplane. He established W6XAO almost 17 years ago. He's been director of the Don Lee television system ever since, and during the war was cited by the Army and Navy.

JAMES L. CADDIGAN

Manager of program planning for the Du Mont network as well as its key outlet, WABD, Caddigan is currently engaged in building programs, and an adequate staff to handle an increasingly expanded schedule. He is a firm believer in diversified video fare and its important to a well-rounded station operation. Caddigan was a Paramount Pictures executive for 15 years.

J. LEONARD REINSCH

Widely - known in industry circles, more recently as radio adviser to President Truman, Reinsch began his career in Chicago in 1924, served with many top stations. Named managing director of the Cox radio properties in '42, Reinsch supervises activities of three stations, including all television activities which will get under way this year.

GEORGE MOSKOVICS

Commercial manager, CBS television, Moskovics was named to the newly - created post of commercial manager at CBS Television in June of 1945. Since then, the list of sponsors at WCBS-TV has increased to a point where, in 1947, approximately 50 per cent of the programming was commercial. Moskovics, with CBS for 12 years, is a veteran ad sales exec.

JAMES C. HANRAHAN

General manager of WEWS, the Scripps-Howard FM-TV stations in Cleveland. He entered radio in 1932. In 1935 he helped organize Scripps-Howard Radio, Inc. of which he is now a vice-president, two years ago came to Cleveland to set up WEWS. Hanrahan was also instrumental in establishing the Scripps-Howard AM stations in Cincinnati and Knoxville.

HAROLD C. BURKE

One of several top broadcasting execs whose career stems from association with newspaper advertising and editorial work, Burke has been a station man since 1930. He joined WISN, Milwaukee at that time, later became manager of the outlet. He's been in radio on the Coast and joined WBAL, Baltimore in 1938. Burke is now general manager of the station, including tele.

www.americanradiohistory.com

LEONARD HOLE

Associate director, CBS Television, Hole currently supervises network station relations, sales promotion and advertising, plus numerous other important assignments. He made the first official announcement of CBS' web tele plans last November before the Radio Executives Club in New York, described working agreements with stations in Washington and Baltimore.

FRANK M. RUSSELL

Vice prexy of NBC in charge of the network's Washington (D. C.) office, "Scoop" Russell has a long career in radio and newspaper work, helped to establish first radio news service in a government department — the Agriculture section. Importantly concerned with early development of tele in Washington with the network's owned-and-operated station, WNBW.

THEODORE C. STREIBERT

Sound and influential business exec, he's been a strong factor in the growth of WOR and establishment of the Mutual network, is currently president of the N. Y. station which will be on the air with tele this year. Formerly Assistant Dean of the Harvard Business School and a motion picture executive for many years, Streibert joined WOR in '33, became its chief in 1945

IRVING R. ROSENHAUS

Guiding force of WATV, New Jersey's first tele station, Rosenhaus is president and general manager of Bremer Broadcasting Corp., owner-operator of the outlet. Sound and experienced broadcaster, he's managed the firm's AM and FM operations with conspicuous success, was an early enthusiast of video as a major force. Rosenhaus is a firm believer in tele's sales power.

KENNETH H. BERKELEY

Washington (D. C.) industry official, is vice president and general manager of The Evening Star Broadcasting Company, operator of WMAL-TV and WMAL, both ABC network affiliates. Managed WRC-WMAL for 12 years when both were NBC outlets, has headed latter station since '42 when it lined up with the old Blue Network. Berkeley's influence had made itself felt in Capital TV circles.

W. C. SWARTLEY

Management and operation of four mediums of radio in WBZ's imposing new Radio and Television Center in Boston is in the hands of an experienced veteran of Westinghouse broadcasting operation — Bill Swartley. He joined the company's outlet WOW, Fort Wayne, (Ind.) in '38, after an active period in various key posts, two years later assumed his present duties.

www.americanradiohistory.com

EWELL K. JETT

Director of radio and television activities for the Baltimore Sun, which operates WMAR-TV, and an FCC Commissioner from 1944 to 1948, Jett is one of the best-known men in the industry. He was chairman of the FCC after James L. Fly, later was succeeded by Paul A. Porter, was chief engineer for the Commission when he resigned.

DOUGLAS A. DAY

Vice president of Buchanan and Co., and one of the first agency execs to become actively involved with the merchandising of tele to the public as well as the advertiser. Since 1943 he has been concerned with the Allen B. Du Mont account, and to the extent that the latter was among the first to receive advertisers Day is rightfully included among the early-birds of TV.

LEE COOLEY

Lee Cooley, director of television at McCann-Erickson, Inc., joined the agency in November of 1946 after six years at Ruthrauff & Ryan as director of daytime radio and television. Prior to that he was an Assistant Director at Paramount Pictures and also in charge of program production at Don Lee Television in Hollywood. He has been an industry exec since 1930.

RALPH B. AUSTRIAN

One of the top motion picture executives to recognize the early potentialities of television, Austrian was for four years an RKO Pictures official, later became president of its television corporation. Firm believer in the use of films in television programming and advertising, and a sound advertising exec, he's vice president in charge of television for Foote, Cone & Belding (N. Y.).

CHARLES J. DURBAN

Influential and enthusiastic tele executive, Durban is assistant director of advertising for one of the medium's earliest and most active sponsors — U. S. Rubber. Two years ago, when the rubber company began using video, Durban wrote, directed and produced all its programs, later undertook the creation of a staff to handle its ever-widening activity.

RICHARD W. HUBBELL

Television management consultant to several broadcasters, he's been in the business since the mid-thirties when he joined CBS as a producer. He's been production manager at WLW and consultant to the Crosley operations, writer-director, and author of two books on the subject. Moderated two video sessions sponsored by the Radio Executives Club.

www.americanradiohistory.com

WILL BALTIN

Secretary-treasurer of the Television Broadcasters Association, since its inception in 1944, Baltin was first program manager of the Du Mont station WABD from June, 1940 to December, 1944. Among his television "firsts" was the transmission of Missing Persons Bureau photographs and descriptions in cooperation with the N. Y. Police.

WILLIAM E. FORBES

Manager of the tele department of Young & Rubicam, Forbes is one of the young industry's alert and able execs, has been the agency's video topper since 1944. Veteran network and station exec, serving with CBS for several years in New York and Hollywood, and before that general manager of WCCO, Minneapolis, he's had a well-rounded background in all phases of advertising and broadcasting.

KENNETH YOUNG

Agency executive who doubles in brass as director of television and radio activities for Campbell-Ewald in New York. Although associated with the medium only since his return from service, Young's been identified with some of the top shows presented on NBC and Du Mont networks during the past two years. He's supervised U. S. Rubber programs, several special events and sports shows.

HARVEY MARLOWE

One of the most active young men in the industry, Marlowe currently heads up programming activities for WPIX, the Daily News station in New York. A veteran thespian, he was an important factor in the early development of video for ABC. He's expected to help make WPIX a dominant outlet within a short period.

WALTER CRAIG

Experienced advertising and station executive, Benton & Bowles' tele-radio chief has had a wide and varied career, much of it in show business. As vice president of both activities as the agency, Craig supervises video activity of all clients, including time-buying, creation, and production of programs, etc. One time headed own radio producing firm, built shows for several of the nation's top advertisers.

WILLIAM J. MORRIS

Head of the television and motion picture department of BBD&O, Morris is a veteran advertising executive, has worked on several major national accounts during his agency career, including Ford Motor Company's "Parade of Sports" TV schedule. His motion picture background dates back to 1923, since which time he's held key posts.

FUNCTIONS

American Television Society is a non-profit group organized to foster the study, understanding and appreciation of television as a cultural, educational entertainment and advertising medium. It provides its members with an intelligence center and clearing house for information pertaining to television and its development; a forum for the exchange of ideas and discussion of mutual problems relating to or affecting television; a television library; special meetings for the dissemination of television information; the opportunity to view and study television technique.

www.americanradiohistory.com

FILMS IN TELEVISION

By JIM OWENS, *Associate Editor Radio Daily and Television Daily*

A QUESTION, important and compelling as any in the formative stage of television's expansion during this, the third year of its post-war development, is the role films will play as an entertainment device and as a tool of effective selling.

Their place in the over-all structure of the medium was the subject of wide and vigorous discussion in 1947 and one on which segments of the industry were not always in accord. Already widely used as a vehicle of news and entertainment on many of the stations on the air last year, celluloid fare was becoming, at the year-end, a more imposing factor since it represented, in the opinion of several key executives, an appreciable reduction in the cost of reaching the public with a quality video presentation. For the broadcaster, films were an additional if not entirely satisfactory source of program material that offered many of the advantages of live production without the sometimes prohibitive cost; for the advertiser it represented a streamlined method of airing his sales message with economy, together with the invaluable advantage of repetitive consistency.

Films played an ironic role in television in 1947. Because of their physical affinity to the medium, they made up a significant portion of the broadcaster's schedule, in some cases as high as 25 to 30 per cent. Program material on celluloid ranged widely in scope, from travelogues to Hollywood features—reclaimed somewhat reluctantly from the archives—to individually-produced newsreels. The latter was later to become one of the most important phases of tele to be provided by films.

•

While their degree of importance in the programming future of television was a matter of diversified opinion, and usually stemmed from the financial position of the individual user, it was generally agreed during the past 12 months that films would play a role not too dissimilar, in many respects, to the electrical transcription in radio. Live programs and live commercials, while superior in principal because of their spontaneity—the very essence of television—were admittedly costly and perishable after one performance, economically speaking. Filmed-programs or commercials, on the other hand, remained available for limitless use, could quickly amortize the initial investment for the producer.

Although broadcasters depended upon film material to a significant degree, and as such were an important source of revenue to the celluloid industry, exorbitant costs prevented their becoming an even more important segment of programming. Hollywood productions available to tele were conspicuously inferior, of ancient vintage and of questionable entertainment value. As such, broadcasters were loathe to use them with as much regularity as would have been possible if the opposite were true. The film capital's ban on use of their products by video, until they had exhausted other markets, had begun to make itself felt with sharper resentment as the number of stations increased. It was a curious interpretation of the law of supply and demand. Here was a new and vital market ready to absorb the residue of the motion picture industry but denied one of the ingredients with which it could rapidly mature.

•

There were, however, certain obscure signs of relief as the industry approached the new year. The film industry's attitude toward tele, once openly hostile, changed to one of interest, was later to become one of active association. Paramount Pictures, first of the major Hollywood companies to align itself with the new medium, with two stations plus a financial interest in an eastern network, developed a process of filming programs off the air which held promise of major importance to the advertiser as well as the broadcaster. NBC and Jerry Fairbanks Productions, a specialty film outfit, made the first official working agreement between the two industries with a long-term agreement by which the movie company would provide the network's entire celluloid video requirements, including newsreels. The trend was given further impetus when Twentieth Century-Fox Film Corp. became the first film outfit to provide a daily newsreel for television.

These developments came with sudden and agreeable surprise to the video industry, and were looked upon as indications that both industries had approached the point of economic juncture.

Television Awards For 1947

Television Broadcasters Association

AWARDS FOR 1947

To Dr. Frank G. Back, for outstanding technical improvement to television programming for the development of the Zoomar Lens, which makes possible instantaneous following of action by the camera.

To William C. Eddy, director of television station WBKB, Chicago, for outstanding application of a technical improvement to television programming for the application of existing microwave equipment to a relay between South Bend, Ind., and Chicago, thereby bringing to the Chicago television audience the Notre Dame football games.

To Paul M. Hahn, executive vice-president, American Tobacco Company, for contributions to commercial television programming, for the skillful application of commercial technique to television broadcasting.

To Ben R. Donaldson, in charge of passenger car advertising, Ford Motor Company, for contributions to commercial television programming, for the extensive experimentation with and support of commercial television in diverse market areas during the past year.

The Committee also made honorable mention and praise for the work of John H. Platt, vice-president in charge of advertising, Kraft Food Company, for the conception and execution of a series of highly entertaining and commercially successful dramatic telecasts.

American Television Society

AWARDS FOR 1947

To the Electric Association, Chicago (Felix Van Cleef, president) for organizing and co-ordinating a television committee made up of set and transmitter manufacturers, broadcasters, suppliers of power and transmitter facilities, retail distributors, and advertising agencies.

To the dramatists Guild of the Authors eague of America, Victor Wolfson, secretary, for "outstanding contribution to television programming."

To John R. Poppele, president of TBA, and vice-president and chief engineer of WOR, for his efforts in submitting a graduated programming schedule to the FCC which would bring relief to commercial television stations faced with the problem of 28 hours per week minimum operation; encouragement of the nation's television broadcasters to adopt a self-imposed code of ethics to forestall imposed censorship from without; rescinding of a proposed 20 per cent amusement tax on television receivers in public places and the spearheading of a TBA committee in overcoming objections to apartment house television antenna installations.

To George Shupert, eastern representative of Television Productions, Paramount station's KTLA, Los Angeles, and WBKB, Chicago, for his "unselfish efforts" on behalf of the Society.

VIDEO STUMBLING BLOCKS

By RICHARD W. HUBBELL, *of Richard W. Hubbell and Associates*

Hubbell

THERE is a reason why advice to the love-lorn has been standardized in newspaper columns in the form of questions and answers. So universal a subject defies the general and theoretical approach.

Television likewise.

This article is therefore limited to a list of questions and answers. They cover stumbling blocks which we usually encounter in the analysis of many television operations. They are fundamental to any master plan for television.

Question #1—A station owner asks:

Should we swing into television? Can we ride along without it?

Answer: At different times in different markets and under different circumstances there will come a time when radio broadcasting as we know it now will be unprofitable. Survival as a general advertising medium requires a shift to television. Every indication of popular interest shows the mass audience is shifting this way.

Question #2—A general manager asks:

What should we plan to do with our AM and FM operations? Liquidate them over a period of years? If so, what period?

Answer: Plan ahead for AM and FM operation for at least fifteen years. Sound radio should continue to be profitable—but on an entirely different basis from present operations. Sound broadcasting seems headed toward a service operation, a principal feature of which will be the distribution of vital public messages. Sound receivers will eventually develop electronic memory for the retention of these messages, in which a visual record is not necessary. This will entail an entirely different method of organization, entirely different circulation, entirely different techniques of obtaining revenue.

Question #3—An investment syndicate asks:

We have applied for a television construction permit and license. What are our chances of getting it?

Answer: Your Washington lawyer or consulting engineer can advise you—but be sure you can support your claim that you can really operate a television station. Be sure also that your plans are so developed that you can actually produce results after the CP is granted. Make no mistake—many CPs will be lost, because licensees do not act aggressively enough to stand up against fierce competition, whose aim is to secure that coveted franchise for itself.

Question #4—A bank president asks:

Will profits in television approach those of radio? Be less? Or greater?

Answer: The most careful economic analysis we can make indicates profits will be far greater in television than in old-fashioned, "blind" radio. Within ten years the character of stations will have completely changed. The broadcasting industry is moving from simple, uniform broadcasting service to complex, consolidated services which will play an enormous part in the social and economic life of the nation and every community therein. Capital investment will be six to ten times as great; capital turnover somewhat slower; gross income many times larger; ratio of profits to gross income somewhat smaller; actual dollar profits many times as large. We are headed for bigger, more stable, more diversified operation.

As a result of this trend, the capital structure of most broadcasting organizations will change. One feature of this change should logically be broader stock ownership—more shares and more stockholders—per station. This should prove to be one of the major rewards to the television pioneer: the increase in capital value of stock holdings which can be realized through subsequent sale of shares.

Question #5—A regional network executive asks:

How should we finance our investment in television?

Answer: First, re-examine your capital structure. In many cases the issuance of preferred stock provides the best solution. This permits the expansion of the business, providing the larger operating capital now necessary and assuring continued dividend payments out of AM radio profits during the transition period.

Small, and even medium-sized broadcasters who plunge into television with expectancy of paying for equipment and deficit operations out of AM radio profits are in for a rude shock.

www.americanradiohistory.com

WEST COAST TELE PICTURE

By RALPH WILK, *West Coast Representative, Radio Daily*

AT THIS writing, KFI-TV is slated to be the third television station in Southern California and it is expected to start operations in the spring of his year. Its RCA transmitter has been installed atop Mt. Wilson and the equipment for the transmitter building represents a cost of more than $500,000.

NBC expects to have its video station, KNBH, in operation July 1 of this year. Its RCA transmitter will be located on Mt. Wilson and a two-story building has been erected at a cost of $150,000. The Otto K. Olesen building, north of NBC headquarters on Vine Street, Hollywood, will be converted into a studio for the television activities.

NBC's outlay for equipment and buildings will total $1,300,000. Hal Bock is in charge of NBC's Western division video plans.

The Los Angeles Times-Mirror Company, which will operate KTTV, is hopeful of having its station telecasting by the end of 1948. Its RCA transmitter will be installed on its site on Mt. Wilson, while at this writing the site for the studio is yet to be selected.

•

The Times-Mirror will work closely in co-operation with the Pasadena Community Playhouse and a room in the Pasadena building has already been converted into a training studio. A potential staff is expected to be created and some of the Playhouse talent may be used in future programming on KTTV. R. A. Montfort, who was with NBC in the East, heads the Times-Mirror active video plans.

KTLA, which was formerly W6XYZ and which is owned and operated by Television Productions, a subsidiary of Paramount Pictures, has been on the air commercially since Jan. 22, 1947. It is offering 40 to 50 hours of programming weekly, with a little more than 20 hours sponsored.

KTLA has been televising the feature race of each Saturday's program of the 1948 ten-week season at the Santa Anita racetrack. The Union Oil Company has been sponsoring the televising of the event. Klaus Landsberg has been in charge of Television Productions' video operations since their inception.

Construction of three new units on Don Lee's W6XAO transmitter atop Mt. Lee has been completed. Result is a heavy increase in signal strength and it provides sharp reception from Malibu to San Diego and from the Sierra Madre coastal mountain range to Catalina Island.

Harry R. Lubcke, who is still in charge of television for Don Lee, organized the Thomas S. Lee television system in November, 1930. The initial televised image on W6XAO, transmitted through equipment Lubcke built and in many instances invented and manufactured himself, was a short motion picture film, the subject a wagon rolling across western plains.

The first full hour program presented on the station was on Dec. 23, 1931 and the first regular program services was begun March 10, 1933. An important move was the purchase of a Hollywood mountain, right in the heart of the city, and the erection there of the first built-for-television studios in the world.

•

KLAC, Los Angeles, has ordered an RCA transmitter and expects to be operating KLAC-TV late in 1948. Its site for its transmitter building is on Mt. Wilson. KLAC's sister station, KYA, San Francisco, also has permission to telecast, but its video activities will not get underway until KLAC-TV becomes active.

ABC, which operates KECA, Los Angeles, and KGO, San Francisco, is making active video plans and expects to launch television stations in both cities simultaneously by the end of 1948 or early part of 1949.

KECA has a transmitter site on Mt. Wilson, and $1,000,000 has been earmarked for a transmitter, field equipment, studios and offices.

Telecasters estimate that 200,000 receivers will be in use in Southern California by the end of this year, with five spectators for each set. The threat of video to theatre grosses has circuit and independent exhibitors in this area giving serious thought to the blending of television into normal theatre operation.

Exhibitors showed keen interest in the video demonstration of the New Year's Day Pasadena Rose parade and Rose Bowl football game, which grossed an estimated $9,000 at the Shrine auditorium, Los Angeles. The demonstration was arranged by Bert D'Orsay, local custom receiver maker. At this writing, Rodeny Pantages, owner-operator of the Hollywood Pantages, has been experimenting with large screen tele in his theater.

TELEVISION TALK

A MODERN GLOSSARY

(Courtesy Caldwell-Clements, Inc.)

A

AMPLITUDE—The magnitude of any quantity, particularly voltage or current.

AMPLITUDE MODULATION—The periodic variation of the voltage or current amplitude in a circuit in accordance with some signal transmitted. Used for television picture.

ANTENNA—An electrical circuit for radiating or receiving electromagnetic waves (radio).

ASPECT RATIO—The ratio of picture width to picture height. Now 4:3.

AUDIO—(I hear.) A term applied to any part of a radio or electrical system handling frequencies in the audible range.

B

BAND-PASS FILTER—An electric circuit which will transmit frequencies between two limits and reject others outside those limits.

BANDWITH—The arithmetical difference between the maximum and minimum frequencies required to convey the information being transmitted, either visual or aural.

BLACKER-THAN-BLACK—A portion of the television signal devoted to synchronizing. These synchronizing signals are transmitted at a higher power than the blackest part of the picture, so that they will not appear on the screen.

BLANKING—The process of cutting off the cathode ray during the time it is not forming a part of the picture. This occurs when the spot returns from the far right to begin the next line and from the bottom to the top of the picture.

BLOCKING OSCILLATOR—A type of oscillator which generates a saw-tooth shaped signal used for scanning in a cathode ray tube.

BLOOM—The condition of overall bright illumination of the picture tube obscuring any picture detail.

BOOSTER ANODE—A conductive coating placed inside a cathode-ray tube near the screen. Because of a high positive voltage applied, it causes a brighter picture.

BRIGHTNESS CONTROL—A control on the receiver for regulating the overall brightness of the picture.

C

CAMERA TUBE—The electron tube used to translate a scene into electrical impulses.

CARRIER—The term applied to the high frequency radio wave which is modulated by the audio and video signals.

CATHODE—The electrode in a tube from which electrons are obtained, usually by heating or by photoelectric effects.

CATHODE RAY TUBE—An electron tube in which streams of electrons from a cathode are formed into a pencil-like beam and directed by means of electric or magnetic fields over a target, usually a fluorescent screen which glows wherever the beam strikes.

CHARACTERISTIC IMPEDANCE—The input impedance of a transmission line infinitely long or a short line terminated in its characteristic impedance. The impedance is independent of length and depends on size of conductor and spacing.

CLIPPER—A circuit used to separate signals of different amplitudes. In television these circuits are used to separate the synchronizing pulses from the video signal.

COAXIAL CABLE—A particular type of cable capable of passing a wide range of frequencies without the usual prohibitive losses. Such a cable in its simplest form consists of a hollow metallic conductor with a single wire accurately confined along the center of the hollow conductor.

CONTRAST—This refers to the ratio of black to white portions of a picture. Pictures having high contrast have very deep blacks and brilliant whites, while a picture with low contrast has an overall gray appearance.

www.americanradiohistory.com

CONTRAST CONTROL—A control on the receiver which regulates the video signal strength. This has the effect of changing the ratio of the black and white portions of the picture. It corresponds to the volume control in an aural receiver.

CONTROL ROOM—Studio facilities from which television cameras, lighting, shading and mixing is performed.

CYCLE—One complete set of values in any series of phenomena which repeats periodically. In radio this usually refers to one complete range of values for either voltage or current.

D

DAMPING CIRCUITS—These circuits are used to prevent high voltages from being induced in the deflection coils when the current changes suddenly.

DC RESTORER—This circuit regulates the average brightness of the television picture tube to correspond with the average brightness of the scene being transmitted.

DC TRANSMISSION—This term applies to circuits which will pass zero frequency—that is, direct current.

DEFLECTION—The movement of the cathode ray beam by electric or magnetic fields.

DEFLECTION YOKE—The combination of coils uesd to direct the cathode ray up-and-down and right-and-left to form the image.

DELAY SCREEN—A fluorescent screen used in cathode ray tubes, which has the property of phosphorescence. The light intensity of any particular spot dies out gradually after the ray moves to a new position when this material is used.

DIFFERENTIATING CIRCUITS—These circuits respond to the rate of change of a pulse and are used in synchronizing the receiver scanning.

DIODE—A vacuum tube having two elements, one of which emits electrons (the cathode) and the other the anode which attracts electrons. It is used for rectification (detection), that is the conversion of alternating currents into direct currents.

DIPOLE ANTENNA—An antenna consisting of two conductors, usually of equal length extending in the same straight line, with a pair of lead or feeder wires connected at or near the inner ends. For television the physical dimensions are such that self-supporting metal rods or tubes can be used.

DIRECTOR—A section of an antenna used to increase the pick-up from the side on which the director is placed.

DISSECTOR TUBE—The special type of television tube used in the pick-up camera in the Farnsworth system.

DISTORTION—Any change in the original frequency, amplitude or phase of a radio signal.

DIVERGENCE—The spreading of a cathode ray stream due primarily to the mutual repulsion between the electrons that compose it. The function of the focusing arrangement in the tube is to counteract this effect.

DOLLY—The movable stand upon which the television camera is mounted.

DOUBLE SIDE BAND—When a carrier is modulated by a plurality of signal frequencies, two new, distinct bands of frequencies appear, of frequencies higher and lower than the carrier frequency.

E

ELECTRODE—A metallic conductor introduced into a vacuum tube for a specific purpose. It must be electrically connected to the external circuit. In general each electrode is referred to by its specific use, such a cathode, grid, anode, etc.

ELECTROMAGNETIC FOCUSING—A system in which magnetic fields parallel to the motion of the electrons are used to confine them to a narrow beam.

ELECTRON GUN—That part of a cathode ray tube in which the electrons are emitted, formed into a beam and deflected.

ELECTRON LENS—A systematic arrangement of electromagnetic or electrostatic fields, having symmetry about the axis of a cathode ray tube, as to their radial components, established for the purpose of controlling the divergence and convergence of the electron ray.

www.americanradiohistory.com

ELECTRON MULTIPLIER—An evacuated amplified tube in which one or more anodes have photoelectric surfaces which are exceedingly active as to secondary emission. The original electron emission is cascaded by the secondary effects.

ELECTRON TUBE—A device employing a cathode, an anode and possibly additional electrodes for controlling the volume and direction of flow of electrons which constitute electric current.

ELECTROSTATIC FOCUSING—A system in which electric fields are employed to confine the electrons into a thin stream.

EMISSION—The continuous liberation of electrically charged particles, either ions or electrons, into space (usually evacuated) from a surface. The most important case practically is where these particles are negatively charged, i.e., electrons.

EQUALIZING PULSES—These are signals transmitted after each vertical synchronizing pulse to insure correct start of horizontal sweep circuit.

F

FACSIMILE TRANSMISSION—The electrical transmission over wires or radio circuits of printed records and pictures. While this term originally referred to black-and-white line reproductions only, it is now considered to include processes producing halftone and shaded effects as well.

FADE-OUT—A camera technique in which a scene is gradually dimmed from view.

FIDELITY—The faithfulness with which a system reproduces audio or video signals.

FIELD—This term refers to one set of scanning lines making up a part of the final picture. In present standards, pictures are transmitted in two fields of 262½ lines which are interlaced to form 30 complete frames per second.

FLUORESCENT SCREEN—A chemical coating on the inside of a cathode ray tube which emits light at the point where a cathode ray beam strikes.

FLYBACK—In scanning, the spot is moved across the screen at a definite rate in one direction for each scanning line. It is necessary to restore it to the start of the next line in a very short interval of time, say three or four millionths of a second. This return time is termed flyback, and the voltage to accomplish it is called flyback voltage.

FOCUS—In a cathode ray tube this refers to the size of spot of light on the screen. The tube is said to be focused when the spot is smallest. This term also refers to the optical focusing of the camera lenses.

FRAME—One of a series of complete pictures that are succesively viewed so as to simulate moving scenes. In television, thirty are sent each second.

FRAME FREQUENCY—The rate at which frames are sent each second in the various moving picture and television applications.

FRAMING CONTROL—This control on a receiver adjusts the picture repeat rate to that of the transmitter. It is also called the vertical hold control.

FREQUENCY—A term applied to the rate of repetition of voltage or current or other periodic functions.

FREQUENCY MODULATION—A process by which the carrier frequency is modulated in accordance with the information to be transmitted. Used for television sound.

FUNDAMENTAL—The basic frequency of a wave or sound. It is sometimes referred to as the "first" harmonic.

G

GAS-FILLED TRIODE—A type of vacuum tube in which the elements operate in an atmosphere of gas, such as mercury, argon, helium, etc.

GHOST—A secondary picture formed on a television receiver because the signal from the transmitter reaches the antenna by more than one path. Ghosts are often caused by the radio signal being reflected from objects within approximately one mile of the receiver antenna.

H

HALATION—The ring of illumination which surrounds the point at which the electron beam strikes the fluorescent screen.

HALFTONE—A method whereby photographs having various degrees of lights and shadows can be reproduced in ordinary printing, using a system of dots which are substantially undistinguishable to the unaided eye. However, the dots are graded as to size or density so as to produce the highlights and shadows of the pictures.

HARMONICS—In electrical and radio circuits the fundamental current waves are usually accompanied by others whose frequencies are equal to some whole number multiple of that fundamental. These multiples are called harmonics.

www.americanradiohistory.com

HEAVISIDE LAYER—The ionosphere. A region of ionized air some fifty miles above the surface of the earth. Its lower boundary acts as a reflective surface or "mirror" for radio waves. Rapid changes in the height of this lower boundary and its contour causes much of the radio interference and fading.

HETERODYNING—The process of changing frequency by combining the received signals with the output of an oscillator tube in the receiver.

HORIZONTAL CENTERING—The position of the picture with respect to the axis of the cathode ray tube. This is accomplished by a control on the receiver.

HORIZONTAL HOLD CONTROL—A control on the receiver for adjusting the number of lines per second to correspond with that of the transmitter.

I

ICONOSCOPE—A designation used by RCA for a particular type of cathode ray tube developed for the purpose of picking up the scenes to be televised. It is the essential part of a studio camera.

IMAGE DISSECTOR—A television camera tube developed by P. T. Farnsworth in which the photoelectrons are moved past pickup aperture by deflection circuits.

IMPEDANCE—A combination of electrical resistance and reactance, analogous to mechanical friction and inertia.

INTEGRATING CIRCUITS—Circuits used to add up the energy of a number of repeated pulses. These circuits are used in the receiver for synchronization.

INTERFERENCE—Random electrical signals which cause noise in the audio system and disrupt the picture in television. This includes automobile-ignition impulses, some diathermy apparatus, neon signs, FM and short wave stations, etc.

INTERLACING—A system whereby the odd numbered lines and the even numbered lines of a picture are sent as two separate fields and superimposed to create one frame or complete picture.

ION SPOT—A discoloration on the center of the screen of a cathode ray tube caused by heavy negative ions striking it.

K

KERR CELL—A chemical solution which changes its light transmission characteristics when electric fields are applied to the solution. An early form of a television reproducer system no longer used.

KEYSTONE EFFECT—A distorted field or background noticed in some cases with television pictures, where the opposite edges are not parallel.

KINESCOPE—A name applied to the cathode ray tubes used in the television receivers built by RCA.

L

LENS—A radial field (electrostatic or magnetic) applied concentric with a cathode ray to concentrate the diverging electrons into a single slender beam, is called a lens.

LINE—The path covered by the moving electron spot. The intensity of the spot along this path is altered to create that portion of the picture. In present system 525 lines make up the complete picture.

LINEARITY—A term used to refer to the straightness of a characteristic curve, or a portion of that curve, that shows the relation between two quantities or circuit factors. The uniformity of distribution of a regular pattern on a picture tube.

LINE FREQUENCY—The number of lines scanned each second. In any system it is equal to the number of scanning lines per frame, multiplied by the framing frequency.

LINE OF SIGHT—A straight, unobstructed path between two points.

LIVE TALENT—"On-the-spot" televising of events and people in contrast to transmission of film material.

LUMEN—A lumen is a unit of light flux. A foot-candle is equal to the illumination that falls on a screen that is placed one foot away from a standard candlepower. One foot-candle is equal to the lumen per square foot of surface.

M

MEGACYCLE—A total of one million cycles.

MICROPHONE BOOM—The arm which carries the microphone above the area being televised.

www.americanradiohistory.com

MICROWAVE—This term generally refers to radio waves having a wavelength of less than one meter, that is, one having a frequency greater than 300 megacycles.

MODULATION—A process of altering the amplitude, phase or frequency of a radio carrier in accordance with the information to be transmitted.

MODULATION GRID—An electrode interposed between the cathode and focusing electrodes in a cathode ray tube, to control the amount of emission and thereby the brilliance of the spot. This controlling effect is produced by altering the voltage of this grid with respect to the cathode.

MONITORING—The technique of controlling, at the transmitter, the picture shading, and other factors involved in the transmission of both the scene and the accompanying sound.

MONOSCOPE—A television camera tube which contains a simple picture or pattern used for test purposes.

MOSAIC—The screen used in an Iconoscope so called due to its similarity to that form of art wherein a great many bits of colored tile are combined so as to form a picture.

MULTIPATH TRANSMISSION—The condition in which the radio signal from the transmitter travels by more than one route to a receiver antenna usually because of reflections from obstacles. This condition usually results in ghost pictures.

N

NEGATIVE GHOSTS—Ghost pictures in which the black and white areas are opposite to those of the real picture.

NEGATIVE TRANSMISSION—This has to do with the polarity of transmission of a television signal, or the direction of modulation to produce the light and dark parts of the picture. In negative transmission a white area corresponds to a decrease in the carrier amplitude. This is the present U. S. method.

O

ORTHICONOSCOPE—A television camera tube combining some of the features of the image dissector and Iconoscope.

P

PANNING—(From panorama). A camera technique in which a large arc of the scene is shown by swinging the camera around a central point.

PEAKING—A technique of increasing the response of amplifiers at some particular range of frequencies. Also applied to certain sweep voltage wave shape characteristics.

PEDESTAL—A portion of the television video used to blank out the cathode ray beam as it flies back from the right edge of the picture to the left.

PHASE—A term used to designate the time relation between the maximum points of two recurrent electrical quantities such as voltage, current, etc. It is expressed in degrees of a circle, one complete revolution of which represents one cycle of one of the waves.

PHASE SHIFT—Any change in the phase relations of current or voltage.

PHOTOELECTRIC EMISSION—The phenomena of electrons being emitted from certain materials when they are exposed to light.

PHOTOELECTRIC TUBE—A tube in which electrons can flow to a charged anode when light falls on the tube causing emission.

PICTURE ELEMENT—A small section of a given scene as reproduced by the cathode ray spot at any instant.

PICTURE NOISE—Interference signals causing spots of light and other irregular patterns on the received picture.

POLARIZATION—A term usually applied to the position of the transmitting antenna, that is horizontal or vertical. The receiver antenna should correspond in most instances to that of the transmitter. At the present time horizontal polarization is standard.

POSITIVE TRANSMISSION—A television system in which maximum radiated power from the transmitter corresponds to maximum white area in the picture. Not used in this country.

R

RADIO CHANNEL—The "space" in the frequency spectrum allotted to each transmitting station. In present television standards the channel is 6 megacycles.

RASTER—A term applied to the group of lines appearing on the cathode ray tube in the absence of an incoming video signal.

REFLECTOR—A part of an antenna system used to prevent pick-up of signals in one direction and increase it in the opposite direction.

www.americanradiohistory.com

RELAXATION OSCILLATOR—A type of circuit which oscillates periodically. Used to generate scanning voltages.

RETURN TRACE—The lines on the cathode ray screen formed as the cathode ray beam moves back to its starting position. Not visible when a signal received.

S

SAW-TOOTH—A voltage or current whose variation with time follows a saw-tooth outline. This is the basic wage shape used to sweep the spot over the cathode ray tube screen.

SCANNING—The process of forming a picture by a spot of light of changing intensity moving at high speed from left to right and in a sequence of rows or lines from top to bottom.

SCANNING LINE—One line from left to right of a picture being transmitted.

SENSITIVITY—A measure of the ability of a receiver or other device to produce a given output for a given input.

SHADING—The process of correcting the light distribution of the image produced by the television camera. This is a part of the station monitoring job.

SIDE BANDS—The groups of frequencies higher and lower than the carrier which contain the information being transmitted and produced by the process of modulation.

SIGNAL—The electrical impulses which represent the sound or picture elements being transmitted.

SPECTRUM—A band or range of frequencies.

SPOT—The light produced by the slender beam of electrons on the fluorescent screen.

SWEEP—The uniform motion of the electron beam across the face of the cathode ray tube.

SYNCHRONIZATION—The process of keeping the moving beam of electrons at the picture tube in the exact relative position with the scanning process at the transmitter.

T

TELEVISION—Literally, seeing at a distance. A system of transmitting a scene by dividing it, by a scanning process, into a great number of elemental areas and representing each area by an electrical signal. The electrical signals are received and used to control the intensity of a spot of light to correspond to the light and shade of each original picture area as the spot is moved over a screen, in synchronism with the scanning at the transmitter.

TELEVISION CAMERA TUBE—A cathode ray tube used to convert light and shade portions of a scene into electrical signals.

TELEVISION PICTURE TUBE—A cathode ray tube in which a picture being transmitted is recreated by a moving beam of electrons.

TEST PATTERN—A drawing containing a group of lines and circles, etc. transmitted for receiver and transmitter test purposes.

TRAP—A circuit used to reject unwanted signals.

TRIMMER—A device which permits a resonant circuit to be tuned over a limited frequency range.

V

VESTIGIAL SIDE BAND TRANSMISSION—A method of suppressing part of one side band to limit bandwith requirements.

VERTICAL CENTERING—The control which regulates the position of the picture vertically on the screen.

VERTICAL HOLD—A control on the receiver to adjust the field rate of the scanning to that of the transmitter.

VIDEO—(I see.) The portion of the television signal which contains the picture information.

VIEWING MIRROR—A mirror used to reflect the image formed on the picture tube at a convenient viewing angle.

Y

YOKE—A set of coils used around the neck of a cathode ray tube to produce horizontal and vertical deflection of the electron beam.

www.americanradiohistory.com

LOOKING BACK — AND AHEAD

by LEONARD CRAMER, *Executive Vice President, Allen B. DuMont Laboratories*

CRAMER

MANY times an individual, a business organization or an industry welcomes a new year because it represents a clean slate. Resolutions are lofty and the year behind is forgotten. The resolutions of the past year are rarely examined in the light of what was actually accomplished during that year because the accomplishments seldom come up to the resolutions.

Strange as it may seem our youthful television industry dares to look back with a feeling of pride in its accomplishments during 1947.

●

Television began 1947 with a mere 12,000 receivers in the hands of the public. Various estimates were made 12 months ago of the number of receivers which would be manufactured and sold during 1947. Only Du Mont and RCA were actually in production at the beginning of the year but the consensus of opinion indicated approximately 300,000 receivers by the end of 1947. Among others Philco, General Electric, Crossley and Andrea entered the field to add receivers to meet the total estimate and while the production figures picked up by RMA amount to between 175,000 and 200,000 the production of other manufacturers not reporting should swell this total to better than 250,000 for the year. This is an accomplishment to which the industry can point with pride. Manufacturing television receivers in large quantities is a tough trick at best and even tougher without sufficient "know-how" and trained personnel to go around, but we rose to the occasion. This measure of success is indicative of much more than just meeting a forecast. It proves that 1948 can and will be much bigger. The industry has acquired "know-how" and has trained personnel. Its initial success is attracting much attention and as a result new talent and financing.

1948 will see practically every major established radio company and many new and smaller ones in production on television receivers.

Many industry estimates put the goal for 1948 at 750,000 receivers to be installed in American homes and I will go along with this figure. The manufacturing end of television has donned its first long pants and is starting its climb to its rightful position among the great industries of the world.

What about the broadcasting end of television?

At the beginning of 1947 only 9 stations were operating regularly but by the end of this year this total will have reached 18. There is no reason to believe that we cannot double this figure again in 1948. Throughout the industry there is a feeling of optimism. Just under the surface there is a ripple of excitement. Great days lie ahead. For years we have stared at ever increasing budgets with little more than an idea, a hope, a prayer and faith to go on. But that's behind us. We've taken the bumps, or most of them; the road ahead should be smooth and fast.

●

The established television broadcasters have done some heavy pioneering over the years and in 1947 great strides were made in operations and programming. These broadcasters have made it easier and less costly for those about to enter the field. They have established procedures through trial and error, they have trained personnel and they have field tested the equipment and contributed ideas for improvement. Today the prospective broadcaster can buy proved equipment and begin operations on a budget within reason. Never again will the unusual opportunities of 1948 be available to those desiring to enter this promising new business.

Television is the number one candidate for public popularity. We're building an industry that will make a profound impression on the economic and social life of the world. Let's continue to build it on a sound basis.

TELEVISION PROGRAMMING

By LAWRENCE PHILLIPS, *Director Du Mont Television Network*

Phillips

THERE is no longer any question but that television, as it develops, will become the most potent and effective means of mass communications so far devised by man; that it will soon exercise a profound influence upon the lives, habits and welfare of many millions of people.

A review of the variety and scope of television programming already achieved in the two years of operation, since the end of the war, indicates the endless panorama of entertainment, information and education which will in time be made available to more than 80% of the people of the United States—tomorrow's television audience.

•

Drama, music, variety entertainment, movies and hundreds of original productions have formed the nucleus of television broadcasting schedules since the introduction of public service in 1939. Indoor and outdoor events of general public interest: boxing, wrestling, baseball, football, parades, circuses, etc., are already a mainstay in current television programming. The vast reservoirs of information and instruction: travel, art, public forums of debate, round-table discussions; political conventions, etc., are already being scanned by television cameras for the enjoyment and edification of thousands of viewers within the range of existing facilities in almost a dozen major cities in the United States.

To date, television broadcasting has been primarily a local operation. But now the time has come when networks must assume the responsibility of introducing and advancing the new art of sight-sound broadcasting and of making television program service available to independent stations that will be associated with their networks.

For it is only by the establishment of network service as quickly as is practicable, and the resulting distribution of costs, programs and experience over a number of stations—that television programs of network quality can be achieved and supported.

Experimental connections for networking are already available in television—between Boston, New York, Philadelphia, Baltimore, Washington, D. C., and Schenectady in the East, and between Chicago and South Bend in the middle West. These facilities will be expanded southwards to Richmond, Virginia sometime in 1948.

Television stations within range of these facilities are already finding it possible to exchange programs with other stations operating along these existing lines of communication.

•

But what about those television stations that are still within two to five years of network facilities? Stations in the south and middle west, for example. What do they do until the networks reach them?

It is our feeling at Du Mont, that here again the networks must take the responsibility and the initiative. In this connection, we are currently investigating details of a plan to make Du Mont Television Network affiliation—and Du Mont Network Program service available immediately to all stations regardless of their geographical location in the United States or their proximity to existing facilities.

Briefly: our service to these stations will begin with their own construction, if desired. It will include training of station personnel—technical, administrative, production, etc., in the intricacies of television station operation. It will extend to syndicated program service, surveys of local programming possibilities, sales surveys and audience and trade promotion assistance—as much or as little of such aid, assistance and cooperation as may be required to help independent stations get through the initial difficult period of operation with the least possible financial risk.

•

Having no other interests but television, and consequently no AM commitments, the Du Mont Television Network is in a position to offer such network service to any television station operator immediately. And it is our belief that by the end of 1948 we will have convinced enough stations throughout the country of the economic advisability of Du Mont Network affiliation, to have in efficient operating order regional networks along the Atlantic Coast, in the Mid-West and on the West Coast.

FM SHOWING PROGRESS

By IRWIN ROSTEN, *Staff Writer, RADIO DAILY*

Rosten

THURSDAY, January 29, 1948, will go down in the annals of radio history as the turning point in the progress of frequency modulation broadcasting. On that day, in joint statement with the nation's four major networks, James C. Petrillo announced the end of his ban on FM duplication of AM live musical programs. Three days later, for the first time since October, 1945, listeners throughout the country were able to hear their favorite network shows with the higher fidelity that only FM can provide.

The day after the joint AFM-network announcement, Petrillo met with Everett Dillard, president of the Frequency Modulation Association and also of the first major FM web, the Continental Network. When the confab ended, Petrillo announced the removal of his ban on FM stations originating live music; and said that AFM locals may negotiate contracts with FM outlets.

•

This was the news for which FM broadcasters had long been waiting. No longer need they feel like unwanted stepchildren of the radio industry. For those who had patiently attended the FM infant for several years, it meant virtual assurance of their eventual success and hastened the day when red would no longer be the dominant color on their ledgers. For some, this happy switch to black ink will come during this year. For newcomers, for those licensees who had been holding back construction, the advent of music for FM meant that they would now try to get their stations on the air as soon as possible.

The breaking of the music czar's strangle hold on FM broadcasting is expected to provide strong stimulus for the ever-growing FM audience. A record-breaking total of 1,175,104 FM-AM receivers were produced last year, according to the RMA, as compared with only 181,485 in 1946. Early estimates of anticipated 1948 production placed the number of FM sets at least double last year's figure. This, however, was before the lifting of the music bans. The RMA had gone on record as stating "that the day network programs are made available to FM, production of FM sets will be stepped up." Now that that day has arrived, some trade estimates of FM receiver output for 1948 are as high as four or five million.

The achievements scored by FM during 1947 offer added substance to the optimism prevalent in the trade. According to the 13th annual report of the FCC, "FM showed its biggest and most material gain" last year. As this is written, there are 371 FM stations on the air, 312 of which are affiliated with AM outlets. The total number of FM authorizations is more than 965.

Indications are that national advertisers are gradually growing more aware of FM's possibilities. A spot check made by RADIO DAILY in New York revealed that key executives of the three independent FM stations in that city agree that "the worst is over." All three outlets reported increased sales, broader programming and an appreciable jump in listener response. Although they are still operating in the red, hopes are high that they may be able to break even this year.

The FM system, however, will not gain its due prominence solely on its own merits. Although, in the words of former FCC Chairman Charles R. Denny, "FM is the finest aural broadcasting system attainable in the present state of the radio art," it must be promoted, sold, plugged and promoted again to assure universal acceptance in the shortest possible time. The story of FM must be kept before the public eye and ear at all times.

•

A unique plan to increase local FM audiences—and one that may well be followed by many stations—was developed towards the end of last year by a new outlet on Long Island. The station sponsored a contest among local retailers, with free air time awarded dealers selling the most FM receivers or tuners. First prize was 65 quarter-hour periods over 13 weeks, with runner-up receiving 39 quarter-hour shows. The next 15 stores each receive one 15-minute seg a week for 13 weeks, and all other entries get five spots each.

PROGRESS OF EDUCATIONAL FM

By GEORGE JENNINGS, *Director, Radio Council—WBEZ, Chicago Public Schools*

Jennings

DESPITE some difficulties met with during the past year, such as changing of frequency and the lack of suitable radio receivers for classroom use, educational FM broadcasting has taken great strides. The change in frequency seriously affected the operation of station WBEZ in Chicago, for example, since it meant the purchase of new transmitter, new antenna system, new antenna tower and a new site for the location of the transmitter. Cleveland, Ohio's WBOE made the changeover without stopping service and is now broadcasting on both the low and the high FM band. New York City's WNYE did or will close down for the period of change over.

•

Some thirty applications for FM broadcast station license have been granted by the FCC to schools, school systems, teachers colleges, and universities. Among the new stations to get into operation were WDTR, Detroit Public Schools and KUSC, the University of Southern California. The increased interest in FM for schools is evidenced by the increase in attendance at such educational meetings as the School Broadcast Conference, held annually in Chicago; the Institute for Education by Radio, held annually at Ohio State University and the Regional Radio Conference sponsored by the University of Oklahoma.

•

Another outgrowth of the interest in FM is the number of teachers organizations, such as the National Council of Teachers of English and Social Studies, which have included the consideration of the classroom use of radio in their annual progress. That interest is not alone on the part of the teaching staff is evidenced by the inclusion of sessions on radio broadcasting and use in the annual sessions of the American Association of School Administrators. It is the administrator who ultimately controls the school funds for the establishment of stations and studios.

The Association for Education by Radio, and organization of administrators and teachers has held two semi-annual meetings during the year on a national basis and has established local units in Cleveland, Indianapolis, Washington, Detroit, Philadelphia, Chicago, Portland, Klamath Falls (Oregon), Sacramento, and Atlanta.

With the increased local interest in FM broadcasting and the increasing availability of radio receivers suitable for classroom use the growth of FM broadcasting seems assured. A warning must be made, however, concerning the fact that school stations, as with all others, must be programmed. Years ago when schools and universities held all licenses to operate, programming was the greatest difficulty, and many boards of education and trustees of universities were not prepared to finance on adequate program. Consequently, many such AM licenses were returned to the FCC. Educators are stressing, therefore, the *use* of radio and are likewise stressing the programming of stations.

•

The state-wide FM network picture has lagged somewhat, with Wisconsin the only state at the moment which seems to have gone ahead with its plan for a statewide FM network. One station has been placed in operation at Madison and another is under construction at a site near Milwaukee. Despite the well-known advantages of such a state FM network for educational use, legislators are loath to use tax funds for what some of their constituents might think was in competition with other stations.

The ideal situation for FM educational broadcasting remains the large city school system, and some educators are doubtful if the smaller cities can not adequately be supplied with time for educational broadcasts by their own local AM and FM stations.

FAX MAKING PROGRESS

By VAL ADAMS, *Staff Writer, RADIO DAILY*

RADIO gets more versatile every day. But a couple of decades ago a radio set was based on one litte idea—AM broadcasting. Then they began to trick it up. A phonograph was put in. Along came FM. Television rightfully had to get in the act too. Now we're about to get facsimile, a fifth element in our radio sets which spews the printed word and lush layouts all over the living room floor, even while the events are in progress.

The home used to be a place where you slammed the door on the outside world. That era is over. Radio homes of the future will be communication centers in themselves, snowed under by incoming traffic via the eye, ear and printed page from the four corners of the earth. Walter Winchell's going to have to get a word better than "flash" or he'll be out of business.

•

This is an era when veteran newsmen are being tapped on the shoulder by managing editors and informed, "You're the facsimile editor. Get out a facsimile edition." And before those who are tapped can ask just what the heck they're supposed to do, they are informed that the managing editors are merely carrying out orders of the publishers. In other words, a lot of competent newsmen are suddenly getting titles they never even heard of before and they're strictly on their own.

It seems that those connected with the technical development and sale of facsimile facilities have made a successful pitch to broadcasters and publishers. Many of the latter are sold on the idea to the point of having laid their money on the line and some are already showing facsimile in their cities. As to whether or not this new medium has possibilities, there must be some significance in the fact that the New York Times and WQXQ staged the first postwar demonstration in that city early in 1948.

Facsimile newspapers wont be as common as the housing shortage overnight. But the trend of broadcasters and publishers making a decision to "Let's appoint a facsimile editor" is definitely growing. There are many who don't know just where facsimile is headed but they think it important enough to get their finger in the pie just in case.

Stations and newspapers starting facsimile today are not getting in on the ground floor — they're in the basement. You write your own textbook as you go along. Technically, from the standpoint of scanners and recorders, facsimile is ready to go to the pubic. Next step is to work out a technique for making up facsimile newspapers. While some have done a little preliminary work, in general all are completely ignorant on this subject. But it's something that wont be learned or worked out in a laboratory. It must be done by actual operation—making up daily facsimile editions and putting them on the air. It will be learned only by hit and miss.

•

To sell an idea to the public, it normally must be a little different from a previous one, some new advantage must be added. Consequently, facsimile is not likely to sell itself publicly merely on the idea that now you can get your newspaper delivered into the home by radio instead of by boy. New kinds of formats, different from the average newspaper, must be worked out and probably new types of entertainment gimmicks particularly suited to facsimile.

News-wise, facsimile's greatest attraction lies in its possibilities as a picture medium. You can't lightly toss off the thought that with facsimile a housewife can hold a picture in her hand of a big fire with the caption reading, "Firemen are still fighting the blaze." The Miami Herald and WQAM-FM put a wet photo on the air of an attempted suicide, lying crumpled on the payment, while an ambulance rushed the victim to the hospital.

•

If it's competition that makes business, then facsimile is going to be a big one. One of the hottest battles broke out in Philadelphia in 1947 between the Inquirer and the Bulletin and their FM outlets. Several weeks ahead, the Inquirer announced a public facsimile demonstration for early in May but about two days before the date the Bulletin suddenly staged its own. Late in December, the Inquirer started what it called the first daily facsimile newspaper but the Bulletin promptly exclaimed it had been doing it for eight months. It's an argument which might best be left for historians to decide but the real story seems to be that each can claim a first in separate ways. Technicalities, however, were overlooked in the rush for promotion.

The Sun never sets on Presto Recording Equipment!

▶ There is hardly a spot on the globe that isn't within hearing distance of transcriptions recorded and reproduced on Presto equipment and discs. Presto's leadership as manufacturers of fine products for stations and studios is the logical result of dependability, progressive engineering, and world-wide distribution.

▶ The record of Presto firsts in the recording field is long and imposing. Presto creative engineering plus precision manufacture have kept Presto in the forefront for more than a decade. This is evidenced by the high regard in which Presto equipment is held, not only in this country, but everywhere in the world. It all adds up to this supportable statement: Broadcasting stations prefer Presto for performance.

TUBE INDUSTRY OUTLOOK

By C. J. HARRISON, *Sales Mgr., Tube Div., Federal Telephone and Radio Corp.*

GOING to the top of a convenient hill for the long view, the past year's activities in the American vacuum tube industry look pretty good. The picture yields a panorama of new achievement in tube design, the development of new production techniques, and an acceleration in high powered tube sales which refutes completely the contentions of those prophets of gloom and sales recession who held the stage only 12 months ago. The signs are most encouraging.

At the close of hostilities the tube industry, long geared to a war-time production, was not prepared to meet the sudden over-night demand for tubes suitable for FM. There was a grand industrial stampede. Everywhere, manufacturers scampered about to get into quick production with FM tubes. These tubes, of course, are now available, and the market affords FM types which are entirely satisfactory up to 10 KW output, and 50,000 wattage also is being obtained by using small tubes in multiples. However, a great development work got underway during the past year to achieve a suitable FM tube of 50 KW. A great deal has been accomplished in the industry, although no FM tubes of this rating have been announced up to this writing.

●

Here in Federal Telephone and Radio Corporation, manufacturing subsidiary of the International Telephone and Telegraph Corporation, we of the Tube Division are interested primarily in the design and production of the larger types of industrial and power tubes, including FM. Naturally, such specializing or concentration narrows the activity to some six of the larger producers in the industry. Speaking for ourselves, and with particular regard for the field of FM, Federal triodes are actually exceeding their exacting specifications in performance on the job. The tubes have been subjected to rigorous and exhaustive development tests for permanence of characteristics, overload capacity and durability. We are recommending the air-cooled triodes of 3,000 and 10,000 watts per pair at 88 to 108 megacycles. So much for FM.

In AM the biggest news relates to the industry's new triodes for 50 KW transmitters, with the thoriated tungsten filaments, featuring lower filament power, lower hum level and longer service life. Rated conservatively, such tubes have the electrical and structural design to withstand overloads.

In tube manufacture the seemingly smallest details are a big factor in achieving a lasting performance. Most vacuum tubes, designed for a given job, look much alike. Still, there is a difference. It may be a difference of no more than a hundredth of one percent in the purity of certain raw materials used, or the difference of a few thousandths of an inch on the spacing of internal elements. Yet these ordinarily unseen details mean much in terms of tube life and performance, and "Watch the Details" is fast becoming the standard shop slogan of the industry.

●

As an old line tube company, Federal, now in its 39th year, naturally takes a deep interest in new developments in the business, particularly in the direction of the industry's improvement and welfare. Although the idea itself is not precisely new, relatively, it is a new departure in the tube manufacturing business. I am speaking of the merging of many of the objectives of NEMA and the RMA. The two associations have created a round-table known as the Joint Electron Tube Engineering Council which is composed of representative engineers and technicians from the memberships of both organizations. The aim largely is to develop and establish product standards for the vacuum tube industry, and eliminate duplication of effort. To achieve these objectives will greatly benefit both the industry and the tube user. One highly beneficial result has been the data sheet wherein the member manufacturers agree to certain sets of tube specifications and electrical characteristics, guaranteeing the interchangeability of specific tube types irrespective of the manufacturing source, a very definite advantage to the tube user, and enabling the manufacturers to avoid the confusion and chaos of an earlier day.

●

The American tube industry is on the march, continuing its effort to perfect new manufacturing techniques, to make a better product. Broadcast stations are obtaining tubes of longer service life and at much lower costs. The outlook is bright for a big tube sales year ahead.

HOW TO APPLY FOR A FCC LICENSE

Official FCC Procedure for AM, FM and Tele Licenses

ANY qualified citizen, firm or group may apply to the Federal Communications Commission for authority to construct a commercial standard (AM), frequency modulation (FM), or television broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would be in the public interest, convenience and necessity.

The licensing procedure is detailed in Part 1 of the Commission's "Rules Relating to Organization and Practice and Procedure," while station operation is covered by Part 3, "Rules Governing Radio Broadcast Services," and "Standards of Good Engineering Practice."

This statement summarizes the consecutive steps required in applying for authorization to build and operate a commercial broadcast station. The application procedure is substantially the same whether the facility sought is AM, FM, or television broadcast.

Selecting a Frequency

The Communications Act recognizes broadcasting as a competitive industry and invests the Commission with the responsibility of allocating facilities so as to provide a fair, efficient and equitable distribution of radio service.

Standard (AM) broadcast stations operate on "local," "regional," or "clear" channels. Local stations are of 100 to 250 watts power and serve smaller communities; stations of 500 watts to 5 kilowatts cover larger centers of population and surrounding areas; stations of 10 to 50 kilowatt maximum power are for large area coverage, particularly at night.

To determine whether an AM frequency is available for assignment in a particular

(Continued on Next Page)

www.americanradiohistory.com

area, it is necessary for the applicant to have a channel study made by a competent engineer. The Commission's engineering personnel cannot undertake to make such studies for prospective applicants.

An FM applicant must specify a frequency available to the area intended to be served. The Commission has tentatively allocated geographic blocks of frequencies to accommodate 3500 Class A stations (community) and 1500 Class B stations (metropolitan and rural) throughout the United States. Except in the larger cities, the demand for FM stations has not yet exceeded the supply of available frequencies.

Television channels are apportioned for "metropolitan," "community" and "rural" service.

Applying for a Construction Permit

Once a prospective licensee has decided the type of station he wants to apply for, the next step is to make application for a construction permit. This application must be in wriing on a form supplied by the Commission (Form 301, "Application For Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM and Television broadcast). This form requires information about the citizenship and character of the applicant, as well as his financial, technical and other ability to construct and operate a station, plus details about the transmitting apparatus to be used and proposed new service. Triplicate copies are required, one of which must be executed under oath or affirmation.

Application Processing

Applications are, in turn, studied by the Commission's Engineering, Law and Accounting Department which make their respective recommendations to the Commission. The system of processing is so designed that applications are considered by different categories in the order in which received.

If, upon examination of an application, the Commission determines that there are no engineering conflicts and that all other requirements are met, the application is granted and a construction permit is issued.

Conditional grants are made to qualified FM applicants subject to their filing, within 90 days, of engineering details concerning their proposed operation. If these technical requirements are met, a construction permit is issued. FM and television stations are permitted interim operation with less than the prescribed power.

All construction authorizations are subject to approval of the transmitter site and antenna system by the Civil Aeronautics Administration in the interests of safety to air navigation.

Hearings

Where it appears that interference would be caused to another station above the degree prescribed in the Commission's "Standards of Good Engineering Practice," or if other serious questions are involved, a hearing is usually required before a determination can be made. Sometimes, also, a hearing is necessary because two or more applications request the same frequency.

In designating an application for hearing, the Commission gives public notice of the issues raised for the information of the applicant and other parties who may be concerned. Prior to the hearing, requests may be made for enlargement of the issues to amend the application, or to permit other parties to intervene.

Usually the hearing date is not fixed until after the applicant agrees to such a hearing and has filed for his appearance. It may, however, be designed in the original notice. The notice generally allows the applicant a period of 30 days or more in which to prepare. Even after being designated for hearing, an applicant may find it possible to satisfy the issues raised by amending his application, especially if there are engineering considerations.

Hearings are customarily conducted by a Commissioner or an examiner. He has authority to administer oaths, examine witnesses and rule upon the admission of evidence. Individual or partnership applicants may appear in person or by counsel, but corporate applicants must be represented by attorney.

Request for Argument

Within 20 days after the close of the hearing, each party has the privilege of filing proposed findings of fact and conclusions in support of his contentions. After review of evidence and statements, the Commission enters its proposed decision.

In the event he wishes to contest the proposed decision, the applicant and any other interested party then has 20 days to file exceptions and to request oral argument before the Commission. Oral argument is granted on request. After oral argument the Commission may adopt, modify or reverse its proposed findings.

In the event that no exceptions are taken, the Commission issues an order making its proposed findings effective. Within 20 days thereafter, any party involved may file a petition for rehearing. Such a petition may be filed whether or not the decision is based upon a hearing, but the petition does not stay the proceedings unless ordered by the Commission.

Construction Permit

When and if an application meets statutory and other requirements, it is granted and a construction permit is issued. The latter specifies a date for commencement and another for completion of construction. A maximum of 60 days from date of grant is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified he can apply on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction, the permittee can engage in equipment tests.

License

The final step is to apply for the actual license. All applicants for broadcast license are required to fill out Form 302 ("Application for New Broadcast Station License"). Applicants must show compliance with all terms, conditions and obligations set forth in the original application and the construction permit. After applying for a license, the holder of a construction permit can conduct program tests for a period not to exceed 30 days, or any extension thereof. A station license is then issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

Standard broadcast stations are licensed for the statutory limit of three years; FM and television stations for one year. Applications for renewal of license are made on Form 303 ("Application for Renewal of Broadcast Station License").

Forms for Other Purposes

In the event that a construction permit has expired, reinstatement may be sought on Form 321 ("Application for Construction Permit to Replace Expired Permit")

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License").

Should the permittee or the licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License").

RMA COMMITTEES 1947-1948

ADVERTISING COMMITTEE
(Set Division)

Chairman: Stanley M. Manson, Stromberg-Carlson Co.

AMATEUR RADIO COMMITTEE
Chairman: Lloyd A. Hammarlund, Hammarlund Mfg. Co., Inc.

CREDIT COMMITTEE
Chairman: E. G. Carlson, Croname, Inc.
Eastern Vice-Chairman: Wm. W. Paul, Radio Condenser Co.
Western Vice-Chairman: Edw. Wolf, Oak Mfg. Co.

EXCISE TAX COMMITTEE
Chairman: Joseph Gerl, Sonora Radio & Television Corp.

EXPORT COMMITTEE
Chairman: James E. Burke, Stewart-Warner Corp.

FMA-RMA LIAISON COMMITTEE
Chairman: Larry F. Hardy, Philco Corp.

INDUSTRIAL RELATIONS COMMITTEE
Chairman: G. W. Thompson, Noblitt-Sparks Industries, Inc.

INDUSTRY STATISTICS COMMITTEE
Chairman: Frank W. Mansfield, Sylvania Electric Products, Inc.

MEMBERSHIP COMMITTEE
Chairman: Thos. A. White, Jensen Mfg. Co.

NAB-RMA LIAISON COMMITTEE
Chairman: R. C. Cosgrove, Crosley Div., Avco Mfg. Co.

PURCHASE ORDERS COMMITTEE
Chairman: Benjamin Abrams, Emerson Radio & Phonograph Corp.

SCHOOL EQUIPMENT COMMITTEE
Chairman: Lee McCanne, Stromberg-Carlson Co.

Sound Equipment Section
Chairman: H. G. Kobick, Webster Electric Co.

Transmitter Section
Chairman: H. Scott Killgore, Collins Radio Co.

Classroom Receiver Section
Chairman: Sydney Jorin, Pilot Radio Corp.

SERVICE COMMITTEE
Chairman: W. L. Parkinson, General Electric Co.

SURPLUS DISPOSAL COMMITTEE
Chairman: A. F. Gibson, Stromberg-Carlson Co.

TRAFFIC COMMITTEE
Chairman: Richard C. Colton, RCA Victor Div. of RCA.

RMA DIVISION ORGANIZATION

Set Division
Paul V. Galvin, Chairman

THE JANSKY & BAILEY BUILDING

AT 1339 WISCONSIN AVENUE, N. W.
WASHINGTON, D. C.

We extend to our broadcast clients a completely integrated radio consulting service* made possible by the availability of

- The engineering research and apparatus development facilities housed in the building pictured above.
- A fleet of field cars equipped for the accurate measurement of the performance characteristics of AM, FM and Television stations.
- A diversified staff of highly qualified experienced radio engineers.

* Illustrative of the wide range of capabilities of our engineering staff are projects now under way involving the allocation studies, apparatus development and field engineering necessary to the operation of synchronous AM boosters for increasing metropolitan coverage using 1000 megacycle FM link circuits and the interconnection of FM broadcast stations by direct reception for network operation.

Export Mgrs.....Rocke Intern'l Corp.
Service Mgr.....G. W. Vater

BRANCH OFFICES: All key cities.

PRODUCTS: A.C. Across the line starters, A.C. Reduced Voltage starters, A.C. Multispeed starters, A.C. Combination starters, D.C. Across the line starters, D.C. Reduced voltage starters, Push Buttons, Limit Switches, Pressure Switches, Timing Relays, Float Switches, Relays, A.C. and D.C., Zero Speed and Plugging switches, Temperature controls, Solenoids, Compression type rheostats, Special A.C. and D.C. panels, Control centers, Fixed composition resistors, Adjustable composition resistors (volume controls, tone controls, rheostats, etc.).

American Coil & Engineering Co.

1271 North Hermitage Ave., Chicago 22, Ill.
Phone: Humboldt 3803

President .....D. Sackheim
Sales Manager.....P. W. Lawrason
Chief Engineer.....S. M. Brainin
Credit Manager.....Z. L. Ross
Purchasing Agent.....W. J. Slater
New York, N. Y., Export Managers.....L. Minthorne Co.
Works Manager.....A. Wetle

PRODUCTS: Audio and Radio Frequency Coils; Transformers and Chokes—Output and Power; Solenoid Assemblies; Hearing Aid Transformers; Ignition Transformers; Stators; Field Coils; Layer Wound Solenoids; Clock Coils.

American Condenser Co.

4410 No. Ravenswood Ave., Chicago 40, Ill.
Phone: Longbeach 1386

Partner .....L. J. Menschik

www.americanradiohistory.com

Purchasing Agent.....W. Norder
Superintendent .....M. E. Hussey
Sales Manager.....W. J. Johnston
BRANCH OFFICES: All key cities.
PRODUCTS: Condensers.

American Microphone Co.

370 So. Fairoaks Ave., Pasadena 2, Calif.
Phone RYan 1-7444

General Manager.....F. A. Yarbrough
PRODUCTS: Crystal & dynamic microphones, crystal & dynamic phonograph pickups, microphone stands.

American Television & Radio Co.

300 East Fourth St., St. Paul 1, Minn.
Phone: Cedar 3791

Pres. & Sales Mgr.....Albert A. Goffstein
Chief Engineer.....Albert A. Goffstein
Credit Manager.....A. Kuchenbaker
Purchasing Agent.....A. Kuchenbaker
Export Managers.....Lincoln Export Co.
Service Manager.....Aaron Kipp
PRODUCTS: Auto Radio Vibrators, Heavy Duty Inverter Vibrators, DC-AC Inverters, Vibrator Packs, Battery Eliminators, and Rectifier Power Supplies.

American Transformer Co.

178 Emmet St., Newark 5, N. J.
Phone: Bigelow 3-4444

President.....Thomas M. Hunter
Vice-President.....Walter Garlick, Jr.
Mgr., Electronic Sales.....F. K. Hawkinson
Mgr., Electronic Apparatus...John F. Harris
Purchasing Agent.....E. H. Bard
PRODUCTS: Amplifiers, ballast transformers for fluorescent lighting, distribution transformers, electronic components, industrial-dry type-indoor or outdoor use industrial transformers, air cooled industrial phase changers, modulation reactors, modulation transformers, net work transformers, oil or abestol-immersed plate transformers, power transformers, precipitation transformers, radio type "P" precision line, radio silcor line audio components, rectifiers, regulators, test sets, transtats, "W" type transmitter, wave filters, welding and soldering transformers.

Amperex Electronic Corp.

25 Washington St., Brooklyn 1, N. Y.
Phone Main 5-2050

President .....Nicholas Anton
Exec. Vice-Pres.-Sales Manager .....Samuel Norris
PRODUCTS: Electronic tubes for communication, industrial, television, electromedical and special purposes.

Amy, Aceves & King, Inc.

11 West 42nd St., New York 18, N. Y.
Phone LOngacre 5-6622

President .....Ernest V. Amy
V. P.-Treasurer.....Frank King
Secretary.....Julius G. Aceves
Sales Manager.....F. A. Klingenschmitt
PRODUCTS: Antenna Systems, Television and FM Antennas. Electronic Developments.

Andrea Radio Corp.

27-01 Bridge Plaza North, L. I. C. 1, N. Y.
Phone: STillwell 4-5411

President.....F. A. D. Andrea
Chief Engineer.....H. J. Heindel
PRODUCTS: Radio and Television Receivers and Phono. combinations.

Andrew Corporation (Formerly Andrew Co.)

363 East 75th St., Chicago 19, Ill.
Phone: Triangle 4400

Chairman of the Board .....Dr. Victor J. Andrew
President .....A. S. Andrew
Chief Engineer.....C. Russell Cox
Comptroller & Credit Mgr.....W. J. Mather
Purchasing Agent.....W. B. Humphreys
Advertising Manager.....C. Russell Cox
Industrial Relations Mgr.....Dora Smith
Export Manager.....James F. White
PRODUCTS: Coaxial Transmission Lines, Phasing and Tuning Equipment.

Ansley Radio Corp.

41 St. Joes Ave., Trenton 9, N. J.
Phone: 4-1175

President-Chief Engr.....Arthur C. Ansley
Sales Mgr.....J. Cameron Gordon
Credit Mgr.....Anne J. Dawson
Purchasing Agent.....Karl Brunner
PRODUCTS: Radio-phonograph combinations (Ansley Dynaphone), Electronic piano (Ansley Dynatone), Built-in-wall radio (Ansley Paneltone).

The Astatic Corp.

Harbor & Jackson Sts., Conneaut, Ohio
Phone: 12-656

President-Gen. Mgr.....F. H. Woodworth
V.P.-Chief Research Engr..C. M. Chorpening
Treasurer-Asst. Gen. Mgr.....G. B. Fraser
Sales Mgr.—Jobber Div...R. T. Schottenberg
Gen. Sales Mgr.....W. J. Doyle
Chief Engineer.....A. G. Morrell, Jr.
Purchasing Agent.....H. G. Green
Secty.....F. H. Kuhlman
Factory Superintendent.....W. M. Semple
Personal Dirc.....F. H. Kuhlman
BRANCH OFFICES: All key cities.
PRODUCTS: Microphones, phonograph reproducers, replacement reproducer cartridges, microphone stands, recording heads and accessories.

Audak Company, Inc.

500 Fifth Ave., New York 18, N. Y.
Phone LA 4-3723

President .....Maximilian Weil
Vice Pres.....Geo. V. Sullivan
BRANCH OFFICES: All key cities.
PRODUCTS: Cutting Heads, Electronic Acoustic Apparatus.

www.americanradiohistory.com

Audio Devices, Inc.

444 Madison Ave., New York 22, N. Y.
Phone: PLaza 3-0973

President.....Wm. C. Speed
Vice-President-Sec.....Bryce Haynes
Research Engineer.....E. W. Franck

BRANCH OFFICE: Allan H. Bodge, West Coast Mgr., 844 Seward St., Hollywood, Calif.

PRODUCTS: Recording Discs (Audiodiscs), Recording and Playback Points (Audiopoints), Audio Tape.

Automatic Manufacturing Corp.

65 Gouverneur St., Newark, N. J.
Phone: Humboldt 5-2100

President .....Martin H. Benedek
Vice-Pres., Charge of Sales....Bert E. Smith
Chief Engineer.....Joseph R. Mazzola
Comptroller .....M. E. Silver
Plant Mgr.....J. A. Heimbruch

PRODUCTS: Mica trimmer condensers, intermediate frequency transformers, radio frequency coils, R. F. choke coils, adjustable padder condensers, permeability tuners.

John F. Beasley Construction Co.

P. O. Box 1624, Muskogee, Okla.
Phone 4762

President .....John F. Beasley
Secty.-Treas. .....James H. Beasley
Erection Superintendent...Sydney N. Beasley

Union Station Building, Erie, Pa.
Phone: Erie 26-857

President.....F. D. Bliley
V.P. & Sales Manager.....G. E. Wright
V.P. & Chief Engineer.....J. M. Wolfskill
Treas. & Credit Mgr.....D. F. Stout
Purchasing Agent.....S. E. Riley
Industrial Relations Mgr.....R. R. Johnson

PRODUCTS: Quartz Crystals, Crystal Controlled Oscillators and Crystal Ovens.

William Brand & Co.

276 Fourth Ave., New York 10, N. Y.
Phone: ORchard 4-6960

Partners.
William Brand, William Naumburg, Jr.
Sales Manager.....J. R. Garey

BRANCH OFFICE: 325 W. Huron St., Chicago, Ill., Phone, Superior 9-733, Manager, Earl W. Brinson.

PRODUCTS: Insulation, electrical, Tubing, Varnished Cotton, Glass, Tubing, Varnished, Plastic, Extruded Tubing Cambric, Varnished, Mica block, films, splits and splittings, Mica-Plate, segments, Wire, Thermoplastic insulated.

Brooks Electronics, Inc.

34 DeHart Place, Elizabeth 2, N. J.
Phone: Elizabeth 2-7600

President .....Lincoln Walsh
Sales Manager.....J. Ray Edinger
Chief Engineer.....J. Ray Edinger
Credit Manager.....Helen Anthony
Purchasing Agent.....Helen Anthony

PRODUCTS: High Quality Audio Amplifiers.

Browning Laboratories, Inc.

750 Main St., Winchester, Mass.
Phone: 2121

President.....G. H. Browning
V. P.....R. L. Purrington
Chief Engineer.....F. A. Spindell
Prod. Mgr.....S. C. Sullivan
Head Test Tube Dept.....H. L. Smith

SALES REPRESENTATIVES: All key cities.

PRODUCTS: Frequency Meters, Cathode Ray Oscilloscopes, 60-cycle Calibrators, Regulated Power Supplies and Square Wave Generators, Super-high Frequency Signal Generators, Frequency Calibrators, Capacitance Relays, Electronic Capacitance Alarm Systems, FM-AM Tuners, FM Tuners.

The Brush Development Company

3405 Perkins Ave., Cleveland 14, Ohio
Phone: Endicott 3315

General Manager and Chairman of the Board.....W. R. Burwell

www.americanradiohistory.com

President & Chief Engineer...A. L. Williams
General Sales Manager.....Blair Foulds
PRODUCTS: Magnetic Recording, Acoustic Products, Instruments, Crystals.

William W. L. Burnett Radio Lab.

4814 Idaho St., San Diego 4, Calif.
Phone Talbot 4943

Owner-Chief Eng.....William W. L. Burnett
PRODUCTS: Piezo-Electric Crystals, Holders, Constant Temperature Ovens, Frequency Measuring Equipment, Laboratory Equipment, Conducting of Radio Laboratory Measurements, Frequency Monitoring Service, Special Laboratory Testing Equipment, Consulting Radio Engineers.

Chicago Telephone Supply Co.

1142-1232 W. Beardsley Ave., Elkhart, Ind.
Phone: 1205

President.....F. C. Best
Gen. Supt.....B. S. Turner
Sales Manager.....W. A. Nicely
Chief Engineer.....W. H. Budd
PRODUCTS: Volume controls, tone controls, associated switches.

Clarostat Mfg. Co., Inc.

130 Clinton St., Brooklyn, N. Y.
Phone: Main 4-1190

Pres.-General Manager.....Victor Mucher
Sales Mgr. Distributors Div.....Fran Chamberlain
Secretary.....Charles H. Burnell
V.P.-Chief Engineer.....George Mucher
V.P. Chg. Sales.....I. J. Youngblood
PRODUCTS: Fixed and Variable Power Resistors, Power Rheostats, Power Resistor Decade Boxes, Wire Wound Potentiometers. "T" "L" Cism Pads, 25 and 10 Watt Attenuators, Special Resistor Products, and Composition Potentiometers.

Collins Radio Co.

855—35th St., N.E., Cedar Rapids, Iowa
Phone: 3-0281

President.....Arthur A. Collins
Exec. V. P.—New York.....W. J. Barkley
Vice President-Gen. Mgr.....R. S. Gates
Vice-President Chg. Engr. & Mfg.....L. M. Craft

for **FM** COVERAGE and PERFORMANCE

you can't beat Federal's

COMPLETE "ONE-PACKAGE" STATION

A broadcast station that's FM by Federal all the way—from microphone to antenna—offers three outstanding features that assure maximum coverage at minimum operating costs, and maximum performance with minimum maintenance required.

1. FEDERAL'S SQUARE-LOOP ANTENNA!

The coverage of an FM station depends primarily on the effective strength of the outlined signal. And Federal's 4-Element, Square-Loop Antenna gives an effective outlined power more than 3 times the transmitter rating. Actual measurements have repeatedly proved its ability to give outstanding coverage—with its outstanding high power and low-angle lobes.

2. FEDERAL'S HIGH-FIDELITY TRANSMITTER!

All Federal FM transmitters feature the exclusive "Frequencyaire" modulator—the outstanding history and performance Wideband Linear-Frequency Modulator (WLFM)—between signal-to-noise ratio of better than 70 db—less simple all-electronic circuits than standard modulation types—easy to adjust, simple to operate.

3. FEDERAL ENGINEERING ALL THE WAY!

Everywhere, FM by Federal means FM as we have, with all known and previously engineered or work together. Transmitter controls, audio controls, transmission lines, power supplies—everything from microphone to antenna designed and coordinated for maximum over-all performance and economy.

"When choosing your new FM station, remember these and many other advantages. And if you want to get on the air fast, Federal can supply every station requirement on special open line priorities as numerous broadcasters already have. Check below.

With the Federal 3-Element Square-Loop Antenna, serving [illegible], South Carolina, [illegible] WBAC's broadcasting tower, with Federal FM 3-kw transmitter, recently erected [illegible]

Freedom To Listen

"Our American concept of radio is that it is of the people and for the people. The principle of Freedom to Listen should be established for all peoples without restriction or fear. This is as important as Freedom of Speech and Freedom of the Press."

David Sarnoff

President and Chairman of the Board

Radio Corporation of America

Radio City, New York
