SOLD ON SPOT

Grove Laboratories and its agency, Harry B. Cohen Advertising Company, are Sold on Spot as a basic advertising medium.

As the weather turns cold in various sections of the country, Grove Laboratories puts a substantial part of its advertising budget for 4 Way Cold Tablets into Spot Television and Spot Radio.

This use of Spot in seasonal campaigns provides the company with powerful impact and complete flexibility at low cost in selected key

www.americanradiohistory.com

markets, and has helped make 4 Way the largest selling cold tablet in the United States.

Spot can do the same for you on stations represented by NBC Spot Sales in 14 major markets, accounting for 48% of the nation's retail sales.

Foreword

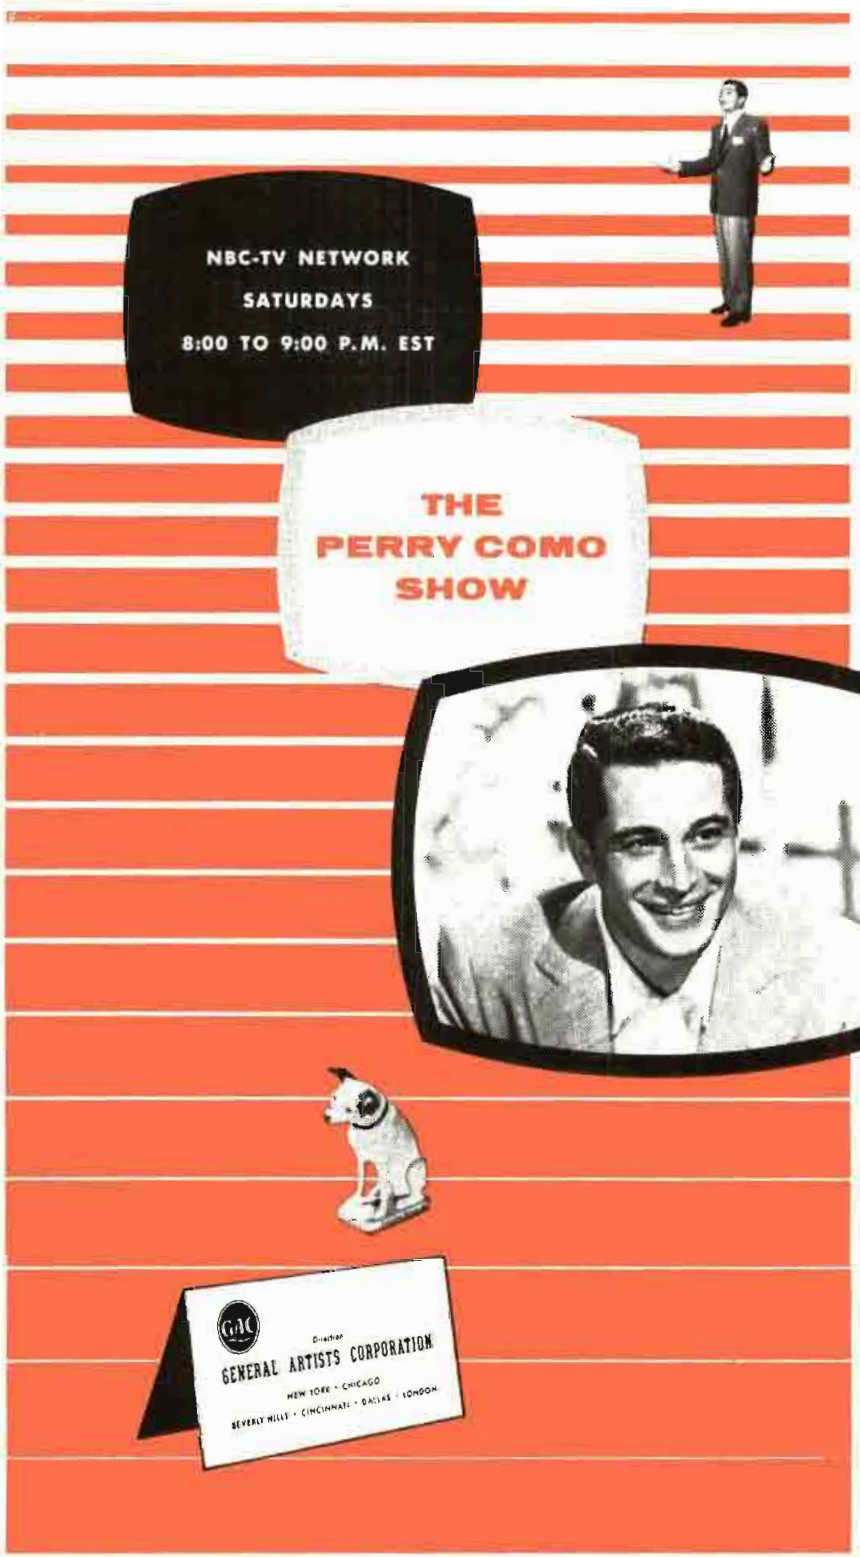

FROM crystal sets to the modern compact transistor receivers, radio has come a long way since the broadcast of Arlington time signals over KDKA more than 30 years ago. The same is true of station expansion, programming, advertising techniques and all that goes to make radio the most widely used medium in the nation today.

IN A measure this is the story of the advances of Radio Annual. Today this comprehensive, fact packed volume, is dramatic documentation of broadcasting's advances. It represents the composite thinking of a lot of experts and the untiring efforts of a specialized editorial staff. Radio's chronological story from its inception is faithfully recorded and the tremendous advances of television fill sections of the Book.

WE RECOMMEND this volume to you for it is your book in every sense of the word. If it were not for the fine cooperation of all segments of the industry this 1956 edition would not have been possible.

JACK ALICOATE
Editor-in-Chief

***The first commercial announcement ever made on television — 2 P.M., July 1, 1941, over WNBT, New York — was also sponsored by Bulova**

This . . . the world's most famous commercial time signal was originated by Bulova 'way back in 1927! As the years went by, it became the announcement most familiar to the radio audience . . . just as today Bulova is seen by more people than any other product on television*. An average of 35,000,000 a night — 7 nights in the week!

As a pioneer user of radio and television spots, Bulova salutes the stations which have served it so well, and wishes them continued prosperity!

1,700 stations from coast to coast receive from United Press an average of more than 50 news programs and news features every day—besides scores of extra shows of seasonal and special topical interest throughout the year. And some 200 kinds of sponsors buy them. The U.P. bureau nearest you is ready to present further information promptly.

PLUS

The Sunday Show

A full hour of features—documentaries, news reviews, striking quotes, human interest and personality stories, comment on business, politics, government, foreign affairs, books, records, stage and screen, farming, fashions, home-making. Interspersed with musical recordings and announcer comment, the material is enough for a program block of at least two hours. All of this in addition to U.P.'s regular Sunday news dispatches.

THE SYMBOL OF . . .

SOUND SERVICE

Audio-Video offers the ultimate in *facilities*, *equipment* and *personnel* to meet all sound reproduction problems.

Five air-conditioned studios have been specifically designed and equipped to meet every possible acoustic and sound engineering problem. These facilities are available at no additional charge.

Audio-Video's staff of highly skilled *producer-engineers* give expert attention to every detail of your recording problem.

The A-V symbol means *fast, dependable service*.

- INSTANTANEOUS & MASTER DISC RECORDING
- EDITING & RE-RECORDING
- MULTIPLE TAPE DUPLICATION
- NATION WIDE AUDIO AIR CHECKS
- DIRECT LINES TO MAJOR NETWORKS
- SPECIAL ARRANGEMENTS FOR REMOTE RECORDING

Radio-Television Industry Scores First Over-Billion Dollar Year

☆ ☆ ☆

Federal Communications Commission financial figures for radio and television revenues in 1954 show broadcasting to be a more than billion dollar industry—42 million more exactly. TV accounted for $593 million in revenues; and radio for 449 million. The year 1954 also was the first year in which TV passed radio in total revenues. More than half of TV's total revenues were attributed to the four TV networks and their sixteen owned and operated stations.

BROADCAST REVENUES, EXPENSES, AND INCOME OF NETWORKS AND STATIONS OF RADIO[1] AND TELEVISION BROADCAST SERVICES
1953-1954

Service	1954	1953 ($ Millions)	Percent Increase or (Decrease) in 1954
		Total Broadcast Revenues	
Radio	$ 449.5	$475.3	(5.4)
Television	593.0	432.7	37.0
Industry Total	$1,042.5	$908.0	14.8
		Total Broadcast Expenses	
Radio	$ 407.7	$420.3	(3.0)
Television	502.7	364.7	37.8
Industry Total	$ 910.4	$785.0	16.0
		Broadcast Income (before Federal Income Tax)	
Radio	$ 41.8	$ 55.0	(24.0)
Television	90.3	68.0	32.8
Industry Total	$ 132.1	$123.0	7.4

[1] Includes AM and FM broadcasting.

Note: 1954 radio data cover the operations of 4 nationwide networks and 3 regional networks, 2,555 AM and AM-FM and 43 independent FM stations. 1953 data are for the same networks and 2,434 AM and AM-FM and 45 independent FM stations. 1954 TV data cover the operations of 4 networks and 410 stations; 1953 data are for the same networks and 334 stations.

NETWORKS
COMPARATIVE DATA FOR AM AND TV OPERATIONS OF NETWORKS INCLUDING OWNED AND OPERATED STATIONS
1953-1954

($ Millions)	1954	1953
	Broadcast Revenues	
AM	$ 84.5	$ 92.6
TV	306.7	231.7
Total	$391.2	$324.3
	Broadcast Expenses	
AM	$ 77.0	$ 83.2
TV	270.2	213.7
Total	$347.2	$296.9
	Broadcast Income (Before Federal Income Tax)	
AM	$ 7.5	$ 9.4

Brightest Radio-TV Business Year In Sight

By
FRANK BURKE
Editor
Radio-Television Daily

WRITING about the radio and television outlook for 1956 is a pleasant assignment for one could wrap it all up with one sentence — **The outlook is terrific.**

Business yard sticks everywhere indicate the prospects of a boon year. These impressive forecasts include radio, television and the many allied fields of the electronic industry who'll figure in the 1956 profit parade.

☆ ☆ ☆

On the radio scene there has been a substantial increase in business on the local level and an upturn in the network radio billings. Stations across the nation have experienced a return to radio by many old advertisers and also some new clients have come into the fold. Most important on the local scene have been the heavy use of time by automobile dealers, retail stores, appliance companies and public utilities. Then too the heavy amount of national spot business has been a factor in the profit parade.

☆ ☆ ☆

The outlook for radio broadcasters this year is as good or even better than it was in 1955. Already signs point to billing increases over a year ago and the summer business prospects were never healthier. Many factors have brought about this healthy business condition: The substantial increase in radio circulation through millions of car radios, portables, and the advent of the revolutionary new transistor receivers. These influences coupled with the intensive selling the Radio Advertising Bureau, Station Reps organization and other agencies have revitalized the medium.

Television as a medium continues to pile up an enviable record of sales and programming advancement. Network business has far exceeded expectations and TV stations on the local level in all the major markets report excellent business and a big year in prospect for 1956. The TV prosperity story is clouded, however, by the plight of UHF station operations in many markets in which VHF stations dominate the scene. These UHF stations, at the moment are hopeful that the Federal Communications Commission will help alleviate their economic distress.

The equipment field with the potentialities of relays, tape recorders, film recorders, other TV innovations also offer boundless opportunities for production and sales expansion this year. Never before has equipment been so important to the trade and indications are that sales this year will transcend any previous records.

☆ ☆ ☆

Under the all-embracing term—equipment—comes such newcomers in the field as closed circuit TV, toll TV systems, and community antenna systems which are making their bid for a share of the equipment dollar. The many specialized manufacturers who contribute to these new developments will add considerable to the gross equipment sales this year.

We could go on and on and cite statistics to emphasize this progress report of the radio and television industry. We are certain, however, that Brig. General David Sarnoff, chairman of the board of RCA, an annual contributor to this edition will document this story better with RCA's record of unprecedented production. Harold E. Fellows, president of NARTB, another distinguished editorial contributor, can also add to this success story as he outlines the growth of the radio and television broadcasting industry.

There are many more who have written of the industry's accomplishments in this volume, moving testimony to the impact of the electronic age. They include James Secrest of the Radio Electronic Television Manufacturers Association, and Oliver Treyz of the Television Advertising Bureau.

☆ ☆ ☆

The simple facts are that anyway you look at it 1956 should be the biggest year in the history of this industry. It holds promise of heavy production of transistor radios; great new lines of popular priced color television sets and revolutionary new radio and TV transmitting equipment which will keep production lines humming throughout the year. Then too we have the promise of unprecedented advertising expenditures this year. These are the signs of prosperity found during this — a Presidential election year.

TELEVISION PRECEDENT SET

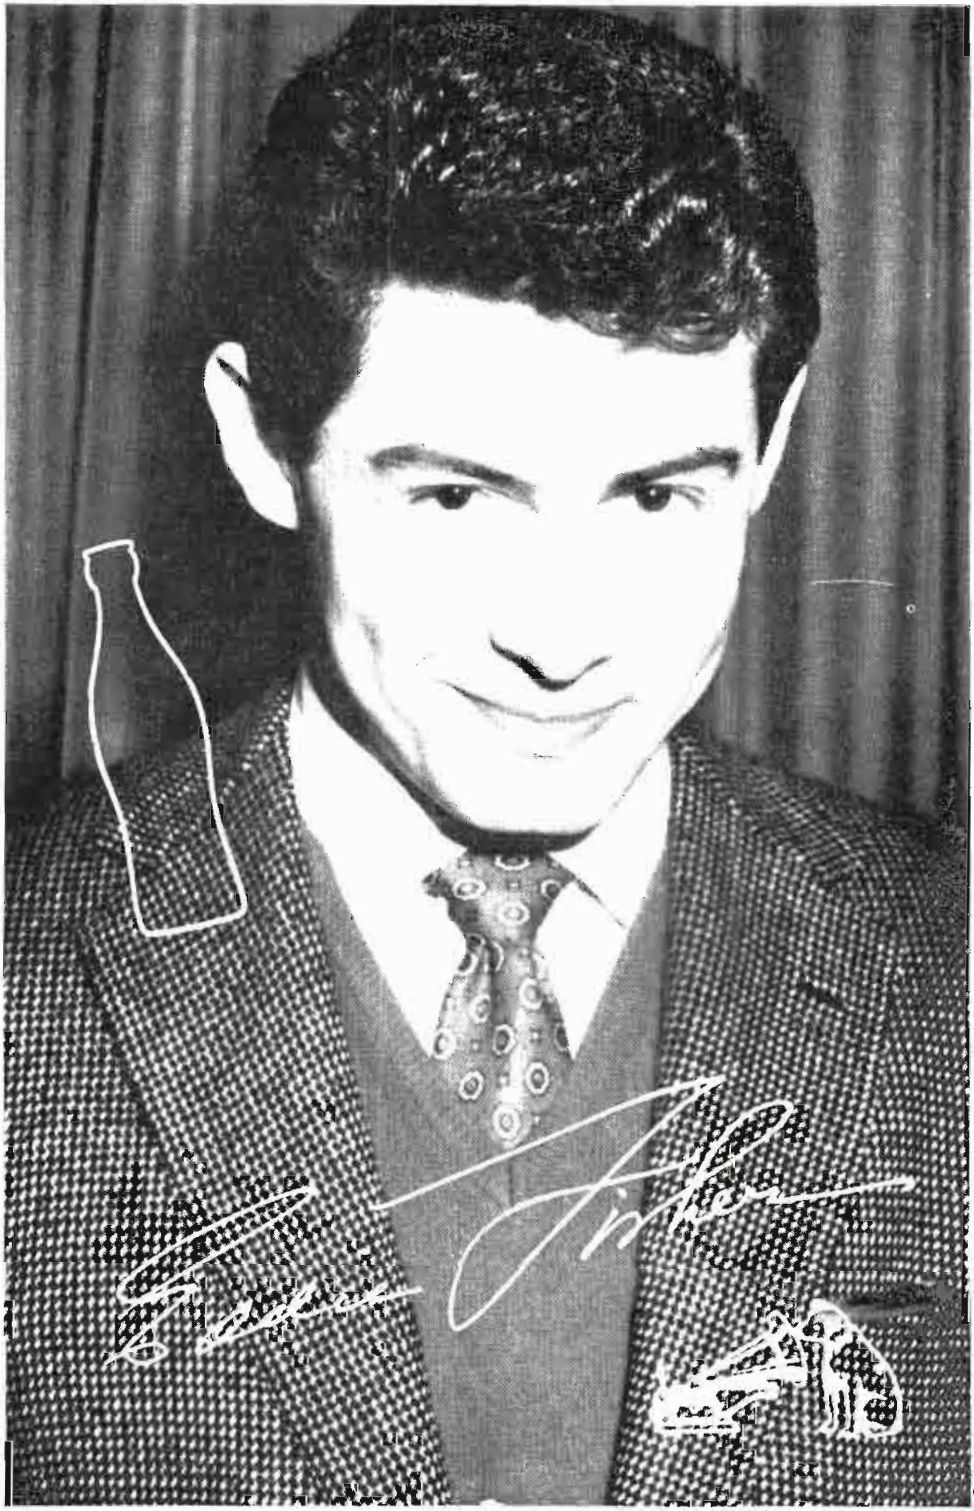

A television and judicial precedent was set in December of last year when District Court Judge D. W. Bartlett permitted the cameras of KWTX-TV to telecast an actual murder trial while in session, with the camera deftly placed in a little-used balcony. (Shown left.)

O'NEIL BUYS RKO

In what is believed to be the largest single financial transaction in the motion picture industry and one of the largest cash transactions in American financial history, Thomas F. O'Neil, president of General Teleradio, is shown presenting a $25 million dollar check to Thomas A. Slack, attorney and representative for Howard Hughes, from whom GT purchased RKO Radio Pictures, Inc.

TV OWNERSHIP REVEALED BY U. S. CENSUS

☆ ☆ ☆

- The first Bureau of the Census survey of TV set ownership since the 1950 census, conducted in June at the expense of the Advertising Research Foundation, revealed that 67% of America's 48,000,000 homes contain TV sets, an increase of 26,000,000 in five years.
- The survey showed that the number of sets increased in proportion to the density of population. Eighty percent of the homes in cities of 1,000,000 or more contained sets, as compared to 55% in cities of less than a million, and 45% in rural areas. Households of five persons contained more sets than smaller homes.
- The Northeast and North Central areas led with 75% ownership, followed by 67% in the West, and a little better than half in the South. Significant details from the survey are shown below.

Table 1.

HOUSEHOLDS WITH TV, U.S., INSIDE AND OUTSIDE STANDARD METROPOLITAN AREAS: JUNE 1955

(% Distribution)

Area	Number of Sets: None	1 or More	2 or More
U. S.	32.8	64.9	2.3
Inside standard metropolitan areas	21.7	74.9	3.4
Outside standard metropolitan areas			
Urban places	44.1	55.1	0.8
Rural territory	54.1	45.3	0.6

Table 2.

HOUSEHOLDS WITH TV SETS BY RESIDENCE AND SIZE OF PLACE, U.S.: JUNE 1955

(% Distribution)

Residence and Size of Place	Number of Sets in Household: None	1 or More
Urban	26.5	73.5
In urbanized areas	21.0	79.0
Areas of 3,000,000 or more	19.5	80.5
Areas of 1,000,000 to 2,999,999	18.0	82.0
Areas of 250,000 to 999,999	21.5	78.5

Total Broadcast Authorizations Pass 6,000

McCONNAUGHEY

FOR FISCAL YEAR ENDED JUNE 30, 1955

HIGHLIGHTING the 21st annual year of the Federal Communications Commission is the realization that for the first time, broadcast authorizations have passed the 6,000 mark. Of these, more than 4,000 were for program outlets and the remainder comprised pickups and other adjuncts. Outstanding also was the fact that of the 582 authorized commercial TV stations, 458 were on the air. This means that over 90 per cent of the people of the country were within service range of at least one television station, and about 75 per cent were served by 2 or more stations.

☆ ☆ ☆

The Commission is taking various steps to assist UHF stations to operate on a comparable basis with VHF stations and to help TV in general. These include authorization of "satellite" stations, low power operation, liberalization of the multiple ownership rules to permit joint operation of seven TV stations by the same interest if at least two of the stations are UHF, and amending its chain broadcasting rules to remove a restraint on station competition for the same TV network programs; also, proposals to authorize UHF "booster" operation to fill holes in service areas, to permit an increase in maximum power of UHF stations from 1 to 5 megawatts, to allow broadcasters to establish their own intercity relay systems, and to require transmitters to be located within 5 miles of the station's "home" city. It is not considering petitions for local deintermixture of UHF and VHF channels pending a general rule-making proceeding to consider possible solutions, on a nationwide basis, to the difficulties now hindering expansion of TV service.

☆ ☆ ☆

Since the lifting of the "freeze" on construction of new television stations on April 11, 1952, the number of TV stations in operation has jumped from 108 to 458. In 1952, 63 markets had 1 or more local stations — in most cases 1; today there are over 4 times as many communities with their own video facilities. Two hundred and fifty-two communities have at least 1 TV outlet, and 100 communities have 2 or more.

The number of TV receivers in use has grown from 20 to 35 million, and it is estimated that the public has already invested over 10 billion dollars in TV receiving equipment, and the annual volume of TV advertising, set sales, servicing and operating combined runs close to four billion dollars a year.

At the year's close there were 582 commercial TV station authorizations, which was 9 more than in 1954. The net gain in operating stations was 46. The number of authorized AM stations continued to increase, showing a net gain of 143 for the year, which brought their number to 2,840. Those on the air totaled 2,732, which was 149 more than the previous year.

☆ ☆ ☆

On June 22, 1955, the Commission amended its chain broadcasting rules to remove a restriction which operated to preclude TV stations from contracting with the networks for particular programs when a station with overlapping coverage in another community had contracted for "first call" on the same network programs. Since, at this stage in TV development, network programming is essential to the profitable operation of most stations, and in many cases, to their very survival, it was desirable to remove this restraint on competition among stations for TV network programming.

☆ ☆ ☆

The Commission had long recommended to Congress that it be given funds to conduct an overall study of the broadcast industry -- including a review of the chain broadcasting rules — to develop factual information necessary to determine the effectiveness of its present rules and the need for any revision. The Independent Offices Appropriation Act, 1956, earmarked $80,000 to be used by the Commission to begin a study of radio and television network broadcasting. In July, 1955, the Commission designated myself and Commissioners Rosel H. Hyde, Robert T. Bartley and John C. Doerfer as a committee to conduct this study.

Broadcast applications totaled nearly 7,700 in fiscal 1955, which was some 300 less than in 1954. Applications for new TV stations decreased from 106 in 1954 to 58 in 1955. Applications for new AM stations increased from 227 to 330, and applications for new FM stations rose from 33 to 37. Of all AM applications, 114 had to be designated for hearing in 1955 as compared with 84 in 1954, while TV applications designated for hearing decreased from 255 to 26.

* McCann-Erickson
** TvB

1955 AUTOMOTIVE ADVERTISING

☆ ☆ ☆

This is an August estimate by BBD & O's Detroit vice president, Robert E. Anderson, on factory-controlled advertising expenditures for new passenger cars in 1955. Because of the terrific spot radio, and TV activities by all automotive manufacturers during November the entire estimate for the year could be projected even further.

Media	Dollar Amount	Percentage
Newspapers	$97,000,000	38.2
Network TV	67,000,000	26.4
Magazines	34,000,000	13.4
Outdoor	17,000,000	6.7
Direct Mail	15,000,000	5.9
Network Radio	8,000,000	3.1
Spot Radio	7,000,000	2.8
Car Cards	3,000,000	1.2
Theaters	2,000,000	0.8
Other	4,000,000	1.6
TOTAL	$254,000,000	

* Spot Television is not included.

Color TV Continues To Gain In Momentum

By
DAVID SARNOFF
Chairman of the Board
Radio Corporation of America

THE year 1955 saw color television get "off the ground" as a new service and become commercially established. The initial steps are behind us. With more and more color TV receivers being installed in homes daily, the entertainment value and other advantages of color pictures become increasingly apparent and are stimulating the desire of more people to acquire color sets. To meet the demand, RCA has introduced a complete line of color receivers, including a table model, consolette and three consoles, each with 250 square inches of viewable picture.

☆ ☆ ☆

Color TV will continue to gain in momentum and influence on the American home and the nation's economy. Color programming is being substantially increased by the National Broadcasting Company and we hope by others in the broadcasting industry. This will accelerate the transition from black-and-white to color.

Television sells through both eye and ear, greatly multiplying sales appeal. While the public is becoming more color conscious, advertisers and merchandisers are also attracted by the power of color which gives added sales impact to all products from automobiles to candy bars.

Color is a powerful sales stimulant. It presents things as they are — reveals distinctive characteristics of everything from packages to fashions and foods, from colorful kitchens to cereals and soaps, all of which are made more attractive when identified by their colors.

☆ ☆ ☆

Today color is quickening the pace of the broadcasting art and industry on all fronts. Its challenge extends in various directions. Scientists seek new inventions because they are well aware that color presents boundless opportunities for development of new ideas and industrial expansion. Showmen are challenged to produce programs of greater beauty and interest. Manufacturers are challenged to "get into color" and develop and design receiving sets at prices which will put color TV in many millions of homes. I firmly believe that the sale of color sets will eventually exceed the sale of black-and-white sets.

The National Broadcasting Company is now entering its thirtieth year and 1955 was the greatest year in its history.

☆ ☆ ☆

Television for the home, however, is but one significant phase of electronics. Industrial uses of TV and electronic controls hold promise of great expansion.

Marked progress is being achieved in RCA's development of an electronic light amplifier; a magnetic tape recorder for television; a high-speed electronic printing process (Electrofax); an electronic air conditioner; and microwave two-way radio communication for virtually all types of mobile vehicles.

Change is a characteristic of electronics as a science and industry; it is synonymous with progress. Electronics is a vast and fertile field for research, discovery, invention and development. The new knowledge acquired through scientific exploration makes it possible to provide the public with improved or new products and services.

Progress is born of change as illustrated by the fact that during 1955, **eighty per cent of RCA's total sales were in products and services which did not exist, or were not commercially developed, only ten years ago.** The majority of these new products and services were created through pioneering efforts that involved substantial expenditures for research, development and engineering.

☆ ☆ ☆

Total sales of products and services by the Radio Corporation of America, in 1955, exceeded one billion dollars. This is a record for the RCA. **It is equivalent to more than four million dollars' business for each working day of the year.** At the beginning of 1920, when RCA commenced its operations, the volume of business was running at the rate of one million dollars a year.

From a million to a billion in thirty-five years is a record that gives all of us in the RCA Family a sense of pride in the past and confidence for the future. RCA is now among the top twenty-five industrial companies in the United States.

Our achievements in electronics, radio and television establish 1955 as our best year on record. I look forward to 1956 as a year of continuing progress.

Radio's Might Is Gradually Reawakening

By
HAROLD E.
FELLOWS

President and Chairman
of the Board
National Association of
Radio and Television
Broadcasters

MOST of the enlightened economists of the nation variously have predicted a continuation of the prosperity which attended 1955. This can only be good news to broadcasters — who, as businessmen, are the legatees of prosperity as well as contributing authors.

I don't suppose that anyone can measure accurately the total contribution of television advertising, for example, to the movement of goods and services during the last few years. Surely it can be assumed, however, that this dramatic medium of demonstration in combination with radio and published media has moved a phenomenal amount of goods from our factories and warehouses to the consuming public.

☆ ☆ ☆

Some within the industry believe that 1956 will be the year in which color television comes into its own, a factor which will influence markedly the distribution of advertising dollars, particularly at the national level.

I look for continued prosperity, too, in radio — the "every-place-all-the-time" medium. Radio's gifted ability to deliver buyers at the lowest cost-per-thousand accounts for the stability it has demonstrated, particularly at the local level. As one looks back over the past five-year period, he senses the evolution through which radio has progressed: the changes in program policies, the proper emphasis on community interest, and the gradual reawakening to the need or aggressive selling and sales promotion.

☆ ☆ ☆

The National Association of Radio and Television Broadcasters has benefited as a result of the increasing stature and effectiveness of both electronic media. The Association has grown, until today, measured in both income and membership, it is larger than ever before in history. The encouraging aspect of this to those of us who devote our full time to Association activities is not alone the revenue increase (which does enable us to do a better job for the members), but rather the evidence of industry solidarity implicit in such continuing growth.

The need for "strength through unity" is so obvious as to hardly require delineation. We need such cooperation and understanding at all levels of broadcast experience, particularly in the fields of legislation, economics, and public relations. The increase in the number of State Associations also has been encouraging to the Board and management of NARTB. The stronger we become at all levels of Association activity, the more efficiently we shall be able to operate. We shall have more freedom to initiate good broadcasting policies, which will enhance the industry's economic security. More important than this, however, is the benefit that accrues to the public through cooperative action. By being together, we have been able to evolve sound programming and advertising standards.

☆ ☆ ☆

In the areas of regulation and legislation, 1956 is going to be a busy year for the NARTB. The management and staff of the Association like to think of their function in these vital fields as that of an organized voice which can bring enlightenment to all branches of the government through speaking with a common purpose. However, it remains true — such is the nature of government — that defense of our rights sometimes must be maintained militantly and without qualification. Here, especially, is where strength through numbers is so important.

The annual NARTB Convention, held in Chicago in April, probably was the biggest yet — for each year recently we have been breaking records in both attendance and size of exhibit. Some broadcasters may not realize the tremendous amounts of money and the exhaustive effort which go into these annual expositions — all of it paid for by our Associate Members. Even now, early in the year, plans have been nearly completed by most of them for the 1956 show . . . and the Convention Committee is well advanced with its planning for the entire meeting.

☆ ☆ ☆

From here, and at this time, 1956 looks good. But such is the growth potential of this dynamic industry that a year from now, no doubt, we shall be expecting 1957 to introduce even brighter horizons.

TV Set, Auto Radio Sales Set Record

By
JAMES D.
SECREST
Executive
Vice President
Radio-Electronics-
Television
Manufacturers
Association

THE radio - television - electronics business boomed in 1955 despite increasing competition, and several production and sales records were established. All indications at the beginning of 1956 were that it would be another highly successful year with the greatest growth expected to occur in color television and industrial electronics.

Television receiver and auto radio sales in 1955 were the highest of any year to date, while color TV set sales, though relatively small, were high enough to encourage the industry to make plans for a more substantial output in 1956.

☆ ☆ ☆

The greatest industry expansion in 1955 was in industrial electronics. The trends toward automation and product diversification among large manufacturers resulted in an intensified interest and numerous investments in electronic facilities. Thus the industry's boundaries were expanded.

Preliminary compilations by the RETMA Statistical Department show that the following records were achieved in 1955:

- About 7,770,000 black and white TV sets were manufactured. This was 400,000 more than were made in 1954 and 300,000 above the previous peak year of 1950.
- Consumers bought close to 7,400,000 black and white television receivers — about 75,000 more than in 1954, the highest previous year. An additional 100,000 were exported.
- Auto radio sales skyrocketed to a new peak of 7,260,000. This was over 3,000,000 more than were sold in 1954 and 2,000,000 above the previous record of 1953.

☆ ☆ ☆

While the output of home radios, including clock and portable sets, did not keep pace with the rise in auto receivers or equal the postwar 1947-48 records, 7,686,000 units were manufactured in 1955 as compared with 6,276,000 in 1954. Retail sales of home sets were approximately 7,000,000. The year also was marked by the entry of a variety of transistor type radios into the consumer market.

With 459 TV stations on the air, there were an estimated 37,100,000 television receivers in use throughout the United States by the end of 1955. An increasing share of new TV set sales were replacements or second sets, and this trend is expected to rise. Industry estimates were that more than 125,000,000 radios were in use with a large percentage of multiple set homes.

☆ ☆ ☆

Total sales of all electronic products in 1955 at the factory level rose to a new peak of about $5.5 billion. This was 10 per cent above the 1954 figure. During 1956 further expansions in industrial, military, and parts replacement sales should bring the industry's total to $5.8 billion or higher.

When radio-TV servicing, broadcasting, and distributor-dealer sales are added to the manufacturers' factory sales, the industry's total volume was about $9.7 billion in 1955. By the end of 1956 this over-all total should reach $10.8 billion on an annual basis.

Deliveries of military electronic equipment and components last year increased by about $100 million over 1954 to reach $2.4 billion. However, the rise in radio-TV and electronic sales for civilian and commercial uses for the first time since the outbreak of the Korean War exceeded military electronic procurement. Many electronic developments moved out of research laboratories into production facilities.

☆ ☆ ☆

The outlook of the radio-TV-electronics industry in 1956 is very promising. Sales of black and white TV sets are expected to exceed 7,000,000. Color receiver sales will depend to a large degree on the quantity and quality of color telecasts and the availability of color TV tubes. However, present indications are that about 250,000 or more color receivers will be manufactured and sold, bringing total TV receiver sales close to the 1955 record with probably a higher dollar value.

Electronics production of non-entertainment equipment will continue to increase in 1956. Military procurement may rise. Commercial and industrial uses of electronic equipment certainly will grow and require greater production. The growing use of transistors and other semiconductor devices will bring about expansion of plant facilities to supply requirements. Further mergers and acquisitions in the electronics industry are likely with increasing competition in the radio-TV field.

View TV 4 Hours And 57 Minutes Each Day

By OLIVER TREYZ

President
Television Bureau
of Advertising, Inc.

THIS marks the second year that TvB has been invited by the editors of Radio-Television Daily to contribute to its Annual.

This also marks the beginning of TvB's second year.

Perhaps some future historian, goggled-eyed at TvB's meteoric rise in the 20th century mid-fifties, may note — while perusing the yellowed pages of Radio-Television Daily Annuals — that TvB arrived on the television advertising scene in 1955.

If this historian goes through the daily issues with a fine tooth comb, he will find a chronicle of TvB's development.

☆ ☆ ☆

We believe annuals serve a useful function . . . the compressing of days and weeks into a yearly review of what's happened, and a look ahead.

In television, to look back is to look down. For the path of television has been constantly up.

The television industry has put TvB in business to help accelerate its rate of climb.

To play our role, we've been constantly at work selling advertisers the productive use of television.

Our initial activities have concentrated on building a focal point or points where television and advertising meet.

☆ ☆ ☆

We've been uncovering basic facts about the relationship between television and specific markets.

For example, early in the year Nielsen supplied TvB with the highly intriguing "Quintile" report. This was the splitting of some 35 million homes into fifths, of 7 million each.

The **average** home, according to Nielsen, views television 4 hours and 57 minutes per day.

But the Nielsen report showed that the lightest viewing 20% watched 1 hour and 22 minutes daily, 6% of the total viewing. The next fifth watches 3 hours and 28 minutes; the third fifth, 4 hours and 44 minutes. Curiously, the 60%, accounting for the relatively lightest viewing homes, represents 39% of the viewing. In delineating these findings to more than 200 advertisers, TvB has unfailingly emphasized that the **lightest** viewers of television, give to it an amount of time which would qualify them as the **heaviest** readers of magazines and newspapers. But the heaviest viewers of television, the 20% that view 6 hours and 11 minutes per day, and the **top** 20% which view 8 hours and 59 minutes per day, proved, in special TvB research, to be the "cream" customers of the American market.

☆ ☆ ☆

The 14 million homes which keep their sets lit up from 6 to 9 hours a day are, basically, the **post-war** families, products of the post-war marriages, the new and larger families whose emergence and growth are putting the real vigor into the fastest expanding, most productive economy in world history.

These are the families with more and hungrier mouths to feed . . . more teeth to brush . . . more hair to shampoo . . . more lunch boxes to fill . . . more bodies to clothe.

And these are the families which have paced the universal, all-embracing national swing to television, the only advertising medium which can distribute not only advertisements but sales calls, the only advertising medium which can supply the friendliness, the warmth and personal persuasiveness of face to face communication. The only medium which can "teleport" a salesman, who can describe, demonstrate and **sell,** in the prospect's **home,** with the force and power of an in-person visit.

☆ ☆ ☆

The cumulative, repetitive documentation of these inherent advantages of television, will represent a good part of TvB's activities in 1956.

If our continuing efforts to forge a mightier link between television and advertising merit reporting, we know they will be chronicled in the 1956 pages of Radio-Television Daily.

The Future of Television Film Programming

By
MARTIN V. ZUZULO
Associate Editor
Radio Annual,
Television Yearbook

THE two great rivers of mass entertainment —Hollywood, and television, are beginning to flow into one gigantic ocean of compatibility and quality for the viewing public. Ironically, the amalgamation does not lessen the one and strengthen the other, but rather like a communion of two great minds, or a blissful marital tie, the relationship has begun to show signs of enhancement for both mediums.

☆ ☆ ☆

Shaking at first from the swift and biting currents of television when it swept onto the scene in 1949, Hollywood, of necessity, was cautious enough only to get its feet wet, and wait patiently for the rampaging economic waters to subside. Deftly moving their costly film vaults high and dry, Hollywood, rivalling a Swiss diplomat's acumen, decided to let the main body of television go by and experiment niggardly instead with some of television's tributaries, until a more realistic and opportune time.

☆ ☆ ☆

From all indications, the year 1955 seemed to be, for Hollywood, that more realistic and opportune time. Huge holes have appeared in the once seemingly invincible dikes that had been built by film people to protect its precious libraries from the onslaught of television. These ripping holes, such as one of filmdom's greatest financial transactions, the RKO-O'Neil 740 film package, and others, were not gorged out by television, but much to the amazement of many, by Hollywood, removing its own thumb from its own film library dike. There's no doubt that this will bring about a flood of entertainment for the public and a flood of income for both mediums.

Hollywood and television are beginning to know and enjoy each other. They know now they can live with one another. There can be a "prosperous co-existence." In 1940, the movie theaters of the land took in $735,000,000; last year the take was $1,275,000,000. In 1945 Hollywood spent $401,577,800 in production; in 1955, the sum was a little more than $240,000,000. Moreover Hollywood is now enjoying a boom inspired by television. With approximately 75% or more of all television fare now being beamed on celluloid, Hollywood technicians and craftsmen seem likely to monopolize this field. And rightly so, for Hollywood long before the roar of television had always been known as the "film capital of the world." The city's technological craftsmen, ideal weather conditions, and bulk of acting talent, had only to swerve toward the television field in order to captivate it.

☆ ☆ ☆

Yet in swerving or re-channeling its own talent and production to meet the surging economical waves of television, Hollywood by its own movement has enhanced itself. It's a truth that movies in the year 1955 have never been better. But it's also a truth that television can take some of the credit. Not for contributing the live teleplay, "Marty," which at this writing could very easily be chosen as the Academy Award winner as the best movie in 1955, or even for another original teleplay "Patterns." But only for the fact that television has presented competition, and in competition only, there is greatness, and quality.

☆ ☆ ☆

In the past year it has become apparent to Hollywood that the command of the mass audience of television is greater than any single night of the largest all-time audience of any single picture. That there is only one thing Americans let consume more of their time than television and that's sleep. That this single medium sold more lipstick on just one-half hour program than a sponsor could make. That these at-one-time ominous charging waters of television will not waste themselves and trickle away into nothing. That this great river of entertainment when joined by Hollywood's great river of entertainment will form one of the greatest moving forces that has ever been known to man.

Radio Will Pave The Trend Of Business

By
DONALD H. McGANNON
President
Westinghouse
Broadcasting Co.

THIS year is going to be another big one for our industry. I look for a 10% increase in sales. Television will move forward. One needs no crystal ball to see that. But the dramatic swing toward good times these days is happening in radio, simply because radio is no longer taking the drubbing it took during those first years of television.

I like the prospects for our industry particularly this year because of radio's prospects. It means that we are at last gaining strength on both fronts - in both television **and** radio.

☆ ☆ ☆

Why am I bullish? After 1955, which was the biggest year in our industry's history, how do I justify such optimism for 1956? Should we be content with a sunny plateau, hoping that the future will be just as rewarding as the immediate past? I think not, for we are wiser than we were a year ago. Therefore, we should be better — and that much more successful.

Take television. Television is no longer "in its infancy," a favorite expression of many industry "observers" not so long ago. Today, television is approaching full growth. Of course, it will continue to grow. But, just as important, television is now beginning to mature. It has reached voting age. It is taking on adult responsibilities.

☆ ☆ ☆

For example, during 1956, I look for exciting television programming on the part of local television stations. We saw this happening in a few areas during the past year. We saw stations in certain communities begin to develop local programs that challenged some of the big network productions.

I predict that television in many cities will be strengthened during 1956 because local programming will become a stronger supplement to the network shows.

Very often, local programmers show themselves as courageous journalists. Their subjects are sometimes controversial, because their objective is to make the communities which they serve better places in which to live. When you point a camera at a community trouble-spot, you tread on dangerous ground. But you also gain audience respect for your effort. This is the kind of programming which will strengthen the industry, by adding strength to the stations which make up the industry.

In radio, we have a chance of a lifetime. Along with it, we have a responsibility of a lifetime.

☆ ☆ ☆

Some broadcasters were willing to let radio die just a few years ago. The industry was the victim of jokes about youngsters finding strange objects in attics, and not knowing what on earth they were. Radios, of course. And we deserved just about every bad joke that was ever written about radio's obsolescence, because we were not really trying in those days. We were willing to recoup our losses with television.

Today, we are beginning to get smart. It is finally dawning on us that radio has a place, too — and a big place. Many radio stations did well last year, for the first time since television came along. Many more will do well in 1956.

It would be unfair for me to imply that everyone in radio showed weakness when television flexed muscles. Not so.

Certain operators knew the score. They proved that radio would always have a place. They did it by making money while most of the industry shed tears at radio's demise.

☆ ☆ ☆

This year, radio gets its big change — its second big chance. It can succeed if it is willing to work; if it is willing to develop new talent — local talent; if it is willing to make itself a community member, and not just an outlet for network shows. I believe that radio must become primarily a local, intimate thing in the future, if it is to succeed.

The major networks, in my opinion, deserve credit for their efforts on radio's behalf during the past year, although I cannot honestly agree with the approach which they have taken, for I believe that the days of big, network radio shows are over, at least for the predictable future. I believe that today's radio audience wants to hear music — good music of all types; it wants frequent news coverage — with a strong play to local goings-on.

Of course, radio's obligation does not stop there. As a public servant, radio must do more. This year, I believe radio will assume a greater responsibility in the areas of education and human understanding, with programs of quality and of intellectual import.

Never Such A Choice Of Programming

By
FREDERIC W. ZIV

Chairman of the Board
Ziv Television Programs

THE booming growth of the syndicated film industry has meant one thing to television: Never have so many different sizes and classes of sponsors had so wide a choice of film programming.

Our client roster shows names like Carter Products, Phillips Petroleum, Emerson Drug, P. J. Ballantine, Ohio Oil and others who are sponsoring first-run half-hour shows on line-ups that approach network coverage. Lists of 20, or 30, or 40 and more markets carrying the same Ziv TV show for the same national spot advertiser are not uncommon.

☆ ☆ ☆

At the same time, our list of over 2,270 Ziv telefilm clients include many local merchants, retailers, auto dealers, bakeries, dairies, banks, breweries, supermarkets and jewelers, whose television campaigns are confined to just one market.

We do not differentiate; no intelligent producer-distributor would. All are important, since they all make up that huge category known as "spot television advertisers." All are seeking the same thing — a top-notch show that will attract a large audience at a reasonable cost-per-1,000 figure to the advertiser's commercials.

☆ ☆ ☆

This places a large responsibility in our hands. With more and more advertisers moving into television, we must create more and more telefilm properties of all types for them to sponsor. In one sense, it is a fascinating challenge to our creative ingenuity. In another, it is like having a tiger by tail — while you are reaching out to grab another.

Television filming is getting more expensive all the time. Star talent commands big budgets. The materials of production cost more. Labor costs more. Everything costs more.

We feel we owe it to our advertisers to continue to produce those syndicated shows which have proved themselves over several seasons for Ziv advertisers, and not to turn out a series of "one-season wonders," with no continuing production. This enables our clients to concentrate on getting the finest time availabilities and in preparing the most effective commercials. They can relax (or come as close to relaxing as you can in the fast-paced business of television!), knowing that if a show is in demand, we have the financial stability, the studios, and the manpower to continue to produce the series.

Take the case of Interstate Bakeries, for instance. Interstate has built a major advertising campaign around our "Cisco Kid" for more than five seasons, starting with a modest list of a dozen or so markets and building the list steadily until it stands at more than 60 cities.

☆ ☆ ☆

This growth has been possible primarily because we have delivered to Interstate, and other "Cisco" sponsors, a fresh cycle of telefilms each season since 1950. I might add that time clearances for Interstate, and other year-in, year-out Ziv advertisers, have steadily improved over the years. Time buyers are free to scout for the choicest availabilities, knowing the program will continue to be supplied to the advertiser.

One of our largest clients, for example, who has been with us for several seasons, now has 92% of his Ziv-produced programs aired in choice evening time slots on leading stations between the hours of 7:00 p.m. and 11:00 p.m., with more than half of them falling into the peak hours of television viewing!

☆ ☆ ☆

We believe we owe other things to our clients as well. For example, we will spend a large portion of our 1956 promotion budget, currently set at $800,000, in promotion campaigns and publicity designed to increase the audience for Ziv shows now on the air.

We furnish promotion-publicity kits to be used by our advertisers in everything from tune-in ads and local publicity to store displays and merchandising campaigns. We also furnish complete plans for a program designed to boost employee recognition of client advertising, since genuine enthusiasm for a television program has to start within a client's own employee family. In addition, we create and merchandise various public service drives, television contests and other promotions in connection with Ziv Television Programs productions.

Finally, we are working ahead of most people in providing a long-range program of color filming at our Hollywood studios. Last year, we shot more than 3,000,000 feet of telefilm footage there — and over 70% was on color film.

Looking Into Syndicated Television

By
WYNN NATHAN
Vice President
in Charge of Sales,
MCA

IN THE aura of claims from other sources that the syndicated television show business is slipping, I think it is good for us to look back on the past twelve months and see if these claims have any foundation.

Of course, I am most familiar with the exceptional progress of MCA-TV Ltd., Film Syndication Division, during 1955, but I am sure that most of the larger distributors have experienced the same trends that we have.

☆ ☆ ☆

During 1955, our company added six new series to the 26 properties we already distributed. These additions included 123 Gene Autry and Roy Rogers Western films, never before seen on television; 39 of the new "Doctor Hudson's Secret Journal" program, adapted from the famous Lloyd C. Douglas novel; 104 "The Adventures of Kit Carson," which were sponsored on the network for four years by the Coca Cola Bottling Company and first run in over 200 markets; 39 "Headline" shows, starring Mark Stevens, which played on the network as "Big Town" and 76 of the very successful network series, "The Ray Milland Show."

With these additions, the list of stars appearing **regularly** in syndicated MCA-TV programs has greatly increased. The talent role now reads like a "who's who" in show business, including Gene Autry, Ralph Bellamy, Charles Bickford, Rod Cameron, Preston Foster, Alan Hale, Jr., Paul Hartman, Louis Hayward, John Howard, Guy Lombardo, Thomas Mitchell, Ray Milland, Roy Rogers, Mark Stevens and Bill Williams.

☆ ☆ ☆

Sales wise, 1955 was the biggest year ever experienced by our company. To name a few of the success stories that were to be found in the past twelve months, we sold "Soldiers of Fortune" to the 7-Up Bottling Company for 150 cities; 26 more shows were added to "Waterfront" making a total of 78, and they were placed in over 200 cities. "Doctor Hudson's Secret Journal," in its first six months on the market, was bought in more than 140 cities; sales of the Roy Rogers and Gene Autry Western films passed the three million dollar sales mark in less than 2 months; and so on down the line. Each and every show we handle did well in 1955, and the sales were getting stronger as the year drew to a close.

Rating wise, syndicated teleshows proved time and time again that they can compete favorably with **any** locally produced or network show. Such ratings as: 40.9, Videodex, Pittsburgh for "Guy Lombardo"; 39.0, Pulse, New Orleans for "City Detective"; 44.2, ARB, Norfolk for "Pride of the Family"; 45.8, Pulse, New Orleans for "Famous Playhouse"; 37.6, Videodex, Grand Rapids for "Man Behind The Badge"; 40.5, Pulse, Charlotte for "Waterfront"; 34.4, ARB, Pittsburgh for "Doctor Hudson's Secret Journal" and 40.1, Videodex, Toledo for the "Ray Milland Show" substantiate this claim.

☆ ☆ ☆

Also during 1955, Revue Productions added 78 more anthology films to their large catalog of half hour dramas. With this added product, any station in the country can bolster its line-up of programs to meet the most rigid demands.

1955 was also a year for expansion in our company itself. New officers were opened in Tampa, Fla. and Indianapolis, Ind., and two new regional offices were opened, Dallas and Cleveland, and were staffed by one of our V.P.'s. A publicity department was added in New York and California better to service our clients with after-sales promotion. The prospect of enlarging our foreign markets was examined, and an International Sales Manager named. Plans were formulated for more complete representation in Mexico City, Rome, and the Orient. With well staffed offices already established in Canada, England and France, MCA-TV will continue to be able to give complete coverage to the entire world.

☆ ☆ ☆

Other advancements of our sales plans, executive responsibilities, after-sales services, merchandising division, and all phases of our operation, were many and varied. To name them all would take much more space than I have been alloted or you would care to read. However, I think it is sufficient just to say that 1955 was very good to us, and 1956 looks even better. I don't think syndicated television is slipping one iota; in fact it is stronger now than it has ever been, and it is our hope that our 70 salesmen and 30 offices at MCA-TV have had a part in bringing about this situation. We promise you we will do everything in our power to continue this advancement in the coming year.

Canadian Auto Set Sales Up 75%

By
J. M. DAVIDSON
Past President,
C.A.R.T.B.

THE past year has been one of intense activity in the sale of new broadcast receivers with reported Canadian sales around the one million mark. This was divided almost equally between radio and TV receivers. The increased sale of television receivers was anticipated as new stations came on the air. But few broadcasters or set manufacturers expected such a dramatic increase in sales of radio receivers, especially portables and automobile sets. Sales of radio receivers showed an increase of some 20% over the preceding year. But the purchase of portables and car sets went up an amazing 75%.

☆ ☆ ☆

The broadcasting industry is confidently looking forward to 1956 being much the largest volume year in Canadian history. Accurate figures are difficult to obtain but the 20% increase in radio revenues last year is expected to continue, and television revenues are increasing at the rate of about 50% each year. Available information would indicate that gross revenue for the broadcasting industry in Canada would reach some $45 million this year.

☆ ☆ ☆

The Canadian Association of Radio & Television Broadcasters shares the industry's expansion with a membership at the beginning of 1956 of 136 radio and 25 television members. The appointment of a Royal Commission to view the broadcasting industry assures a busy year for C.A.R.T.B. The Illsley Commission on Copyright may produce its report this year. As in 1955 there may be appearances before various commissions and boards.

One certain activity this year will be the Association's continued emphasis on providing member stations with information on new program techniques. Few Canadian homes lack radio receivers in kitchens, bedrooms and playrooms. There has been a vast increase in the number of portables and automobile sets. These new radio listeners are welcoming the interesting new programs provided by Canadian stations. The fixed national formula is giving way to the popularity of specially produced programs featuring local talent, local personalities and subjects of special community interest.

☆ ☆ ☆

The Broadcast Advertising Bureau established towards the end of last year by C.A.R.T.B. has a carefully planned program for 1956. The Radio broadcasting division of the Bureau will continue its presentations to Advertisers and planning boards of Advertising Agencies. The television sales story was dramatically told to some 500 executives in a special TV seminar held in Toronto in January. This was arranged by the Television Representatives Association in conjunction with C.A.R.T.B.

☆ ☆ ☆

Community television stations are serving most areas of Canada excepting the six largest cities which in 1956 are still served only by the government owned CBC. The 25 TV members of C.A.R.T.B. are rapidly expanding their operations, the number of homes served and providing an opportunity for local talent to participate in this expansion.

The broadcasting industry will continue in 1956 to improve and expand its services to the 6 million radio and 2 million television receivers tuned to Canadian stations.

5¼ Million Rural Homes Own TV Sets

By
JOHN McDONALD
President, National Association of Television & Radio Farm Directors

THE history of farm broadcasting is as old as radio itself. KDKA, Pittsburgh, the first station to go on the air in 1922, employed Frank Mullen as a part-time farm broadcaster. Mullen later became Executive Vice-President of the National Broadcasting Company. Over the next twenty years the growth of farm broadcasting was slow. On May 5 of 1944, some thirty-five radio Farm Service Directors and other persons interested in agricultural broadcasting met in Columbus, Ohio, and formed the National Association of Radio Farm Directors. It was the opinion of that thirty-five then and of the more than 400 members today that scattered listeners on farms and in small rural towns deserve better and more specialized services than the average city listener. The main objectives of the organization have always been to effect programming of farm broadcasts with the emphasis on service. Realizing that farm people depend on radio for essential business information, weather and market reports, the Federal Communications Commission Hearings in 1946 accented the importance of farm service through radio. Since that time both the organization and the services have grown. Accepting the new media of television as an opportunity for more service, the organization became the National Association of Television and Radio Farm Directors both in name and fact in 1953.

☆ ☆ ☆

We feel that the Association, under the able leadership of Frank Atwood, WTIC, Hartford, Connecticut, had its best year in 1955. It now has an active voting membership of more than 400 and an associate membership of more than 200. These associate members represent station management, station sales, agencies, representatives, clients and other friends of the Association and of farm people — the folks we talk to daily.

☆ ☆ ☆

The radio and television industry has become aware of the farm service type program gaining and holding audiences. This was evidenced by the invitation of eight Farm Directors to speak at regional meetings of the National Association of Radio and Television Broadcasters in 1955. This was our first attempt to present farm radio to management on a national scale. Judging from the comments, letters, and number of inquiries received, NATRFD gained a lot of prestige. Harold Fellows, President of NARTB, said, "I definitely think getting eight of your men into the field to talk to management at the regional meetings was most constructive and more than justified our thinking as to what it would accomplish."

☆ ☆ ☆

NATRFD was glad to tell management that we are a professional group and intend to remain as such. With few exceptions, RFDs are men who have farm backgrounds, agricultural college degrees, and prior to their radio work had jobs as Extension Agents, Vocational Agriculture Teachers or some other related work which kept them close to agriculture and farm people. A lot of effort was put into professional improvement during the year. We cooperated with the National Project in Agricultural Communications in holding a TV Workshop in Columbia, Missouri, and also held a meeting with NPAC on market reporting in Kansas City. We have had representation at practically every meeting throughout the nation that had as its purpose the betterment of farm news reporting or farm life itself.

☆ ☆ ☆

In speaking to our group last June on the lawn of the White House, President Eisenhower said, "The farmer is not just a farmer. He is a citizen of the United States, first and always. And so I think that if we're truly going to interpret the farm problem and farm programs to the farmer, we have got to raise our sights a long ways and interpret . . . and I am told by the Secretary of Agriculture that this group has done a yeoman's job in this regard. For it I hope you will accept my thanks, my gratitude, and more than that my utter conviction that you're doing a truly great service to farmers and to the United States of America."

The last farm census showed that there are 17 million rural homes with radio sets (more than 99%) and more than 5 and one quarter million rural homes with television sets.

Newly elected officers for this year, other than myself are: Jack Timmons, Vice-President, KWKH, Shreveport, Louisiana; Dix Harper, Secretary-Treasurer, WLS, Chicago; Herb Plambeck, Historian, WHO, Des Moines, Iowa and Wes Seyler, Editor of "Chats", WIBW, Topeka, Kansas.

Resurgence of Radio In Latin America

By
A. M. MARTÍNEZ
Exec. Vice-President, Caribbean Networks, Inc.
Treas., International Advertising Association, Inc.

AS we begin 1956 and we look at the past twelve months, two important factors seem to stand out in Latin America. The first is the rapid rate of growth of commercial television in such markets as Brazil, Cuba, El Salvador, Guatemala, Mexico, Puerto Rico and Venezuela. It is not so much the number of additional stations, which were very few, but mainly the improvements made to the existing ones, both in programming and equipment, in service to the sponsors and longer hours of operation for the viewers, and, of course, the rapidity with which these factors are creating new TV homes by the tens of thousands. Yet, one must realize sets are imported and their retail prices are loaded with such necessary expenses as transportation, marine insurance and high import duties, therefore, a great deal more expensive than at home. However, Puerto Rico and Cuba, for example, each bought more TV sets than twenty U.S. states during 1955.

☆ ☆ ☆

The second factor is the effect television competition has had on radio broadcasters. Radio found out, sooner than its counterpart in the United States, that it would have to be on its toes not only to keep and increase its audience but also to keep and increase its revenue instead of remaining stationary or decline. Hence, painstaking plans were made and put in operation by the most important and progressive radio broadcasters during last year to improve the programming with new ideas, acquire better and more up to date equipment and put its own house in order.

☆ ☆ ☆

So far these two factors have brought important economic results to the radio and television industry in Latin America. In addition, advertising budgets were increased to cover both radio and television with the natural chain reaction of increased sales of goods and services for the advertisers.

In general, the outlook for 1956 is good, perhaps even better than it has been for a long time. Here is additional background. It is a well known fact that most Latin American cities have far too many radio stations. Now, in this movement of radio stations to keep and increase revenue and audience, many of the smaller operations, poorly managed and badly equipped cannot stand the pressure. Some already have suspended broadcasting and others soon will be off the air. This is a hard blow but under increased competition, how can a city of the size of San Francisco, as a comparative example, but without its trading area, support thirty-four radio and 5 television stations! It stands to reason some stations must fall by the wayside as there is no other way to stop them, because now it is too late to invest additional capital.

☆ ☆ ☆

The management of the radio and television stations represented by Caribbean Networks has had the foresight to look at the future and act by installing better antennas, more powerful radio and TV transmitters, rebuild studios, form radio networks with powerful FM links and television networks with their own microwave relay units, operate longer hours with better programs, etc. One network will transmit 400 sport events by remote control, another network will broadcast over 35 "Soap Operas" daily and still another station will transmit "live," direct from a baseball park, two games a week plus the entire schedule of the top teams of the winter league: I am sure many of you have heard how CMQ broadcast "live" the world series on radio and television with an airplane acting as a "link" and how it fed NBC "live" portions for "WIDE, WIDE WORLD." These are but a few of the many accomplishments necessary to keep pace with competition and progress.

☆ ☆ ☆

1956 will see a richer and more abundant year for advertisers, advertising agencies, radio and television stations in the international field.

Analysis Compulsory For Newscasters

By
JOHN MacVANE

President
Association of Radio
News Analysts

THE Association of Radio News Analysts this year has begun an inquiry into the charge by radio-television critics that the American public is being lulled into a "deceptive sense of security through the failure of television to present news analysis on a regular frequent basis."

In an article last November, Jack Gould, columnist of the New York Times, asserted that the public has suffered from a "coast to coast vacuum in the realm of mature analysis of the contemporary scene." Gould charged that Television, fearful of controversy, has calculatedly avoided the type of program which would require the set owner to think the most and has provided instead a "protective cloak of continuous escapist entertainment," isolating viewers from "adequate awareness of the realities of day to day life." He maintained the public needs news analysts as "watchdogs" to remind listeners and viewers that the world never stands still and to stimulate them to independent thought.

☆ ☆ ☆

I have noted Mr. Gould's article because he outlined what other respected critics in the field, notably John Crosby of the New York Herald Tribune, have been saying recently. Many have been emphasizing that as of today Television prefers the "videogenic announcer" who can read a news bulletin — to the men who, themselves, have something to say. I think most professionals in our field would agree that the public is being deprived even of the right to disagree with comment on TV, comment which may be sharp, or controversial, but which is thought provoking. Alas! Not much thought is provoked by the bland baby-gruel of newsreel news now fed the public.

☆ ☆ ☆

One of ARNA's major purpose, from its founding fifteen years ago, has been the protecting of "the best interests of the public and the industry," as well as maintaining the "independence and prestige of the profession" and "improving the standards of analytical broadcasting."

ARNA has fought successfully to protect the reputations of its own members as experienced reliable commentators. ARNA did not and does not consider that the public interest would be served by commentators, whose opinion and advice on the state of the world reached so many of their fellow-countrymen, voicing commercials. ARNA fought this battle in the public interest and won it. The stand is now accepted by the networks, although, at a recent private meeting with network officials, it is noted that sponsors still would like to have commentators put their prestige into commercials for the sponsors' products. (One result of this has been that sponsors have applied on occasion the all-inclusive term "commentator" to their newscasters who are naturally not averse to reading a minute of news about the Middle East crisis, followed by a minute of advice to smoke El Ropo cigarettes.) I mention this because the ARNA effort to keep news analysis free was done in the public interest and not seldom at a loss of income for ARNA members.

☆ ☆ ☆

Now, since there seems to be a definite feeling among the serious Radio-TV critics that the "best interests of the public" are being affected by the failure of the industry to stimulate though and discussion through news commentary, ARNA has devoted several of its recent meetings to a discussion of this topic. These are being continued and form a field of activity separated from the usual private meetings of ARNA with distinguished American and foreign statesmen, contacts which, of course, have been taking place as usual.

It is too early to reach any conclusions on the extent of the problem, before an adequate number of network officials and other authorities in the field are consulted.

It has seemed to ARNA, however, that the analysis and interpretation of news should find a regular place on the daily schedule if the broadcasters are to fulfill the demands of the charter under which they operate to serve public interest, convenience and necessity.

☆ ☆ ☆

ARNA is well aware of the challenge of the new means of communication. How to marry the expert knowledge of the news analyst to the ability of the visual technician must be a subject of experiment, and it may be that at times, the analyst will be behind the scenes working on the preparation of TV news in depth, at others in front of the camera. But the claim of the critics that the public is being subjected to a stupifying mesmerising wheel of escapist entertainment seems to emphasize that news analysis must find a place, if Television's duty to the public is to be anything more than — just words.

AWRT Maintains 11 Chapters In America

By
BETTE
DOOLITTLE
AWRT Eastern Area
Vice-President

IT WAS a year full of progress for American Women in Radio and Television, Inc. A year in which membership grew to an all-time high of 1,325. President Jane Dalton of WSPA, Spartanburg, S. C. and all of AWRT are to be congratulated on the growth of the organization, its increased activity and the valuable service to its members in the bringing together of women with something in common — employment in the broadcasting industry.

☆ ☆ ☆

The exchange of ideas and information when it is undertaken by women is always of great and far-reaching importance and has been demonstrated in AWRT. We have seen small local chapters form with no more than the seven required minimum of members, women who got together to exchange ideas and information, and within a few months that membership has doubled and even tripled with a program of activity underway which reached all the women in the area in the broadcasting field, cooperating in community and industry projects and furthering their own value and stature by **helping one another.**

AWRT's 1,325 members come from every state, Alaska, Hawaii, Puerto Rico and Canada. There are 26 chapters, with eleven of them chartered in 1955. The majority of members are employed by radio and television stations and networks in widely diversified jobs: broadcasters, disc jockeys, administrators, program directors, continuity directors, lawyers, owners, librarians, and women in traffic, writing, publicity and promotion, education, film, sales and music.

☆ ☆ ☆

Another important segment comes from advertising agencies, package agencies and public relations firms. These women are account executives, administrators, writers, actresses, publicists and in agency production. Companies that want to reach Mrs. Consumer have home economists and consumer service women in membership, too. Government agencies and public service organizations also are represented. There are also many free-lance writers and performers, casting directors, researchers, industry consultants, and women writing for the important broadcasting trade press.

AWRT has demonstrated that it has something of value for every woman who is employed in broadcasting, either part or full time, wherever she might be.

News and Views, the AWRT monthly newsletter continues to carry news to every member. All chapter activities are reported, outstanding success stories of members and reports from its board and national committees.

Eleven national committees function in AWRT: Eligibility, Constitution and By-Laws, Membership, Projects, Public Relations, Scholarship, Publicity, Information Services, Convention, Industry and Information and Chapter Services. The latter two are new committees, having been created in 1955.

☆ ☆ ☆

The AWRT 1955 Convention held in Chicago in May, was the largest in its history, with a registration of 529. The first AWRT Scholarship was awarded to Heather Woodard, 21-year old student at the University of Miami. Panels, speeches and business meetings gave to every delegate useful information, and more significantly, **inspiration** to improve her own work and contribute her share to the progress of the industry. The McCall Award again was a highlight, with seven women in radio and television receiving gold mikes as symbols of their achievements and service to the listening and viewing public.

☆ ☆ ☆

The AWRT Scholarship deserves special mention here, since it is the pioneer effort by women in broadcasting to encourage college women to enter the field. The $500 cash award is given to a woman in her junior year in college, who is majoring in radio and/or television, and with the scholarship goes the guidance and counsel that the winner may draw upon from the membership of AWRT. The Scholarship can be best described as the faith and enthusiasm radio and television women have in their own work and in the future of the industry.

AWRT has great plans for the future. The national convention will be held in Boston in April of 1956, with Heloise Parker Broeg of WEEI as Convention Chairman. In 1957 the convention will be in St. Louis, and in 1958 the West Coast.

AWRT has come a long way since its organizing convention in New York City, in April, 1951 when it had a total of 358 members. But we consider our work only begun and will continue our efforts to build the organization.

Public Acceptance Is Sales Barometer

By
DR. W. R. G. BAKER
Vice-President of the General Electric Company

WE can expect significant developments in electronics in 1956, perhaps even greater than the progress achieved in 1955.

During the year just ended, General Electric Company introduced lightweight portable television sets, convertible clock radios and transistorized portable radios which were considered as outstanding innovations in the consumer goods market. The heavy public acceptance of these items was a reliable barometer indicating that the developing trend toward compactness and portability will be with us for some time. This trend will make itself felt not only in consumer goods lines, but in other products as well.

☆ ☆ ☆

The trend to miniaturization which we can expect in 1956 goes hand in hand with that of compactness and portability. The year 1955 saw advancements in printed wiring, microminiature ceramic and metal tubes, and micropower transistors. Next year, we can expect a furthering of developments along this line — only one of which will be a tiny resistor-capacitor network assembly now undergoing refinement within our General Electric Electronics Division.

☆ ☆ ☆

In the field of broadcast equipment, we pioneered in 1955 in equipment which moved television broadcasting to the highest transmitting powers allowed by FCC, thus insuring better reception in fringe areas. And, to meet the demand for industrial television, an area which will see heavy commercialization in 1956, General Electric made available new high-quality camera equipment, with improved camera tubes. Similar progress was made in cathode-ray tubes during the year.

Our mobile communications equipment line also saw substantial improvement during 1955, and we paid considerable attention to microwave relay systems. A new laboratory of the G-E Electronics Division was established during the year at Palo Alto, Calif., for this latter purpose.

For defense, we are continuing our development of more powerful and more efficient radar equipment, and are placing more emphasis on electronic defense systems. To accomplish this, our Electronics Division was reorganized just before the turn of the year, to bring about a closer coordination of our Company's military electronic businesses.

☆ ☆ ☆

This organizational realignment, however, was not concerned with military electronics alone. It also was designed to help us keep pace with the great steps forward which are anticipated in the next five years in industrial electronics including such areas as semiconductors, computers, and automation.

The electronics industry heard the last-mentioned word — automation — with abundant repetition in 1955. Undoubtedly, we will hear more of it in 1956 and the years beyond. It is a catch-all word which is meant to sum up everything the industry in general has been doing to manufacture equipment in the most efficient manner possible.

☆ ☆ ☆

Whether we thing of automation in its true sense — that is, the programming of machines by electronic control — or in the sense of achieving increased mechanization with more intricate systems of conveying goods — the ultimate desire is still the same. We have as our goal the primary objective of improving processing and assembly operations so that the consumer, in the long run, will get a better product at the most economical price possible.

As we see it, the technology of automation is only part of the program for progress which will lead us to new horizons in 1956 and the years ahead.

Public Interest Campaigns Get Results

By
GORDON C.
KINNEY

Radio & Television
Director The
Advertising Council

IT IS nice to be able to report, in this Annual, that the past year has seen a sizeable increase in the time, talent and circulation contributed by broadcasters and advertisers to public service information campaigns. More television and radio circulation was given to more campaigns of government agencies and private organizations last year than in any previous year. And the outlook for even broader broadcasting support of public interest projects in 1956 is very bright.

☆ ☆ ☆

The number of network television programs and advertisers that cooperate with The Advertising Council in supporting its campaigns continues to grow. More and more filmed TV shows are finding it possible to insert public service appeals. The many multi-sponsored TV shows are now devoting time to these vital projects. Even the most expensive spectaculars and special shows are sharing time with campaigns in the public interest. The drive of the Council to enlist the help of television's biggest programs in the best time periods -- and thereby assure public interest campaigns, the largest audiences and best that TV has to offer — is succeeding.

☆ ☆ ☆

It is the Council's goal to have the cooperation of every network television program in Class A Time in support of important public service campaigns. This goal was nearly reached in 1955. We are confident that the few remaining programs and advertisers who have not yet joined in this important phase of broadcasting will participate in 1956. Also, as television stations increase throughout America, they bring these vital messages to new audiences, new markets — broadening further the generous support, expanding further the role of the broadcaster in the public service.

But rather than detail for you here the continuing growth of public service broadcasting and advertising, it might be best to answer the questions, "Do these broad public service campaigns, which America's broadcasters support so generously, achieve any results? Are they effective?"

Here briefly, are reports on a few of the Council's Major campaigns:

Better Schools

- Four-years-ago, there were some 17 local citizens committees working to improve public schools. Today, the total exceeds 10,000. In 1955, there were 34 state citizen committees — an increase of 10 over 1954. In 1947 membership in Parent-Teacher Associations totaled 4½ million. Present membership is over 10 million.

CARE

- In 1955 more CARE packages were shipped overseas than in any previous year. Over one million of the so-called "Dollar Packages" were shipped during the calendar year.

Engineers Wanted

- While overall college enrollments rose 8% as of September, 1955, enrollments in engineering colleges rose 9%. Freshmen enrolled in engineering colleges were 10.4% of the overall college freshmen enrollments. This compares with a 7% figure in 1952, the year the Council originated its campaign.

Fire Prevention

- Statistics for fire losses during 1955 showed a leveling off after four years of steady increase.

Religion In American Life

- In communities mobilized around the RIAL program increases in attendance at religious services have taken place running from 10% to as high as 50%. Experience indicates that these results generally continue long after the conclusion of the program.

Stop Accidents

- In 1954 the national death rate was reduced from 11.3 per 100 million passenger miles to 6.5. While the actual number of deaths for 1955 probably will show an increase over those of 1954, it is indicated that the death **rate** may not be affected adversely.

U. S. Savings Bonds

- Sales of E and H Savings Bonds in 1955 were the highest in peacetime history. Cash sales totaled about $5½ billion compared to $4,900,000 in 1954.

☆ ☆ ☆

Broadcasters and advertisers can be proud of their part in helping to produce results like these. If we all work to expand even further the support and effectiveness of television in these areas, we can achieve even more remarkable results in solving America's problems the voluntary way.

Color TV Transition Must Be Smooth

By
JOHN SINN
President
Ziv Television Programs

IN THE past few months, it has become very clear to the television film industry that a plentiful basic supply of film programs is not enough, in itself, to attract either audiences or advertisers — particularly advertisers.

The top advertisers using syndicated films today are paying careful attention to star names, production values, script quality, and promotional opportunities. They are taking a close look before they bet their advertising chips for a whole season.

But, we've learned, when they find a show that measures up, they don't skimp on their program budgets. Quality, more and more advertising executives fully realize, has to be purchased — not bargained for.

☆ ☆ ☆

We are very proud of the fact that we have a very low turnover in our clients, year after year, and a very high renewal rate on shows continuing in production. In fact, more than 75% of the clients with which we started out some six seasons ago are still on the roster of Ziv Tv sponsors.

The continuing quality of the film series we have delivered to our clients has built their confidence in us. And, the confidence of our advertisers has enabled us to map out a production goal for 1956 that is expected to be 38% over the level of 1955 — a year in which we produced more than 3.2 **million** feet of program film footage and 428,976 feet of special custom commercials at our Hollywood studios.

☆ ☆ ☆

As you might imagine, the number of man-hours and the amount of talent that must be poured into such an ambitious schedule is enormous.

Take actors, for example. We have been able to attract top marquee names — like Barry Sullivan, Richard Carlson, Broderick Crawford, David Brian — and others to star in our telefilm series by paying top prices, and by proving that they will get nationwide exposure on television that rivals any other medium in existence.

But telefilms can't be made with stars alone. You need supporting players, character actors, extras. They, too, must be of a high calibre to maintain your overall quality.

At our Hollywood studios recently, we inaugurated what is probably the biggest schedule of talent auditions ever seen in the film industry. We will screen groups of actors and actresses of all types twice a month, and hope to find as many as 250 "new" faces for our $12 million 1956 production schedule.

☆ ☆ ☆

Why are we forced to hunt for "new" faces in Hollywood, the talent center of the worldwide film industry? It's true there's no particular shortage of acting talent. But television, and television filming, has grown so extensive that we must enlarge this talent pool, since we and others are constantly using it. Fresh faces help us to maintain freshness in our productions — particularly those of a semi-documentary nature, such as "Man Called X," "Highway Patrol," and "I Led Three Lives" and dramatic anthologies like "Science Fiction Theatre." And, it ultimately helps to build large program audiences for the advertiser's commercials.

This is only one facet of the problems that face us as a leading telefilm producer. We constantly search for top-notch writers, and have employed such well-known TV dramatists and screenwriters as Jerome Lawrence and Robert E. Lee, authors of "Inherit The Wind"; Robert L. Smith, who scripted "Sudden Fear," Jo Pagano, Gene Levitt, John Larkin and many others. We have sought out the top directors, producers, cameramen, technicians, lighting experts. Everything, from the raw film stock you use right through to your distribution organization, must be top calibre. Otherwise, a weak link in your chain will lower your over-all quality.

☆ ☆ ☆

It all adds up to one thing. As film producers, we feel that our primary responsibility is to deliver a quality product to our customers. At the same time, we also feel a responsibility toward the millions of viewers who watch Ziv-produced telefilm shows in over 280 cities in the United States.

The viewer of today is getting more and more selective in his choice of viewing fare. But we at Ziv Television Programs feel confident that we will prove equal to this challenge, and that we will continue to play a major role in an industry which will forge beyond the conventional lines as they are drawn today.

New Television Broadcast Techniques

By
DAVID T.
SCHULTZ
President
Allen B. Du Mont
Laboratories, Inc.

PROBABLY the most significant occurrence during 1955 at Du Mont from a television broadcast industry standpoint was our decision to discontinue television network broadcasting, to spin-off our broadcasting properties as a separate corporation, The Du Mont Broadcasting Corporation, and to concentrate upon furnishing technical equipment to the industry.

Du Mont had participated in television network broadcasting since 1946, and in the succeeding years we made many contributions to the development and growth of nation-wide television as we know it today. With the type F.C.C. allocation plan under which the industry is now operating, there is no likelihood in the near future that there can be enough strong television outlets in major markets to support four network operations.

☆ ☆ ☆

With the spin-off of our broadcasting properties in December, Du Mont Laboratories divorced itself from broadcasting. Our direct interest in television broadcasting is now to provide service, transmitting equipment, and new technical advances at the transmitter, studio and film making levels to broadcasters and film producers.

An example of the technical advances and service which Du Mont is equipped to provide is the Electronicam TV-Film System. In this completely new concept for the making of motion picture films, all of the electronic advantages of live television broadcasting are combined with motion picture techniques so that highest quality film can be made in a fraction of the time required by conventional methods.

☆ ☆ ☆

The camera units of the "Electronicam" combine an image orthicon view finder with a specially-adapted 16mm or 35mm motion picture camera, using a single common lens system. As a result, film directors, producers and all members of the creative team see the action that is being filmed on television monitors exactly as the motion picture camera sees it. There is no need to wait to see results of a day's shooting. It is seen instantaneously on the monitors by all persons concerned.

The "Electronicam" is a complete system which includes monitors, television switching control units, and matting amplifiers. An editing master film is made electronically while the high definition film is being shot, and this editing master is recorded complete with wipes, fades, laps, super-impositions and other special effects.

In the broadcast equipment field Du Mont pioneered again with a completely new method for live color television pick-up. Called "Vitascan", this new system enables a television station or closed-circuit broadcaster to present live color television without the need for expensive tri-color cameras and their problems of registration, long warm-up time and numerous highly-trained technicians.

☆ ☆ ☆

This is accomplished by scanning a scene with a beam of light and using photoelectric cells to pick up the reflected light and convert it to electrical energy. In the "Vitascan" system, the scanning is done by a cathode-ray tube and the reflected light is picked up by multiplier phototubes which not only convert the light to electrical energy but multiply it many times. Correct signals for color transmission are achieved through the use of color filters placed in front of the phototubes.

"Vitascan" is actually the reverse of usual television techniques. In "Vitascan", what appears to be the camera is actually the light source or scanner. Above the studio, where floodlights would ordinarily be, are the multiplier phototubes.

☆ ☆ ☆

Because "Vitascan" works on the principle of a reflected beam of light, the action must take place in a light-tight studio. So that actors can see in the studio, stroboscopic lights flash on 60 times a second during the blanking interval when the cathode-ray beam is shut off.

The "Electronicam" and Vitascan" are two of our most recent developments to serve the television broadcast industry. Du Mont continues its basic research in transmitter circuitry, studio equipment, optics, film production and color television transmission to give broadcasters the best technical products and service.

Mutual Broadcasting System-Radio — WABD-Dumont Television

www.americanradiohistory.com

Cuban Annual Ad Investment $7 Million

By GOAR MESTRE
President, Circuito CMQ, S.A.

CUBA'S first TV license was granted to CMQ early in 1950 and our Channel 6 transmitter went on the air in mid-December of that year, before our television building, adjoining our radio installations in Radiocentro, had been completed. A 5 kw transmitter, with a 3-bay superturnstile antenna on a 200 ft. hurricane proof tower atop the television building, was inaugurated together with two iconoscope film chains and four projectors and two studios, with two cameras each, plus a mobile unit equipped with microwave and cameras.

☆ ☆ ☆

A small 16 mm film processing laboratory was installed in order to provide adequate facilities for the production of TV commercials, and the usual provisions for a reasonable amount of scenery and props were also included.

On March 12, 1951, the official inauguration of CMQ-TV took place with the attendance of the highest Cuban authorities, including the President of the Republic and a group of U. S. advertising agency representatives, newspapermen and editors of trade magazines, who came to Cuba as guests, to join their Cuban colleagues on the eventful occasion.

From the very beginning of television in Cuba, it became evident that response to the new medium, on the part of the advertisers and the general public, was surely to exceed our fondest expectations. By the end of 1951, CMQ-TV was in the black, the number of live programs was far greater than could be adequately handled with the existing facilities and there were more than 25,000 TV-homes in Greater Havana.

☆ ☆ ☆

In November, 1951, CMQ inaugurated in the city of Camaguey, the first of four TV stations in the Interior of the island which were to make up its national network, for which both advertisers and the general public had been clamoring since the inception of television in Havana, less than a year before. In March and April of 1952, additional transmitters went operative in the cities of Matanzas, Santa Clara and Santiago de Cuba, and our Video Recording Department was ready to handle over 20,000 feet of 16 mm film daily, containing all of CMQ's 6 hours of daily program fare. By May 1st, 1952, our national TV network was a reality and TV had come within the reach of nearly 70% of all Cuban homes.

While this expansion in our transmitting facilities was taking place, additional studios and cameras were being added in Radiocentro and by mid 1952, the number of studios had increased to five, the mobile units to two and sixteen cameras were in daily use.

☆ ☆ ☆

While there are no official figures available, we estimate that total advertising investment in the television medium in Cuba is currently approaching a figure equivalent to seven million dollars a year, a substantial share of which is being invested in the CMQ-TV network. This is due to CMQ's superior programming, which commands at all times an audience in excess of 50% of all sets tuned in at any one time.

Program ratings in Cuba are undergoing the same process which has been observed in the United States and while three years ago it was not uncommon for a top program to hit a rating of over 60, today there is only one program on Cuban television that exceeds 50, and those that exceed 40 can also be counted with the fingers of both hands. At CMQ, however, when a program does not obtain a rating of more than 25, we seriously begin to consider throwing it out the window.

☆ ☆ ☆

Summing up, boldness in programming, boldness in creative selling, and a tremendous expansion in technical facilities, have made CMQ-TV grow spectacularly during the past five years. What the future holds for Cuban television, greatly depends on the general over-all economical situation of the country which, in turn, hinges to a greater extent than most people realize, on what happens to U. S. purchases of Cuban sugar.

This little island in the Caribbean, everyone knows, is among the world's best and largest consumer of U. S. manufactured and agricultural products, having one of the world's highest per capita rates of consumption of such products. The extent to which television will participate in the overall advertising picture greatly depends on the demand for such imported or locally manufactured goods.

www.americanradiohistory.com

Syndication Now Permanent In TV Field

By
DAVID V.
SUTTON

Vice President
in Charge of
MCA-TV Ltd.

DESPITE some comments to the contrary, I think 1955 saw syndicated television reach a mature stage. I think further that syndication has become one of the basic mainstays of the medium, and 1956 will see it established even more firmly.

☆ ☆ ☆

Many previously notable trends became more in evidence in 1955 and will play an important part in shaping the future of syndication in the year to come. In 1955, these four factors underlay the development of most national trends: the emergence of top-quality productions filmed expressly for syndication; the rating success achieved by syndicated shows even when paired against well-known network fare; the choice time periods obtained by syndicated properties, notwithstanding the general "tightness" of prime time experienced by the industry as a whole; and finally, the entering en masse of the medium by a big number of national advertisers.

☆ ☆ ☆

With the emergence of the dramatic spectaculars during 1955 by the networks, tv film distributors met the challenge with quality products. In line with the trend of handling only top-quality shows, MCA-TV, for example, in June, 1955, released a work of Lloyd C. Douglas for presentation on television for the first time. "Dr. Hudson's Secret Journal," based on the novel by the eminent author, has presented the film buyer with the opportunity of sponsoring a show of quality with originality and the opportunity of associating his station or product with the works of one of the most distinguished writers in the literary world. This is the trend which became so evident during 1955 and will be of primary importance if syndication is to present the type of product that can pull high ratings against a national show.

Given a good time period, a high-quality show made for syndication can match the rating of a network show. Carrying this one step further, there is little doubt that a good syndicated show, given broad coverage, can offer fierce competition to a network presentation. Using MCA-TV's own highly successful "Waterfront" series as an example, we found that in 34 ARB metropolitan market reports listed as carrying the series, an approximate 4,200,000 homes watched the program out of a potential of 15,900,000 unduplicated homes. This is a highly respectable audience level for any show, syndication or net.

☆ ☆ ☆

As a result of proving they can attain high ratings, syndicated shows are now able to obtain prime telecast time. For example, "Waterfront" was able to obtain prime evening time in such major markets as: 8:00-8:30, Wednesday, Houston; 8:30-9:00, Friday, in San Francisco; and 8:30-9:00, Thursday, in Portland, Oregon. These are time slots once considered the exclusive domain of the networks. It is interesting to note that even in markets where "Waterfront" did not get prime time, like Philadelphia, where it is telecast Sundays 6:30, the high quality of the show earns a 35.6 rating which ranked eighth in the market among all shows, network or local origination.

☆ ☆ ☆

There is still another vital factor to be taken into consideration when attempting to define the scope of film syndication. There is the sponsor's angle. Many of the nation's biggest and most astute advertisers have realized the value of syndication, as evidenced by their entering the medium en masse. The list of major advertisers now using syndication reads like the blue book of advertising. Such important sponsors as Procter and Gamble, Standard Oil Company, Ford Dealers, Coca-Cola Dealers, Liebman Breweries and Heinz Company have entered syndicated television in the past. Major advertisers found they could purchase syndicated fare and get prime time rather than go into fringe network time. This allowed the advertisers to slant their campaign toward the consumer situation in the market and maintain one theme through their advertising campaign.

Today in any evaluation of television, syndicated TV must be considered a major factor in the broadcasting industry. We are headed toward a stabilized business year. It is apparent that syndication is moving ahead into a permanent and prominent position in the nation's most dynamic advertising medium.

65 TV Stations Across Canada By 1958

By
JULES
LaROCHELLE
Canadian
Correspondent
Radio Television Daily

THE Canadian radio and television industry in all its phases recorded further sharp growth in 1955 and outlook for 1956 is declared highly favorable by all those connected with the industry — either in the broadcasting, advertising and manufacturing ends.

Numerous other outlets were initiated during the year, both for television and radio broadcasting and it is now estimated that television coverage spreads to reach over 10,000,000 Canadians, while radio coverage, of course, is pretty near the 100 per cent mark.

☆ ☆ ☆

Canadian manufacturers of television and radio sets report higher production and sales for the year 1955. It is estimated that already Canadians have spent more than $500,000,000 for television sets and other related appliances thus far. There are at present some 1,600,000 black and white TV receivers in homes across the country. For this year, official associations report that when final figures become available it will be shown that 1955 tv set sales amounted well over 750,000 units. (Latest official figures indicated that in the first eleven months of 1955 there were 690,071 TV sets sold, compared with 530,350 in the corresponding period of previous year. Value of television sets sold in the eleven month period of 1955 was $209,160,-249). There was a decline in average value of sets in that period — from $348 year before to $303 in latest period.

☆ ☆ ☆

As for the sales outlook of tv sets, makers feel that growth will not be as pronounced in 1956 but the market just the same is not expected to ever become saturated. They point out to the experience of the radio receiver market where despite the fact that television has given stiff competition to the older system, sales have continued at high level right along.

As far as the broadcasting end of the radio and television industry, conditions remained favorable. Advertising revenues were good, especially for television operations. Also, radio broadcasters managed favorably despite the fact that they had to considerably re-arrange program schedules.

An important development in the year and one that will have an all-important bearing on the future of the whole television broadcasting business was the progress reported in the cross-country 3,800-mile coast-to-coast microwave system. Using 135 relay points to make simultaneous transmission of nation-wide TV programs, the system is expected to be completed on schedule by 1958.

☆ ☆ ☆

Contract for the giant network was awarded to the Bell Telephone Company of Canada, acting for the Trans-Canada Telephone System, an association formed of Maritime Telephone & Telegraph Co., New Brunswick Telephone Co., Bell Telephone Co. of Canada, Manitoba Telephone System, Saskatchewan Government Telephones, Alberta Government Telephones and the British Columbia Telephone Co. The seven members are responsible for construction in areas they serve. Also to extend the French-language television network in Eastern Canada, the Canadian National Railways and Canadian Pacific Railway Company have opened micro-wave networks from Montreal to Quebec City — which is now used by the CBS — and further contract has been awarded to push the service from Montreal to Sherbrooke, Que., as far east as Rimouski, Quebec. The railways have also developed a network between Toronto, Hamilton, Kitchener, Wingham, London and Windsor, in Ontario.

☆ ☆ ☆

Latest compilation available showed that the following Canadian cities were serviced by private television stations: St. John's, Nfld., Sydney, N. S., Charlottetown, P. E. I Saint John, N. B., Moncton, N. B., Jonquiere, Que., Rimouski, Que., Quebec City; Sherbrooke, Que.; Hamilton, London, Windsor, Wingham, Barrie, North Bay, Timmins, Sudbury, all in Ontario; Brandon, Man., Saskatoon, Sask., Regina, Sask., Lethbridge, Edmonton and Calgary, Alberta, Peterborough, Kingston, Sault Ste. Marie and Port Arthur, Ont. The CBS operated TV stations at Halifax, N. S., Montreal, Ottawa, Toronto, Winnipeg and Vancover. Of the immediate future as far as television stations additions is concerned, private interests maintain that they could have up to 65 stations operating across Canada by 1958 — if more than one outlet is permitted in all centers.

Radio-TV Members Boost Press Corps Total

By
LOUIS P.
LOCHNER
President
Overseas Press Club

THE Overseas Press Club of America was organized in 1939 under the leadership of Wythe Williams, veteran New York Times foreign correspondent, as an association of journalists who have served or are serving American newspapers, news associations, magazines, radio and TV abroad as foreign correspondents or photographers.

Beginning with 40 charter members, the Club now numbers 1500 and includes virtually every foreign correspondent whose name has become familiar through radio and television appearances, or by his or her byline in newspapers and other periodicals.

☆ ☆ ☆

In December of 1954, the Club dedicated the Memorial Press Center, a beautiful brownstone club house at 35 East 39th Street, New York, to the memory of over eighty American correspondents on overseas duty who gave their lives during and after World War II so that a free press might continue in a free world.

The furtherance of freedom of speech, press, and assembly is one main aim of the Club. During 1955 it has supported efforts to liberate American journalists in several Latin-American countries who were arrested by dictatorial regimes. It has insisted upon a fair inquiry into the murder of Gene Symonds in Singapore, and has championed Dr. Alberto Gainza Paz's right to regain ownership of La Prensa of Buenos Aires, wrenched from him by Juan Peron.

☆ ☆ ☆

In October, 1955, the Club joined the Americas Foundation in sponsoring a two-day Assembly on News, Knowledge and Freedom in the Americas, held in the Memorial Press Center. Problems of inter-American interest were discussed with intimate frankness by a gratifying array of publicists and savants from both continents, among them Dr. Gainza Paz, and general chairman of the Assembly; former President Eduardo Santos of Colombia, publisher of El Tiempo of Bogota; A. A. Berle, associate professor of law, Columbia University; former President Galo Plaza of Ecuador, and Spruille Braden, president of the Pan-American Society.

The Club maintains cooperative relations with the International Press Institute at Zurich, Switzerland. It helps combat the growing tendency in government to render access to information to which the public is entitled, increasingly difficult.

The Annual Awards Dinner, held at the Waldorf-Astoria in April, 1955, was the high-point of the year. An inspiring address by U.S. Senator Margaret Chase Smith preceded the presentation of a series of awards to foreign correspondents for exceptional journalistic and photographic work.

☆ ☆ ☆

At the Club's Tuesday afternoon "at homes" members returning from overseas assignments have reported intimately and authoritatively on the political, social, and economic situation abroad, often speaking off the record.

The Club appeared on the air repeatedly during 1955. Principal event in this category was the NBC Producer's Showcase in November. This TV show was produced for and with the Overseas Press Club. Club members also participated in an NBC panel discussion on Disarmament, with Harold Stassen as guest. Others contributed a WNYC program on Freedom of the Press. The CBS Overseas Round-up by this network's foreign correspondents has become an annual luncheon feature of the Overseas Press Club's Christmas season. The CBS colleagues are plied with searching questions.

One of the most popular features of 1955 Club life was a series of regional dinners, or "national nights," which acquainted the members with the history, customs, arts, and cuisines of France, Israel, Greece, Hawaii, India, Austria, Mexico, and Norway.

☆ ☆ ☆

"Book evenings" centering about works of Club members proved impressively stimulating.

One of the Club's many services is that of a Placement Committee, which finds jobs for many members; another is a Group Insurance Plan which furnishes members inexpensive protection of life and health.

The Club publishes a weekly BULLETIN which keeps the membership informed both of the Club's doings and the whereabouts, nature of work, and personal data of the 1500 members. A Who's Who of the membership is in process of publication.

Advertising Agency Competition Is Keen

By
BILL NUGENT
Staff Writer
Radio-Television Daily

COMPETITIVE belt surrounding advertising agencies stretched to new lengths in 1955. America's consumer goods makers, riding the crest of the healthiest economy in history, shuffled advertising accounts at the rate of better-than two a day.

The "big switch" left few agencies untouched. For some, it meant new life, new power and a record-breaking share of the nation's advertising dollar. For others, the reverse wos true.

☆ ☆ ☆

Agency zig-zagging by blue-chip giants comes as no accident. It's the direct result of new concepts in today's selling. Marketing and merchandising pressures, more violent than ever because of television, enveloped practically every shop along the Madison Avenue circuit uprooting accounts that had been resting leisurely for years.

Time was when the only function of an agency was to prepare ads. This is no longer true. Today's sponsor expects a complete merchandising and marketing service. If he doesn't get it, he goes a-hunting.

☆ ☆ ☆

A record number of agencies felt the pinch last year. Before the smoke clears from this season's hop-scotching, over $150,000,000 in major client billings will have changed hands.

The migrants came from virtually all product fields. Two top soft-drink firms, Coca-Cola and Pepsi-Cola, diverted alliegence from agencies which had directed their spending for decades. Breweries, with combined billings of over $25,000,000, left several of the better-known ad-sleuths crying in their beer.

Automobile and cigarette makers did their share of transplanting in the past year, too. Studebaker named Benton & Bowles while Packard lapped D'Arcy over Ruthrauff & Ryan. In one of the biggest stories of the year, Philip Morris switched $8,000,000 in business from The Biow Company to N. W. Ayer. L&M Filters, which grew up in Cunningham & Walsh, decided Dancer-Fitzgerald-Sample could do a better job.

Soap, drug and toothpaste companies provided plenty of ad alley gossip as did watchmakers, cosmetic firms, appliance makers, food packers and airlines.

☆ ☆ ☆

Some of the big changes included Whitehall Pharmacal from Biow to Ted Bates; Westinghouse from Fuller & Smith & Ross to McCann-Erickson; Bulova from Biow to McCann-Erickson; Swift from J. Walter Thompson to McCann-Erickson; Frigidaire from Foote, Cone & Belding to Kudner; American Airlines from Ruthrauff & Ryan to Lennen & Newell; Toni from Weiss & Geller and Leo Burnett to North; Revlon from Norman, Craig & Kummel to BBD&O and a host of others.

Hardest-hit agency was the Biow Company. That firm had over $30,000,000 in billings lopped off within two months. Among the winners were McCann-Erickson (upped over $50-million in billings), BBD&O, J. Walter Thompson, Kenyon & Eckhardt, Benton & Bowles, Ted Bates and Young & Rubicam.

☆ ☆ ☆

Estimates for the total 1955 advertising expenditure by American business have been placed at $9-billion — a gain of almost 10 per cent over the previous year. A higher figure for 1956 is freely predicted.

Radio and television garnered a sizeable portion of that amount. The video medium accounted for over $1-billion in advertising dollars representing a 25 per cent gain over 1954. With Young & Rubicam leading the pack, the top 35 agencies billed over $800-million in both radio and television.

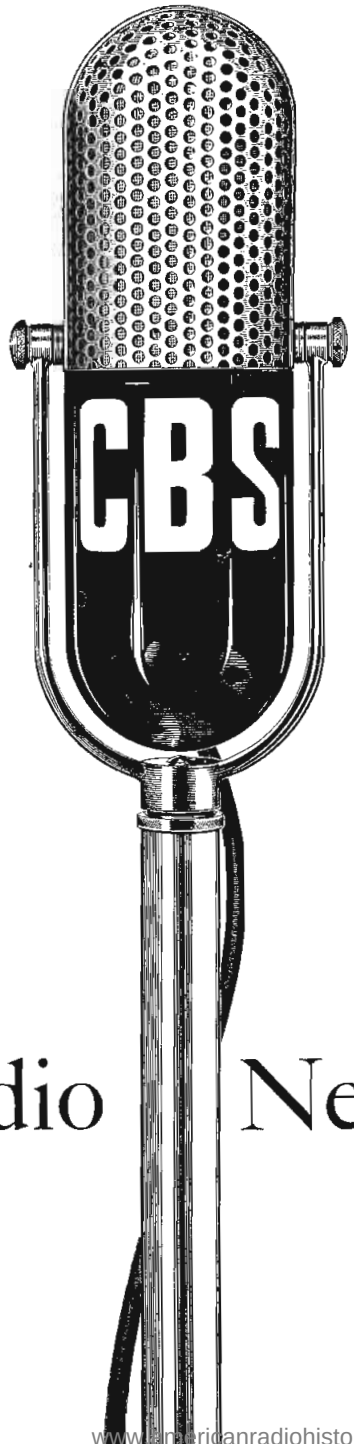

No knowledgeable adman would dare predict the life-expectancy of an account within his own organization. Last year's wholesale head-rolling makes that pretty clear. But one thing is certain.

Agencies can look forward to bigger billings in 1956. Just where those plums land depends on the agency itself. Ability to keep pace with today's rapidly-changing selling trends is a necessary factor for survival on Madison Avenue.

The Position of Closed Circuit Television

By
JOE MORRIS
Managing Editor
Radio-Television Daily

MOST facets of TV have a very bright future but the current candidate for the title of "Most Likely to Succeed" is the closed circuit application of the medium. There are those who predict that closed circuit TV in all its phases and fringe features will, within 10 years, be an industry with a larger annual dollar volume than TV broadcasting. This of course would include equipment manufacturing, industrial application, use in the home, in buildings, as a communication medium in education and other phases as yet undeveloped and undiscovered.

☆ ☆ ☆

Prevailing opinion is that its role as a communication and entertainment medium will eventually be taken over by networks. This holds true both among networks and to a great extent among executives of independent companies engaged in producing closed circuit telecasts.

During 1955, new exploration in use of closed circuits brought astounding results. As a medium of entertainment, it garnered heavy financial returns; as a medium of communication, it found wide use in industry for transcontinental business conferences; as a sales tool, it was put to use selling broadcast TV to potential sponsors and was offered to advertisers as a merchandising adjunct to sponsored programs.

☆ ☆ ☆

Currently, networks which use it, apply it as an adjunct to the TV sales department. However, the natural outgrowth of this is eventual domination of the medium's application on a commercial basis, both as a communication tool for industry and as an entertainment vehicle. First steps have been taken in this direction. Production of several telecasts sold by closed circuit firms has been network handled. The resources available to networks—for this role make it inevitable that they will dominate the field since no closed circuit company would be able to muster equivalent staff and equipment to furnish competition.

New developments in the medium currently being rushed are large screen color and merchandising in department stores. There are five large screen color projectors available at present. The use of large screen color at first will be backed up with a safety factor of 21-inch screen color receivers spotted throughout reception locations to safe-guard against breakdowns in the large screen apparatus.

Consensus of opinion is that there will never be a sufficient number of events of national interest to support a closed circuit TV firm. However, many new theories of programming are being put into effect.

☆ ☆ ☆

In an overlap into the educational TV area, a series of lectures will be presented this year on a commercial basis. These lectures will not be of general interest but will be aimed at specific professional groups throughout the country, presenting experts in each field in teaching roles.

As a merchandising tool in department stores, the closed circuit TV set uses 21-inch color receivers placed throughout the store to bring customers an electronic merchandising display at one location without requiring them to make a tour of the entire building. Use of the medium in a monitoring role in factories and buildings is becoming widespread since a simple set-up using a portable-size camera and a receiver can be installed for as little as $1,000.

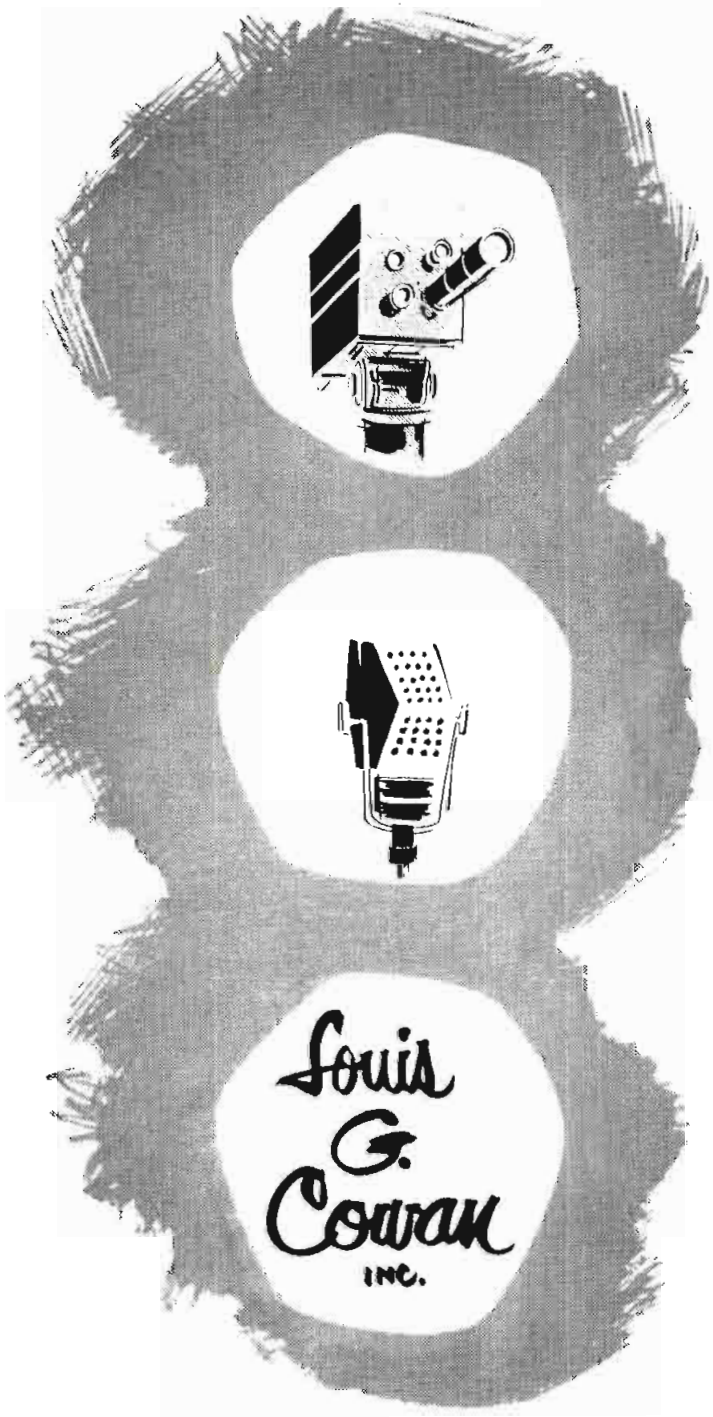

☆ ☆ ☆

Color makes the medium particularly appetizing to a client as a sales or merchandising tool since color is still enough of a novelty to guarantee him an audience motivated by curiousity about color TV if not about his product.

Currently, closed circuit TV is in a big boom as a medium of communication for large firms. One company holds a closed circuit conference each week of the year, utilizing it to approve TV commercials prepared by its various agencies. Two large advertising agencies are planning to install permanent closed circuit links between branch offices in key metropolitan centers.

In the educational field widespread experimentation with closed circuit TV is in progress on all academic levels, from kindergarten to university graduate instruction, and indications are that it may be the final answer to alleviation of the crucial teacher shortage existing throughout the nation.

Glowing Future Predicted for RTES

By
CLAUDE
BARRERE

Secretary
Radio and Television
Executives Society

ABOUT a thousand hard-headed men and women in the broadcasting business ranging from Chairmen of Boards of some of America's major enterprises down to junior Time Buyers and Salesmen belong to the Radio and Television Executives Society. Why?

We could say it's because of the inborn industry slogan of "Service." We could equally well recall the statement of an old Greek philosopher that "All of our acts are motivated by selfishness."

☆ ☆ ☆

The growing recognition that the RTES, through its various activities, is increasingly serving the industry and the individual therein is the true answer to why so many are members and are supporting it with time, money and energy.

It is recalled that the RTES was formed in 1952 by bringing together the Radio Executives Club of New York, which was founded in 1939, and the American Television Society, junior by a matter of a few months. These two organizations resembled each other in many phases and were quite different in others. The teaming of their various qualities brought about the stronger, sturdier, organization now in its fourth year. The present membership shows a well-balanced representation amongst the networks, stations, station reps., advertising agencies, film organizations and the many other services allied to broadcasting.

☆ ☆ ☆

How, then, is the RTES serving the industry and its members? The showiest aspect is, no doubt, its monthly luncheons, a forum attended by consistently large numbers of members and friends. It is pleasant to point to such speakers this current season as Vice-President Richard M. Nixon and George C. McConnaughey, Chairman of the FCC, Bishop Fulton J. Sheen, Sir Ian Jacobs, of the BBC, Louis A. Cowan, Irving R. Levine, and special events with the American Women in Radio and Television, the Peabody Awards luncheon and the huge Christmas party. Yet these "showcases" have perhaps less weight than such things as the Listening Post, the Time Buying and Selling Course and the Workshops.

The Listening Post is something of which the RTES and its members are particularly proud. Its intriguing name originated before the RTES was formed when a group of well-known people in the industry, on a very informal basis, endeavored to help their friends and acquaintances who suddenly found themselves in the unaccustomed predicament of being unemployed. As one of its founders put it: "We lend a sympathetic ear to our friends and keep the other to the ground to hear of openings, hence the name." Frequently, be it said, they didn't wait for openings but energetically sought out possible spots for which their friends were qualified.

☆ ☆ ☆

With the monies collected through the Christmas parties the RTES was in a position to help the Listening Post, all of whose members also belonged to the Society. They gave it a headquarters with the necessary administrative personnel and wider publicity, promotion, etc.

It is significant that the Listening Post is not a placement service. It will not accept applications from persons who are in jobs, but insists that they must be, or officially are about to be, unemployed. Furthermore, it will not accept, as applicants, persons who are trying to get into the broadcasting field, nor those, who through other affiliation, might better be helped to locate jobs.

Each week applicants have the opportunity of sitting around the table with members of the Listening Post. This helps them to orientate themselves as well as to acquaint the Committee with their qualifications. Call it an informal screening and counseling session. The applicants are then given leads to likely openings for which they are qualified.

☆ ☆ ☆

As can well be expected the applicants outnumber job referals. Perhaps as much as ten to one. However, as people in key positions in the industry become acquainted with the Listening Post's services they are more and more inclined to tap this pool of available talent. The files are thick with commendatory letters from employers who found the man or woman they needed through the Listening Post. There is also quite a collection of notes of gratitude from ex-applicants.

Strict statistics of the Listening Post activities are not available. While applicants far exceed placements, it is estimated that an average of something better than four jobs a week are filled through employers and prospective employees being brought together through the Listening Post.

Random Information Bits On Buying Habits

By
RALPH H. WEIL
Executive
Vice President, WOV

A THOROUGH follow-up on several random bits of evidence (a costly wedding dress, a pack of cigarettes, a new automobile and a tin of olive oil) will help clear up the remaining mysteries surrounding the character and activities of the Italian-language market in the U. S.

Purchase of the Wedding Dress: The wedding dress alluded to, questioning shows, cost approximately as much as a standard fur coat, which puts it into the "considered purchase" class. Obviously the family's income was such that the price was not an obstacle. As is usual, such an important purchase was carefully considered by the bride-elect and her family. With such a sum involved it was naturally selected from a shop which measured up to the entire family's prestige ideals. Their choice of a shop was directly influenced by the family's Italian language listening habits and the gown was sold either by a Fifth Avenue shop — or perhaps one in the Bronx — which has used Italian language broadcast schedules regularly for years, with intensified schedules preceding the wedding boom seasons. The family listening habits tell us something about the family tastes . . . including second and third generations (since the American-born, American-schooled bride herself is either second or third generation). With better than 95% of Italian-American New Yorkers understanding English, only a scant 5% listens because of language limitation. The others listen by choice . . . because it is a beloved part of their heritage. They want to retain it and why not? People who have never yet even visited Italy are imbued with bantering pride about the district from which their forebears originated. Programs from these "home towns" once or twice removed, fascinate the entire family. Many of WOV's produced-in-Italy features are daily broadcast fare for stations in other cities. (These are all flourishing, with the tabs picked on a multi-city basis by a single sponsor).

But The Brand Of Cigarettes Is American: Naturally it is. One of the big standard brands too. National advertisers have found they can garner a bigger share of sales for their brand by using, instead of ignoring, the Italian language broadcast way to influence the Italian Market in their favor. Automobile manufacturers and dealers have caught on to the same fact. They are frank and grateful in their acknowledgement that Italian broadcasting produces a welcome volume of inquiries leading to actual sales.

But Olive Oil Is An Italian Staple. Right again. The taste for nationally advertised American merchandise and services coexists with the taste for Italian cuisine. Nor should one overlook the fact that grocery stores featuring full lines of Italian type food products magnetize the third generation Italian-American as well as the first. They enjoy roughly the same forum type popularity as the legendary country store of earlier rural America. And incidentally, the majority of these store keepers keep radios tuned steadily to Italian language broadcasting. In New York the number of such stores is 2,700.

Therefore Sherlock Concludes: That there is no end in sight for the influence of Italian language broadcasting on that portion of the American public which is of Italian descent. Today's bride gowned in the expensive finery she acquired as the result of Italian language advertising impact is tomorrow's Italian grocery store customer. Since Italian listening is a happy part of her heritage it is also one of the best ways of influencing her choice of furniture retailer, electrical appliance shop, real estate dealer, etc. (A large summer colony in Long Island has grown up as the result of several years of Italian language broadcast advertising with the young married and middle age groups naturally accounting for the major portion of purchasers).

Thot if Americans of non-Italian origin are being swept up in the current fashion for things Italian (clothes and hair styles to name but two) it is clear that with Italian-Americans this taste has been fostered from infancy on and can be considered a lifetime preference.

That Italian language broadcasters, in the WOV tradition, can be counted on to keep the ear-appeal and heart-appeal of programs in prime condition, and of prime influence. They've had long experience with audiences that listen, not from language limitation but from choice.

NETWORK RADIO BILLINGS

Estimates For Years 1955 & 1954

☆ ☆ ☆

Editor's Note: These figures, compiled by the Publisher's Information Bureau, are based on one-time network rates before discounts. They do not represent accurate revenues of the networks since the networks decline to divulge their actual net dollar incomes. The 1954 figures are given at the bottom of the page as a basis with which to compare network revenues in 1955.

January-July 1955

	ABC	CBS	MBS	NBC	Total
Jan.	$ 2,487,140	$ 4,181,787	$ 1,372,532	$ 2,744,204	$ 10,785,663
Feb.	2,387,900	3,950,767	1,291,938	2,584,620	10,215,225
Mar.	2,445,765	4,393,441	1,446,535	2,953,486	11,239,227
Apr.	2,096,355	3,837,124	1,365,658	2,624,671	9,923,808
May	2,080,272	3,921,807	1,450,889	2,652,560	10,105,528
June	1,817,967	3,656,201	1,255,424	2,703,981	9,433,573
July	1,676,650	3,122,096	1,022,255	2,452,364	8,273,365
‡Total	$14,992,049	$27,063,223	$ 9,205,231	$18,715,886	$ 69,976,389

† Network radio billings figures were discontinued by PIB as of Aug. 1955 because "recent changes in the rate and discount structures of the various networks have seriously affected the comparability of the gross billing figures, one network with another, and also the comparability of current figures with those of the past."

January-December 1954

	ABC	CBS	MBS	NBC	Total
Jan.	$ 2,830,654	$ 5,166,174	$ 1,896,925	$ 3,391,873	$ 13,285,626
Feb.	2,494,737	4,749,512	1,783,452	3,176,849	12,204,550

"BUT, DADDY, DIDN'T YOU WRITE THE COMMERCIAL?"

Yes, Virginia, there are people who write BBDO television commercials. But they don't get a credit line. Not because we aren't proud of our work. And not only because a long list of our TV writers, artists and technicians would eat up high-priced time. But mainly because BBDO wants to leave the viewer with a stirring memory of just one name—*the client's*.

in fact

McCann originates and produces *more* television throughout America (from I.D.'s to hour shows) than any other agency.

M-E (McCann-Erickson) loves *you*, and we just don't care *who* knows it! After all, you—the talent, the producers, the packagers, the people with ideas—helped make this the biggest quarter in McCann's history, so why shouldn't we? To be specific, our little affair this year will give birth to TV and radio billing weighing in at over $75,000,000, and *that's* a heap of lovin' in anybody's book.

Most important of all, our romance has made McCann clients the happiest mothers-in-law on TV, with big bouncy shows like *Climax, Shower of Stars, Studio One, Disneyland*, and many, many, many others.

M-E loves you, so, please, keep right on calling us with those big, bright ideas. (If a man answers, keep talking anyway; we're a pretty broad-minded lot.)

"Give to the world
the best you have
...and the best will
come back to you."

I don't know the author,
I wish I might have written it.

But Queen For A Day
has been doing all right for nearly
eleven years.

Top Agency Presidents

• Pictures and profiles of the men who held the billing reins for the top twenty-five ad agencies in the nation. Total investment by these agencies in radio and television in 1955 amounted to more than $675,750,000.

www.americanradiohistory.com

BEN DUFFY, president of BBD&O, has spent his entire career with the firm. Starting at 17 as an office boy, the young Irishman became head of the media department in 1928 when the George Batten company merged with BD&O to form the present company. Baptized Bernard Cornelius, sometime in this period Ben lost his given name, and now only uses it for the most formal signatures. In 1934 he become director of media; in 1938 a vice-president and director, in 1944 executive VP; in 1945 general manager; and finally, in 1946, president. In 1951 Ben found time to author the standard "Profitable Advertising in Today's Media & Markets." He is also a member of the Board of Directors of the Audit Bureau of Circulations, member of the Advisory Committee on Advertising of the Proprietary Association of America.

NORMAN H. STROUSE, the new president of J. Walter Thompson, has spent virtually all of his business career in advertising. He was an advertising salesman with the Seattle Post-Intelligencer for four years before joining the J. Walter Thompson Company's San Francisco office in 1929, where he served in a variety of capacities, including account representative. Strouse enlisted in the Air Corps, as a private, declining an officer's commission, early in the Second World War. He ended his service as a Major, with a Legion of Merit, three campaign stars and a Medal of Merit from the Philippine Government. In 1945 Strouse went to the Detroit office of the Thompson Company where he became a vice president, and later manager of the office.

ADOLPH J. TOIGO, president of Lennen & Newell, Inc., is a strong believer in research, and has spent much of his agency career as a research director. While holding a full time job with John H. Dunham, a Chicago agency, after his graduation from the University of Chicago in 1929, he was a football line coach for Stagg. In 1938 he came east to manage the research department of Benton & Bowles, and four years later moved to Geyer, Cornell, & Newell in a similar capacity. In 1943 he became a vice-president and research director of William Esty Co., and soon became chairman of the plans board and supervisor of the Colgate account. In 1952 he helped change Lennen & Mitchell into Lennen & Newell, and became a vice-president.

SIGURD STANTON LARMON, president and chairman of the board for Young & Rubicam, Inc., began his career as a salesman in 1914 with various companies before becoming district manager of Columbia Phonograph Co. in 1922. In 1925 he joined N. W. Ayer & Son as an account executive. Larmon became associated with Y & R in 1929, reaching his present position in 1942. Born in Stanton, Iowa, July 21, 1891, he attended Dartmouth College, receiving his B.S. degree in 1911 and his M.A. in 1948. Larmon is a member of the U. S. Advisory Commission on Information, a trustee of the Committee for Economic Development and a member of the Research & Policy Committee for the government. He is also vice chairman of the U. S. Council of the International Chamber of Commerce.

MARION HARPER, JR., president of McCann-Erickson, was born on May 14, 1916, in Oklahoma City, Oklahoma, attended Phillips Academy, Andover, Mass., and was graduated from Yale University in 1938. During the following year he joined McCann-Erickson. After serving successively as manager of copy research, vice-president in charge of research and merchandising, and assistant to the president, Harper became president of McCann-Erickson in December, 1948. At that time the agency had 24 offices and 1,200 employees. Today it operates from 34 offices in sixteen countries and its employees total 2,775. During the same period, the agency's business volume has more than doubled. Harper is also the author of "Getting Results from Advertising."

www.americanradiohistory.com

WARNER S. SHELLY, president of N. W. Ayer & Son, Inc., can really claim to have started his career at the bottom. His first job, in 1920, involved working under the Hudson River on the Hudson tubes. This was a full-time job, and he was also taking full-time courses at Fordham University Law School. His double career caught the attention of friends who worked for N. W. Ayer & Son. He joined Ayer in 1923, worked up steadily through several departments to become a vice president and manager of client service in the New York office in 1938, and a director in 1951. In the latter year he was also elected president. In the average year he travels about 50,000 miles by plane visiting clients throughout the country and as far away as South Africa.

ATHERTON W. HOBLER, Chairman of the Executive Committee of Benton & Bowles, Inc., has been associated with the firm since 1932 when he joined as an equal partner, becoming president a year later. A University of Illinois graduate, Mr. Hobler entered the advertising field as an assistant in the media department of the Gardner Agency in St. Louis, but after six months joined the Appleton Manufacturing Co. as an auditor. By the time he was 24 he had complete authority over sales and marketing, but returned to Gardner in 1919, and by 1922 was vice-president and general manager. Three years later he came to New York as an account executive with Erwin Wasay & Co., and later became a partner. The native of Chicago became chairman of the board of B & B in 1941.

MILTON H. BIOW, chairman of the board and chief executive officer of the Biow Company, has never worked for an agency other than his own. Born in New York on July 24, 1892, and attending schools there, Milt entered the advertising business as a young man, founding his own firm in 1918. He has a keen interest and appreciation of English antiques, whether it be furniture, silver, china or glassware. His mid-Manhattan air-conditioned town house on East 62nd St. is filled with fine pieces, as are the offices of the Biow Co. Strongly disliking personal publicity, his biography in Who's Who is limited to a few lines. He married the former Milise Lane Banning on January 9, 1944. Biow's first principle is to constantly re-examine advertising and merchandising, to quote him, "with an ear to the familiar cash register ring."

FAIRFAX M. CONE, president of Foote, Cone & Belding since 1951, formed the company in 1943 in association with Emerson Foote and Don Belding—all three vice-presidents of the dissolved Lord & Thomas Agency. He started out with L & T as a copywriter after three months on the staff of the San Francisco Examiner. Within nine years he became a vice-president of the agency and manager of the San Francisco office. In 1941 he became executive vice-president and manager of the Chicago office. Since the formation of FC&B Mr. Cone has been successively chairman of the executive committee, chairman of the board, and since 1951, president. He is also a past chairman and currently a member of the advisory council of the AAAA.

JOHN P. CUNNINGHAM, president of Cunningham & Walsh, Inc., has been with the same firm, or its predecessors, since he entered the advertising field as an artist fresh from a World War I tour in the Navy. A Harvard graduate, he started in the art department of C & W's predecessor, the Newell Emmett Co., and quickly moved into copy territory. He was appointed vice-president in 1931 and later became the agency's creative head. When C. D. Newell retired in 1949, Cunningham became executive vice-president. At this time the agency changed its name to reflect current principals. He was elected president in 1954, at which time Fred Walsh became chairman of the board. During World War II, he was a chairman of the creative advertising committee for the U.S.O.

www.americanradiohistory.com

JAMES H. S. ELLIS, president of the Kudner Agency, Inc., has been with the firm since 1935, when it was founded by Arthur Kudner. A native of Rensselaer, Indiana, Jim Ellis entered the advertising field after service with the A.E.F. in the first World War. His first position was with a firm in Columbus, Ohio, and in 1928 joined Erwin, Wasey & Co. as copy chief. On the death of Mr. Kudner in 1944, Mr. Ellis succeeded him as president, and in 1945 became head of the newly formed Kudner Agency, Inc. Jim is board chairman of the National Outdoor Advertising Bureau and a former member of the Board of Directors of the American Association of Advertising Agencies. A resident of New York City, he is married to the former Maxine Courtney Ford, and the father of three sons.

LEO BURNETT, chairman of the board, Leo Burnett Company, Inc., started out to be a newspaperman on his home town paper, the St. John's (Mich.) Weekly, and after his graduation from the University of Michigan, worked for the Peoria (Ill.) Journal. He moved on to become editor of the Cadillac Motor Car Company house organ, and advanced to the position of advertising manager. Mr. Burnett held positions with the Homer McKee agency, Indianapolis, and Erwin, Wasey & Co., Chicago, before opening his own firm—with a staff of seven, and three accounts—in mid-depression 1935. Best known for his creative work, Mr. Burnett is still actively in charge of the agency's creative work. The parents of three children, the Burnetts live on a farm in Lake Zurich, Ill.

BARTON A. CUMMINGS, president of Compton Advertising, Inc., is probably one of the youngest chief executives of a multi-million-dollar corporation in the nation, heading up an agency that has more than doubled its billings in the past 8 years. Following his graduation from the University of Illinois in 1935, he joined his father's agency in Rockford, Ill., and later was associated with Swift & Co., and Benton & Bowles. During the early part of the war, he worked with the OWI and the OPA, later joining the Navy. After V-J Day, Bart spent a short time with the Maxon Agency, and in 1947 joined Compton as an account executive. Three years later he became a vice-president, and in 1952 was elected a director. In January 1955 he was elected president.

HENRY G. LITTLE, chairman of the board and president of Campbell Ewald Co., Detroit, has been in advertising for 36 years, all but three of them in the agency field. He started with Lord & Thomas in 1919, and seven years later was transferred to the San Francisco office. In 1935 he opened an office in Dayton, Ohio, to handle the Frigidaire account. After becoming a vice-president he left the agency to manage the Cincinnati office of Roy S. Durstine, and then moved to the general managership of Campbell Ewald Co. A year later he became executive vice-president and a director. He was elected president in 1952, and chairman of the board in 1953. Henry was recently elected chairman of AAAA board of directors and its operations committee.

WILL C. GRANT, president of Grant Advertising, Inc., established his agency in 1935 at Dallas, Tex., after selling advertising for R. R. Donnelley & Sons from 1932 to 1934. He also sold for W. F. Hall Printing Co. Grant opened the home office in Chicago in 1937. The New York office opened three years later, and several foreign branches are now open. Grant was born in Dallas on Aug. 9, 1906 and attended high school there. He entered Southern Methodist University in 1924. While working his way through, Grant sold so much advertising for the student annual paper that the university abolished the paper on the grounds that big business was not a suitable student endeavor. Grant is also a member of the Indian Hill Club, and the Racquet Club.

www.americanradiohistory.com

HOWARD D. WILLIAMS, newly named chairman of the board of directors of Erwin, Wasey & Co., received his B.S. degree from Massachusetts Institute of Technology in 1911. He joined the Chicago Sanitary District as an engineer the same year. Williams has successfully worked for James McCreery & Co., New York City, Stewart Dry Goods Co., Louisville, and the National Cash Register Co., Dayton, where he was vice-president in charge of foreign operations, before entering the advertising field. At Erwin, Wasey & Co., Williams held several posts, becoming president and general manager in 1947 and now chairman. He is a member of the American Association of Advertising Agencies, director of the Advertising Research Foundation and a 32nd degree Mason. Williams is a World War I veteran.

CLIFFORD L. FITZGERALD, president of Dancer-Fitzgerald-Sample, Inc., has swapped titles of president and chairman of the board with H. M. Dancer for twelve years. After graduating from Dartmouth College, the young native of St. Louis founded the Fitzgerald Advertising Agency in New Orleans in 1927, at the age of 24. In 1937 he left his partners to manage the Chicago office of Sherman &. Ellis & Co., In 1941 Cliff joined Blackett-Sample-Hummert as vice-president and over-all supervisor of the agency's Procter & Gamble account. In 1943, the organization became Dancer-Fitzgerald-Sample, Inc. Cliff married the former Isabel Hanway in 1924, and is now the proud grandfather of six.

WILLIAM B. LEWIS, president of Kenyon & Eckhardt, Inc., brought a broad background of experience in broadcasting to the firm when he joined them in 1944. Starting as an apprentice at J. Walter Thompson, he joined CBS in 1935 as commercial program director, and a year later became the first vice-president in charge of programs, and the network's youngest vice-president. In 1941, at the request of New York's Mayor LaGuardia, Lewis went to Washington as Chief of the Radio Division in the Office of Facts and Figures, with the job of coordinating the government's radio activities. When the OWI was formed in World War II, he was appointed Chief of the Domestic Radio Bureau, and organized and operated the Radio Allocation Plan. Returning to CBS briefly, Lewis joined Kenyon & Eckhardt in 1944 as a vice-president.

ROBERT M. GANGER, chairman of the board of the D'Arcy Advertising Co., spent twenty-four years with Geyer, Newell & Ganger, Inc., and its predecessors, and did a three-year stint with P. Lorillard and Co., before coming to the D'Arcy agency in his present position in 1953. Fresh from Ohio State University, he started with the Geyer Co., of Dayton, Ohio, as an office boy, and in four years—in 1930—was a branch office manager, and in another three, a vice-president. A native of Greenville, Ohio, Bob became a director of P. Lorillard in 1950, and in 1952 was elected president, to become the youngest of prexies in tobacco's Big Five. In 1953 he assumed his present post with D'Arcy. Besides introducing Embassy and Kent for Lorillard, Bob's achievements also include the "Man of Distinction" campaign.

ROBERT M. WATSON, president of Ruthrauff & Ryan, Inc., joined the firm as an account executive in the San Francisco office in 1940, and subsequently became manager of that office. In 1943 he moved to the New York office, and in 1946 became vice-president. Six years later he was named executive vice-president in charge of eastern operations. Before joining R & R Bob had been a newspaper reporter, copy writer, salesman, and retail advertising and sales promotion manager. Mr. Watson married the former Frances Baldwin, and is a resident of Greenwich, Connecticut.

www.americanradiohistory.com

ROBERT E. ALLEN, president of Fuller & Smith & Ross, Inc., joined the agency in 1936 as an account executive, after having his own agency in Philadelphia. In the position of account executive Bob directed the advertising and marketing activities of more than a dozen clients, and gained the experience that has won him a reputation as an expert in marketing and a champion of integrated merchandising. In 1945 he was made a vice-president, and after the death of the late Allen I. Billingsley in 1954, he was elected to the presidency. From 1950 until his election to the presidency, he had served as manager of the agency's New York office. A graduate of Temple and Columbia Universities, he is, at 42, among the youngest presidents of any major agency in the nation.

ERNEST A. JONES, president of MacManus, John & Adams Inc., at 40, is the youngest president of a major advertising company in the nation. With MJ&A since 1938, he came to New York in 1950 to open the New York office, and was elected vice-president at that time. A graduate of the University of Michigan, he returned to Detroit in 1953 as executive vice-president and account supervisor of the Dow Chemical account, and more recently of the Pontiac Motor Division account. While a senior at Michigan, W. A. P. John, then president of MJ&A, visited the campus and was impressed by Ernest, who was business manager of the Michigan Daily. He offered him a job soon after his graduation in 1938.

MAURICE H. NEEDHAM, founder and president of Needham, Louis & Brorby, Inc., has led the agency which bears his name a long way in the 31 years he's served as chief executive officer. From a single room and three modest accounts billing $270,000, NL&B has grown to occupy the top three floors of Chicago's newest and tallest structure—the Prudential building. It represents 17 of the nation's top advertisers, whose billings amount to more than $30,000,000 per year. Needham recently delivered a talk entitled "Towards the Complete Man," outlining the belief he's held since college days that it's the man with a broad base of education in the humanities who makes the most effective leader in advertising, or in any other business.

WALTER C. AYERS, president of Brooks, Smith, French & Dorrance, Inc., is a "salesman." He has been a retail and wholesale salesman, field training supervisor, district manager, branch and sales manager. This covered 17 years before he joined BSF&D's merchandising staff in 1939. A year later he was vice-president in charge of research; by 1954 a senior partner; in 1950 executive vice-president, and in 1955 he became president. Commenting on business, Ayers recently said, "With the U. S. national product forecast at $415 billion in 1960, and with competition in almost all major industries in the 'dog eat dog' stage, it seems we are heading into the toughest fight in the history of business for the greatest stakes in the history of business."

RAYMOND F. SULLIVAN, president of Sullivan, Stauffer, Colwell & Bayles, upon graduating from Yale in 1920, joined Ruthrauff & Ryan as a copy writer and within six years became a vice-president. By the middle thirties he was a director of the agency. In July, 1946, along with Donald T. Stauffer, Robert T. Colwell and Heagan Bayles, he founded Sullivan, Stauffer, Colwell & Bayles, Inc., and became president of what is today's largest post-war agency. Under Sullivan's leadership, SSC&B has grown from $4,500,000 billings in 1947, the first full calendar year of operations, to approximately $33,000,000 in 1955.

in the
Ad Agency Field

BIOGRAPHICAL SKETCHES

OF SOME OF THE TOP-

LEVEL VICE-PRESIDENTS,

TIME BUYERS, ACCOUNT

EXECUTIVES, AND

OTHER AD AGENCY

OFFICIALS

www.americanradiohistory.com

FRANK WHITE, chairman of the board, McCann-Erickson Corporation (International), was born in Washington, D C., and educated at George Washington University. Beginning as an accountant in 1921 he later became assistant to the president of the Union News Company, 1924-29 and then treasurer of the Literary Guild of America from 1929-35. In 1942 he became a vice-president of CBS and in 1948 president of Columbia Records, Inc. This began a series of presidencies: president and director of the Mutual Broadcasting System, in June, 1952, president and director, NBC, January-August, 1953, and chairman of the board of McCann-Erickson Corporation (International) since January, 1954. He is a director for the Better Business Bureau of New York, and also a member of the Armed Forces Advisory Committee for the Northeast Area, and Sigma Nu

FRANK SILVERNAIL heads the radio-TV time buyers department at BBD&O, and is considered a veteran of the field. Before joining NBC as merchandising counsel in 1929, Frank broke into the broadcasting game as a guitar artist on WEAF in the early days. He was first with Pedlar & Ryan before joining Young & Rubicam in a similar capacity and then later, in 1943, moved to BBD&O. A graduate of the University of Rochester, Frank often recalls his undergraduate days where even then he laid plans for a career in sales promotion and time-buying techniques, techniques that have embarked him on a time-buying vocation that comprises handling radio-TV campaigns for every type of product from soap to cigarettes and from beer to automobiles

LESLIE L. DUNIER, director of radio and television for the Emil Mogul Company, became interested in radio after doing a short stint with the Armed Forces Network in England during World War II He began his advertising career with the Sterling Agency, then for a number of years headed his own agency and specialized in servicing radio-television spot advertisers At Mogul he plans the air media strategy for Esquire Shoe Polish, Manischewitz Wine, Rayco Seat Covers, Block Drug, National Shoes, Barney's, and many others When time allows Les enjoys traveling and meeting with the many station people he has done business with through the years

RICHARD P. POWELL, vice-president in charge of information services for N W Ayer & Son, has a background of newspaper work, public relations, and free-lance writing involving scores of magazine stories, articles and serials, and ten mystery novels After graduating from Princeton University in 1930, he joined the Philadelphia Evening Public Ledger, where he worked at everything from police reporter to feature writer In 1940 he joined Ayer's public relations department, but in 1942 was called to active duty in the War Department's public relations bureau. Later he served on MacArthur's public relations staff, and handled many of the press arrangements for the Japanese surrender ceremonies. Returning to Ayer, he was elected a vice-president in January of 1952

NICHOLAS E. KEESELY, senior vice president in charge of radio and TV for Lennen & Newell, Inc, has many current hits to his credit, including "Two for the Money," "Queen For a Day," "Home," and "Today" Born in Philadelphia in 1910, Nick attended Temple University and the Charles Price Advertising School. His first radio advertising job was with N. W. Ayer & Sons, starting in 1928. In his fifteen years with the firm, he held the positions of everything from producer to account executive In 1943 he became program sales manager of CBS, and later with MBS. He is a member of the New York Committee of the Academy of Television Arts & Sciences, and is on the Arthritis and Rheumatism Foundation's Radio Committee.

www.americanradiohistory.com

WALTER WARE, director of television for Scheideler, Beck & Werner Agency, broke into commercial TV in the days of hall-room studios, and hot lights. The native Kentuckian started in radio on the home-town station, WLAP, Lexington, and in 1941 joined the Maxon Agency in New York as a copy writer. He put his theatrical knowledge to work in television experimentation in 1945 by launching the first experimental TV show from the Dumont Wanamaker studios. He is credited with the success of New York's first women's daytime show, "Missus Goes A'Shoppin'", telecast direct from supermarkets. Walt set up the TV department for SB&W when the agency was launched in 1951.

JANE DALY, vice president and radio-TV director of the Earle Ludgin Company, Chicago, joined the company as a young secretary in 1942, and then later became the first vice president at the year-end corporate meeting. Three years after she joined the agency she became the assistant time buyer, and soon after that became head of the radio-TV department. As newest of the agency's vice presidents, Jane continues as radio-television director, a position which she has held for the past several years.

ARTHUR A. KRON, executive vice president, treasurer and radio-TV director of Gotham-Vladimir Advertising Co., is unique in having been with the one agency his entire career, joining Gotham in 1916. Virtually a one-man agency, he is the founder of the International Advertising Convention which he initiated while president of the International Ad Association. Also active in other professional groups, he is charter member of the Association of International Ad Agencies, and the Association of Ad Men & Women, vice chairman and treasurer of the New York World Trade Week Committee, as well as active in the RTES, Radio Pioneers, and others. Chief interests on the outside are golf, gardening, and pistol-shooting.

LYNN DIAMOND, radio and television time buyer for the Emil Mogul Company, joined the agency's time buying department in March of 1953 as executive assistant and was upped to radio and television time buyer in July of the same year, working primarily on the Rayco Auto Seat Cover account. She joined the agency after two years at Cecil & Presbrey, where she was assistant to the account executive on Tintair. Her present job is a prodigious one, since Rayco is a chain of franchised retailers with over 100 stores in approximately 90 markets, and each outlet operates on an individual budget allocation. All radio and television advertising is planned on a local spot basis.

HERBERT GRUBER, business manager of the radio and television department of Edward Kletter Associates, Inc., was previously head time buyer at the now defunct Cecil & Presbrey, Inc., before assuming his present duties, where he is concerned primarily with the purchase of all radio and television time and the execution of all such contracts for clients. A veteran specialist in the time-buying field, Gruber, previous to joining Cecil & Presbrey, Inc., had been with the Biow Company for several years in the same capacity as the post he now holds. Delving in both art and the more strenuous game of tennis, both actively and passively, form two of his most favorite pastimes.

www.americanradiohistory.com

JAMES C. DOUGLASS, vice president in charge of radio and TV for Ted Bates and Company had been, after the war, production manager of the Colgate-Palmolive-Peet Company's radio unit in Sydney, Australia, working for their ad agency, the George Patterson Company, Ltd. He was also formerly vice president in charge of radio and TV at the Erwin Wasey Company. After graduating from Hastings College Conservatory of Music and the University of Nebraska, Jim joined WAAW (now KOWH) in Omaha, as assistant manager in charge of programs. Later he shifted to Central States Broadcasting System as program director, and then later to CBS as program production manager in St. Louis. During the war he was a Lieutenant Commander in the United States Navy.

ROBERT FOREMAN, vice president of the radio-television department of Batten, Barton, Durstine & Osborn, is the youngest man to have been made a vice president of the agency. Starting in the trade copy department 17 years ago, then into consumer advertising, Bob was a VP 10 years later. He headed the first segregated radio group of the agency and, in that capacity, helped with the development of the famous "Chiquita Banana" and "Willie the Penguin" commercials. The author of a bi-monthly radio-TV copy column, Bob has an avid interest in early Americana, and lives in a 150-year-old farm in Westport, Conn.

GERALD GIBSON, chief time buyer at Doherty, Clifford, Steers & Shenfield, Inc., returned to his native state of New Jersey to embark on his agency career with McCann-Erickson, where he estimated radio-TV time for Lever Brothers' products, after he had begun his broadcasting career as a time salesman for WJOY, Burlington, Vt. He joined Doherty, Clifford, Steers & Shenfield in 1953, as time buyer on the Pharmaco and Mmit-Rub accounts. He was subsequently promoted to his present post as head of the time-buying department, supervising the purchase of spot radio and TV and network buying for such accounts as Borden, Bristol-Myers, Curtis Publishing Company, Sonotone and other top-notch clients.

WINSLOW H. CASE, vice president of Geyer Advertising Inc., has been associated with Stinson Aircraft, La Driere Art Service and Chesterfield cigarettes and has served on the advertising faculty of the University of Columbia since first entering the advertising field back in 1927. Formerly associated with Campbell-Ewald as senior vice president, he is known as a major contributor in the development of that agency's television department, working closely with Chevrolet officials in their TV expansion. Active in the presentation of "Famous Jury Trials" and the Notre Dame grid games on DuMont for Chevrolet, Case supervised more than sixty remote events at N. Y.'s Madison Square Garden.

ROGER PRYOR, vice president in charge of radio and television at Foote, Cone & Belding, started off in show business at the age of 18, when he played summer stock and gradually moved to leading parts on Broadway and Hollywood. With an exceptionally large background in the entertainment field, Roger finally moved into radio, first as an orchestra leader, then as MC on the Gulf Screen Program. He joined Foote, Cone & Belding in 1947 as director of television. Among the clients he has presented on TV are Union Oil, Sunkist, Pepsodent, Kleenex, Toni Home Permanent, B-B Ball Point Pen, Rheingold Beer, and the New York Central Railroad.

www.americanradiohistory.com

DAN SEYMOUR, radio and television supervisor of J. Walter Thompson Company, is a well-known radio veteran, as well as a pioneer in television, both as a performer and as a producer. His greatest fame came as the emcee of the very popular "We the People" show on radio, and Dan was largely responsible for the long list of firsts accredited to the show. While at Amherst College, Dan was active in campus dramatics, and at 18 went abroad as a guest of the Austrian Ministry of Education to study and teach stage techniques. Dan was with Young & Rubicam for five years in a position similar to his present one with the Thompson Agency, which he joined in 1955.

HARRY WAYNE McMAHAN, vice-president in charge of TV-radio commercials and a member of the Creative Plans Board at McCann-Erickson, Inc., is the author of "The Television Commercial," and "TV Production Handbook," which is scheduled for publication late this year. Mac was born a Hoosier, raised in Texas and transplanted to California before moving to New York two years ago to join McCann-Erickson. In 1935 he wrote and produced his first advertising film, and in 1939 founded Five Star Productions, Inc., in Hollywood. Since then he has written more than 3,000 commercials, and supervised production on more than three times that many. McMahan's articles in television production have appeared in trade publications in both Britain and America, and have been translated into Spanish and Japanese.

SAMUEL H. NORTHCROSS, vice president and director of television for the William Esty Company, is a scholar with a background in both the newspaper and audience measurement field. After graduation from North Carolina University, Sam studied at Oxford University, England, and returned to enter the newspaper field as reporter and country editor for the Washington Herald. He spent five years with the George Gallup organization in public opinion and audience research, before joining Young & Rubicam for a two-year period. A veteran of the Army Air Corps, from which he emerged with the rank of captain, Sam was a vice president and manager of television production for Esty for five years before his appointment as over-all director of the agency's television department.

JOHN R. SHEEHAN, vice president and director of radio and television for Cunningham & Walsh, Inc., launched his career as a featured vocalist at WGY, Schenectady, under Kolin Haeger. Moving over to the business side of radio, John became assistant to the station manager and, in 1936, joined General Electric as manager of international broadcasting. In this position he inaugurated, staffed, and managed GE's full-time FM station and had supervision of the planning and editing of GE's documentary and institutional films. After Pearl Harbor, he was appointed Chief of Facilities and Radio Operations of OWI, and was responsible for all communications for both OWI and the Armed Forces Radio.

MYRON P. KIRK, senior vice president and director of television and radio for the Kudner Agency, Inc., is a veteran advertising man, and was a pioneer of many of today's radio and TV formats. He received training in the banking, brokerage, agency, theatre, radio, and movie businesses and, from 1938 to 1941, he served as a vice president of Famous Artists, and had previously been a vice president of Ruthrauff & Ryan, Inc. He joined the Kudner Agency as director of radio and was among the first to recognize the potential of TV. He is credited with many of the experiments which helped the medium come of age. Becoming vice president of radio and television, he helped set the pattern of the original Berle show and of the Caesar-Coca show.

www.americanradiohistory.com

JOHN PAUL MARSICH, assistant media director for the Kudner Agency, has attended Columbia and New York University, graduating from NYU with a degree in Business Administration. He began his advertising career with NBC in 1940. In 1943 he left NBC to join the service. As a lieutenant in the navy, he commanded an LSM in the Pacific Theater until the end of hostilities, whereupon he returned to the television department of NBC. By 1949 he had advanced to supervisor of production costs on all network shows. He served in that capacity until August of the same year, when he accepted an offer from Kudner to join the agency as assistant business manager of the radio-television department.

GEORGE POLK, radio-TV supervisor with Batten, Barton, Durstine, & Osborn, Inc., attended Hotchkiss and Pomfret Schools in Connecticut. With BBD&O since 1950, George is a graduate of Erskine College, South Carolina, getting his BA degree with the class of 1950. He started his advertising career in the mail room of BBD&O and, progressing steadily, he went on to research, time buying, to his present post, where he works with Robert Foreman, vice president in charge of the radio-television department. George, still single, is a native New Yorker.

LOCKE TURNER, media director of Batten, Barton, Durstine, & Osborn, Inc., Los Angeles, joined the firm after graduation from Stanford University, and has now been with BBD&O for the past seven years. He began as a trainee and was promoted successively to production and account duties. Prior to being named media director, he was an assistant account executive on the Rexall Drug account for a period of four years. He was married to Barbara Walsh early in 1955, she being the assistant to the research director of BBD&O, Los Angeles.

FRANK MINEHAN, vice president, media director and member of the plans board at Sullivan, Stauffer, Colwell & Bayles, had before that post spent a short time as media director at Pedlar & Ryan. With Sullivan, Stauffer, Colwell & Bayles since 1946, Frank had been media director and a Brand Man at Lever Brothers Company in Cambridge, Massachusetts, before coming to New York. After graduating from a finance school in Boston, he began his business career as a public accountant and school teacher. After joining Lever Brothers Company, he switched to advertising and he has continued brilliantly in the field since that time.

GEORGE KERN, associate media director of Lennen & Newell, Inc., started in the advertising business in 1923 with the Chicago office of the George Batten Company, now known as BBD&O. After several years there in various departments and capacities, including several weeks in the New York office, George joined Blackett, Sample, Hummert (now Dancer, Fitzgerald & Sample) in 1931, as an assistant account executive on the Parker Pen, Insulite, Stewart-Warner accounts, remaining there for several years. In 1940 he joined Benton & Bowles as chief time buyer. During World War II, he served on the staff of General MacArthur in the Moral Services Section. Prior to joining Lennen & Newell, he was associated with Benton & Bowles.

www.americanradiohistory.com

LEONARD F. ERIKSON, vice president of McCann-Erickson in charge of the central radio-television department, started with CBS in the early days of commercial radio, after receiving a degree in journalism from the University of Wisconsin and a graduate degree from the Harvard School of Business Administration. His first major position with CBS was as Western sales manager working out of Chicago, and later on as general sales manager in New York. After 14 years with the network, Leonard went to BBD&O in 1945 as assistant to president Ben Duffy, and handled liaison between management and the radio department. His next move was to Kenyon & Eckhardt, where he was vice president and director of radio and TV.

HENRY FOWNES, vice president, director of the radio and television department, and manager of the New York office of MacManus, John & Adams, Inc., started his advertising career in the mail room of Benton & Bowles. It wasn't long before Hank was appointed to the post of assistant executive on the lucrative TIDE account, but soon after left to become a radio-television producer with Fenton Productions. In this post he serviced numerous accounts, among them those of Cadillac and Pontiac, whose primary agency is the MacManus Agency, with head offices in Michigan. When they decided to open offices in New York, Hank was chosen to head the air waves department, later becoming manager of the New York office and vice president.

WALTER CRAIG, vice president in charge of television for Norman, Craig and Kummel, started his career in show business, but in 1930 moved into the ground floor of radio as program director of the old World Broadcasting System. A native of St. Louis, Walter left World to found his own producing firm, and created top shows for clients such as Chevrolet, United Drug, Coca-Cola, Beechnut Packing, Carter Products, and Wheaties. Illness forced him to retire for two years to his home in Bucks County, Pennsylvania, where he raised cocker spaniels and Guernsey cattle. Unable to leave the field completely, however, he acted as radio consultant for Street & Finney, until his return to full harness in November, 1942, as program director for WMCA.

GEORGE WOLF, vice president and director for radio and television for Ruthrauff & Ryan, Inc., joined the firm in 1953 after seven years with Foote, Cone & Belding, where he was director of radio and TV, supervising a large part of the agency's eighteen-million-dollar-a-year airtime billings. George started out as a free-lance radio writer and producer, contributing to many of the leading programs of the pre-war era. After Pearl Harbor, he served with the Signal Corps Motion Picture Center, assigned to writing and producing documentary training films. After the war, Wolf wrote and produced a weekly network institutional show for NBC, in addition to working on special assignments.

ALVIN KABAKER, manager of the Hollywood office of Compton Advertising, Inc., is unique in that he was a practicing attorney before turning to the advertising field. Receiving both a Bachelor of Arts and a law degree from the University of Chicago, Al practiced law two years before venturing into advertising as a copywriter with Blackett-Sample & Hummert of Chicago, the predecessor of Dancer-Fitzgerald & Sample, Inc. Rising to the production field, he supervised shows such as "Beulah," "Mystery Theatre," and "A Date With Judy," while manager of the Hollywood office. After seventeen years with DFS, Al moved to Compton this year as manager of the Hollywood office.

www.americanradiohistory.com

NORINE FREEMAN, media director for Western Advertising Agency, Los Angeles, was a news reporter for more than fifteen years on mid-Western newspapers, such as the Toledo Blade, the Toledo News-Bee, and the Cincinnati Post. With this background of newspaper reporting, she left the newspaper field for publicity and public-relations work in New York, where she was an account executive with Earle Ferris, Inc., and later radio director of Carl Byoir Associates. Norine left New York for Chicago, where she became publicity director and radio-TV planning director for W. B. Doner and Company. She went to Los Angeles in 1951, and was media director for the Gables Company, before joining Western Advertising Agency.

PETER ARNOLD KRUG, director of radio and television for Calkins & Holden, was formerly with Hicks & Greist for seven years in the same capacity and, prior to that, served as business manager of the radio department of Donahue & Co. He has directed radio and television activities for such clients as Prudential Insurance of America, Stokely-Van Camp, Marculus Manufacturing Company, Oakite, Stereo-Realist Cameras, and other nationally known accounts. His non-agency experience includes five years as program director, writer and performer with WEBR, Buffalo, N. Y., and an earlier stint with WNBX, Springfield, Vt., now WKNE, as station manager.

BETH BROBERG, media director for the Mayers Company, went from USC to Foster & Kleiser Company, where she learned the advertising business working in various departments, including the posting and sales. She left Foster & Kleiser after four years to join West-Marquis, Inc., where she started as a general employee and at the end of a two-year period, was assisting the media director, production manager and chief accountant. Two years later she joined the Jere Bayard Associates as media director where, for three years, she selected various media and kept all agency media records. She was associated with Grant Advertising Agency before joining the Mayers Company in 1951.

JOHN GAUNT, director of television and radio for Grant Advertising, now divides his time between supervising such programs as ABC's "Make Room For Daddy" and "Lawrence Welk Show" and NBC's "Roy Rogers Show", in addition to creating filmed commercials for national Grant clients. Formerly a director and producer of many top-rated network shows, Gaunt, when recently asked to define his position, replied, "Television and radio broadcasting today is made commercially possible only by combining the talents of two widely divergent types of creative people—the artistic theatrical type and the sales managerial type—each is able and resourceful."

H. PIERSON MAPES, general manager and vice president in charge of radio and TV in the New York office of Hutchins Advertising Company, Inc., joined the May Radio Corp. in 1930 and became sales promotion and merchandising manager in 1933. In the same year he moved from May to Philco as sales promotion manager. Coming into TV via radio advertising and merchandising, Mapes joined the Hutchins agency in 1945 and has been responsible for the radio and television activities of Philco Corporation ever since, with a notable series of shows, including "Radio Hall of Fame," "Bing Crosby Show," and the "Philco Television Playhouse" on NBC-TV. Pierson also supervises planning of Philco conventions and other national activities.

www.americanradiohistory.com

DON BLAUHUT, radio-television director of Edward Kletter Associates, holds a Bachelor of Arts degree from Ohio State, which he gained in three rather than the customary four years. A native New Yorker, Don has been associated with the H. B. Humphrey Agency, and in 1950 joined the Peck Advertising Agency as the assistant to the director of radio and television, and the following year was advanced to become director. In 1952 he joined Raymond Spector as radio-television director, where he worked principally on "This Is Your Life." In 1953 the young veteran of World War II joined Kletter in a similar capacity, and is working on such programs as "The Red Skelton Show," "Meet Millie," "Douglas Edwards With the News," and "Masquerade Show."

VICTOR SEYDEL, vice president for radio and television for Anderson & Cairns Agency, never had any doubt about his career. A star performer on the school and dramatic society boards of Grand Rapids, Michigan, and later Pottstown, Pennsylvania, Vic was all set to enter Michigan University, when an RKO theatre manager offered him a summer job as a song and dance man in Chicago. The job lasted two and a half years, and Vic's been connected with show business ever since. He started in radio with the old Blue Network, now ABC, as a director, and worked on such top shows as "Counter-Spy" and "Ladies Be Seated." In 1944 he became Eastern radio and television director in the New York office of the Walker & Downing Agency, and later moved on to Anderson & Cairns in a similar capacity.

FRANKLIN ROBERTS, vice president and director of radio and television at the Will Roberts Advertising Agency in Philadelphia, brings a wealth of varied experience to his duties. While studying at the University of Pennsylvania, Frank was both a campus correspondent and sports writer for the Philadelphia Evening Bulletin. Upon graduation his first position was with the Harry Feigenbaum Ad Agency as radio continuity writer. He soon became a director for radio and television and, in addition, wrote musical jingles for both mediums and created TV commercials. From there, Frank moved to his present position, where he maintains an active interest in Philadelphia's television association, and is an active sportsman.

EDWARD RATNER, radio-TV director of Friend-Reiss, has had a varied career as a ghost writer for a syndicated column, a short-story writer, and a free-lance script writer, although he is only 31. A veteran of World War II, in which he served as an aerial gunner, Ed received a degree in English from NYU and received his first experience in advertising as a radio-TV copy chief with Product Services, Inc., where he created and scripted numerous shows for both mediums. A native New Yorker now residing in Hudson County, New Jersey, Ed is a member of the Radio Writers Guild since 1946, and a director of the Metropolitan Advertising Men.

BARBARA JONES, Donahue & Coe time buyer, is a graduate of Smith (cum laude) and formerly on the staffs of Mademoiselle, Life, and Television magazines, free-lancing with scripts to all major outlets. The blonde member of the Jones Girls' time-buying triumvirate, none of whom are related, Barbara, after a stint with the package firm of Video Associates, Inc., embarked on her agency career with Grey where, for over five years, she ran the gamut of production, business management, talent buying, et al, to become the administrative assistant to the radio-TV vice president. She's been in her present post for over 30 months, and lives in Greenwich Village.

www.americanradiohistory.com

EDNA S. CATHCART, chief television and radio time buyer for J. M. Mathes, Inc., is one of that small group of advertising personalities who have maintained a long and unbroken association with one firm. Edna started with the Mathes firm in 1937, and since then has gained a broad experience in all branches of the advertising field. Her first taste of huckstering was with Young & Rubicam, where she spent three years. At present Edna is responsible for the purchase of all broadcasting time for the firm, which handles such accounts as Canada Dry Ginger Ale, Inc., Ludens, Inc., the Northern Warren Corp., Bates Fabrics, and the Capehart Farnsworth Co.

WILLIAM L. WEDDELL, vice president in charge of broadcasting for the Leo Burnett Company, Inc., joined the firm in 1946 after a long association with the National Broadcasting Company, which he joined in 1929, soon after his graduation from the University of Chicago. With NBC he served as sales promotion manager, account executive, and chairman of the operations committee in Chicago. Later, he became radio director for Erwin Wasey & Co. Bill is a member of the National Committee on Television and Radio Policies of the AAAA.

CHARLES W. CURRAN, television film producer at McCann-Erickson, Inc., commenced his advertising career with general agencies in Chicago before coming to New York. In 1931, after his play "Ad-Man" was made into a feature by RKO-Radio Pictures, Charlie went into film production with several major companies. During the war he served at the Naval Photo Center as head of writers and directors division. He's been in the production of film for television since 1947, and was given many awards for the work of his company, Times Square Productions, Inc., before returning to the agency field. He also found time to author the "Handbook of Television and Film Technique." Charlie is a member of the Variety Club, the Lambs, RETS, and SMPTE.

JOSEPH P. BRAUN, vice-president in charge of media at Kenyon & Eckhardt, Inc., joined the firm in 1933 as an office boy. Over the years he has advanced through various jobs within the agency, including media clerk, research reporter, statistician, and space buyer. In 1942 he was appointed media director, and in 1947 was elected vice-president. He was elected a director in the same year. Joe is a member of the AAAA Media Committee and a director and member of the Executive Committee of the National Outdoor Advertising Bureau. He is unusual in the advertising field in that Kenyon & Eckhardt has been his only agency affiliation.

WICKLIFFE W. CRIDER, vice president in charge of radio and TV for Kenyon & Eckhardt, Inc., has been with the firm since 1952. A graduate of Penn State, he began his advertising career as an apprentice with J. Walter Thompson Co., and soon worked his way to the radio publicity department, and thence into production. He moved to BBD&O as a developer of new programs for radio and TV. He ultimately became vice president of that department.

www.americanradiohistory.com

WILLIAM R. SETH, JR., vice president and director of radio and television of Lewin, Williams & Saylor, Inc., has a solid background in local radio. A graduate of the University of North Carolina, Bill has been an announcer, disc jockey, and news editor, and has managed stations in Fredericksburg, Virginia, and Youngstown, Ohio. For a time Bill was with NBC Spot Sales and, in 1948-49 was the director of advertising for Muzak. Prior to his present connection, he was vice president in charge of television and radio for Needham & Grohmann, and earlier was radio director of O'Brien and Dorrance. A member of AFTRA, Bill keeps his perspective by doing occasional spot announcements, in addition to being account executive for four advertisers.

TOM McDERMOTT, vice president of radio-television programming at Benton & Bowles, has set an astonishing record for a young man in his early thirties. Tom got a head start as a writer and producer of shows while a student at Manhattan College, as a youthful organizer of a local dramatic society, and as a summer theatre producer. Prior to entering advertising, Tom worked on the staffs of WNYC and WOV and wrote and directed for Ireene Wicker, "The Singing Lady." He has directed "When A Girl Marries," "The Prudential Family Hour," and has written, produced and directed scores of other top-flight shows. A lifetime student of the drama, Tom has studied at Fordham, Columbia, and NYU. He joined B&B in 1942.

JEAN L. SIMPSON, radio and television time buyer at Doyle, Dane & Bernback and formerly time buyer at Anderson & Cairns Agency, is a native of New Jersey, specifically, Passaic. She went out West for her education, receiving a B.A. degree in sociology from Oberlin College in 1947. She began her time-buying career with Anderson, Davis & Platte in 1950, continuing after the agency merged with John A. Cairns Company to form Anderson and Cairns. She's a specialist in the spot field, handling only spot radio and TV while other colleagues handle network purchases. Her outside interests lie mainly in the field of architecture, being the wife of architect John E. Grocco.

ROBERT W. DAY, vice president and radio-television director of Albert Frank-Guenther Law, Inc., has a well-deserved reputation as one of the leading radio-television authorities for Wall St. After graduation from Harvard, he was associated with Broadcast Advertising, Inc., in Boston, where he served as the merchandising representative for network food programs from 1939 to 1942. The war years were spent as a lieutenant in the Navy, and the first post-war period with the John Hancock Mutual Life Insurance Company. Bob has also been radio-TV director of Lynn Baker, Inc., and H. B. Humphrey in New York.

PAUL GUMBINNER, director of radio and TV for the Lawrence C. Gumbinner Advertising Agency, Inc., was one of the creators of the station-break and singing commercials. In 1929, Paul sold the idea of a fifteen-second singing commercial to George Washington Hill of the American Tobacco Company, and then made a tour of the country, explaining the methods radio stations could use to gain revenue by selling station-break time. Paul pioneered in the creation of filmed television commercials in 1947, using his own apartment as a studio, and shooting exteriors on Riverside Drive.

www.americanradiohistory.com

MILDRED FULTON, chief time buyer for McCann-Erickson's Bulova Watch Company account, has served in the same capacity for nine years. Starting on the account in 1947 with the Biow Company, Mildred moved with it to McCann-Erickson in January, 1955. Her experience before that was rather varied, having worked with organizations ranging from tree surgeons to country clubs. During the war she worked as secretary and administrative assistant to Edward W. Barrett, former assistant Secretary of State, with the Office of War Information. Moving to New York City in 1945, Millie entered the advertising field with Free & Peters. She is a native of Stamford, Connecticut, and among her many hobbies, she enjoys doing portraits in oil best.

BERNARD G. RASMUSSEN, manager of broadcast media at Fuller, Smith & Ross, Inc., started as an accountant with Seagram Distillers Corporation. A native of Brooklyn, with a degree in Business Administration from Fordham University, during World War II he saw service as an Air Force navigator in Europe. Bernard joined Ruthrauff & Ryan in 1947 as a timebuyer. He has been with Fuller, Smith & Ross, Inc., in his present capacity since 1952.

JAMES ZABIN, radio and TV director and partner in the Posner-Zabin Agency, has a well-versed background and a wide community of interests that include trusteeship in the N. Y. Society for Ethical Culture, a board member of the Riverside Community House, member of the New York Financial Advertisers, and former officer of the Associated Motion Picture Advertisers and other professional groups. The co-author of "Understanding Advertising," Zabin is equally talented in his artistic pursuits, having exhibited in numerous shows. He began his ad career with Paramount Pictures, later going with United Artists and thence to the Hann-Metzger Agency (now Buchanan Company) for 15 years.

MARVIN L. GRANT, vice president, radio-TV director, and account executive of the Dobin Agency, gained his triple-threat versatility as a free-lance writer-producer-director with the William H. Weintraub Co., where he had an outstanding record of many national radio programs to his credit. He moved over to the Mann-Ellis Agency in a position similar to his present one, where he had overall supervision of radio-TV from time buying through production, as well as executive on six accounts. Grant joined Dobin in his present position in 1955.

KENNETH G. MANUEL, vice president and director of TV and radio at D. P. Brother & Co., entered broadcasting as the discovery of the veteran Harry Bannister, quickly becoming a full-time newscaster and commentator on WWJ, Detroit. He became a TV pioneer when he inaugurated the first major educational telecast, "Television University," staged on WWJ-TV in collaboration with the University of Michigan, the University of Detroit, and Cranbrook Institute of Science. Manuel's alma mater, the University of Michigan, where he was an outstanding sports star, continued the series on the same station as "Telecourses," and has won many commendations for it.

www.americanradiohistory.com

PHILLIP ROUDA, Chicago vice president in charge of radio and TV for Bozell & Jacobs, Inc., joined the agency in October, 1944, as a copy-writer, after serving with the Army Air Forces as a radio instructor. He has been with the agency for ten years. His previous background included motion picture work with National Screen Service and Filmack in writing and production and also varied motion picture and other advertising. His radio and TV work at Bozell & Jacobs includes program and spot buying for the cream of the agency's clients. He has won six Chicago Federation Advertising Club awards for individual ads and campaigns handled as creative account executive. He was educated at the University of Chicago.

EVELYN LEE JONES, business manager of the radio and television department, and chief time buyer of Donahue & Coe, Inc., joined the agency as a copy writer, later shifting to the administration and business division. She has been with the agency since 1943 and, prior to that, Evelyn was at City Hall as Civilian Defense Volunteer Aide to the late Fiorello H. LaGuardia. Immediately prior to World War II, she was director of advertising for Theatre-on-Film, Inc. Evelyn has been on the board of directors of Advertising Women of New York, Inc., from 1954-55. She attended Columbia University and Rochester University. Marriage entered the picture in 1934 when she met Charles Reed Jones.

RINO NEGRI, vice president and member of the Executive Committee of the Emil Mogul Company, is a leading authority on the advertising and marketing of Italian-American products, particularly in the radio-television media. Born and raised in Venice, Italy, Rino is a graduate of the College of Milan, and speaks and writes five languages fluently. He got his start in advertising as an Italian language announcer at WOV, New York. Rino became associated with Mogul in 1945, and since then has directed the very successful campaigns for Ronzoni Macaroni Company, Berolio Importing Company, Gem Oil, and Berio Olive Oil, which have proven his mastery of the Italian-American market.

ALVIN Q. EHRLICH, vice president in charge of radio and television for Kal, Ehrlich & Merrick, of Washington, D. C., is a pioneer and long-time leader of the advertising field in our nation's capital. Al, always active in civic and advertising affairs, was twice president of the Washington Advertising Club, has been a director of the Better Business Bureau, and is a member of the Radio Pioneers. He entered advertising in 1929 as manager of Raleigh Haberdasher's advertising, and joined the Kal Agency in 1932. Within three years he was a partner in the firm, and after three years in the service during the war, rejoined the firm which reorganized as Kal, Ehrlich & Merrick.

JOHN P. ATHERTON, vice president and director of radio and television for the Atherton & Currier Agency, brings a unique talent to his position. John is an accomplished musician and composer, and has created both music and lyrics for many of the agency's radio and television jingle commercials, in addition to many musical novelty announcements. He studied at the Oberlin (Ohio) Conservatory of Music and, after receiving a B.A. degree in music from Bard College in 1942, he spent the next 38 months in the U. S. Army, 20 of them in the South Pacific theater. On his return in 1945, he joined the agency and, in addition to his musical work, has assumed the duties of radio and television director.

KAY OSTRANDER, time buyer for the Dan B. Miner Company in Los Angeles, went to work as a secretary for McNeil & McCleery, a Los Angeles agency in 1948, where she remained until 1950. She first became interested in advertising agency work while employed by CBS-KNX in the post-war days. The vice president in charge of radio and television at the Miner Company, Hilly Sanders, offered her the job as time buyer for the agency. Kay has just passed her fifth anniversary with the agency and looks forward to being with Dan B. Miner Company long enough to have one of her daughters replace her at the job.

ROGER C. BUMSTEAD, media director of David J. Mahoney, Inc., was formerly with the Maxon Agency as a time buyer. He assumed his present post in January, 1954. His responsibilities at Maxon included recommendations on spot-time purchase, market research, rating and cost per M analysis. The accounts he served included Packard Motor Car Company (television network programs and radio announcement campaigns), Snow Crop Marketers and Gillette Safety Razor Company. Prior to that he was with the Katz Agency for over two and a half years in the promotion and sales data department.

HAROLD A. DAVIS, head time buyer for Erwin Wasey & Company, joined the organization in October, 1953, when he switched over from Doherty, Clifford, Steers & Shenfield, where he was assistant to the head time buyer. While there, he became buyer on the Bristol Myers, Borden's and Welch accounts. He got his start in the advertising business at Benton & Bowles, after spending four years with the Air Force, serving in China with the 14th Air Force, and then taking a Bachelor's degree at Marietta College, Marietta, Ohio. His first position with Benton & Bowles was that of budget coordinator on Procter & Gamble.

JERRY BERGHOFF, executive vice president and radio-TV time and talent director of Berghoff Associates, Inc., Los Angeles, has a background of actor, producer, director, and writer for radio-TV shows in Seattle and Los Angeles. He organized the department of radio-TV at Berghoff Associates in 1949, and now directs all media, space, and time buying, besides handling account executive duties for the agency's fifty national manufacturing accounts. He is a charter member of Sigma Beta Chi, an honorary fraternity, married, and the father of one son, Eddie Marc.

E. A. "TIM" ELLIOTT, media director and vice president of the Fletcher D. Richards Agency, has spent his entire career (over a quarter of a century) with one agency. He directs the purchase of TV and radio time for U. S. Rubber, Eastern Airlines, Dixon Ticonderoga Pencils, Waterman Pen, American Machine & Foundry, among others, as well as serving as account supervisor on many key accounts. He came to Detroit from Canada when he was 19 to join Campbell-Ewald and when the separate corporate entity of Campbell-Ewald of New York became the Fletcher D. Richards Agency he was made a board member of the new organization, as well as remaining a vice president and media director.

www.americanradiohistory.com

WILLIAM W. LEWIS, radio-TV director on the General Electric account at the Maxon Agency, is a former director of the radio-TV department at the Geyer Advertising Agency and first entered the broadcasting field through the writing route. He's a graduate of the Pasadena College of the Theater in 1941, has acted in two off-Broadway shows, and later developed an interest in radio writing. He did a few free-lance scripts for NBC, where he was subsequently employed as a continuity writer and announcer. He worked on early experimental shows until 1943, when he entered the Army Air Corps, serving as a pilot until the end of World War II. After discharge he worked with Redwood Products, Inc., in a promotion capacity, then later started a 1,000-watt radio station in the Boston area.

WALTER BOWE, time buyer at Sullivan, Stauffer, Colwell & Bayles, Inc., has been head of the department at Ogilvy, Benson & Mather, Inc., after receiving good training at Benton & Bowles in a time-buying capacity. A well-rounded agency time buyer, Walter currently handles time purchases for Pall Mall, Speidel, Vim and other top accounts. He spearheaded the large-scale radio campaigns for Lever Brothers' Good Luck Margarine, in conjunction with the New York state conversion to yellow oleo three years ago and brought fast sales results to the sponsor. Walt's radio baptism dates back to high-school production in his home town of Syracuse, New York, followed by workshop experience at Syracuse University's Radio-TV School.

NEWMAN F. McEVOY, vice president and media director of Cunningham & Walsh, has had previous experience in retailing and in industrial marketing which has provided the background and insight so vital to this highly specialized advertising function. He has been buying space and time for national and local advertisers since 1928. Among the accounts for which McEvoy has supervised media planning and buying are Chesterfield, Sunshine Biscuits, The Texas Company and E. R. Squibb & Sons. He has served as president of the Media Men's Association and is an active member of the Radio-Television Executives Society.

DONALD QUINN, media director of Doherty, Clifford, Steers & Shenfield, Inc., has been responsible for radio-TV time on a wide variety of programs, ranging from the "Garry Moore Show" to "Hilltop House," and has supervised extensive spot buying and participation programming. Don entered the advertising field eight years ago via the research department of Lennen & Mitchell, but soon after switched to media work. Later, while at Ruthrauff & Ryan, Inc., he continued the radio-TV work which opened the path to his present post. Born in Northampton, Mass., Don currently resides in Bronxville, New York, with his wife Margot and their two children, Susan and Douglas.

LYDIA RHYDHOLM HATTON, chief radio and TV time buyer for Foote, Cone & Belding in Los Angeles, spent one year at Ohio Wesleyan University at Delaware, then transferred to the Washington Square College of New York University, majoring in retailing and advertising, where she received her B.A. degree in January, 1948. Shortly thereafter, she joined the media department of Alfred J. Silberstein-Bert Goldsmith, Inc., in New York City. Lydia entered the doors of Foote, Cone & Belding for the first time in September of 1949 as a member of the typing department. In October of 1952 she was named chief time buyer. Lydia was born and raised in Cleveland, Ohio.

WHERE IS RADIO?

☆ ☆ ☆

Here, room by room, is an accurate account of radio sets in homes in the United States as compiled by both the Radio Advertising Bureau and a Politz Research Inc. Study.

	Fall 1955*	Spring 1954**
Living Rooms	25,500,000	25,320,000
Bedrooms	24,000,000	21,560,000
Kitchens	17,200,000	16,100,000
Dining rooms	4,500,000	4,390,000
Other rooms in homes	8,800,000	7,370,000
Total, in U. S. homes	80,000,000	74,740,000
Total, in automobiles	31,000,000	26,180,000
Total, outside homes, except in cars	10,000,000	(Not estimated)
GRAND TOTAL, IN U. S.	121,000,000	100,920,000 (in homes and cars only)

Network Radio To Experience Renaissance

By
ROB'T E. KINTNER
President
American Broadcasting Company

THE time to **sell** network radio, not to sell it short, is now.

This medium possesses the power and magic needed by national advertisers and requires only a vigorous and positive selling approach, such as was used to create it from nothing after World War I to one of America's great sales agents before World War II.

By virtue of its coast-to-coast facilities, network radio at a very low cost-per-thousand delivers potential clients quickly and efficiently. The key to success lies in finding the proper means and time for the particular product.

☆ ☆ ☆

Network radio commercials also serve as the perfect complement to other forms of advertising. It's a known fact that people associate what they hear on radio with commercial copy placed on television, in newspapers or magazines! And once again, at a low cost, network radio can buttress the campaign of many advertisers.

Back in the early days of the industry, our predecessors had to use every bit of ingenuity and resourcefulness at their disposal to put across to the public a then unknown and unpredictable form of communication. When their critics said it couldn't be done, they did it, to paraphrase a line from Edgar Guest. Radio executives admittedly had one advantage in those days over present-day men; there was no past experience to guide them.

☆ ☆ ☆

Creativity, time and money have been lacking in the more recent years of network radio because of the pressure of developing television. But the time has come when TV has reached a degree of maturity and at ABC for example, greater attention is being placed on radio.

We have added new program properties including Walt Disney's "Magic Kingdom" attuning to the aural medium the talent of one of America's great creative artists. This new daytime entry is planned to meet some of the desires of morning audiences, yet while it is new, it is really only old time showmanship of which Disney is a master.

With the "Breakfast Club," also heard in the morning, ABC has found this property as valuable as ever. To insure its financial success, we have found it necessary to change our selling techniques, accommodating advertisers in smaller segments, from five minutes, one-time only to any other amount of time over a year or more. The results have been gratifying, proving that network radio needs only the right combination of time and program for the advertiser to buy.

☆ ☆ ☆

ABC has experimented in other areas of programming, particularly the nighttime, and will continue to try new ideas and techniques to eventually discover what the public and the advertiser wants, knowing that ultimately our endeavors will pay off. Since we are in business for a profit, we have faith in what we're doing and have no intention of going out of the radio business.

While research men have come up with every kind of statistic about radio ("radio set sales are greater than television," "radios are everywhere," "radio appeals to the individual at work or play") television has still capped the headlines on sales and programs. Many radio executives have succumbed to thinking negatively and defensively as a result. Personally, I think this is a great failure on their parts.

Other industries have suffered set-backs such as motion pictures, records, etc. But we have all seen how they have snapped out of the doldrums and are now doing well.

☆ ☆ ☆

Difficulties often serve to rally the best in a person or an industry and I sense that this is happening in many areas of network radio at this very moment. Self-confidence is being restored and better efforts are being made to compete with other media. It is quite possible that network radio within the next year or so, will experience a renaissance, gathering strength as the industry learns to utilize fully its tremendous but now latent potential.

Radio networks can still do the best job in many fields of endeavor and I believe they will continue to do so.

Not expecting miracles overnight, ABC believes that with patience and ability, we will accomplish what some pessimists say can't be done and return network radio to its respected position in American life.

Radio's New Threshold Of Achievement

By
ARTHUR HULL HAYES
President
CBS Radio

THE exciting thing about radio today is that it keeps breaking through its own high "ceilings."

In 1955, there were just short of 15 million radio sets produced — the biggest year for set production since 1948. Equally impressive is the fact that this tremendous year for radio set production came at a time when there were already a record number of radios — **some 132 million of them** — on the job in the nation. Also, out-of-home radio grew to be as large in numbers as the entire medium of television. And still radio continues to grow, expanding as rapidly as the manufacturer can make listening available in new and different ways.

☆ ☆ ☆

Such vast acceptance of radio, of course, means that advertisers must continually re-examine it as an advertising medium. Last year, therefore, was one in which the greatest emphasis was placed on informing advertisers of radio's basic low costs and vast audiences. It was a year of enlightenment for many advertisers. Now, in 1956, radio emerges as a powerful all-purpose tool for the big national advertiser, and one highly effective, as well, for the low-budget advertiser who needs both frequent and continuing exposure.

☆ ☆ ☆

Thus, at the beginning of 1956, we find Chesebrough-Ponds entering daytime radio with co-sponsorships of many different Monday through Friday programs. Hazel Bishop is purchasing a full 15-minute show each weekday, Monday through Friday. Lever Brothers, after a brief absence, is returning to network radio in a similar way. The F. C. Russell Company is purchasing evening segments of "The Bing Crosby Show." F. W. Woolworth has gained customers and prestige through its presentation of an hour-long "live" Sunday musical program. The Insurance Company of North America chose network radio for its fabulous Christmas Eve "Christmas Sing With Bing." And all this activity is taking place on one radio network — CBS Radio.

These new purchases of network radio, of course, augment a list of long-established ones — General Motors, Brown & Williamson, Liggett & Myers, General Foods, Longines-Wittnauer, Wrigley's, Campbell Soup Company, Standard Brands, Pillsbury Mills and many more.

Among all the radio networks, there has been a definite accent on the versatility of radio. Radio's new audiences, its audiences of all kinds of people doing all kinds of things, has been our hue and cry. There is no time of day or night when there is a dearth of listeners, whether at home or away. During one specific 15-minute period on a Sunday afternoon, for example, Nielsen found that more than 3 million auto radios were in use. And during many weekday evening periods, auto radio listening adds more than one-third to the in-home audience.

☆ ☆ ☆

There have been many and varied approaches to reaching these vast audiences on the move, busy with their avocations, driving about the country, and those merely relaxing at home. One pattern seems to have wooed and won more listeners more consistently than any other. And that pattern is the one which CBS Radio adopted. Regular programming of popular stars and programs — the established favorites — has regularly gained for CBS Radio greater audiences than any type of programming by any other network. The serial-dramas continued to draw the biggest audiences in daytime radio. CBS Radio, through nearly all of 1955, produced all ten of the most popular daytime shows. In the evening, favorites Bing Crosby, Edgar Bergen, Our Miss Brooks, Amos 'n' Andy, Gunsmoke, among others, continued to outdraw the competition. Day and night, listeners continued to choose the home stars and the big shows as their favorite form of radio entertainment.

☆ ☆ ☆

And while all the business of programming and selling was going on, there were other examples of radio's inherent ability to serve its listeners more effectively than anything else known to man. The devastations of hurricanes and floods were reported almost the instant they struck. There were many exciting on-the-spot reports from Geneva as well as everywhere else in the world — including Russia, for the first time since 1947. Radio news rose to new heights during the year; CBS Radio exceeded previous peacetime records with 101 news broadcasts a week.

Last year, network radio regained a great part of its glory and is now on the threshold of new and greater achievements.

Radios Bought Every 4 Seconds In America

By JOHN B. POOR
Executive
Vice President
Mutual Broadcasting System

TODAY'S miniaturized radio receivers, research-developed in the war years, blueprinted for consumers in 1950 and made available on a mass scale last year, are charting the metamorphic turns in current broadcasting operations.

And they're doing it intangibly as well as tangibly.

Most obvious effect has been the sudden realization of the tremendous number of sets in use, approximately 125-million, or one for every 1.4 people. The RAB's latest brochure states there is a radio for every person in America over nine years old . . . and recent RETMA figures show that there is a radio purchased in the United States every four seconds — 365 days a year! ! I'm sure these radios were not bought to be used as bookends.

☆ ☆ ☆

These startling statistics have awakened broadcasters and advertisers to the co-related fact that radio is the most mobile of the mass communications media. Perhaps the best tribute to the manufacturer's ingenuity has been the development of the miniature tube and the transistor which has made radio so small and portable that today there are people who literally "wear" their sets. It can be listened to — and be a constant companion — no matter where the listener might be and no matter what he or she are doing at the time they're listening.

The most pregnant intangible effect, on the other hand, was the realization too that radio's very acceptance as an essential part of our daily lives had obliterated the aura of romance, of mystery, of actual luxury that had previously excited listeners, and naturally advertisers.

☆ ☆ ☆

This aura now surrounds television, the luxury item. Radio is the accepted thing, the life necessity as common to the American people as the shoes they wear, the bread they eat and the automobiles they drive. Radio is part of everyday life. People would be lost without it.

But they wouldn't realize that loss until radios were taken from them. That's how well radio has become integrated into our standards of living. It has even become the No. 1 item on Civil Defense lists.

This absorption pattern has not been sudden. Originally, as a luxury item, radios were handsome furniture pieces in living rooms — just like television sets are today. Then gradually came the need for second, third and fourth sets in homes — just like there is similar need today for more tv receivers in homes. This prompted development of smaller, table models.

But now the radio-tv receiver set parallel changes markedly. Radios were made, too, for automobiles and trucks. America began spending more of its time on wheels. Radio listening became more mobile — more and more of the personalized and companionate type than the central entertainment unit in the home.

☆ ☆ ☆

War-time development of pocket-sized sets rushed this pattern much faster. Today radio sets, in most homes, are in every room that's used. They're carried in pockets. They're in the cabs of trucks, in cars and taxicabs, in busses, on farm tractors and on motorcycles and bicycles. Last year over 13-million radio sets were manufactured — and they were almost a fifty-fifty split in types between automobile sets and small portables, table models and clock-radios.

This mobility, as we call it, has prompted the new selling and programming techniques we initiated in 1955 and which we will continue to emphasize, with the cooperation of our 560 affiliated stations, throughout 1956.

☆ ☆ ☆

Mutual foresaw changes in listening trends two years ago when the J. A. Ward survey was authorized to measure total radio audiences throughout the day plus the activities and locales of listeners (bedrooms, living rooms, dens, offices, kitchens, etc.). From the welter of statistics that became available to us, Mutual initiated its new programming and selling concepts last year. Continued faith by the nation's top advertisers in Mutual's effectiveness encouraged us to develop the multiple-brodcast, shorter-time-pericd pattern that now marks our schedule.

Mutual is unique in that it operates solely as a radio network. It is our belief that network radio, with its vast potential audience, is a valuable and essential means of national communication. We feel that the industry has an obligation to those who invested their money in the millions of radio sets. Conversely, we believe the adequate fulfillment of this obligation will, in itself, bring about the necessary economic stability, and establish, on a firm basis, the true impact of this medium with both the listening public and the advertisers.

Radio Now Provided With Fresh New Role

By
ROBERT W.
SARNOFF

President
The National
Broadcasting Company

THE broadcasting industry, as it enters 1956, can look back upon a year in which these three facts became clearly apparent: first, television is now well anchored as a powerful moving force in the nation's economy; second, the growth of color television into a national service will soon hit snowballing dimensions; third, the new program and sales concepts of network radio, whatever the title given to them, have provided radio with a fresh and hopeful role in the age of television.

☆ ☆ ☆

For Pat Weaver and myself, and for everyone at NBC, the year just ended has been one of progress and promise. We expanded our color TV schedule by 500 per cent to reach a total of 40 hours live color programming per month. We created new programming forms such as "Wide Wide World," "Matinee Theatre," and "Project 20," and new radio services such as "Monitor" and "Weekday." We pioneered the "Color Spread" sales plan, making big-time evening hits available for the first time to a wide base of advertisers on a single-insertion basis.

☆ ☆ ☆

During 1955, NBC ordered a $12,000,000 expansion of its color production facilities in New York, Hollywood and Chicago, to be completed by September, 1956. These added facilities were designed to permit doubling our color schedule to 80 hours a month. As part of this project, the NBC-owned station in Chicago, WNBQ, becomes the world's first all-color station.

The Maurice Evans dramatic series opened up new vistas in television's constant effort to upgrade its product, and developed new Sunday afternoon audiences.

The year was marked by a more mature approach to world problems. Koestler's great drama, "Darkness at Noon," and the dramatic history "Nightmare in Red," brought thunderbolt impact to the subject of Communism. The full-hour "Meeting at the Summit" provided a stirring prelude to the Geneva talks.

☆ ☆ ☆

"Wide Wide World" freed television from the constraints of the studio and set it to moving back and forth about the United States, across borders into Canada and Mexico, and over water to Cuba with electronic speed. And the great fulfillment of this program is yet to come — when transoceanic television becomes a reality within a very few years.

A new kind of television documentary was pioneered with "Assignment: India," a full-hour "by-line" presentation featuring Chester Bowles.

During 1955, the NBC enlightenment campaign was broadened, with more entertainment programs inserting elements of cultural and educational value into the format. We also set up the television industry's first Children's Program Review Committee to provide us with added guidance in improving our children's shows.

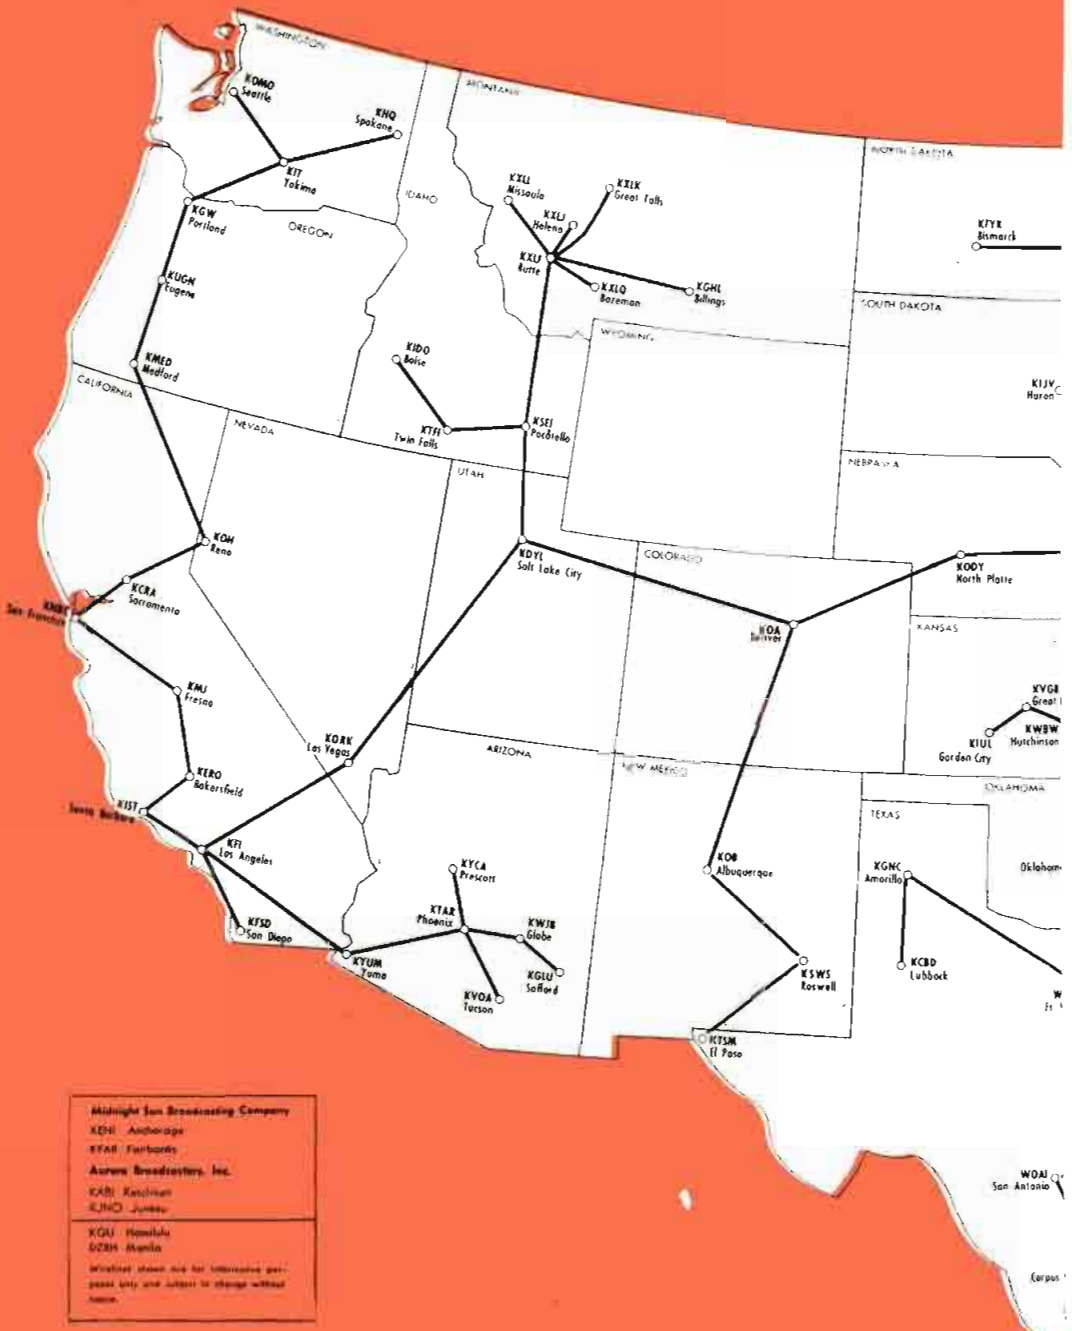

☆ ☆ ☆

Looking toward television's talent needs of the future, NBC created the Talent Development Program, a multi-million dollar project designed to seek out and develop new stars, writers, producers and technicians.

Greater flexibility in programming was accompanied by greater flexibility in sales. Multiple sponsorship advanced to a point where it accounted for more than half our entire schedule. The network served 231 clients in 1955 as against 210 in 1954 and 165 in 1953. All in all, NBC-TV showed an increase of 34.6 per cent in total gross billings over the previous year, and a gain of 22.5 per cent in overall income.

Keystone Hits America's Prime Audience

By
SIDNEY J. WOLF
President
Keystone Broadcasting
System, Inc.

THE primary motivation of advertising is to substantiate sales incentive at trade and consumer levels. In order to do this it is basic that to move goods it is a necessity to also move people.

☆ ☆ ☆

Keystone moves people in a key way . . . it gets people into motion and keeps them moving in the interest of and in the direction of its advertisers' products. The Keystone Broadcasting System audience listens . . . and moves! Keystone delivers one of the most prime audiences to the advertiser that exists in the nation today. From a fall, 1955 government report, these facts emerged: Keystone's market of Hometown and Rural America contains 25,058,420 radio homes consisting of 87,704,470 people. Within this grouping there are over 4,000,000 farms and less than 30% of them have television. Here indeed is an undeniable primary market which deserves principal consideration for any well-directed sales program that lists national coverage as a requisite.

☆ ☆ ☆

The Keystone story would not be complete without the almost fantastic kind of merchandising that exists within the realm of Keystone affiliates. This story is unique in the annals of the radio industry . . . unique because of the geographic and population setup of the area in which Keystone operates. Here in the small, widely scattered communities throughout the nation are the small town nuclei of American community living where station personnel is closely associated with the merchants of each specific community. Here a pattern of close cooperation with retail outlets of advertised products happens day in and day out with results that amaze advertisers of every conceivable type of product. Merchandising contests held by several of Keystone's clients have paid off in rich dividends.

☆ ☆ ☆

Keystone's steady growth is an indication that this approach to advertising is a sound one. Keystone's long list of customers who stay around year after year for this successful treatment is ample testimony to the fact that the advertising dollar spent in the rich Home Town and Rural America market is an investment hard to equal in the media field. Keystone's biggest growth year was 1955 with the list of Keystone's affiliates growing to 875 stations.

☆ ☆ ☆

1956 will probably be Keystone's biggest year in volume of sales to date and this in itself is a commentary on the need for using Keystone as a **supplement** to the rapid expanse of television . . . getting through to the vast daytime market where TV is not a factor in the audience story.

SERVICES OFFERED: The Keystone Broadcasting System is a transcription network which services local radio stations with programming transcriptions, and KBS makes their time available to national advertisers and their agencies at an attractive network package rate.

At present, there are more than 875 Keystone affiliates, located in towns with 10,000 to 250,000 population where they reach both the small town and rural markets. For the most part, these Keystone stations serve those areas which are beyond clear reception areas of the large metropolitan radio stations or other high-power stations. The number of radio homes in the Keystone primary coverage area total more than 25,058,420 based on Nielsen reports, or one-half millivolt where Nielsen report is not available.

Keystone is a flexible media easily purchased, whole or in part. Entire areas or spot coverage may be selected . . . whichever meets the needs of the advertising program. Regardless of the schedule, Keystone makes its time available at a considerable savings.

In operation, Keystone offers the same advantages as the wired networks. Instead of a large number of individual transactions, KBS reduces your problem to one order, one time clearance, one series of Affidavits of Performance, and one invoice.

Many of the nation's largest advertisers are using the facilities of Keystone. Types of programming vary from 25 word spots to one hour shows.

Spot Can Make Or Break National Business

By
ADAM YOUNG

President
Station Representatives
Association

VERY often the question comes up as to what the Station Representatives Association is doing for the industry. Before explaining this, it is important to understand the basic fundamental upon which this Association operates. We believe that a healthy broadcasting industry should be our aim. With this in mind, we can consider only one thing —what is in the interest of the television and radio stations? Because we are their sales representatives, it is natural that we should be particularly interested in their economic health. The SRA, therefore, feels that basically the good of their own industry is tied so closely to what is good for broadcasters, that, for all practical purposes, their aims should be identical.

☆ ☆ ☆

Everything in the broadcasting field depends primarily upon the good economic health of all broadcasters. The amount of public service they can perform and the amount of talent they can develop depend upon economic well being. We realize our responsibility in seeing to it that, so far as we are able, the broadcasting business develops financially.

It is a fact that most major radio and television stations depend upon national spot business, for which we are responsible, to such a point that what we do can virtually make or break the broadcasting business. We realize this responsibility and accept it.

☆ ☆ ☆

Along with this responsibility goes the need to do two things:

1. Pave the way for the development of a maximum amount of National Spot business.
2. Wage war on anything contrary to the best interests of our clients — the broadcasting stations.

During the past year, the SRA has done a great many things — some of these activities have appeared in the trade press but most of them have not. The station representatives have individually developed a number of fine presentations to sell both radio and television. Through the offices of the S.R.A. the various representatives went over their individual presentations with competitors, and, it should be noted, that ours is a very competitive business. This exchange of information is beneficial to all representatives because obviously there is no monopoly on ideas. The representatives, therefore, not only effectively sold the medium on an industry-wide basis, but actually shared their ideas and plans with other strong competitors.

As salesmen we realize that the best way to assure yourself of a sale is to make it as easy as possible for the advertiser to buy. This has meant more and more research to show agencies and advertisers that Spot Television and Radio is the best buy and at the same time simplify as many steps along the way to make our medium one that can be handled as inexpensively as possible. We know that even though what we are selling represents the best advertising buy that it is still expensive for advertising agencies to handle. Step by step we are whittling away at this problem. We are trying to eliminate all of the costly bottlenecks.

☆ ☆ ☆

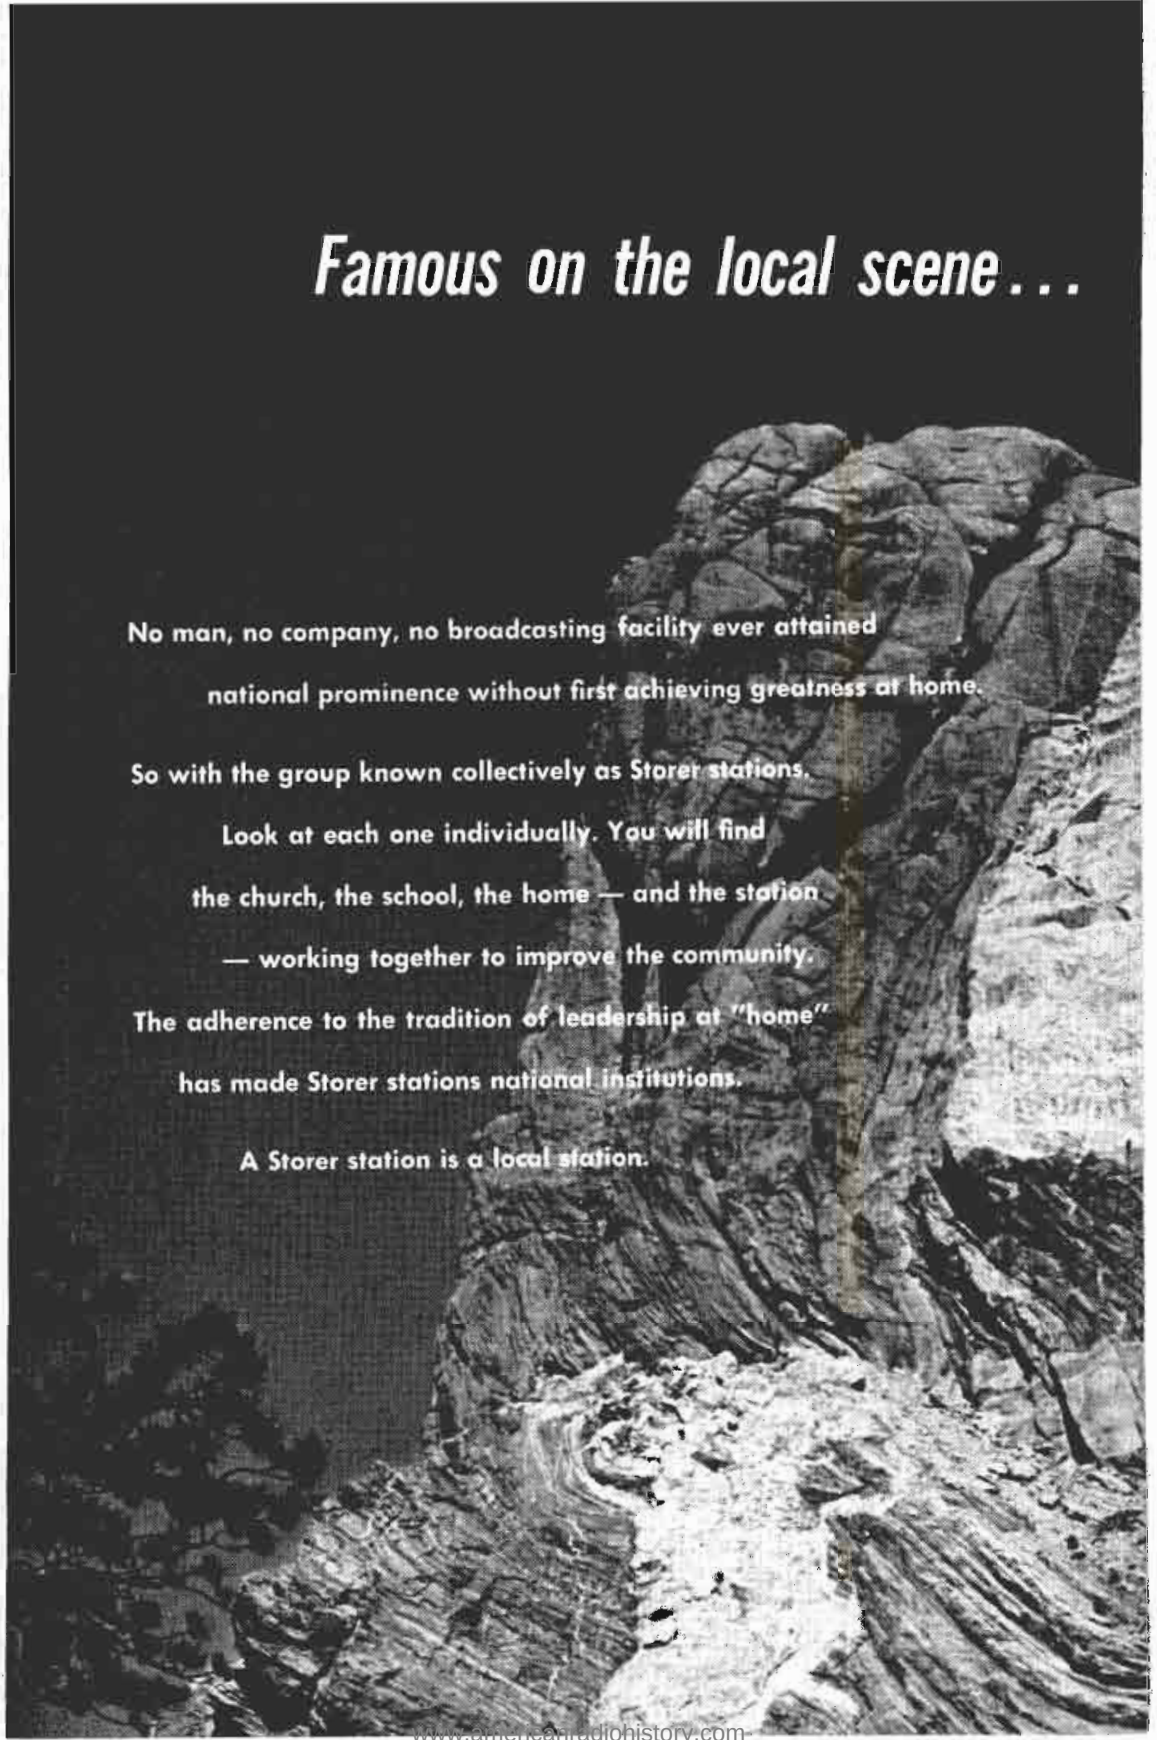

A good example of this is the standard availability form which was introduced last year. Each one of our members and even some representatives who are not members are, as new forms are printed, accepting the new form. This has been approved by the AAAA. In the industry we know the difficulties that were encountered when an advertiser suddenly put on a large coast-to-coast spot campaign. An agency suddenly needs a great many new timebuyers which usually results in the addition of novices. Standard forms overcome many of the difficulties in training these new people. More and more we are standardizing procedures. This makes spot easier to use and results in what we are trying to accomplish — more income for the stations we represent.

☆ ☆ ☆

We have many problems that will never be solved, but they can be kept under control by constant surveilance. One such problem is the matter of local versus national rates. In the stations' own interest we have been attempting to establish definite policies on what should be considered local and what should be considered as national business. The definitions can be easily set forth but the interpretation is another matter altogether. By keeping a close watch in this matter, we have saved the industry hundreds of thousands of dollars.

www.americanradiohistory.com

Famous on the local scene...

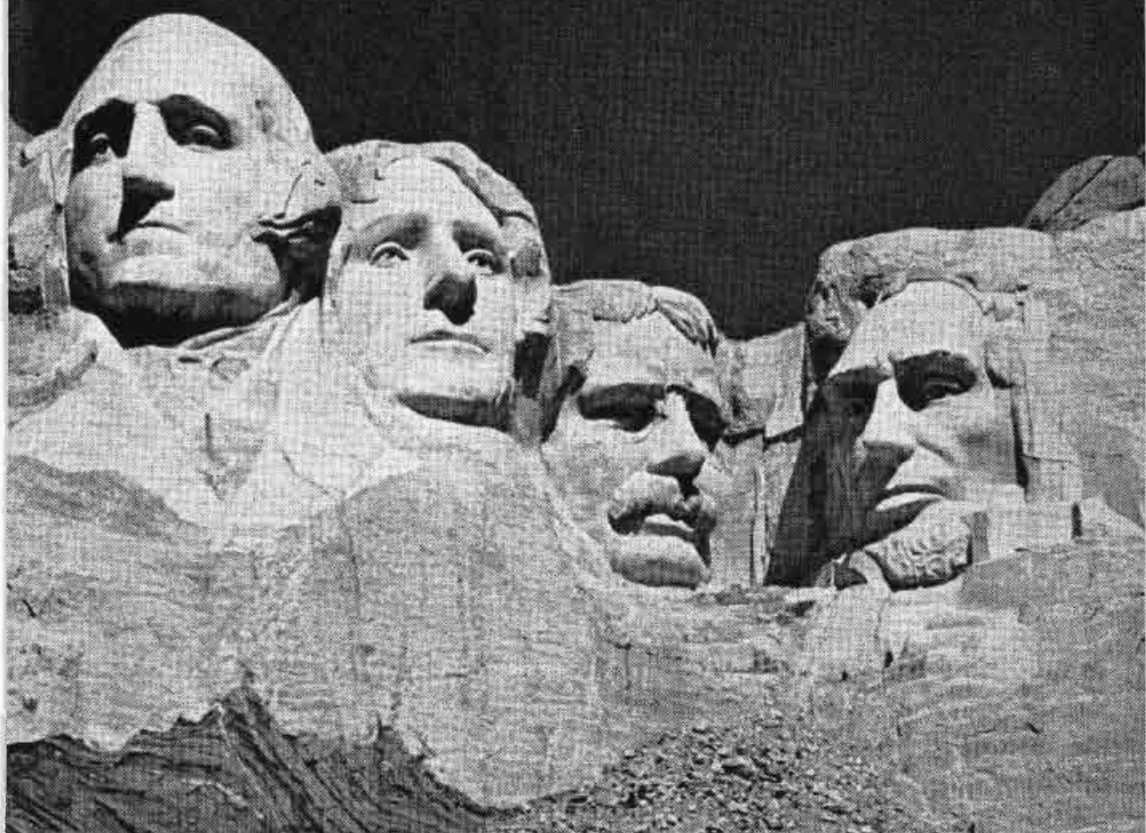

No man, no company, no broadcasting facility ever attained national prominence without first achieving greatness at home.

So with the group known collectively as Storer stations. Look at each one individually. You will find the church, the school, the home — and the station — working together to improve the community. The adherence to the tradition of leadership at "home" has made Storer stations national institutions.

A Storer station is a local station.

WORKING PARTNERS

FRANK HEADLEY, *President*
DWIGHT REED, *Vice President*
FRANK PELLEGRIN, *Vice President*
CARLIN FRENCH, *Vice President*
PAUL WEEKS, *Vice President*

We have found no substitute for experience when it comes to rendering a needed and effective representative service to station owners and buyers of time.

The mature working partners who started H-R all had long years of experience in this field. The men who have joined with us as we have grown, all have been selected on this basis.

That's why, when we say we "Always send a man to do a man's job" we mean it!

Headley-Reed TV

provides

on the spot...service for TV Spot

TV Spot time is sold on Madison Avenue in New York but it is also sold through Headley-Reed offices in Chicago, Philadelphia, Atlanta, San Francisco and Hollywood.

Headley-Reed TV

provides a nationwide cross-the-country sales organization designed to serve and sell advertisers and their agencies on the spot.

All offices are company owned and operated.

FCC Reveals Growth of Broadcasting

☆ ☆ ☆

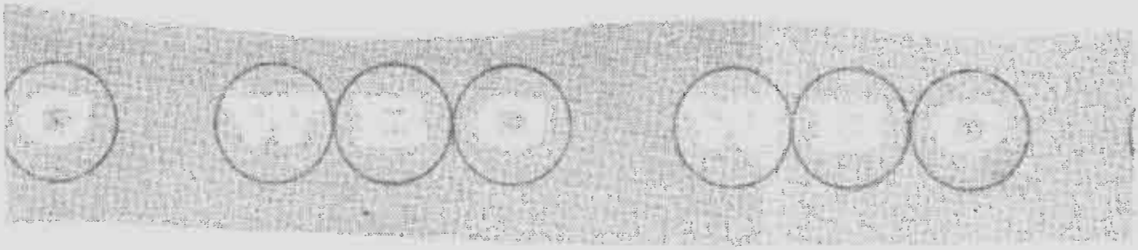

Editor's note: In its 21st annual report to Congress, released late in 1955, the FCC traced the number of authorized, licensed and operating broadcast stations since 1949. The following chart shows Commission statistics from 1949 to 1955:

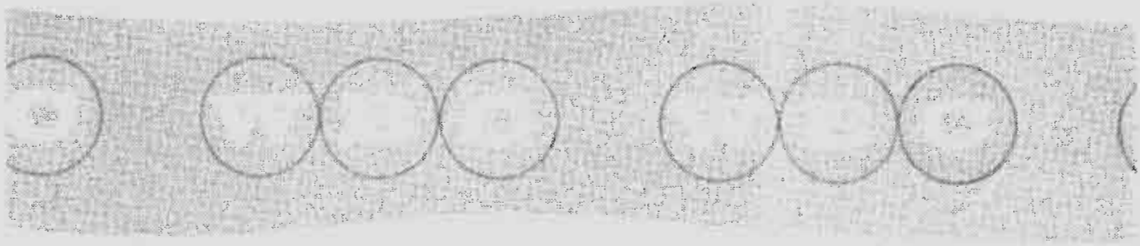

Year	Grants	Deletions	Pending applications	Licensed	CP's on air	Total on air	CP's not on air	Total authorized
COMMERCIAL AM								
1949	200	55	382	1,963	43	2,006	173	2,179
1950	191	70	277	2,118	26	2,144	159	2,303
1951	116	35	270	2,248	33	2,281	104	2,385
1952	60	25	323	2,333	22	2,355	65	2,420
1953	187	23	250	2,439	19	2,458	126	2,584
1954	148	29	226	2,565	18	2,583	114	2,697
1955	161	18	304	2,719	13	2,732	108	2,840
COMMERCIAL FM								
1949	57	212	65	377	360	737	128	865
1950	35	169	17	493	198	691	41	732
1951	15	91	10	534	115	649	10	659
1952	24	36	9	582	47	629	19	648
1953	29	79	8	551	29	580	21	601
1954	27	54	5	529	24	553	16	569
1955	27	44	6	525	15	540	12	552
EDUCATIONAL FM								
1949	18	7	9	34	3	34	24	58
1950	25	4	3	61	1	62	20	82
1951	19	6	2	82	1	83	12	95
1952	12	2	2	91	1	92	12	104
1953	13	1	3	106	0	106	10	116
1954	9	2	1	117	0	117	6	123
1955	7	3	1	121	3	124	3	127
COMMERCIAL TV								
1949	15	7	338	13	56	69	48	117
1950	0	8	351	47	57	104	5	109
1951	0	0	415	81	26	107	2	109
1952	0	1	716	96	12	108	0	108
1953	381	6	572	101	97	198	285	483
1954	174	81	200	104	298	402	171	573
1955	67	58	127	137	321	458	124	582
EDUCATIONAL TV								
1952	0	0	1	0	0	0	0	0
1953	17	0	29	0	1	1	16	17
1954	13	0	17	0	6	6	24	30
1955	5	1	14	1	10	11	23	34

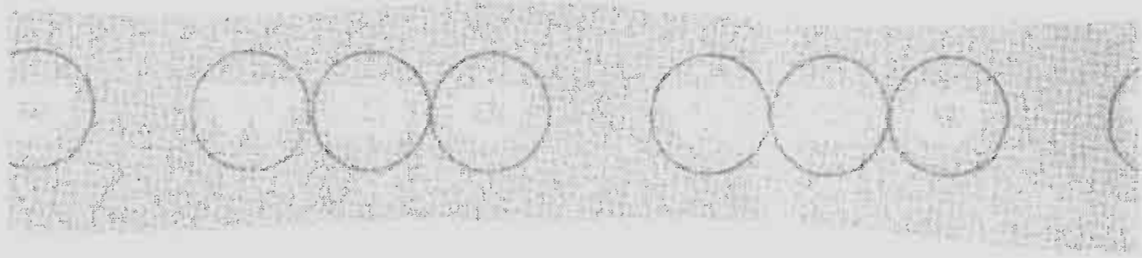

Any seeming discrepancy in the relation of grants and deletions during the year to total authorizations at the close of the year is due to reinstatement of some deleted authorizations and other considerations impossible to detail in this general table.

SEVEN COMPLETE BMI PROGRAM PACKAGES

● THE AMERICAN STORY

Prepared by BMI in association with the Society of American Historians. Each fifteen-minute program written by an outstanding American Historian, expert in the period or subject. Here are the fascinating and inspiring stories of our country from the age of discovery to the age of the atom. Top prestige programming.

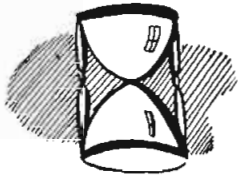

● STORIES FROM THE SPORTS RECORD

Eye-witness accounts of dramatic action on the baseball diamond, in the prize ring, on the gridiron and elsewhere. . . . A complete script package available three times weekly as a 15-minute presentation.

● THE BOOK PARADE

Sparkling 15-minute scripts written by the most prominent of literary figures. This series is being hailed as "a conspiracy against ignorance" and has skyrocketed into national prominence. Another BMI script for top prestige programming.

● MILESTONES

Full half-hour presentations . . . simple to do, saleable, excellent listening. Usually four per month, sometimes five. Each script commemorates a special date or event of national importance.

● ACCORDING TO THE RECORD

Timely facts about the unusual, with musical cues that fit neatly into a dynamic 5-minute show. . . . Highly commercial. . . . . Available 7 times per week for 52 weeks. *Now in its 12th successful year*

● YOUR CONCERT HALL

Full-hour or half-hour programs, three times weekly. Authoritative scripts which make concert music *popular* music. This series has proved that good music has a loyal and solvent audience. Continuity is held to a minimum — music at a maximum.

● MEET THE ARTIST

Behind the scenes . . . three-a-week 15-minute scripts loaded with factual biographical material about recording artists in the public favor. Fills a vital need in areas where such data is not easily available. Highly commercial.

For Sample Scripts and Complete Details Write to BMI Station, Service Department

GET LOST!

That's mighty easy in this TV-Radio business. Very Easy! Once you decide that you don't need creative, down-to-earth and on-the-spot selling plus live active promotion—you're done. You'll get lost mighty fast if you decide you're too big—or too small—to keep punching away at those that buy.

YOU'VE gotta keep SELLING and PROMOTING your station . . . for some eager-beaver is selling his property against yours. We'd like to help.

JOHN ESAU & COMPANY
1601 Graybar Building MU 4-1159
New York 17, N. Y.

www.americanradiohistory.com

There's only 1 Independent in Southern Californ

powerful enough and popular enough
register audiences in radio survey ratin
of both **Los Angeles** and **San Di**

KBIG's 10,000-watt Catalina Island signal focuses all its strength on its mainland market, wastes none out to sea, Booming across salt water (finest natural conductor of radio waves) KBIG covers Los Angeles, San Diego, Santa Barbara, and **all** Southern California

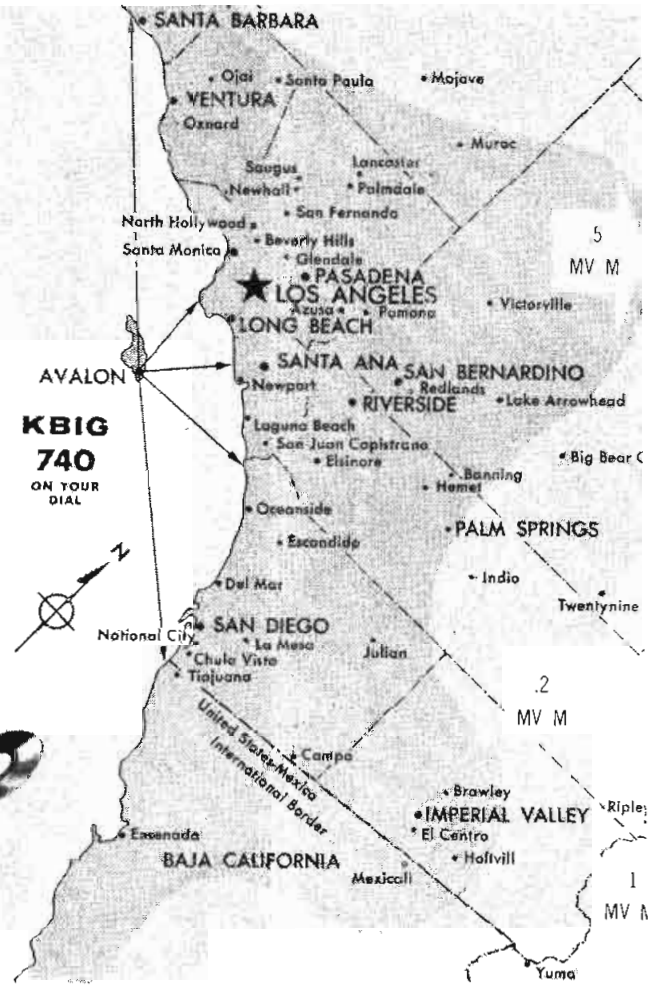

KBIG helps you to make the Whole Sole, to all the Southland, at Wholesale Prices!

Prove It To Yourself! Compare KBIG's base hour rate ($132) or base minute rate ($20) with any combination of newspapers, outdoor, television or radio you need to get this same coverage You'll see why KBIG is the **Giant Economy Package of Southern California Radio.**

Call Weed or us — get the whole KBIG story

The Catalina Station

K

BULLETIN FROM

Betty Thomas
Merchandising
Director

F

A.R.T.B. *** You buy it when you buy KFWB, Southern California's leading Independent radio station . . . A.R.T.B. *** is the rating your cash register understands as KFWB kicks out your message to the huge Southern California market which today does 25% of all the grocery business in the 11 Western States.

W

Now KFWB is ready to convert A.R.T.B. into sales for you with a smashing new Merchandising Program tied into every major market chain and Independent Grocery in Southern California. The KFWB merchandising plan is the shortest distance between your advertising and the customer's sales dollar.

B

***
A.R.T.B. means *AUDIENCE READY TO BUY*

"the Station with Sales Penetration"

980 on the Los Angeles Radio dial

TELEVISION CLICHES

This helps you in any of those new television movies . . . when the picture lags and you want to impress your friends use this cliche at our expense. It will fit practically any place in an airplane picture. It's just another friendly service of KFXM — San Bernardino, California.

"You're not going to send a kid like this up in a crate like that on a night like this?"

*Usually starring that magnetic newcomer Slim Summerville as a mechanic.

to reach GEORGIA'S 63 GOLDEN COUNTIES you need WAGA-RADIO

*THESE 63 COUNTIES...

(39.6% of the state's total of 159) account for 49.6% of Georgia's population, 53.6% of the state's total retail sales, and 53.9% of the total spendable income in Georgia.

To reach the 468,900 families in Georgia's 63 golden counties, you need WAGA-Radio.

Live, wide-awake programming to capture the largest possible audience, backed by aggressive merchandising and a staff of sales-minded people, will help you get maximum results for your advertising dollar.

Let our reps give you complete facts about the expanding Atlanta market and how WAGA-Radio can best be put to work for you.

Don't send a boy to do a **MAN'S** work

Apparently, it is recognized that a multiple number of smaller Georgia radio stations are indicated if one hopes to approach the effectiveness and economy of WSB Radio. This is a protective concept which has prevailed, ineffectively, for the past 20 years.

No other Georgia radio station, or combination of Georgia stations, gives you as many listeners per dollar as you can get on WSB Radio. Ask your Petry man to show you the facts.

WSB Radio
ATLANTA

PORTLAND, MAINE

WPOR is not Portland's only station . . . but

It's the *only* station in Portland where radio is not a secondary operation.

It's the *only* station in Portland that features Music News and Sports.

It's the *only* station in Portland that raked up 15 quarter hour firsts out of 24 tested in a recent Survey. It's the *only* station in Portland that doesn't claim or charge you for questionable coverage outside the greater Portland market —

And it's the *only* station in Portland that can truthfully say,

"Portland's Favorite Station — Ask Anyone!

Represented by
George P. Hollingbery Boston — Kettell-Carter

Stars and Hosts of WXYZ-TV's daytime shows

Look what WXYZ-TV delivers in the Detroit market

Even against network competition, the well known WXYZ-TV personalities who are stars and hosts capture an extra large share of total daytime audience. Between noon and 6:00 P.M., WXYZ-TV's share runs as high as 40%. **Represented nationally by Blair TV.**

34%
of daytime audience
in 4 station market

WXYZ disc jockeys Ed McKenzie, Fred Wolf, Paul Winter

Look what WXYZ RADIO delivers in the Detroit market

WXYZ captures the largest share of daytime radio audience in Detroit. What's more, WXYZ's exclusive mobile radio studio wins an extra large car radio bonus by broadcasting from heavy traffic intersections. **Represented nationally by John Blair and Company.**

17%
of daytime audience
in 9 station market

Kansas City's Most Effective *"ONE-TWO"* ADVERTISING PUNCH!

KMBC-TV

Coverage-conscious advertisers get more than their money's worth when they swing their schedules to KMBC-TV, Kansas City's most powerful television station. With a giant 1,079-foot tower (above average terrain) and a 316,000-watt color-equipped RCA transmitter, KMBC-TV is the giant among television facilities in the Heart of America.

The new KMBC-TV "Big-Time" Daytime format is unquestionably the No. 1 TV buy in the market. Comparison of ratings, cost per thousand and complete versatility of commercial handling show that this fresh, new programming — featuring the Heart of America's finest TV talent — is far and away the best place to put your television advertising dollars.

KMBC-KFRM Radio

Listeners and advertisers alike are finding the New Sound of KMBC-KFRM more and more irresistible! Some of the biggest names in the Midwestern broadcasting world — plus top ABC personalities — produce a new brand of radio that's tailored to the tastes of today's radio audience. Music, News, Sports, Major League Baseball, Farm Service, Women's Programs — there's quality service and entertainment for *everyone* via the New Sound of KMBC-KFRM.

By skillfully integrating *personalized* air salesmanship with the radio services modern-day audiences demand, KMBC-KFRM has created a climate for selling that's unduplicated in the Heart of America. You'll see what we mean when you buy your next schedule on KMBC-KFRM.

the SWING is to...

KMBC-TV
CHANNEL 9

KMBC *of* **Kansas City**
KFRM *for* **the State of Kansas**
1st in the Heart of America

For the broadest broadcasting coverage in the Heart of America market, use the area's most effective one-two advertising punch — KMBC-TV Television plus KMBC-KFRM Radio! See the Colonel from Peters, Griffin, Woodward, Inc.

all three see
EYE-TO-EYE-TO-EYE

No matter who asks the question

KOWH *Omaha*

is the answer!

43.7% overage shore-of-oudience per latest Hooper. Latest Omoha-Council Bluffs PULSE has KOWH on top in every time period. So does Trendex. KOWH is first in every time period of every Omoho survey. Good coverage, too on 660 kc. Call the H-R man, or General Manager Virgil Sharpe.

BUFFALO'S MOST POWERFUL STATION

50,000 WATTS
AVERY-KNODEL INC
National Representatives

BASIC ABC
CLINTON H. CHURCHILL
Founder, President
and General Manager

SATURATION SELLS GOODS

The most successful advertising technique is "telling your sales story to as many people, as many times as you can, within the limits of a sound budget." This is the WKBW SATURATION FORMULA which is bringing increased sales results for WKBW advertisers; and we have the renewals to prove it. A WKBW saturation campaign gives you more than twice as many listeners for your advertising dollar. That's why your sales results will be more than twice as good. For details call any office of AVERY-KNODEL or WKBW direct.

You'll be surprised what $100 a week will buy!

We Make Goods Move

wonderful **RESULTS**
based on 50,000 watt **COVERAGE**
of the nation's largest **MARKET!**

"The excellent showing we have made for the 11 months of 1955 again confirms our judgment in 'putting all our radio eggs in the WMGM basket'."
Herbert M. Adler, Pres.
ADLER SHOES FOR MEN

"Delighted with the response on our promotion of ski tours. Within two days our switchboard was swamped with calls about our tour package."
J. E. Reinke, Vice President
COLONIAL AIRLINES, INC.

"We have used five of the leading stations intermittently during the past four years. The only *station that justified* continuous *use is WMGM."*
Joseph Rudnick, Pres.
SUNSET APPLIANCE STORES, INC.

"Make sure we get those spots again *this year as our dealer organization was very well pleased with last year's schedule."*
E. S. Schulman
SHELL OIL COMPANY

"Results over WMGM were the best in New York City, substantially ahead *on a 'cost per proof of purchase', of TV and all New York newspapers used with the exception of the Daily News, who, too, stood out."*
Martin L. Strauss, II
BYMART-TINTAIR, INC.

GERMAN

ITALIAN

POLISH

RUSSIAN

SPANISH

PLUS

Over half of the population of the New York City Metropolitan Area speaks a language other than English. Spanish, Italian, Polish, German, and Russian can be heard on the streets of New York at any time of day or night. Over 6 million families still use the language of their origin in the home. It is no wonder that WHOM, which for over a quarter of a century has been giving service to these foreign language groups, is *the foremost foreign language radio station in the East*. WHOM speaks the language they understand and therefore has become a great influence in the buying habits of millions. That influence can be put to work . . . SELLING FOR YOU.

. . . "Fiesta Mambo," a bi-lingual, Spanish and English program designed to satisfy the current rage for Latin Rhythm that is sweeping the country. Don Mambo draws his following from both the Spanish and English speaking after hours listeners.

because

- WLIB has more Negro listeners than any other New York station—network or independent (Pulse).
- WLIB is the only radio station in New York City with studios in Harlem.
- WLIB is first in 24 out of 25 quarter hours every morning.
- WLIB is the only New York station broadcasting Negro community news and special events on a regularly scheduled basis —every hour on the half hour.

50 KW

OF GOOD

MUSIC

America's Number One Good Music Station, WQXR, becomes America's most powerful good music station with our new 50,000-watt transmitter.

This means that the demand for the best in music and The New York Times news puts our television-proof program policy in the "big time."

Twenty years of sticking to one idea —good music and news—has enabled WQXR to build an audience of 659,000 families of higher-than-average income in the world's richest market —New York. Our new top-powered transmitter will extend that market further.

Now more people will hear WQXR's excellent programming, more people will hear our sponsors' messages, more people will buy WQXR's advertised products and services. That's what you want, isn't it?

KYW—RADIO

first in Cleveland!

KYW . . . Northern Ohio's only class 1A, 50,000 Watt, clear channel radio station! Covers 32 counties in one of the country's richest industrial areas.

To you this means audience action in the nation's seventh largest market.

KYW serves 4½ million people in the nation's highest per-capita income area.

Put KYW to work for you in Cleveland. Call John McIntosh, Jr., Sales Manager, at CHerry 1-0942, or Alexander W. "Bink" Dannenbaum, Jr., WBC National Sales Manager, MUrray Hill 7-0808, N.Y.

In Delaware Valley, U.S.A....

NOTHING SUCCEEDS LIKE SUCCESS

WFIL TV, like the booming 30-county Delaware Valley U.S.A. which it saturates, is a modern success story without equal.

- Advertisers in Delaware Valley use WFIL-TV more than other Philadelphia stations—50% more than Station A, 70% more than Station B.
- WFIL-TV's unparalleled point-of-sale merchandising support in 3 great supermarket chains has increased food billings 387% in 4 years.
- Delaware Valley's most popular local programming is created by WFIL-TV. "BANDSTAND", for instance, topped all competition since it began, October, 1952.
- Only the WFIL stations—in all of broadcasting—hold more than one du Pont Award—for community service.
- Respected advertisers like FORD . . . ALKA SELTZER . . . RCA . . . ATLANTIC REFINING . . . KELVINATOR use an annual average of 5½ program hours per week on WFIL-TV—and have for the past 5 years.

The surest road to top sales in the teeming Delaware Valley, U.S.A. is WFIL-TV—proven competitively superior service to advertisers and community. NOTHING SUCCEEDS LIKE SUCCESS.

Two's Company

JACK LOGAN starts the day "bright" with music, news, weather. 6 to 9:30 A.M.

AL NOBEL provides pleasant listening with melodic music, home service tips. 3:30 to 6 P.M.

Three's Better Yet!... with Mrs. Pittsburgh!

Mrs. Pittsburgh starts her day with Logan, and keeps tuned to KQV most of the day! Why? She likes the informal style of Logan and Nobel . . . hears her favorite CBS shows in-between. (Mr. Pittsburgh says KQV sports, weather and news shows are great, too!)

That's why you're in good company on

Only BIG radio is BIG enough to reach BIG Texas...

Texans are where you find 'em!
In selling Texas you don't look down your nose at folks with rural addresses. Bless them, they make up 35% of Texas' 8½-million population.
Any plan of advertising that touches only Texas' widely separated big cities does some powerful hop-skip-and-jumping, but *omits* a heap of good people who are able to get their entertainment and information *only* by Radio!
In selling Texans you've got to go BIG with radio — to reach them wherever they are . . . in the cities, the towns, the villages, or the wide open spaces.
Any mass selling of Texas begins with big WFAA's 98% coverage of the largest, richest market area in the Southwest—or the tail is wagging the cow.

WFAA-820 MARKET
25%-100% NCS Area—SAMS, 1952

Population	4,259,500
Households	1,302,550
Radio homes	1,276,460
Cons. spendable income	$5,420,526,000

NETWORKS

...a major selling force in CANADA

RADIO

CBC Radio Networks reach markets large and small in all parts of Canada, with a diversity of news, sports, entertainment and public service features.

To millions of listeners at home . . and to countless thousands on Canadian highways . they bring top-flight program service, both in English and in French.

To advertisers, they provide mass coverage at unusually low cost.

TELEVISION

Through the CBC Television Network . . now grown to 33 stations . . . the tremendous impact of TV is available to advertisers in 31 important market areas from Vancouver, B. C., to St. John's, Newfoundland.

Via Network Television, advertisers can reach a total audience in Canada of almost half the population . over 1,900,000 TV homes . . at surprisingly low cost per home.

The Canadian Broadcasting Corporation extends to advertising agencies and their clients the fullest possible cooperation in the effective use of CBC Networks . . . Radio and Television . . . and in the creation and production of Canadian programs, in both French and English. For complete information, get in touch with CBC.

The grassroots grow dollars in Canada ... get in on the pickings now!

Looking for a spending customer? Then let your sales message be heard in the market where money *does* grow on trees! We're talking about Canada. Did you know that John Canuck pocketed over $2 billion from his tall timber alone in 1954? But wood, pulp and paper isn't all! He's cashing in on the black gold of his Alberta oil fields . . . his rich uranium developments . . . swelling grain elevators . . . and his iron ore deposits south of Ungava Bay. Even in Ontario and Quebec the dollars double as heavy industry gets heavier. Look to the north and you'll see 4,000 miles of bulging pocket book. This is *your* market!

Yes, here is a dollar market with cash customers . . . Canadians! Canadians that are approachable . . . they like the same things you like. Their wives follow the same fashion fads as your wives . . . their kids read the same comics as your kids. They *want* to buy more and they can afford it. All you have to do is tell them about your product and tell them through the voice they know and trust . . . their local radio station.

Local radio will carry your sales message into 95% of all the homes in Canada in a language familiar to each home, English and French. You'll be heard and welcomed as a friend in the company of big network shows *plus* the close-to-home intimacy of news, farm reports and mining broadcasts that only local radio can provide for a community.

What's more, in Canada local radio has a limitless advantage . . . "everywhereness"! This "everywhereness" will set your sales message down in the cities, towns and villages . . . and in the flourishing backwoods. Yes, the backwoods is important. Take Kitimat, for example. Here, locked in the forest, is the world's largest aluminum plant employing thousands of workers and their families . . . all dreaming of things to buy. Local radio is the answer when it comes to penetration, hard-sell and economy. Come into Canada over local radio.

and what about TV?

North of the border the impact of TV is still fresh, new and increasing in intensity. In 1954 the sale of TV sets almost doubled the 1953 sales record. In 1954 a total of 18 new independent TV stations brought a new, curious and enthusiastic audience to Canada's already eager TV viewers. We urge you to cash in on this unique sales opportunity NOW!

Functions

The Canadian Association of Radio and Television Broadcasters is a voluntary trade organization of 137 privately owned (independent) radio broadcasting stations, and 25 television stations in Canada.

www.americanradiohistory.com

IN CANADA RADIO EMPTIED THIS SHELF!

In Ontario, Canada's richest market, $728,630,500* per year is spent on groceries. On CFRB in one month, 91 hours 20 minutes and 30 seconds** were sponsored by people selling grocery items.

Why do the grocery people in Canada buy so much time on CFRB? Because they get results on CFRB.

Other media bring results too. But radio selling messages have a unique persistence, an unescapable quality. Today you find radio selling messages emanating from everywhere, indoors and out, cars, homes, offices.

In Canada to have this "everywhereness" in Ontario—the market where ⅓ of the Canadian population lives, and where 40% of all retail sales are made, is everything!

Why not give the CFRB representatives a call and let them show you what CFRB can do for you in Canada?

Based on Dominion Bureau of Statistics report for period from 1951 to 1952

**Based on CFRB program schedule for January, 1955*

Canada's most powerful independent radio station, gives you:

1. complete coverage of over ½ million radio homes every week
2. your key to Canada's richest dollar market where five million people live—where 40% of Canada's total retail sales are made
3. complete coverage of 44 counties spending $66,283,699.00 every week
4. over twenty-seven years of skill, experience and success in radio showmanship and salesmanship

Call in a CFRB representative todoy. Let him show you without obligation, how you can augment your sales through the result-getting medium of radio.

50,000 watts **CFRB** 1010 on your dial

Famous First Facts In American Radio

By
JOSEPH N. KANE

THE FIRST:

ADVERTISING or commercial radio broadcast was sponsored by the Queensboro Realty Corporation, Jackson Heights, New York City, on August 28, 1922 over station WEAF, the experimental station of the American Telephone and Telegraph Company, New York City. The commercial rate was ten minutes for one hundred dollars.

Baseball (world series) broadcast was effected by WJZ of the Westinghouse Electric and Manufacturing Company, Newark, N. J., which broadcast the National League New York Giants - American League New York Yankees series October 5, 1921 to October 13, 1921. The pennant was won by the Giants who won five of the scheduled nine games. The Yankees won three games.

☆ ☆ ☆

Chain broadcast was accomplished October 7, 1922 by WJZ and WGY of the 1922 World Series baseball game from the field. Ordinary telegraph lines from Newark, N. J., and Schenectady, N. Y., were connected with the Polo Grounds, New York City, where a single microphone connected to these lines completed the requirements. It was not possible to transmit highest and lowest frequencies. Graham McNamee was the announcer. On January 4, 1923, WEAF of New York City and WNAC of Boston, Mass., had repeater points, and amplifiers were provided for faithful reproduction and transmission of both music and speech.

☆ ☆ ☆

Debate over the radio was held May 23, 1922, over station WJH of the White and Boyer Company, Washinglon, D. C. The affirmative "Resolved That daylight saving is an advantage" was taken by Calvin Ira Kephart representing the Miller Debating Society and the negative by Thomas E. Rhodes representing the Alvey Debating Society, both of the National University Law School, Washington, D. C. The audience was requested to act as the judge.

Election returns broadcast was on August 31, 1920, when WWJ of Detroit, Mich., broadcast the results on congressional and county primaries. On November 2, 1920, Leo H. Rosenberg of KDKA of Pittsburgh, Pa., broadcast the results of the Harding-Cox presidential election.

Football (collegiate) game broadcast was presented November 25, 1920 by radio station WTAW of College Station, Texas. The game was played on Thanksgiving Day between Texas University and the Agricultural and Mechanical College of Texas at College Station, Texas. At that time, the station was operating under an experimental license and had the call letters 5XB. A spark transmitter was used and the transmission was in code. This was the first play by play broadcast of a football game.

☆ ☆ ☆

Foreign language course broadcast was March 21, 1924, when WJZ, New York City, operating on a 455 wave length, offered French lessons in cooperation with the Beritz School of Languages.

Musical comedy broadcast with especially composed music, was "The Gibson Family," sponsored by Proctor and Gamble Company of Cincinnati, Ohio, and introduced over the National Broadcasting Company network, September 15, 1934. The comedy was composed by Arthur Schwartz and the lyrics were written by Howard Dietz. The musical comedy was booked for a thirty-nine week period and was broadcast from WEAF, New York City.

Police broadcast was made by Station WIL, St. Louis, Mo., September 4, 1921.

☆ ☆ ☆

Political convention broadcast was June 10, 1924 when the Republican convention assembled at Cleveland, Ohio, nominated Calvin Coolidge of Massachusetts and Charles Gates Dawes of Illinois for President and Vice President respectively. Graham McNamee was the announcer for the program which was carried by fifteen stations of the National Broadcasting Company from Boston, Mass., to Kansas City, Mo.

Presidential message broadcast was on December 6, 1923, when President Calvin Coolidge delivered his message to a joint session of Congress held in the House of Representatives, Washington, D. C. It was broadcast by KSD, St. Louis, Mo., WCAP, Washington, D. C., WDAF, Kansas City, Mo.,

Famous First Facts In American Radio

Continued from Preceding Page

WEAF, New York City, WFAA, Dallas, Texas and WIAR, Providence, R. I., which received his voice over telephone wires. On March 4 1925, he broadcast his inaugural address.

Radio coast to coast broadcast was made May 6, 1937 by Herbert Morrison about the dirigible Hindenburg explosion at Lakehurst N. J. It was broadcast over both the Red and Blue networks of the National Broadcasting Company, from New York City.

Radio program simultaneously broadcast over AM and FM (24) stations, and telecast (5), was on March 20, 1948, when the sustaining feature, the NBC Symphony, was presented. The first commercial program simultaneously aired was "The Voice of Firestone" on March 22, 1948. The New York City outlet was WNBC.

Religious service broadcast was made January 2, 1921 when the Calvary Episcopal Church of Pittsburgh, Pa., broadcast its services through KDKA. The preacher was the Reverend Edwin Jan Van Etten.

Round the world broadcast was accomplished in one-eighth of a second on June 30 1930 by a series of radio relays. Clyde Decker Wagoner spoke into the shortwave microphone from W2XAD, Schenectady, N. Y. His voice was relayed from Holland, to Java, to Australia, across the Pacific Ocean to North America, and back to Schenectady.

Transatlantic broadcast (not experimental) was sent in code January 19, 1903, between Cape Cod, Mass., and Cornwall, England, when greetings were exchanged between King Edward VII and President Theodore Roosevelt.

Transatlantic radio signal was sent from Poldhu, Cornwall, by Guglielmo Marconi and was received at St. Johns, Newfoundland. The letter "S" was repeatedly sent by Morse code at stated time intervals and was faintly received by Percy Wright Paget, and by G. S. Kempon, December 11, 1901, and again on December 12, 1901.

Two-way radio in an automobile was installed by the Chalmers-Detroit Company in an automobile of their manufacture in March 1910 at New York City. The sending set contained two storage cells, a ten inch spark coil, two Leyden jars and a high and low voltage battery, a seven foot aerial, etc. Successful demonstrations were made from the moving automobile in Central Park, N. Y., to the Terminal Building, 42nd Street and Park Avenue, New York City, at distances varying from one to three miles. **(Scientific American May 14, 1910)**

Radio set advertised for sale was the Telimco, (a contraction of The Electro Importing Company) a $7.50 outfit announced in a one inch advertisement in the January 13, 1906 issue of the **Scientific American** inserted by Hugo Gernsback of the Electro Importing Company of New York. It offered a "complete outfit comprising one inch spark coil, balls, key, coherer with auto coherer and sounder, 50 ohm relay, 4 cell dry battery, send and catch wires and connections with instructions and drawings. Will work up to one mile. Unprecedented introduction prices. Agents wanted. Illustrated pamphlet."

Radio Society was the Wireless Association of America formed at New York City, November 1908 with Dr. Lee de Forest as president, Dr. John Stone Stone, vice president, William Maurer, Jr., secretary, and Hugo Gernsback, chairman and business manager. There were no dues and no obligations. Within a few months, more than three thousand members were enrolled.

Radio station. Commercial radio station was 8MK (now WWJ, Detroit, Mich.) which instituted a daily service on August 20, 1920 with the program "Tonight's Dinner." Local election returns were broadcast August 31, 1920. KDKA offered a semi-weekly broadcast from November 2, 1920 to December 1, 1920. KDKA was licensed October 27, 1920.

Radio tube made of metal was announced April 1, 1935, by the General Electric Company, Schenectady, N. Y. The tubes were smaller than the conventional less sturdy glass tubes and provided their own shielding. They are particularly advantageous in the field of shortwave reception as the metal shell is a better heat conductor and radiator than glass.

Three-element vacuum tube was announced to the public by Dr. Lee de Forest at the October 20, 1906, meeting of the American Institute of Electrical Engineers held at New York City. The first three-element tube (filament and two plate electrodes), described as an amplifier of feeble electrical currents, was patented by Dr. de Forest, January 15, 1907 No. 841,387. The first public description of the grid electrode tube was contained in his patent, No. 879,532, February 18, 1908. The name "audion" was given to the tube by Clifford D. Babcock. **(Georgette Carneal — A Conqueror of Space. An Authorized Biography of the Life and Work of Lee de Forest)**

HOW TO APPLY FOR FCC LICENSE

Official FCC Procedure for AM, FM and TV Licenses

☆ ☆ ☆

ANY qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a commercial standard (AM), frequency modulation (FM), or television (TV) broadcast station.

☆ ☆ ☆

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would serve the public convenience, interest or necessity. The Communications Act also recognizes broadcasting as a competitive industry and invests the Commission with the responsibility of allocating facilities so as to provide a fair, efficient, and equitable distribution of radio service.

☆ ☆ ☆

The licensing procedure is detailed in Part 1 of the Commission's "Rules Relating to Practice and Procedure," while station operation is covered by Part 3, "Rules Governing Radio Broadcast Services," and "Standards of Good Engineering Practice" for AM stations.

Following is a summary of the consecutive steps required in applying for authorization to build and operate a commercial broadcast station. The application procedure is substantially the same whether the facility sought is for AM, FM, or TV broadcast.

Selecting a Frequency

Standard (AM) broadcast stations operate on "local," "regional," or "clear" channels. Local stations are of 100 to 250 watts power and serve smaller communities; stations of 500 watts to 5 kilowatts power cover larger centers of population and surrounding areas; stations of 10 to 50 kilowatt maximum power are for large area coverage, particularly at night.

To determine whether an AM frequency is available for assignment in a particular area, it is necessary for the applicant to have a frequency search made by a competent engineer. The Commission's engineering personnel cannot undertake to make such studies for prospective applicants.

☆ ☆ ☆

An applicant for a commercial FM station must specify a frequency available to the area to be served. The Commission has tentatively allocated geographic blocks of frequencies to accommodate Class A stations (community) and Class B stations (metropolitan and rural) throughout the United States. The demand for FM stations has not yet exceeded the supply of available frequencies. (The Noncommercial Educational FM Broadcast Service is a separate category with its own rules.)

☆ ☆ ☆

An applicant for a new television station must request a channel assigned in the Table of Assignments to the community involved. However, a channel assigned to any community listed in the table can be requested for operation in any unlisted community within 15 miles of the listed community. Commercial TV stations are authorized for unlimited hours of operation and are of a single class with minimum power determined by the size of the

www.americanradiohistory.com

principal city and maximum power dependent on antenna height and allocation zone. Channels are reserved for noncommercial educational TV operation.

Applying for a Construction Permit

Once a prospective licensee has decided upon the type of station he wishes to apply for, the next step is to make application for a construction permit. This application must be in writing on a form supplied by the Commission (Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM, and TV broadcast). This form requires information about the citizenship and character of the applicant, as well as his financial, technical, and other qualifications to construct and operate a station, plus details about the transmitting apparatus to be used, and the proposed new service. Triplicate copies are required, one of which must be executed under oath or affirmation.

Application Processing

Applications are reviewed in their engineering, legal, and financial aspects by the Broadcast Bureau, which makes recommendations to the Commission.

☆ ☆ ☆

Applications are, in general, processed in the order in which accepted for filing. There is a Temporary Processing Procedure for TV applications.

If, upon examination of an application, the Commission determines that there are no engineering conflicts, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued.

☆ ☆ ☆

Any grant made by the Commission without a hearing is subject to protest within a period of 30 days, during which the protesting party may request a hearing. Within 15 days thereafter the Commission must determine whether the objection merits a hearing.

The law requires that, in general, final decision on noncontested applications be rendered within three months from the date of the original filing, and within six months from the conclusion of a hearing in those cases which go through a hearing.

Hearings

Where it appears that an application violates provisions of the Commission's rules and regulations; that interference would be caused to another AM or FM broadcast station; or that the minimum separation requirements for TV stations are not met; or if other serious questions of a technical, legal, or financial character are involved, a hearing usually is required before a final decision on the application can be made. Often a hearing is necessary because two or more applicants seek to use the same frequency or immediately adjacent frequencies with such a proximity of stations that excessive interference would result. In such instances, the Commission is compelled by law to accord a hearing to the competing applicants and to make a comparative judgment as to which, if either, should be granted.

☆ ☆ ☆

If unable to grant an application, the Commission is required to notify the applicant and other known parties of interest as to the reason. The applicant usually is given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

In designating an application for hearing, the Commission gives public notice of the issues for the information of the applicant and other parties who may be concerned. The hearing notice generally allows the applicant a period of 30 days or more in which to prepare. Even after being designated for hearing, an applicant may sometimes find it possible to satisfy the issues by amending his application, especially if the apparent deficiencies are of an engineering nature.

☆ ☆ ☆

All competing applications for the same facility are required to be on file at least 60 days before the start of the scheduled hearing. Hearings start with a conference for the purpose of working out stipulations of fact so as to reduce the hearing to bare essentials.

www.americanradiohistory.com

Hearings are customarily conducted by an examiner. The hearing examiner has authority to administer oaths, examine witnesses and rule upon the admission of evidence.

Within 20 days after the close of a record by the hearing examiner, each party and the Chief of the Broadcast Bureau of the Commission has the privilege of filing proposed findings of fact and conclusions in support of their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

☆ ☆ ☆

In the event he wishes to contest the initial decision, the applicant or any other interested party has 20 days from the date on which the initial decision was announced to file exceptions and to request oral argument before the Commission. In all cases heard by an examiner, the Commission will hear oral argument on request of either party. After oral argument, the Commission may adopt, modify, or reverse the hearing examiner's initial decision. Within 30 days thereafter, any party involved may petition for rehearing.

☆ ☆ ☆

If no exceptions are filed, and the Commission does not initiate a review of the hearing examiner's initial decision, the latter becomes effective 40 days after the issuance of the initial decision, unless otherwise ordered by the Commission.

Construction Permit

When and if an application meets statutory and other requirements, it is granted and a construction permit is issued. A maximum of 60 days from date of grant is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified, he can apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction the permittee can engage in equipment tests.

License

The final step is to apply for the actual license. All applicants for broadcast license are required to fill out Form 302 ("Application for New Broadcast Station License"). Applicants must show compliance with all terms, conditions, and obligations set forth in the original application and the construction permit. After applying for a license and receiving authority from the Commission, the holder of a construction permit can conduct program tests. A station license is then issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

☆ ☆ ☆

AM, FM and TV broadcast stations are licensed for the statutory limit of three years. Applications for renewal of license are made on Form 303, which is "Application for Renewal of Broadcast Station License."

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License").

☆ ☆ ☆

Should the permittee or the licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License").

In certain cases a permittee or licensee can apply for a transfer of corporate control or an assignment of license by using form 316 ("Application for Assignment or Transfer—Short Form"). This form may only be used when the transfer or assignment is **pro forma** or technical in nature; i.e., where no substantial changes in interest occur.

Color's Place In Local Television

By
A. B. SAMBROOK
Manager
RCA Recorded Program Services

LOCAL color TV is here. Trade paper headlines recently proclaimed that WNBQ, in Chicago, is getting into full swing on local color programming. This station will have color on the air from sign in to sign off. In other localities color has been a fact for some time.

In Philadelphia, WFIL-TV has "Rainbow Theater," a regularly scheduled local color show. One of the features of this program is "Foy Willing and the Riders of the Purple Sage," a series our RCA Recorded Program Services has made available in both black and white and color for some time.

☆ ☆ ☆

"Foy Willing" is not the only color filmed programming we've been offering to local stations. There's "Town and Country Time," fifty-two quarter-hours in color and black and white; "The Sam Snead Show," thirty-nine five minute shows in color and black and white; "The World Around Us," a new quarter-hour series of exciting looks into the realm of nature. The first twenty-six of this series was recently announced to stations and agencies.

☆ ☆ ☆

RCA Recorded Program Services is in color and intends to get into it even further. We're out to make ourselves known as "Headquarters for Color Film Programming." Every property we consider for distribution stands a better chance of getting the nod if it's available in color as well as black and white.

Why do we feel so strongly about color? Because it's the future of local as well as network television. After all, the same reasons for network color also apply to local color: more variety in programming; more entertainment for viewers; better opportunities for advertisers to show off their products.

In local color, TV film means more than ever. After all, in how many local stations are there facilities for truly spectacular color? This is where top color filmed programming comes in.

☆ ☆ ☆

Besides the colors in the spectrum, there's another kind of color in which we're very much interested. This is the color of variety, of change-of-pace. Let's take another look at our list of programs: "Foy Willing," that's pure country and western music, mixed with beautiful scenic shots; "The Sam Snead Show," golf lessons by the top, all-time great of golf; "The World Around Us," a series that takes the world of nature and shows how the battle for existence is continually going on; "Town and Country Time," a real country-western variety program, complete with singing, three different dance groups, comedy and guest stars. We also offer packages of feature length movies.

For still a further splash of color, we'll be adding at least two new, high budget series to our list in 1956 — one will be an adventure series with a new twist; another will be a children's program with emphasis on sports.

☆ ☆ ☆

We'll be announcing this new show, "Junior Sports League," at about the time this gets into print. Phil Rizzuto is the Sportsmaster (emcee). Each half-hour program salutes a different boys' or girls' club like the Boy and Girl Scouts, the PAL, the Madison Square Boys Club. Viewers who want to accept Rizzuto's invitation to join "Junior Sports League," must first belong to a recognized club. Features of the show include sports lessons and interviews with guests like Tom Gola, Frankie Frisch, Kyle Rote, Tom Landry, Wes Westrum; a quiz with big prizes going to the club being saluted; local tie-in participation and merchandising.

"Junior Sports League" is colorful in more ways than one. So is every other show from RCA Recorded Program Services, "Headquarters for Color Film Programming."

QUICKEST way to build up

RCA Thesaurus

Only RCA Thesaurus offers so many exclusive time-selling and programming features

Selling radio time to sponsors requires the *right* sales tools. Making radio pay off for sponsors also requires the *right* programming for attracting and holding *many* listeners. On both counts, more and more of today's most successful radio stations are building up their profits with *RCA Thesaurus*. Because *RCA Thesaurus* offers proven audience-getting shows and sales tools like jingles, commercial sales aids, echo attention-getters, sponsor-selling gimmicks, sales-clinching attention-getters . . . because this library service is so broad in scope and so complete in its follow-through . . . because it is kept constantly up to date with 50 sales-making and audience-building releases monthly . . . because it's right in step with current radio listening trends, *RCA Thesaurus* actually *pays for itself many times over!* For full information and dollar-and-cents proof of how *RCA Thesaurus* can help *you*, write, wire or call your nearest RCA Recorded Program Services office.

Services Offered: The Keystone Broadcasting System is a transcription network which services local radio stations in their programmiug with transcriptions, with KBS making their time available to national advertisers and their agencies at an attractive network package rate.

At the present, there are more than 800 Keystone affiliates, located in towns with 10,000 to 250,000 population where they reach both the small town and rural markets. For the most part, these Keystone stations serve those areas which are beyond clear reception areas of the large metropolitan radio stations or other high power stations. The number of radio homes in the Keystone Primary Coverage Area total more than 25,000,000 based on Nielson Reports, or one-half millivolt where the Nielson Report is not available.

YOU* will be using the DU MONT ELECTRONICAM

THE REVOLUTIONARY NEW SYSTEM THAT SAVES FILM PRODUCTION TIME AND DOLLARS

- Swift, easy production
- Top-quality black and white or color film
- A complete production in the time it takes to view it
- The spontaneity of live TV—on film
- Savings of 40% or more on production costs

Advertisers, agencies, producers and performers are already breaking production records with quality results:

- Jackie Gleason—"The Honeymooners"—average shooting time of 42 minutes for half-hour show!
- George Jessel—3 one-half hour shows in 4½ hours!†

The next time *you* plan a filmed television show, motion picture, filmed commercial series, pilot or audition, use the ELECTRONICAM to shoot it "live" on film and cut your costs.

The CREATIVE CAMERA for

*Advertisers
*Agencies
*Television Producers
*Motion Picture Producers
*Industrial Film Makers
*Educators
*Government Agencies

We're ready to help you plan for shooting your next production with the Du Mont Electronicam. For full information call or write:

†Produced by Bob L. Roberts

Television « 1956 »

TELEVISION forges ahead in this year of 1956 and **Television Year Book** keeps stride with another comprehensive volume of facts, figures and forecasts on the progress of this most important new industry.

THE progress report on television since the post-war years is one of dramatic achievements. The number of stations have grown tremendously and the quality of programs and transmissions have exceeded all expectations.

THIS year's volume is replete with information on the advancements of the sight and sound medium. The impact of color, progress of closed circuit TV, and prospects of some form of pay-as-you-see TV are only a few of the subjects covered. In addition their is data on networks, advertising, agencies, VHF and UHF channels and many mighty informative articles.

WE are proud of this volume for it mirrors the work of individuals and organizations in the advancement of this electronic miracle. To all our contributors we are deeply grateful.

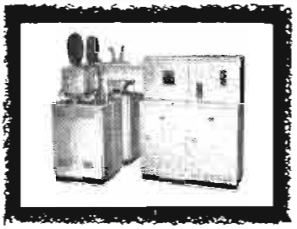

JACK ALICOATE

Speaking of chain reactions...

1 Excellent monochrome slides, opaques, and 16 mm film.

2 Superior color slides, opaques and 16 mm film as well as monochrome.

3 Limited live color in addition to slides, opaques and 16 mm film. Unlimited Live Color

Here's one you can control!

the vitascan

4 UNLIMITED LIVE COLOR

And now, the biggest news of all . . . the Vitascan camera, a portable light source for live color TV broadcasting. The light source is a simple, portable camera assembly that provides unlimited live programming at a cost far below other color systems. Again, Du Mont shows the way for simple, practical television broadcasting.

● Start your scanner operations at any point you need! If you need a source for only monochrome film, opaques, and slides choose the Monochrome Multi-Scanner. If you plan color for later on, you can always convert at minimum expense. At any time, you can add live color with either the fixed or portable light sources. Here is television broadcasting equipment tailored to your exact needs!

Use of TV by President Heralds New Era

☆ ☆ ☆

"I'm going directly to the American people and tell them the full facts." With these words President Dwight D. Eisenhower announced his plan to use commercial television to inform the whole nation of the reasons for his decision to run for renomination. And with these words commercial television was accorded its rightful place as the only true medium for vital news in the twentieth century.

The right—and the duty—of every American citizen to hear immediately his elected officials speak their minds on important issues was performed more than ever before in the President's dramatic telecast of February 29, 1956. Sixty-five million people—more than voted in the last election—saw and heard the President on both radio and television. By watching his face for twenty minutes they were able to form their own decision on the essential problem—the President's health.

The impact of the President's preference for television as the medium to reach all the people at once will be felt strongly on the coming presidential election—and most likely on all future elections. He has announced that observation car barnstorming—at least for him—is as outmoded as the era of the big city "bosses." Television and radio will be the primary weapons of the campaign. The hitherto traditional and old-fashioned methods will be used only to supplement his appearances on television.

The President has long been an advocate of television. He was the first President to address the annual convention of the National Association of Radio and Television Broadcasters, and at that time expressed his high regard for the medium.

Shown here is a view of President Eisenhower at his news conference as he made public his "affirmative" decision to seek re-election.

Pay TV Starts Greatest Controversy of '55

By
EDWARD J. LOWE
Equipment Editor
Radio-Television Daily

A CLOUD no bigger than the palm of a man's hand appeared on the horizon of American television in 1955, a cloud that can conceivably transform our time-honored concept of broadcasting, and will certainly cause the most violent controversy in the industry's third of a century. That cloud is subscription television, or toll TV, the future of which the Federal Communications Commission has been considering since September 9. The advocates of this new system claim that it will make possible hitherto unreachable fields of culture and entertainment, side by side with the sponsored programs of today. Those opposed say that toll TV will destroy free television, and drive the medium out of range of those that rely on it most.

☆ ☆ ☆

Three major forms have been advanced, but the underlying principle of all is to make a program available only to those willing and able to pay for it. The broadcaster would transmit his program in a coded, or scrambled, form. The ability to unscramble the signal would be available, for a fee, to those with the required electronic attachment on their set.

Phonevision, the product of the Zenith Radio Corporation, generally held to be the pioneer in the field, would attach to the set a device with five dials, each with seven numbers. Turning the dials to a previously assigned code number for a particular program would unscramble the signal. The viewer would get the numbers by punching out an insert on a card beside the listing for a specific show. The card would be a record of programs seen, which he would return to the company, and would then be billed.

☆ ☆ ☆

The method of Skiatron, Inc., provides for the insertion of an IBM card with a printed electronic circuit. Pressing a button would simultaneously unscramble the picture and punch the card, making it also a record of shows seen.

The third system, Telemeter, proposed by a subsidiary of Paramount Pictures, differs from the others in two important respects. First, two signals would be transmitted on one channel. An advertisement for the show would be received on existing sets, the show itself for those who wished to pay for it. Secondly, coins inserted before the show into an attached device would directly activate the unscrambler.

☆ ☆ ☆

September 9 was the closing date for the submission of rebuttals to arguments already submitted to the FCC. The crux of the legal aspect of their problem is contained in Section 3 of the Federal Communications Act of 1934, which defines broadcasting as "the dissemination of radio communications intended to be received by the public." If the Commission finds that the recipients of toll TV are not "the public," but the paying public, then it is debatable if the Commission has the power to decide the issue. In that case the problem would be referred to Congress, and perhaps eventually to the Supreme Court. In addition, the Commission must decide which system is most desirable. In view of all these problems, and the fact that 1956 is an election year, no speedy action is expected. It may in fact take several years.

The controversy made many strange bedfellows. The motion picture exhibitors, organized as the Joint Committee on Toll TV, aligned themselves with their rivals for public favor, the broadcasting networks and the National Association of Radio and Television Broadcasters, who were in turn aligned with the American Federation of Radio and Television Artists. All came out unequivocally against toll TV, the NARTB stating that it is "completely repugnant to the historical concept of public ownership of the air waves." Those in favor are composed mainly of motion picture producers and sporting interests, in addition to the developers of the system.

☆ ☆ ☆

The most effective action taken by either side during 1955 was in answer to the contention that toll TV will provide to the public many programs that sponsors are unable to afford, among which were cited recent Hollywood features. General Teleradio's purchase of $25,000,000 worth of feature pictures, which the public will see without charge, effectively answered this argument, and showed the vitality of the sponsored medium.

Of one thing we can be sure — the controversary is not over, probably has not really started. Through its purchase of Hollywood features the young, free, medium has struck a strong blow for itself. We can be sure that 1956 will see much more of the same.

Reports Over 22,000 Women In Radio-TV

By
JEAN GIBSON
Editorial Researcher,
Radio Annual,
Television Yearbook

WOMEN are as essential to the broadcasting industry today as the television camera or the studio clock.

The feminine set may have first entered broadcasting as secretaries at radio stations. Then they progressed to become traffic managers and continuity writers. Later, women became commentators on their own programs. Gradually, women in radio were joined by colleagues in television. Women in TV worked up, as in radio, often remaining behind the scenes to help produce or direct. Many women have made the grade in the management end of radio and television.

☆ ☆ ☆

According to a July, 1955, Survey of Current Business, published by the Office of Business Economics, U. S. Dept. of Commerce, there were 76,000 people employed in radio and television in 1954. An FCC financial statement reports that in this same year, of this total, 29,412 people were employed in television. In other words, although television was barely seven years old, (say it actually got underway in 1947), a little over a third of the employees in the broadcasting industry were in this new media of communication.

☆ ☆ ☆

Figures aren't available for the number of women employed in radio and television in 1954. But in 1950, the Census revealed that a total of 15,690 women were working in the broadcasting field. Of these 7,980 were clerical; 4,590 were professional, and 1,770 held jobs as salaried managers or officers. Since in 1950, there were 104 television stations and 2,144 radio stations on the air, each station averaged about 7 women employees. Assuming the fairer sex was sprinkled evenly among individual TV and radio stations, women in radio outnumbered their TV sisters by about 21 to 1. In round numbers, there may have been about 15,000 women in radio, and 725 or so in TV.

The story is different today. Television has grown steadily, leap-frogging into big business. The 104 stations in 1950 have jumped to approximately 450 on the air with many others pending FCC approval. If the figure of 7 women per TV station is used here, which is undoubtedly conservative, we find that there are now 3,150 women employed in TV. Women in radio currently lead by only 6 to 1.

☆ ☆ ☆

This is not to say that opportunities in radio have lessened, however. Even though television has become a competitor to radio for the listening ear, radio is still enjoying growth. Many more stations are going on the air, and other stations are expanding. Radio Advertising Bureau has estimated that the total number of radio sets in the U. S. was 121 million as of July, 1955. Eighty million of these sets are in homes where women can and do listen to some 2,800 radio stations, where about 19,600 women have a part in the operations.

Taking radio and TV together, there are currently about 22,750 women employed in the broadcasting industry. They serve their industry as traffic managers, researchers, continuity writers, commentators, record librarians, secretaries, receptionists and managers, to name a few.

☆ ☆ ☆

It was mentioned before that television was becoming big business. This holds true for the whole broadcasting industry. In 1954, the U. S. Department of Commerce reported that national income originating in TV and radio amounted to $551,000,000. In contrast to this, automobiles and equipment, a subdivision of manufacturing, showed a total of $6,472,000,000 that year. Utilities, both electric and gas, contributed $5,709,000,000. (National Income Number of the Survey of Current Business, July, 1955.) But women in the broadcasting industry, as well as the men, can take satisfaction in having helped to keep our country prosperous. The huge income of other businesses would not be so impressive without the selling job that broadcasting does.

With the addition of television to broadcasting, and the expansion of radio, more jobs have opened for women, either "behind the mike" or "before the camera." Every indication points toward more women in broadcasting. Wherever women are, it is certain that the broadcasting industry is better for having the help of a feminine hand.

BMI *For Service in TV*

Service continues to be one of the basic theme songs at BMI. Not only are its facilities offered to its TV licensees, but to producers, advertising agencies and their clients, TV film distributors, music conductors, directors, and everyone in TV concerned with music and programming.

This service is apparent in the day to day activities of BMI and is provided in many forms, such as:

- Assistance in the selection or creation of music for theme, background, bridge, cue or incidental mood music
- Aid in music clearance
- Help in protecting music ownership rights
- Answers to questions concerning copyrights, music rights for future residual usage and help in solving all other problems concerning the use of music in TV

1956 TV's Greatest Political Role

By JOHN DALY

ABC Vice President in Charge of News, Special Events, Sports & Public Affairs

THROUGHOUT the length and breadth of our land, on the farm and in the city, the attention of the country this Summer and Fall will focus on two separate weeks and one day that will make history.

Like Topsy, Television has "growed and growed," and our citizenry almost as a whole will witness the exciting, significant and dramatic political conventions and elections of 1956.

As a prelude to these events will come the various tests of strength by opposing candidates in state primary balloting. In August, with battle lines drawn, will follow the conventions of Democratic and Republican parties to select their standard bearers.

☆ ☆ ☆

Thereafter in rapid succession will take place the campaigns by the nominees and the climactic Election Day on November 6.

Television, serving with older and more familiar media, will find itself cast in its greatest role to date. It can and will bring the public the facts, issues and candidates of the conventions and campaigns with the new dimension and greater impact inherent in its visual factor.

Radio with its swiftness and mobility will spread the news to every corner of the country. But television — personal and penetrating — will make it possible for everyone to be on the scene, to interpret and decide on the basis of first hand information. Honored and acknowledged for its influence and impact in 1952, television will be unrivaled in 1956.

☆ ☆ ☆

The audience this year will probably include four out of every five TV-equipped homes, or a total of more than 28 million living rooms, almost double that of the 1952 TV audience. Wherever TV goes, it will profoundly influence those who watch. It will have vast influence on their votes and the outcome of the election.

There is little doubt that radio, newspapers, magazines and other means of reaching the people have been able to exert an influence over segments of the population. But never has one medium, in the control of comparatively few, been able to affect so many throughout the breadth of the land in such proportions.

This challenge, I am sure, will be met with the highest of standards by television's trained personnel. In planning and execution, the men and women, who have added to the talents with which they served so effectively in the great tradition of radio convention and election coverage, are dedicated to objectivity, depth and breadth of reporting.

☆ ☆ ☆

Unfettered by government controls as exist in many totalitarian countries, the television industry will be able to present all shades of opinion . . . an unbiased report of political developments when they happen, exactly as they take place.

ABC's team, of which I can speak personally, provides a typical example of the balance provided. Such veteran and capable newsmen as Erwin D. Canham, George Sokolsky, John W. Vandercook, Edward P. Morgan, Martin Agronsky, Paul Harvey, Quincy Howe, Bryson Rash, John MacVane, Gunnar Back, Don Goddard and Ted Malone will report for both ABC Radio and television at these conventions and on election night.

☆ ☆ ☆

Each in his own way will contribute new chapters to the glowing history of journalism in the United States. The long line of traditions which have established the freedoms of press and speech in our country have prepared them well.

In future years, their achievements will likewise aid those faced with even greater responsibility in the continuance of democratic processes.

As our economy and size have expanded, so too have our skills in the field of reporting. Television is the beneficiary of this heritage, and we are determined that the newest medium shall be worthy of its great heritage.

JOHN H. MITCHELL
Vice President in Charge of ABC Television Network

John H. Mitchell, vice president in charge of the American Broadcasting Company Television Network, was elected to the position on November 1, 1954. He joined ABC in February 1953 as vice president in charge of WBKB, ABC's owned television station in Chicago. In July 1953 he became vice president and general manager of WABC-TV, New York. Before joining the network, Mitchell was with Balaban & Katz Corporation which he joined in 1931. In 1939 he moved to South Bend, Indiana, in charge of Indiana theatres owned by Great States Theatres, Inc., a subsidiary of Balaban & Katz. In 1946, Mitchell was placed in charge of the Central Division of Great States Theatres, Inc., making his headquarters in Peoria, Illinois. Two years later he was transferred to Chicago in charge of the Balaban & Katz television station there, as general manager, which he left to join ABC. A native of Indianapolis, Mitchell now lives in Manhattan.

SLOCUM CHAPIN
Vice President in Charge of Sales for ABC-TV

Slocum Chapin, vice president in charge of sales for the ABC-TV network, joined WJZ (now WABC) in 1942 as Sales Manager. He had served in sales promotion for the World Broadcasting System, Inc., in sales with WOC, Davenport, Iowa, as Sales Manager of WKBN, Youngstown, Ohio, and as General Manager of WSTC, Stamford, Conn. In 1944 Mr. Chapin moved to the radio network sales department, and in 1948 was appointed Eastern Sales Manager for ABC-TV when that department was created in June, 1948. In May, 1951, he was named vice president in charge of owned and operated stations for ABC, which he held until named to his present post in 1954. Mr. Chapin is a native of Quincy, Mass., but was brought up in Vermont. He is married, and a graduate of Dartmouth College.

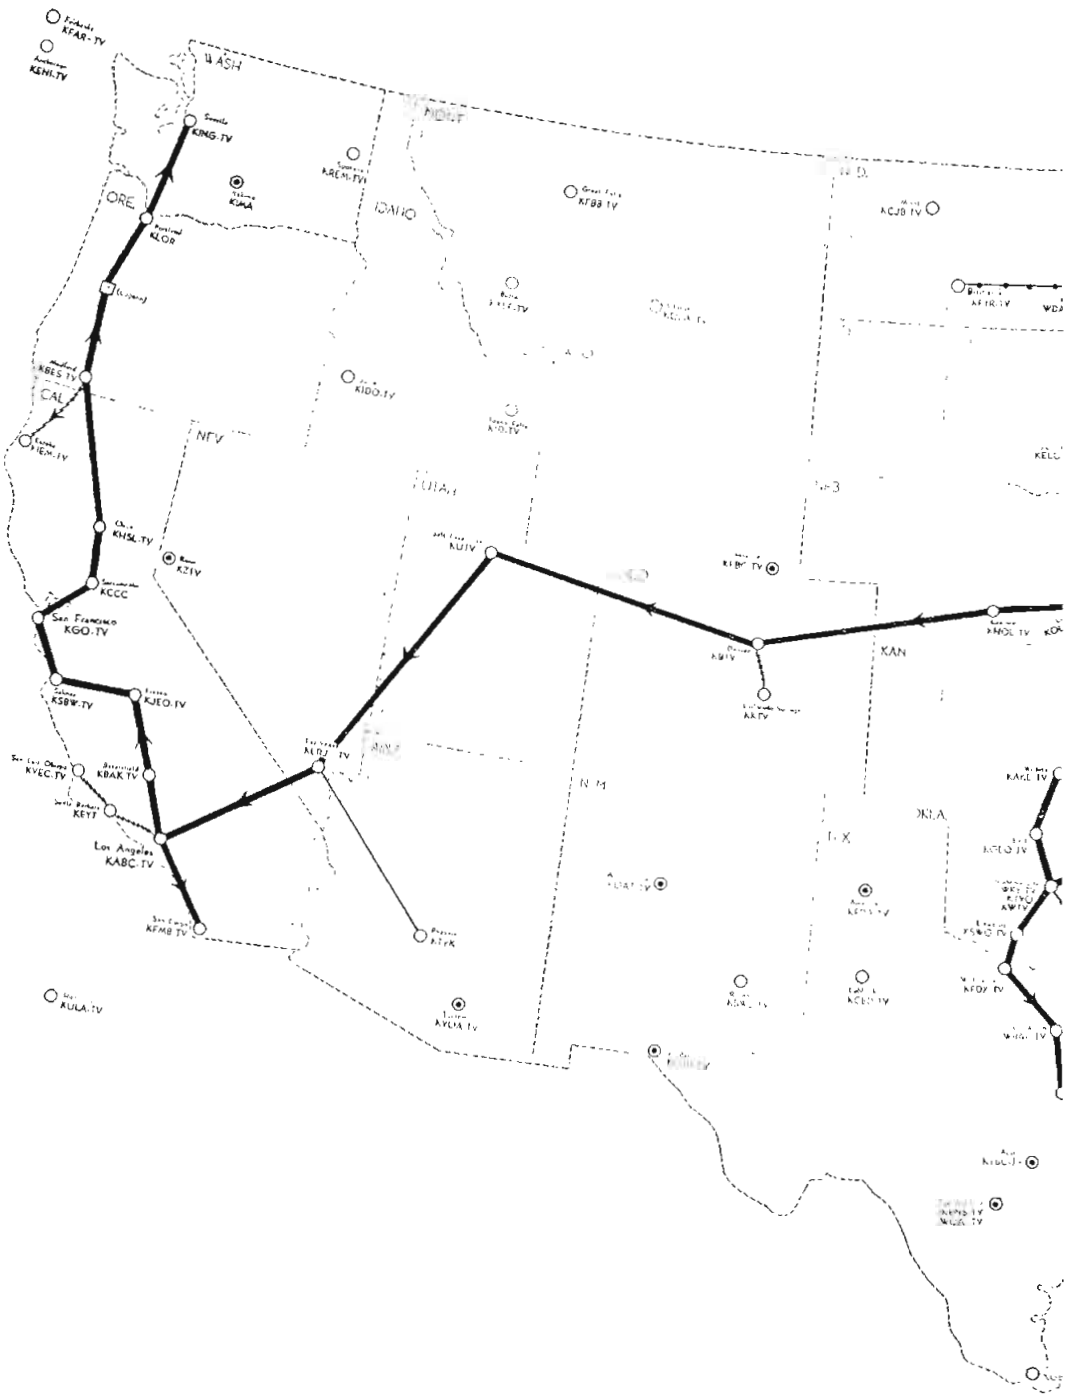

ROBERT F. LEWINE
Vice President in Charge of Programming and Talent for ABC-TV

Robert F. Lewine, vice president in charge of programming and talent for ABC television, was elected to the post in January, 1956. Mr. Lewine joined the American Broadcasting Company in February, 1953, as Eastern Program Director. He was named director of the ABC-TV Network's Program Department in Sept., 1954. Prior to joining ABC, he was the director of radio and TV for Hirshon-Garfield, Inc. Previously he had organized Rockhill Productions, was an independent motion picture producer and TV consultant, and the eastern representative for Dudley Pictures Corporation. From 1945 to 1947 he was associated with Cine-Television Studios, Inc., as production manager, and later as vice president in charge of operations. Mr. Lewine is a graduate of Swarthmore College, and served in the Navy during World War II..

This will be our second leap year in a row

Last year was leap year at ABC Television. Business leapt with the Disneyland and Mickey Mouse Club sell-outs. Bounded up when Hollywood came to TV on the MGM Parade and Warner Bros. shows. Shot higher with the new *adult* Western concept of

www.americanradiohistory.com

"Wyatt Earp." And wound up with plans for the new Afternoon Film Festival, the daytime show with the big-time, nighttime look.

Advice to advertisers and their agencies: if you want to get the jump on competition, hop to it – get on ABC-TV.

TV "Greatest New Force In American Life"

By
J. L. VAN VOLKENBURG
President
CBS Television

TELEVISION in 1956 gives every evidence of living up to its recent description by U. S. News and World Report as "the greatest new force in American life."

And I do not think it is presumptious to suggest that advertisers, and we at CBS Television, as broadcasters, have together played a major role in developing this force and, by extension, the vitality of the American system of broadcasting.

We at CBS Television believe that three basic ingredients nourishing this "greatest new force in American life" are: advertising investment; audience interest; and creative activity — in a well-balanced mixture.

☆ ☆ ☆

Advertising investment in television has grown from $57.8 millions in 1949 to an estimated $1 billion 49.5 millions in 1955. CBS Television leads the industry as the largest single advertising medium in the world, with an estimated gross billings in 1955 of better than $190,000,000. And there is evidence to believe that in 1956 CBS Television will increase this leadership.

Audience interest in U. S. television is one of the truly amazing developments of modern times. The number of stations in the United States has grown from 48 in 1949, to 425 in September of 1955. According to the Bureau of the Census last June, there were more than 32 million television homes in this country, with the number growing daily. This is 67.2 of all the nation's households.

☆ ☆ ☆

But of even greater significance than the numerical increase in stations and television homes is the fact that in America televiewing has become a national habit, with the average family spending nearly five hours a day in front of its television set. This is an incredible statistic. It means that they are devoting more time to watching television than they spend on anything else except working and sleeping. And what's more, there seems to be no indication that they intend to stop, since they are watching television today more than ever before.

At this stage, I am sure I don't have to convince anyone of television's impact. No advertising medium in the world can approach it. No advertising medium in the world so closely associates an advertiser's goods or services with entertainment and information which is absolutely free to the viewer beyond the investment in a television receiver. And part and parcel of our national habit of watching television programs is, I believe, the habit of also watching the sponsor's message.

☆ ☆ ☆

The tremendous increase in set ownership, and the firmly rooted national habit of television watching is of course one of the key factors influencing advertising investment. But we at CBS Television have every reason to believe that behind it all is creative activity, our incessant preoccupation with the problem of providing the best in entertainment, information, and public service programming it is possible for money, talent and brains to create. That we have succeeded in doing so is quite evident: We are broadcasting the majority of the most popular programs day and night. A recent Trendex report gave CBS Television 9 out of the 10 top shows, and in the Nielsen rating CBS Television had 6 out of 10.

☆ ☆ ☆

In short, we at CBS Television believe that our industry leadership has resulted from the fact that we have built the best program structure in the country, which in turn has earned loyal audiences, who in turn are buying our advertisers' goods and services.

All of us who participate in the advertising process play a crucial role in the economic wealth of the nation. For this health is contingent as much on the effectiveness of our activity as it is on any other single factor. The more expertly we employ our knowledge and skills in helping stimulate production and distribution of goods and services, the greater will be our contribution toward making a stronger America.

C. B. S. TELEVISION NETWORK

☆ ☆ ☆

HUBBELL ROBINSON, JR.
Executive Vice President in Charge of Network Programs

Hubbell Robinson, Jr. was named vice president and director of CBS Television network programs in 1951 when CBS was reorganized into separate network operations for television and radio. Robinson joined CBS in July, 1947 as vice president in charge of network programs. Prior to his affiliation with CBS, Robinson was vice president and director of radio for Young & Rubicam, for 16 years, from 1928 to 1944. He joined the Blue Network, now ABC, in 1944, as vice president and director of programs. Robinson moved to Foote, Cone and Belding as vice president in charge of radio in 1945. Born in Schenectady, N. Y. on Oct. 16, 1905, he was graduated from Brown University. Following his graduation he was a reporter on the Schenectady Union Star and the Knickerbocker Press in Albany. In 1928, he moved to New York and entered advertising.

SIG MICKELSON
Vice President in Charge of CBS News and Public Affairs

Sig Mickelson, was appointed Vice President in Charge of CBS News and Public Affairs in 1954, when the Radio and Television News and Public Affairs Departments were combined. He had served as Director of News and Public Affairs for television, prior to that. Mickelson's entire career has been devoted to journalism, first on newspapers and then in radio and television. He was reporter, then editor of the Sioux Falls, S. Dak., Argus Leader and newscaster for Station KSOO, Sioux Falls. He instructed journalism at Louisiana State University and was an assistant professor of journalism at Kansas University and the University of Minnesota. In 1943, Mickelson joined CBS as news editor of Station WCCO, Minneapolis, an outlet then owned by CBS. He was successively director of news and special events, director of public affairs and production manager there. In December, 1949, he transferred to New York to be CBS Director of Public Affairs. Two years later he headed News and Public Affairs for Television. Mickelson was graduated from Augustana College, S. Dak., in 1934 and alter obtained his master's degree at the University of Minnesota.

WILLIAM H. HYLAN
Vice President in Charge of Network Sales

William H. Hylan, who has been associated with CBS for eighteen years, was named vice president in charge of network sales for CBS Television in 1952. Hylan entered military service with the army after four years as an account executive with CBS Radio Sales, from 1937 to 1941. In 1945, he returned to CBS Radio and was appointed assistant to the director of station administration. He switched to the network's new TV sales staff as an account executive in 1948. In 1951, he was named assistant sales manager. Early the next year he was appointed eastern sales manager. Hylan was born in New York City in 1905. He spent a good part of his youth as a resident of the Island of Puerto Rico. Hylan was graduated from Yale University.

Trial and Risk—A Network's Inherent Duty

By
THOMAS A.
McAVITY
Vice-President
In Charge of NBC-TV

HOW many people are using television as a major source of information and entertainment?

This question is far more vital to the future of television than any hassle over day-to-day ratings.

Television can claim success only if it attracts the entire public the light, finicky viewers as well as the heavy, habit viewers.

And if we are to appeal to this entire audience, we must have fresh vital programming—the kind of programming no one can afford to miss.

☆ ☆ ☆

But this implies a risk the risk of new and untried formats, personalities, concepts. It also implies overall planning to insure a balanced viewing diet. For these reasons, fresh programming must be the responsibility of the network.

For only a network can afford the risk necessary to gamble on shows, talent and projects required for providing this type programming to all viewers and as a useful selling medium for every advertiser big and small.

We must refresh and rebuild our programs from year to year, for we know that any known schedule of attractions begins to lose audience and our medium falls short.

☆ ☆ ☆

The conventional so-called "hit" half-hour shows are great for many types of personalities and for story-telling. But this form can be limiting.

The form that television can do so well is the one-shot or the occasional show "idea television." First of all, such a show can be worked on longer than the regular series show. It also saves the artist from over-exposure and enables the artists from all fields to meet the challenge of television on an occasional basis.

This irregular, "idea" television is spearheaded by our firm belief that a network is its programming, and sets the responsibility for influencing the minds of its viewers by offering something for everyone.

This means not only presenting a Sid Caesar, a Bob Hope a Groucho Marx a "Hit Parade," but also a "Richard III," a "Magic Flute," a Maurice Evans in "The Devil's Disciple," a "Caesar and Cleopatra," an "Assignment: India," a "Twisted Cross," a Wanda Landowska, plus a "Peter Pan" and a "Sleeping Beauty."

☆ ☆ ☆

But television must have all forms. We should not choose between them. We want them all. In order to do this, we must fight anything that would restrict television, that would limit its usefulness for over 160,000,000 people. We must keep it so that it programs for everyone. And when we find a large segment of women who do not want soap operas in the daytime, then we must create a "Matinee Theatre" or a "Home."

We believe that the television industry must have significance in a time of world crisis. With the talent development projects and the searching programming that we and others have and must continuously enlarge, we believe we will find a great increase in the number of talented people available to us and from them an intelligent direction will come excellence in one-shots and specials as well as hits.

☆ ☆ ☆

NBC, which pioneered in bringing events and expectancy through its Spectaculars has been joined now by the other networks in filmcasts "specials."

NBC believes this seasoning of programming by means of great cultural events based by a large amount of hit TV and guided by the network's policy of enlightenment through exposure—will keep the network the full national service it deserves to be and not merely a product of universal expediency.

DAVID SARNOFF
Chairman of the Board of RCA

Elected president of RCA in 1930 at the age of 39, Brig. Gen. David Sarnoff, chairman of the board of RCA and director of NBC, was named commercial manager of RCA when it was formed in 1919. He had first entered the communications field at 15 as a messenger boy. As radio grew increasingly more important, he became Chief Inspector, Assistant Traffic Manager and in 1917, Commercial Manager of the Marconi Wireless Telegraph Company of America. When RCA was formed, it acquired the Marconi Company. During the following eleven years with RCA, he moved from commercial to general manager and then vice president and executive vice president. General Sarnoff was elected chairman of the board and chief executive officer of RCA in 1947. After the promotion of Sylvester L. Weaver, Jr. to Chairman of the Board of NBC, General Sarnoff continues as a member of the board of directors. During World War II, he served as Special Consultant on Communications to General Dwight D. Eisenhower at SHAEF in Europe.

SYLVESTER L. WEAVER, JR.
Chairman of the Board of NBC

Sylvester L. Weaver, Jr. was named Chairman of the Board of NBC in December, 1955, replacing Brig. Gen. David Sarnoff, who became a director. Weaver joined NBC in 1949 to head the television network. He was a veteran of 18 years in the broadcasting and advertising fields, including such positions as Vice President in Charge of Radio and Television for Young & Rubicam and Advertising Manager for the American Tobacco Company. In 1952, Weaver was made Vice President in Charge of Radio and Television for NBC and later that year was elected Vice Chairman of the Board. He was named President in 1953 and Chairman of the Board two years later. The concept of the Spectaculars, which began a regular series in the Fall of 1954, and the magazine concept of the Today, Home and Tonight shows, were first outlined by him. Weaver entered broadcasting as a writer, and later became program manager of the Don Lee network. He was graduated magna cum laude from Dartmouth, where he was elected to Phi Beta Kappa.

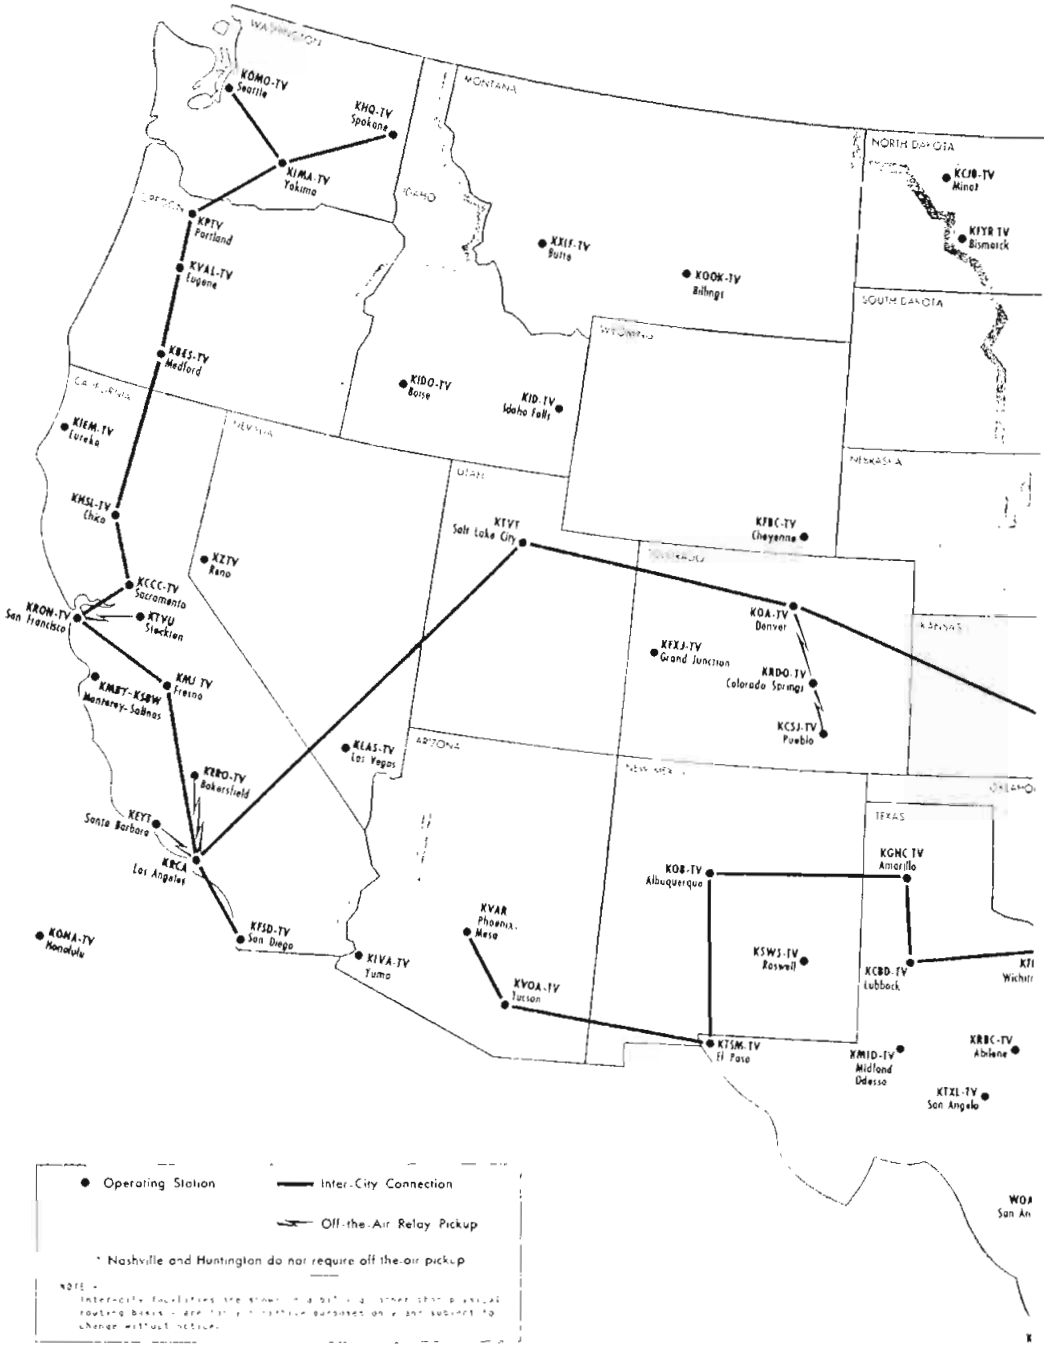

ROBERT W. SARNOFF
President of NBC

Robert W. Sarnoff, who at 37 can look back on a career that already includes service in the newspaper and magazine media and almost eight years with NBC in executive positions in programming, production and sales, was elected President of NBC in December, 1955. Sarnoff joined NBC in 1948 as an account executive in the Sales Department. After serving in various capacities including programming, production and program sales, he was appointed director of Unit Productions in 1951, where he launched "Victory at Sea," the famous NBC-Navy documentary of the Navy's role in World War II. For this he was awarded the Navy's Distinguished Public Service Award. Sarnoff was elected Vice President in 1951 and a year later was placed in charge of the NBC Film Division. He was named executive assistant to Sylvester L. Weaver, Jr. in 1953 and in the same year was elected to the Board of Directors and named Executive Vice President. In the early Spring of 1955, Sarnoff announced plans for a new radio programming service called "Monitor." This was followed in the Fall by "Weekday."

Say hello to the

www.americanradiohistory.com

During the first nine months of 1955, 51 new advertisers entered network television.

44 of these new advertisers were on NBC
42 of them were on NBC *exclusively*

Getting new advertisers, keeping old ones, NBC served 195 satisfied sponsors during this period...*more advertisers than the next two networks combined.*

NBC has proved itself the *pioneer network,* with its new programming patterns and sales plans; the *creative network,* with its Wide Wide World, Project 20 and the exciting and universally-imitated Spectaculars; the *follow-through network,* with its extensive merchandising support and extensive promotion.

Why not join up? *Exciting things are happening on* NBC television

new members!

ORGANIZATION UNDER THE CHAIRMAN AND PRESIDENT

Sylvester L. Weaver, Jr. ..... Board Chairman
Robert W. Sarnoff ..... President
Thomas A. McAvity ..... Vice-President In Charge of NBC-TV Network

ADMINISTRATIVE DIVISION

J. M. Clifford . Administrative Vice-President

FINANCE AND SERVICES

Joseph V. Heffernan . . Financial Vice-President

Engineering Department

Andrew L. Hammerschmidt . Vice-President & Chief Eng.
William A. Clarke. . Administrative Ass't
Edward R. Cullen .. . .. Liaison Engineer
Joseph D'Agostino. ... ...Liaison Engineer
Raymond F. Guy...Dir. of Radio Frequency Eng.
George M. Nixon... ..Manager of Engineering Development
Chester A. Rackey. ..Mgr. of Audio-Video Eng.
James Wood, Jr...Manager of Technical Services

Integrated Services Department

William S. Hedges .. Vice-President in Charge of Integrated Services
Mildred Joy... . . . . Chief Librarian
Robert F. McCaw.. . . .Director, Facilities Administration
William Burke Miller . .Night Executive Officer
Peter M. Tintle... .Guest Relations Manager

TELEVISION NETWORK SALES DIVISION

George H. Frey .....Vice-President in Charge of Television Network Sales
Matthew J. Culligan . . . . .Vice-President National Sales Director

Sales Administration Department

Walter D. Scott. .. Vice-President, National Sales Manager
Michael H. Dann . . . . V.P., Program Sales
Stephen Flynn ...Manager of Television Sales Traffic Operations
Hamilton Robinson. .Manager of Office Services

Treasurer

Joseph A. McDonald . . . . . .Treasurer
William A. Williams.....Assistant Treasurer

Public Relations Division

Kenneth W. Bilby .....Vice-President for Public Relations

National Advertising and Promotion Department

John H. Porter . . .Manager of National Advertising & Promotion
Edwin Vane . . . . . .National Audience Promotion Manager
John Graham . . . . . Art Director
Donald Foley National Sales Promotion Manager

Press and Publicity Department

Sydney H. Eiges . Vice-President in Charge of Press & Publicity
Mike Horton Director of Information
Ellis Moore . . .Director of Press Department
Alexander S. Rylander . Director, Exploitation

UHF Death Total Now Numbers Fifty-Three

By
HAROLD H. THOMS
Former Chairman
UHF Industry
Coordinating Committee

THE UHF-ICC, composed of 70 contributing UHF stations and permittees, was the outgrowth of an enthusiastic effort by UHF broadcasters throughout the country to organize for the purpose of making a vigorous presentation for a solution to the UHF problem in the hearings before the Senate Subcommittee then headed by Senator Potter. Its objective was then the revision of the existing geographic television assignment plan upon a basis which would eliminate the gross competitive disparities inherent in the two spectrum assignments made under that plan and thereby to remove the obstacles inherent in that plan to a nationwide competitive television system. The magnitude of the efforts of UHF broadcasters who came from all over the country to testify in those hearings is now well known history. No immediate results were then achieved but those efforts were continued throughout the remainder of 1954 before the Congress and the FCC and were renewed and redoubled by UHF broadcasters, individually and through the UHF-ICC throughout the year 1955.

☆ ☆ ☆

In the past year, the UHF-ICC made several recommendations for remedial measures. These included deintermixture, confinement of TV stations to their own markets, private microrelay facilities for TV broadcasters, refusal of antenna and power increases in Zone 1, revision of the present TV plan to provide for additional VHF assignments, on a case-to-case basis, at reduced separations and power, with use of directionals, a broad network investigation, and a liberal policy of extension of outstanding UHF permits. It is now an active participant in the pending TV rule making proceedings before the FCC.

☆ ☆ ☆

Despite the tremendous efforts of UHF broadcasters, the year 1955 will go down as a year when UHF broadcasting and the cause of nationwide competitive television service were dealt a bitter blow. It was in the past year that hope for early and effective governmental measures to solve the critical problem caused by the intermixture of VHF and UHF stations, were dashed to the ground as a result of governmental refusal to pass upon the outstanding proposals for selective deintermixture. UHF broadcasters had been led to believe that remedial measures were on the way and their disappointment was all the more bitter because many of them had kept their stations going at continuing heavy financial loss only by the hope that such measures would be forthcoming soon.

☆ ☆ ☆

So far as UHF is concerned, the accounting for the year 1955 is a dismal one indeed: 21 more UHF stations ceased operations. The total of UHF deaths now stands at 53 at a cost to the public and investors of staggering sums of money. Although over 125 UHF permits have been outstanding during the course of the year 1955, only 4 commercial UHF stations were constructed during the year. 111 other UHF permits, which were granted since the lifting of the freeze, have been surrendered for cancellation. Grim evidence of the consequences of the present mixed up television situation was provided by the financial data released by the FCC during the course of the year. The UHF stations in operation sustained a loss of 10 million dollars; 104 UHF stations showed overall losses. Only 18 showed a profit. The losses of at least 31 stations were at the rate of more than $10,000 a month. Despite such discouraging developments, at year's end, no remedial plan had been proposed by the FCC itself; but the FCC had invited and received an infinite number of proposals from interested parties all of which recognized the critical need for remedial action.

☆ ☆ ☆

The year 1955 has therefore figuratively produced a scrambled television picture indeed. It is the fervent hope of UHF broadcasters throughout the country that 1956 will bring forth governmental action which will unscramble the picture by attacking the problem at the core, namely, by revision of the mixed up television allocation. The UHF-ICC will continue to dedicate itself to this end throughout 1956 and for as long as there may be surviving UHF operators with a will to continue the fight.

POWER TOWER

High atop Mount Wilson, in the Angeles National Forest, stands the tallest television tower in Southern California.

This tower, operating at maximum power from a point 6,169 feet above mean sea level, was designed and engineered by RCA to give optimum performance to the 6,000,000 viewers within its range.

PENETRATING PERFORMANCE

High power alone will not cover the unique terrain surrounding the area . . . high mountains, deep canyons and flat plains require height, power and "down-tilted" antenna.

RCA developed a specially designed antenna to meet all the requirements necessary for penetrating coverage . . . and after an exhaustive electronic measurement survey has found the KRCA signal to be the finest in the Los Angeles market.

In laymen's language . . . maximum power sends out a far reaching, clear signal . . . tall tower and special antenna saturate the close in areas with peak performance.

From this great tower, KRCA beams its local programs and those of the NBC network to millions of viewers in Southern California.

Advertisers are assured of penetrating electronic performance, top programming and outstanding promotion support when they buy KRCA-4 in Los Angeles.

for lasting impressions in the **SOUTHERN CALIFORNIA** market

KRCA-4 LOS ANGELES

represented by **NBC** spot sales

CALIFORNIA'S LARGEST SINGLE STATION TV MARKET

The primary KEY-T coverage area includes Ventura, Santa Barbara and San Luis Obispo counties, plus the western portion of Kern County

IN TOTAL AREA: The KEY T coverage area is larger than the combined states of Massachusetts, Connecticut and Rhode Island

IN POPULATION: The KEY-T coverage area is larger than the state of Delaware

IN TOTAL RETAIL SALES: Three of the counties—Ventura, Santa Barbara and Kern rank in the top 200 of the 3,070 counties in the U.S.

The only TV station that completely and effectively covers this rich area is KEY-T . Channel 3.

KNOE-TV OPENS DOORS TO 280,000 HOMES

Your cost-per-viewer is extremely low in the tri-state coverage of KNOE-TV. Of the 280,000 sets we 'boom into' in North Louisiana, West Mississippi and South Arkansas 145,000 of them are unable to get any other station. Set count is growing all the time, too, as more and more industry moves into this area where income has always been high from oil, natural gas, agriculture, cattle and industry.

Top Shows From 3 Networks

Check the survey reports for the top shows on all three networks . . . then check our program schedules. You'll find the first 25 in the industry on KNOE-TV . . . plus the best from the syndicated film field.

Powerful Local Programming

Name your product and we have a strong local participation show to sell it. . . . News, weather, sports, music, variety, farm or cooking and homemaking.

*145,000 Homes Unduplicated Coverage

MARKET DATA

Population	1,664,500	Restaurants, Drinks, etc.	$ 53,985,000

BISMARCK, N. DAK.
FULL POWER
100,000 WATTS
Represented Nationally by Hoag-Blair TV, Inc.

Kfyr-tv entertains and sells some of the nation's spendingest families!

North Dakota families know a bargain when they see it . . . and they see it on KFYR-tv. Top-rated shows from the three major networks blend with carefully prepared local programming — sports, news and special events — to produce picture pleasure enjoyed by thousands of loyal KFYR-tv viewers.

And KFYR-tv satisfies some of the buying-est folks in the nation. North Dakota ranks 10th in the nation in retail sales per household . . . and Burleigh, KFYR-tv's home county, clinched 26th place among the nation's counties with a whopping retail buying spree of $5,748 per household last year.*

No matter how you look at it . . . set saturation, mail pull or local account loyalty, KFYR-tv delivers MORE for your advertising dollar — where dollars mean dividends!

The "*MARKET MAKERS*" made 1 market out of North Dakota!

Now ... ONE CALL BUYS THE NORTH DAKOTA MARKET

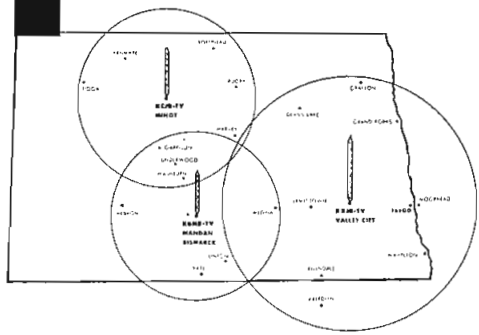

They're spread out in booming North Dakota, but they've got Cadillac buying power from oil, wheat, farming and distribution jobs—a population equal to Seattle, Minneapolis, New Orleans or Providence (and more buying power than most of them.)

What's the easiest, most impressive, most economical way to reach this boom baby? Buy television on the "Market Maker Stations"—the perfect case of *one* television operation taking over 700,000 people scattered over 75,000 sq. miles and making a single market of them.

Here's how economically you can cover North Dakota with the "Market Maker Stations." The open rates below include a 15% discount for using all 3 "Market Makers." (Use two, and get a 10% discount).

	10 sec.	1 min.
AA (7:30-9:30 PM)	$64.00	$127.50
A TIME	48.00	96.00
B TIME	35.00	70.00
C TIME	23.00	47.00

Additional frequency discounts to 25%.

ONE CALL... ONE CONTACT... ONE CONTRACT

Delivers 80% of North Dakota and plenty of gravy in Minnesota and South Dakota, too!

ONLY POSSIBLE BY BUYING THE...

MARKET MAKER STATIONS!

• CBS Primary • N. D. Broadcasting Co • 4000 Front St. • Fargo 4461

There's excitement in the air in Cleveland and all of Northern Ohio. KYW-TV, the newest member of the WBC family, is taking the town.

KYW-TV's audience is watching new and outstanding local shows! Popular NBC network shows! Color spectaculars! Drama, sports, comedy—the best of everything in sight and sound.

To you this means audience action in the nation's 7th largest market . . . 1,217,000 TV homes and the highest per-capita income in the country!

Put KYW-TV to work for you in these 27 rich counties. Call Albert Krivin, Sales Manager at CHerry 1-0942, or Alexander W. "Bink" Dannenbaum, Jr., WBC National Sales Manager, MUrray Hill 7-0808, New York.

A NEW NAME...AND A NEW HOME

A change is being made in WXEL, Channel 8 in Cleveland. A change in name that has a logical association, that makes for easier identity. Sharing the Storer Broadcasting Company banner with veteran radio station WJW, Cleveland's WXEL becomes WJW-TV. And along with the change in call letters comes a change in the home of these two sister stations. In the heart of downtown Cleveland is a handsome new Williamsburg colonial structure—better-than-ever able to serve its clients and the public. Come visit us soon—there's a hospitable welcome awaiting you!

WORLDS OF EXTRA COVERAGE!

In the rich trading area of Lima, Ohio, there are 45,000 TV families for a saturation of 81.1 percent . . . and here more people watch WHIO-TV than all the other TV stations combined. Outside of the primary area, LIMA IS 80 MILES FROM DAYTON. It's just one of the MANY outside bonus areas in WHIO-TV's coverage of 511,310 families. Here are the ARB facts and figures:

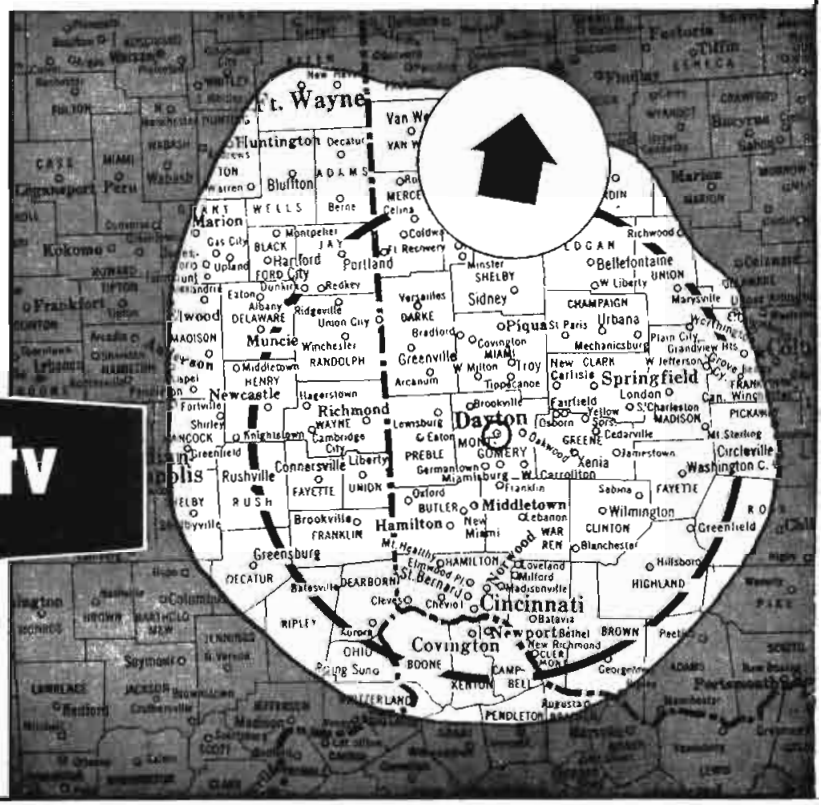

CHANNELS VIEWED MOST IN LIMA, OHIO

Channel	City	Station Viewed Most Before 6 P.M.	Station Viewed Most After 6 P.M.
WHIO-TV	Dayton	66	66
Station B (UHF)		7	24
Station C		5	5
Station D		3	3

These figures prove the eyes and ears of this world are tuned to WHIO-TV, one of America's great AREA stations, using one of the world's tallest towers (1101 ft.) and the equivalent of 316,000 watts. It's America's best buy in TV—and if you don't believe it ask our world representative George P. Hollingbery.

www.americanradiohistory.com

Basic CBS affiliate with ABC, NBC Network Coverage

You need only buy WFBG-TV to cover all of Central and Western Pennsylvania. With maximum power of 316,000 watts, WFBG-TV blankets the rich, heavily-populated area between Pittsburgh and Harrisburg. In addition to the 573,731 tv sets in its coverage area, you get a bonus of 131,556 television homes in Metropolitan Pittsburgh.*

WFBG-TV

Altoona, Pa.

BASIC CBS *NETWORK*

also ABC, NBC affiliate

Represented exclusively by H-R Television, Inc.

*Videodex January 15, 1955 Gives WFBG-TV 11.6% in Pittsburgh, or more than 130,000 homes.

Pittsburgh-TV means...

KDKA 2 TV

Any moment, day or night, KDKA-TV's share of local audience is better than 94%. This is the country's eighth market! The KDKA signal area holds 4,235,994 people — 1,200,000 TV families — retail sales over $4½ billion.

Nothing can sway this market like KDKA-TV. Not over-many availabilities, naturally, but some good ones. Get the facts. Call Lloyd Chapman, KDKA-TV Sales Manager, at EXpress 1-3000 in Pittsburgh, or Alexander W. "Bink" Dannenbaum, Jr., WBC National Sales Manager, MUrray Hill 7-0808, New York.

In Pittsburgh . . . no selling campaign is complete without the *WBC* station —

KDKA 2 TV

OLD TEXAS TEST FOR COFFEE

Drop a branding iron into the pot.
When it floats, coffee's strong enough.

PANHANDLE TEST

Drop a spot schedule into KGNC.
Market's already tested: Amarillo is first (again) in the nation in retail sales per household.

KRLD-TV's GIANT TOWER

1685 feet above average terrain, plus maximum power, provide maximum coverage of sales-rich North Texas and Southern Oklahoma . . . Population in excess of 2,275,000 and growing . . . TV sets in excess of 555,000 and growing rapidly.

CITY GRADE COVERAGE IN DALLAS AND FT. WORTH

These factors plus consistently higher-rated CBS-KRLD-TV programs in survey after survey assure better than ever sales results.

KRLD TV *Channel 4* CBS

MAXIMUM POWER DALLAS

www.americanradiohistory.com

www.americanradiohistory.com

FIRST

★ On the air in the Southwest

★ With COLOR, in Texas

★ With full power, tall tower (1113 ft.)

★ With city grade service in both cities

DAILY COLORCASTING

"TEXAS LIVING" — attractive Margret McDonald gives latest fashion, food, beauty tips — a top-ranking women's show!

"THE JONES PLACE" — a tremendously popular western-style show, storring Neal Jones. Just two examples of local color programming for introducing and testing new products in dramatic colar presentation.

"NBC MATINEE" — full hour of top dramatic entertoinment each doy, in vivid network color! Availoble only on WBAP-TV, Chonnel 5 — now in its 3rd year of colorcasting!

50 ROCKEFELLER PLAZA, NEW YORK 20, N. Y.

www.americanradiohistory.com

The above map is charted in proportion to the net effective buying income for the counties included in the new kgul-tv coverage area

You buy 1/4 of Texas with kgul-tv

kgul's area coveroge encompasses Galveston, Houston and the entire Gulf Coast market. The buying power of this area represents over 25% of the total buying power for the whole state of Texas. Here's a real Texas-size buy for your advertising dollars: one-fourth of Texas with kgul-tv.

	State of Texas	Gulf Coast TV Market	%
Families	2,510,500	611,600	24.36
Effective Buying Income	$12,622,592	$3,258,444	25.81

First in Houston

radio and television

KPRC and KPRC-TV Dominate the Houston Market

KPRC RADIO has been the first choice of Houston Gulf Coast listeners for more than 30 years. KPRC-TV, now over five years old, is also first choice with these same people. More than a time-honored habit, this loyalty is indisputable proof of KPRC's experienced leadership and consistent fine quality.

KOSA-TV . . . . . A CBS

KOSA-TV, a CBS primary affiliate, is the home television for Odessa, Texas and the OIL RICH PERMIAN BASIN of West Texas and Eastern New Mexico.

KOSA-TV has an effective radiated power of OVER 102,000 watts, MORE power than any other TV station in our market area. This power is acquired thru the use of a 10 kilowatt GE Transmitter and a 12 bay GE Antenna. KOSA-TV's tower rises 1,000 feet over Odessa's average terrain. A snow free picture is delivered within a 100 mile circle of the tower site. To name a few of the cities included in KOSA-TV's coverage: Snyder, Big Spring, Colorado City, Seagraves, Fort Stockton, Crane, Midland, Andrews, Wink, Alpine, Pecos, McCamey, Seminole, Rankin, Lamesa: Also Hobbs, New Mexico and Carlsbad, New Mexico.

IAAB Details Television-Radio Activities

By
JULIO MENADIER
Director General
Inter-American Assn.
of Broadcasters

THE Inter-American Association of Broadcasters, whose seat at present is Santiago, Chile, is about to complete ten years of work. It gathers together practically all the associations of the American countries which in their turn congregate most of the radio and television stations of their countries. This means the representation of over 3,000 radio stations and 400 television stations united around the same ideals and objectives.

☆ ☆ ☆

Fundamentally the IAAB upholds the principle that private radio broadcasting is based on free enterprise, on the system of free and loyal competition, on private initiative and on freedom for the legitimate exercise of their activities. It is, therefore, the most powerful and effective stronghold against government interference with radio and television. Also, it is the best check to avoid the establishment of any policy not in accordance with the democratic ideals or the free and democratic broadcasting system prevailing on our continent.

Among the achievements of our institution are:

It was the first to denounce publicly and officially—the attachment of the radio stations of Argentine by the government.

It promoted the organization of National Broadcasting Associations in Guatemala, El Salvador, Honduras and Paraguay.

It gave the fundamental bases for a common legislation of broadcasting in the Americas.

☆ ☆ ☆

It operates in close cooperation with the United Nations, the UNESCO, the Organization of American States and the Inter-American Union of Telecommunications. It has received from the U.N. the status of non-governmental consultant organization.

In 1948 it successfully officiated the petition to the Puerto Rican government for a non-commercial policy in their official radio station.

In the same year it obtained for Guatemala the resumption of the radio broadcasts through station "The Voice of Guatemala."

It has distributed scholarships from the Lincoln Institute of New York and the Northwesters Radio and Television School among the personnel of broadcasting stations. Some of the grantees have already completed their technical studies on broadcasting, and others are doing so at present.

In collaboration with the NARTB it obtained the revocation of the decision of the Organizing Committees for the 1954 football competition to collect dues from the stations for broadcasting the football games.

It sent a mission to Guatemala to confer with their President, who promised a legislation for the radio, and the abolishment of commercial ads in the official broadcastings.

☆ ☆ ☆

It sent a mission to Bolivia to ask the authorities for better working conditions for the radio stations and to promote the reorganization of their National Broadcasting Association.

At the last convention it proclaimed a Declaration of Ethical Principles, which apart from being of extraordinary value in itself, will serve as the basis for the Code of Ethics of each National Association.

It requested and obtained recently from His Excellency, Pedro Aramburu, Provisional President of the Argentine Republic, the declaration that the radio stations of that country could be run by private concerns working under a system of absolute liberty.

This is only part of what the IAAB has achieved through constant efforts as shown throughout the bulk of correspondence addressed mainly to the President and high officials of the different countries and to the executives of the National Broadcasting Associations among whom the IAAB steadily keeps exalting the right principles and striving for their respectful observance. We can safely say, with the certainty acquired through actual facts and the experience of years, that the IAAB is in itself a symbol for the protection of rights and that it contributes powerfully to the fact that thousands of men in America may work at ease and with the necessary freedom, in broadcasting activities.

☆ ☆ ☆

As to the immediate projects which the IAAB has in mind, besides others related with the exchange of programs, the establishment of uniform types of fees throughout the continent and the improvement of equipments, we can mention these:

To cooperate with the governments of the various countries in order to pass a law setting norms for the broadcasting activities, so as to insure that the necessary intervention may not be subject exclusively to the opinions of officials or to changing circumstances.

To promote the award of scholarships for the improvement of the technnical personnel of the various specialties on radio and similar branches.

Fastest-moving film

www.americanradiohistory.com

in television!

They don't sit around long on the shipping-room shelves at CBS Television Film Sales. For here are the stand-out shows in the syndicated film field... the audience-proven programs of the sparkling variety and dramatic impact that gave CBS Television Film Sales *the biggest year of its life* in 1955.

Whatever your program choice may be — adventure, comedy, drama, Westerns or news — here you'll find the big-name, top-quality productions... every one a time-tested audience-winner.

And there's more to come, because expansion is the word for '56. *Nearly a dozen major new properties* are being readied. Merchandising and promotion departments are being enlarged. Sales service and distribution facilities are better than ever. There's expansion and excitement everywhere you turn, from story conference to shipping room!

And there's a show for *your* needs at fast-moving CBS Television Film Sales. Take a look at the list below, then call our nearest office — New York, Chicago, Los Angeles, Detroit, Boston, St. Louis, San Francisco, Dallas, Atlanta. In Canada: S. W. Caldwell, Ltd., Toronto.

CBS Television Film Sales, Inc.

JOHN L. SINN, president of Ziv Television Programs, Inc., and World Broadcasting System, and executive vice president of Frederick W. Ziv Co., guides the destiny of the firms in the production of filmed television shows. He is responsible for everything from the original idea to the picture on the viewer's set. John set out in life to become a lawyer, but after a year at the University of Chicago, he decided that his true vocation was in the entertainment field, and switched to Cincinnati University. After graduation, he gained a solid foundation in his chosen field by a stint at WLW, where he put in an eighteen-hour day, seven days a week. After a short career as a free-lance writer, John joined the Ziv Agency, where he has been ever since.

CARL STANTON, vice-president of NBC, of NBC's subsidiary, the Kagran Corporation, and head of NBC Television Films, came to the network as director of the Television Talent and New Programs department in 1949. He had gained experience with the advertising department of Sears, Roebuck & Co., on the West Coast. In 1934 the Stanford U. graduate joined the Lord & Thomas advertising agency as radio-producer-director. Among the programs for which he was responsible were the memorable "Amos 'n' Andy," "Lum 'n' Abner," and "Bob Hope" shows. After being named account executive for the American Tobacco account, he was named radio director when the firm became Foote, Cone & Belding. After six years with Dancer-Fitzgerald-Sample and its predecessors, Bob joined NBC, and within three years was named national program manager for the TV network programs. He was subsequently appointed director of the Film Division, and elected VP in 1953.

RALPH M. COHN, vice-president and general manager of Screen Gems, Inc., television subsidiary of Columbia Pictures, was born into show business, and has served apprenticeships in all its branches. Ralph is the son of Jack Cohn, executive vice-president of Columbia Pictures Corp., and was born in New York on May 1, 1914. After attending Cornell, he spent a year and a half in the legitimate theatre, and then headed for Hollywood, where he shortly became a producer. In 1941 he became executive producer of Darmour Productions, and turned out the "Ellery Queen' and "Crime Doctor" feature films. After service in the Signal Corps during the war, he formed Triangle Productions with Mary Pickford and Charles Rogers, and later Pioneer Telefilms, which became the Columbia subsidiary, Screen Gems, in 1951.

MICHAEL M. (MICKEY) SILLERMAN, executive vice-president of Television Programs of America, Inc., was founder, and president, from 1938 to 1949 of the Keystone Broadcasting System, a network of more than four hundred stations. From that position Mickey, a native Baltimorean, joined the Frederic W. Ziv Company as a radio programs account executive, and a year later was appointed director of station relations of the World Broadcasting System, Inc., the Ziv affiliate. Prior to founding KBS, he was in the advertising agency field for five years. In addition to his heavy schedule with TPA, Mickey finds time to conduct the Sillerman "Sales Clinic."

MERLE S. JONES, executive vice-president of Columbia Broadcasting System Television, had the unique distinction of being one of the nation's busiest commuters a few years ago. As general manager of two CBS owned and operated stations in Los Angeles, he was constantly shuttling between headquarters in New York and the coast. In addition to these duties, he was head of the Columbia Pacific Network. With his appointment as vice-president, Merle assumed the varied duties of manager of the CBS owned stations, department handling of national spot advertising for a selected list of network stations, and became head of the Television Film Sales Unit before becoming executive V.P.

www.americanradiohistory.com

DAVID V. SUTTON, vice-president of MCA-TV Ltd. in charge of film division, is a lawyer turned broadcaster. A graduate of the University of Virginia and the University of West Virginia Law School, Dave never practiced law. Instead, he entered broadcasting with WBBM, Chicago, in 1940, as a salesman. He became Eastern sales manager in 1942, but was interrupted by a stint in the Marines. Doffing his uniform, he joined KMOX, St. Louis, as Commercial Manager, and then moved to CBS Radio Sales, after which he was in rapid succession general sales manager and vice-president in charge of sales of CBS-TV. The 43-year-old West Virginia native then moved to MCA as VP and member of the board of directors.

REUB KAUFMAN, president of Guild Films, is the man who gave Liberace to the American public. Reub, an alumnus of the University of Chicago, saw the possibilities in the unknown piano player, and in 1952 personally toured the country selling a film of Liberace to local stations. The rest of the story is history. Born in Russia in 1903, Reub's family moved to Tulsa before he entered school, and after graduation from college, he formed his own agency, Kaufman & Associates, and was responsible for the success of Jay's Potato Chips, with the slogan "A Pip of a Chip." In 1952 he formed Guild Films, and today has acquired a library of almost 700 Hollywood features and shorts, and almost 200 Looney Tunes cartoons.

GEORGE T. SHUPERT, president of the American Broadcasting Company Film Syndication, Inc., the subsidiary of American Broadcasting-Paramount Theatres, Inc., entered the visual media field in 1938 working for Industrial Pictures, Inc. In 1940 he suggested to Paramount Pictures that they create their own industrial film division, and was hired to organize it and handle sales. In 1943, he entered the television field as assistant to Paul Raibourn, president of Paramount TV Productions. Eight years later, in 1951, he joined producer Edward Small in organizing Peerless Television Productions, Inc., taking the post of vice-president in charge of sales. A year later he became vice-president and general manager of United Artists Television Corporation, the position he resigned in August 1953, to establish ABC Film Syndication.

MICKEY SCHWARZ, president of ATV Film Productions, Inc., started his film careers at the age 14, working summers in the film laboratories. By the time he had finished college he had been through the stages of printing, developing, negative cutting, printing, and editing. His first professional job was with the Meyer Reiger Film Laboratory in New York. Mickey moved back to the coast as an assistant cutter at the RKO Pathe studios, and in 1937 he became a charter member of the Society of Motion Picture Film Editors. He also worked with the Major Picture Studios, and Universal. During the war he served in the Air Force, and returned to produce live television programs, edited TV film shows, and in 1952 entered the film commercial field by forming his own company, the ATV Film Productions.

ELY A. LANDAU, president of National Telefilm Associates, has a long record of achievement for a young man of 35. A native New Yorker, and only nine years in the broadcasting field, Ely did a three year stint in the Army Air Force during the hostilities, and in 1947 joined the production staff for television of Raymond E. Nelson. Two years later he became the TV director of Moss Advertising, and later assumed a similar position for the Emil Mogul Co., Inc., where he was instrumental in building the video department to its present formidable proportions. In January 1954, he formed NTA. In his spare time, Ely authored the booklet, "Television Story."

www.americanradiohistory.com

EARL COLLINS, president and general manager of Hollywood Television Service, Inc., is a veteran of 26 years of experience in the sales and distribution end of the motion picture industry. He brings to TV a first-hand knowledge of how to deliver what audiences want and how to properly service clients, stations and networks. The HTS organization today has a sales representation in 32 key cities across the nation. In addition to the large assortment of features, dramas and mysteries handled by HTS, Earl has also made it known that the company is planning to produce many series of pictures, made expressly for TV, edited to meet the needs of local sponsors. Some of these are now in production and an announcement on the company's plans for these films will be made in the near future.

HAROLD L. HACKETT, chairman of the board, and president of Official Films, Inc., started his career as a sailor in the merchant marine, and is still traveling in his position with Official Films. This year alone he has made seven round trips to Europe, due to stepped-up production demands. After his stint at sea, Harold spent four years with NBC before joining MCA. In his twenty years with the firm, he rose to the position of vice president of radio and television, and gained the experience and background for his present position. He joined Official Films in 1953 in the capacity of president, and in 1955 became chairman of the board. Harold is a member of the NAITB, and of the Association of TV Film Distributors.

DWIGHT W. MARTIN, vice president of General Teleradio, Inc., came to the firm in June 1952, after six years as assistant general manager of the Crosley Broadcasting Corp. A graduate of the University of Cincinnati College of Law, he started his business career as a practicing attorney with the firm of Dinsmore, Shohl, Sawyer, & Dinsmore in 1934 and remained with them as an associate until 1943, when he entered the Navy. He returned to the firm as a general partner in 1945, but left to join Crosley the following year, ultimately becoming a vice president. After Dwight came to General Teleradio, he organized the Film Division, and his present assignment is as a member of the staff, which is concerned with operation of all divisions of the company.

WILLIAM J. GERMAN, distributor of Eastman professional motion picture films, organized two companies, W. J. German, Inc., one chartered in Delaware, the other in California, to handle the firm's trade. Bill's initial association with Eastman was in 1906 in Rochester. After filling several posts he came to N. Y. in 1921 as manager of the G.M. Labs. in Long Island City as well as of the Paragon studios and labs and San Jacq Film Printing Corp. at Fort Lee, N. J. One year later Bill became associated with Jules E. Brulatour and in two years he organized and became V.P. and general manager of J. E. Brulatour, Inc., which took over the sole distribution of Eastman films for movies and T.V. At Brulatour's death, Bill became president of the two Brulatour corporations, and completed purchase of the latter's assets in 1951.

PAUL RAIBOURN, vice president and member of the Board of Directors of Paramount Pictures Corporation, is also Chairman of the Board of International Telemeter Corporation, of Chromatic Television Laboratories, member of the board of the NARTB, treasurer and director of the Allen B. DuMont Laboratories, Inc., and President of TV station KTLA, Los Angeles. Associated with Paramount since 1921, his duties include supervision of budgets and planning, and of all of the firm's TV interests. A native of Illinois and a graduate of the University of Illinois, Paul spent four years with Bell Telephone as a design engineer. In 1937-8 he conducted a survey of TV developments here and abroad that gave Paramount an early edge in the field.

www.americanradiohistory.com

MAURICE J. RIFKIN, vice-president in charge of sales for Ziv TV Programs, Inc., was born in Marinette, Wisc., on July 12, 1914. His family moved to Youngstown, O., when he was one year old. It was there he stayed through his graduation from Rayen High School in 1930. He received a B.A. in 1935 and an M.A. in 1936 from the University of Southern California. At that time, he returned to Youngstown where he worked as an account executive with WKBN. In 1938, he moved to Cincinnati, where he joined the Frederick W. Ziv Co. In 1949, Rifkin came to New York City to be sales manager for Ziv TV Programs, Inc. He was appointed to his present position in 1952. He and his wife, the former Theodora Levin, have one child, Joan, and they live in Great Neck, Long Island.

MARK GOODSON, partner with Bill Todman in Goodson-Todman Productions, was born in Sacramento, Calif., and began his career in show business as a child actor in stock companies. Goodson entered radio at KJBS, San Francisco, as a disc jockey in 1936. He moved on to the Don Lee Network Headquarters in 1937, where he began as an announcer, switched to special events, then production, in which capacity he developed a group of shows. He came to New York in June, 1942, where he began as emcee of "Battle of the Boroughs" and the "Jack Dempsey Sports Quiz." This led to his directing soap operas. He wrote and directed dramatic spots on the "Kate Smith Show" and co-produced the first of the "Stop the Music" series before he and Todman became associated.

MILTON GORDON, president of Television Programs of America, Inc., is the third member of the triumvirate of Edward Small and Michael Sillerman, who guide the fortune of the flourishing TPA. A financial wizard associated with multi-million dollar investments in television, Milt left active supervision of the Walter E. Heller Company, the Chicago banking firm where he had been vice-president, to enter the infant industry of TV. In 1946 he pulled the frozen food business out of the red, and later launched a new program for Capehart-Farnsworth. Milt also inaugurated the first split hemisphere financial deal between an American banking firm and English investors to produce the Academy Award winning motion picture, "The African Queen."

JEROME S. HYAMS, president of Hygo Television Films, Inc., and Unity Television Corp., spent 18 years with Commonwealth Films before founding his own firm in 1952. Starting in 1934 as an office boy, his first promotion came when they established their 16 mm motion picture department, when Jerry became a salesman. During World War II he served in the OSS film department, where he worked with John Ford. After the war he went back to Commonwealth as sales manager of 16 mm films. With the coming of television, Jerry helped establish and manage the sales activity. A resident of Great Neck, and a do-it-yourself gardener, Jerry held that position until he formed the Hygo firm.

FRED J. MAHLSTEDT, director of operations for CBS-TV Film Sales, is not only a pioneer in the television film industry, but has the unique distinction of having been a practicing architect for four years. Educated at the Pratt Institute's School of Architecture, he started in broadcasting with Erwin, Wasey, and the Kudner Agency. In 1939 he joined Columbia, where he has been ever since. He started as the chief of sales development for the research department, and moved to radio sales promotion, and then to spot sales. In June, 1950, he was given the job of organizing a film syndication unit, and has handled it ever since.

www.americanradiohistory.com

SHAMUS CULHANE, president and founder of the animation studios that bear his name, established the firm in 1945, after a long and meritorious association with RKO, Universal, Paramount, and MGM studios. Shamus worked on more than 250 animated pictures, and won six national prizes for his cartoons. For a period of five years he was with the Walt Disney Studios, working as a pantomine specialist on such pictures as "Snow White," "Pinnochio," and the "Pluto" series. He has produced animated telecommercials for Ajax Cleaner, Muriel Cigars, Halo Shampoo, and others. Since his start as a 15-year-old errand boy for the old Lantz Studios in New York, Shamus has come a long way, working at every job in the industry en route.

SAUL JEFFEE, president of Movielab Film Laboratories, started in the industry over a quarter of a century ago. Always mechanically inclined, Saul has combined business and pleasure in his hobby of tinkering in his home machine shop, and has developed many modifications which have contributed to the advancement of film processing. Saul's firm is finishing up an expansion program that will have increased the firm, 80 per cent of whose clients are television accounts, threefold. Saul is completely wrapped up in his work, but does find time to pursue a second hobby, tropical fish.

WILLIAM J. GANZ, president of the William J. Ganz Co., Inc., has produced over 1,000 films on a tremendous range of subjects for practically all major industries. At 20, Bill was a free-lance cameraman, and served as Universal Newsreel's Philadelphia representative, back in the early days of the news short. In 1919 he came to New York and started his own film business, specializing in the production of sponsored films for industry. Ganz films evolved as quickly as the industry, shifting from silent to sound in the late 1920's, and ten years later from black and white to color. In 1943 he formed the Institute of Visual Training, Inc., for the specific purpose of offering "planned distribution" to clients.

JACK WRATHER, president of Wrather Television Productions, Inc., and part owner of station WNEW, New York, has business interests ranging from the oil industry to the resort field. In television, his firm is the producer of "The Boss Lady," and the owner of all rights to the "Lone Ranger," acquired from Trendle & Associates for a reported $3,000,000. Jack started out in the then new field of TV with the purchase of KOTV Tulsa, and a year later, in association with Mrs. Helen Alvarez, KFMB and KFMB-TV, San Diego. At the present time he has applications before the FCC for a TV channel in Corpus Christi and a UHF channel in Boston. The Tulsa property was sold recently. Wrather's fortune was founded in the oil industry, and in addition to TV, has expanded to resorts in California and Nevada.

PAUL TALBOT, president of Fremantle Overseas Radio & Television, Inc., the largest distributors of radio and television material for the international market, got in on the ground floor of television with CBS in 1941. Following Army service during the war, he became American representative for the Italian Radio Network, and for Radio Andorra, which was the first European station to get back on a commercial basis after the war. Today, as one of the youngest executives in the field, Paul heads a firm with a program on the air somewhere in the world every minute in the year. The firm has recently acquired two wholly owned branch offices in London, and Mexico City. Paul was the American representative to the recent UNESCO conference on international television and movies.

www.americanradiohistory.com

JAMES L. CADDIGAN, director of the Electronicam Division of the Allen B. DuMont Laboratories, Inc., is a veteran in the entertainment field, and a pioneer in TV network programming. His background includes radio, the legitimate theatre, and 15 years with Paramount Pictures and Paramount News. In 1947, Jim began supervision of programming and production for the DuMont Television Network, and led the way for the first full daytime operation by a television station, WABD, in New York. He was also responsible for the first science fiction series, "Captain Video," and the first big amateur show, "The Original Amateur Hour." In June, 1955, Jim was named director of marketing for Electronicam, and in January of this year became overall director of the division.

ARMAND L. SCHAEFER, president in charge of production for Flying A Productions, Inc., was born in Tavistock, Ontario. Following service in the U. S. Army tank corps during World War I, he entered pictures in 1924 as property man with Mack Sennett comedies. Following a career there where he also functioned as electrician, actor, etc., Armand became property man for Mary Pickford Productions and later functioned as assistant director and production manager for various independents. Becoming a director in 1932, Armand directed 13 serials, including Gene Autry's first. When Gene Autry Productions was formed in 1947, Armand resigned from Republic to become president of the company and in 1950, became president of Flying A Productions.

MARTIN N. LEEDS, executive vice-president of production at Desilu Productions, Inc., has been with Desi and Lucy since 1953. Marty holds one of the most responsible jobs in TV while still in his thirties. A graduate of New York University with the degree of bachelor of science and bachelor of laws, he was admitted to the California bar upon his arrival there. Desi Arnaz, Desilu prexy, was so impressed with the former CBS-TV business affairs director, that he brought Leeds into the Desilu picture in the second highest position in the firm. Leeds is also a vice-president of Motion Picture Center Studios, and chairman of the code committee for the TV industry. A veteran of the U. S. Army, he is married to the former Doris T. Segal and is the father of two sons.

GEORGE S. GLADDEN, executive vice-president for Academy Pictures, Inc., the commercial film production organization, joined the firm in November of 1954 after a varied career in the motion picture and radio fields. In 1931 he joined General Motors and rose to become the head of the Public Relations Motion Picture Department. He designed and established the format of the firm's first major road show, "The Parade of Progress," which has been seen throughout the nation since 1936. In 1938 he joined Audio Productions as a writer-director and simultaneously acted as Eastern color director for Technicolor, Inc. Starting in 1940, George served for 14 years as the head of the motion picture and film TV department of the J. Walter Thompson Agency. A graduate of both Cornell and M.I.T., he is married and the father of three children.

CHARLES E. RYND, president and chairman of the board of Audio & Video Products Corporation, was instrumental in solving one of the major headaches of network radio. Back in 1946 Charlie's efforts in behalf of "Operation Rynd" resulted in the technique of delayed network broadcasting via Ampex Tape Recordings, which solved the problems resulting from daylight saving time, and was quickly adopted by all networks. A graduate of Massachusetts Institute of Technology, and Hamilton College, Charlie entered radio with NBC. From 1935 to 1942 he was with the network's sales and traffic, later moving over to ABC as sales service manager. He rose to become vice-president and assistant secretary of the company before leaving to form his own firm.

www.americanradiohistory.com

JOHN W. LOVETON, president of John Loveton Productions, West Coast TV film firm, started his broadcasting career handling the General Foods "Show Boat" radio program for Benton and Bowles. In 1937, he moved to Ruthrauff & Ryan, where he supervised 17 shows and directed some of their top radio productions. From there, he went to Foote, Cone and Belding, where he was placed in charge of all Lucky Strike radio. After a brief term as co-director of radio for Geyer, Cornell, and Newell, he joined Lennen and Mitchell, where be began his long association with the "Mr. and Mrs. North" property. He resigned from the agency in 1947 and has since produced and directed this show from his own office. When he moved into TV, he transferred his production set-up to the West Coast.

CHARLES J. BASCH, JR., president of Television Screen Productions, and in partnership with his wife Frances Scott, Basch Radio-TV Productions, has been a producer of radio shows and commercials for 21 years, and has been in television for ten. Born in Newark, New Jersey, Charlie spent his early career in the manufacturing field, leaving it in 1929 for a Wall St. job. He spent two years in the financial world, before teaming up with his wife in show business. His wife, "Scottie," was radio's first woman roving reporter at the time they formed their own firm. Charlie conceived and directed many of the nationally known spots on the air, and have handled live shows and commercials for many clients. They formed Television Screen Productions in 1949.

GUY V. THAYER, vice-president and general manager of Rowland Reed Productions, Hollywood TV film firm, entered the motion picture field, while a senior at Hollywood High School, working at an after-school job in the Paramount film laboratory. He moved up through the ranks as senior film editor at Paramount, RKO and Universal-International, then became associate producer for PRC. He left the latter position for service in the U. S. Navy, serving in a photographic unit. At the United Nations conference in San Francisco, he was coordinator between the military and government crews of all countries, and he also set up the photographing of the war crimes trials in Nuremberg, Germany. Guy was discharged from the Navy in 1945 and he immediately joined Roland Reed Productions.

TOM VALENTINO, head of T. J. Valentino, Inc., has been supplying the radio, theatre, and television world with sound effects and mood music for the past 20 years. He broke into radio on what must have been one of the first P.I. deals on record. At the time Tom was a piano and organ tuner and tuned station pianos in return for two-minute pitches advertising his services. While working around the studios he noticed the first crude attempts at sound effects—which led him to form his present company. From a modest beginning, Tom has gone on to create sounds for practically all the shows on Broadway, not to mention little theatres all over the country.

JOSEPH PLUNKETT, vice president of North American Television Productions, Inc., has had a varied career as an executive in show business. In the legitimate theatre, he was associated with Liebler & Co., and George Tyler, producing many Broadway hit plays. He was managing director of the Century Theatre (formerly the New Theatre) and also produced plays under his own management, then was appointed managing director of the Strand Theatre in New York. He produced pictures for Paramount Pictures Corporation, then became director, vice president, and general manager of the RKO Corporation. Later, he served as vice president of Select Attractions, Inc., distributing special pictures. It was in 1954 that Plunkett entered the TV film field, assuming his present post with NATP.

www.americanradiohistory.com

WILLIAM F. BRODY, president of Wm F Brody Productions, Inc., is a native of Chelsea, Mass. He spent two years in the business school of Northeastern University but was forced to leave due to illness. Bill first entered the textile business then interior decorating before discovering a lifetime career in the distribution of motion picture films. In March, 1946, Bill went to California and spent three and a half years learning all phases of motion picture production. In 1950, he organized Wm. F. Brody Productions for the purpose of producing films, especially for TV. Headlining his current schedule is "Wild Bill Hickok," co-starring Guy Madison and Andy Devine, a series which enjoys great popularity with the children's audience.

EDGAR G. (TED) SISSON, director of the NBC Film Division, is responsible for the sale, advertising, and kinescoping of the vast NBC film library. Ten years service as a mechanical and radio engineer, in a consulting capacity for radio set manufacturers, preceded his directing-producing positions. He joined NBC's radio production staff, and directed "The Jack Benny Show," and "Your Hit Parade," among others. A Princeton graduate, where he helped start an experimental station, Ed became head of the radio department at the New York office of Lord & Thomas. He then spent nine years with Pedlar & Ryan, ultimately as VP in charge of radio, and then four years with N. W. Ayer. In December, 1953 he joined NBC as an associate producer, and the following month became director of the Film Division.

CHESTER ERSKINE, President of Chester Erskine Productions, producer of the Reader's Digest series of TV films, has had a long and varied background in the producing, directing, and writing of plays and motion pictures. He abandoned the law career for which he studied at Union University, Schenectady, N. Y., in order to study for the theatre at the American Academy for Dramatic Arts. In 1929, he began directing Broadway plays. At one time, he was head of Charles Frohman, Inc., and also served as director for the Theatre Guild, and the Erlanger and Shubert interests. Starting in 1944 he wrote and directed a number of screenplays. First venture under Chester Erskine Productions was "Witness to Murder," starring Barbara Stanwyck, George Sanders, and Gary Merrill.

NORMAN GLUCK, vice-president and general sales manager of United World Films, Inc., started up the ladder of the film business as an usher in his hometown of Racine, Wisconsin. From this beginning Norm went ahead to become the manage of many theatres throughout the East for both RKO and Skouras. Between 1936 and 1947 he managed movie theatres in Schenectady and Albany as well as several cities in New Jersey and New York. Following the end of World War II, in which Norm served in the army, he became affiliated with Universal Pictures and for two years managed the Park Avenue theatre. Later he moved to United World Television, the Universal subsidiary, in 1949. Two years later he assumed his present post.

BASIL GRILLO, executive vice president of Bing Crosby Enterprises, is described by industry associates as an account with imagination. His financial and management background is both wide and varied. He has managed all of the Crosby financial interests and has organized all Crosby packages for the past ten years, including acting as executive producer of the "Fireside Theatre" series. He is also acting in the same capacity for the dramatic series which the firm is producing for the Studebaker-Packard Motor Car Company. Basil has an active hand in such allied organizations as Decros Corporation, the Crosby-Jayson Corporation, Bings Things, Inc., and Crosby Research Foundation. He is president of the Namso Enterprises Inc., merchandising firm serving the Crosby interests.

www.americanradiohistory.com

WILLIAM VAN PRAGG, head of Van Pragg Productions, produces and directs both film commercials and features for television. From a start in the industry as manager of a theatre, Van Praag got into advertising via a promotional scheme for theatres. He worked on advertising films for theatrical distribution, and from there became a free-lance film editor, doing stints for some of the top film companies. His creative talent drew the notice of Uncle Sam, who contracted him to set up the first film unit for the OWI. After a three-year hitch in the Army, he went back to free lancing on a large scale. Prior to forming his own company, he did some pioneer film work for NBC-TV, was on the production staff for several features released through United Artists, and worked for Bray Studios.

HENRY "DOC" BROWN, president of Atlas Television Corp., has been in the motion picture business for over 25 years, and has experience as an exhibitor, owner of a chain of theatres, producer of motion pictures, and head of an international distributing organization. "Doc," a graduate of both CCNY and Columbia, founded Atlas in 1948, and collected more than 350 film comedies, editing them to quarter-hour lengths so that program managers could use them freely. Since then Atlas has gone into new production, and has several filmed program projects under way. "Doc" is a member of the board of the National Television Film Council, a director of the Allied Theatre Owners of New Jersey, and a Motion Picture Pioneer.

ISIDORE LINDENBAUM, president of Filmcraft Productions, is one of Hollywood's leading makers of filmed TV productions. He attended UCLA and Harvard Law School and has long been recognized as one of the top experts in the television film field. He entered the TV medium in 1949, when he formed a corporation to explore Doctor Ferenz Fodor's inventions, which since have been responsible for many advances in TV. While always feeling that TV was his medium, "Lindy" still maintains a large practice at law and at one time he was a pharmacist, and is still licensed. His Filmcraft company is on a par with the biggest in Hollywood and at present owns its own large studio and took over the first motion picture theatre in Hollywood for exclusive use for filmed TV productions.

LOUIS HUOT, vice-president in charge of client relations for Five Star Productions of Hollywood, has had wide experience both in newspaper work and film production. For five years he was vice president and European manager for Press Wireless, Inc. He represented the Chicago Tribune in Europe for two years, headquartering in Paris, and has worked for numerous other papers, including the Montreal Gazette. In film production, Louis has produced public relations movies for such clients as the Prudential Insurance Co., Pontiac Motors, and the Block Drug Co. of New Jersey. He has made movies on new weapons and techniques for the Army Signal Corps. In his position at Five Star Productions of Hollywood, he supervises the production of both TV commercials and institutionals.

EDWARD HOCHHAUSER, JR., vice-president of Muzak Corporation, vice-president and general manager of its Associated Program Service Division, and vice-president and director of merchandising for Muzak Corporation Franchise Division, initially joined APS as a field representative in 1951. He started in local radio in 1941, and in '46 joined the newly formed Transcriptions Sales, Inc., where he was successively account executive, sales manager, Eastern Division manager, and vice-president. After joining APS he was rapidly made sales manager, general manager, and in January of 1953, he was elected vice-president of Muzak. The 37-year-old Mr. Hochhauser is an alumnus of the University of Virginia, and a resident of Merrick, Long Island.

www.americanradiohistory.com

MARTIN P. HENRY, president of Video Pictures and West Coast Sound Studios, was born in Lebanon, Indiana on June 4, 1904. He was educated at the University of Florida. He began his career as an assistant director in 1924 and worked for Famous Players, Lasky, Paramount and Fox. He opened West Coast Sound Studios in 1932, with George Goman and Al Manchee. Martin serviced West Coast Productions, shooting screen tests, second units, and backgrounds. He later branched into short subjects, documentaries, sales training and educational pictures. From 1942 to 1946 he was a Major in the U. S. Army Signal Corps, Chief of Army Ground Force Training Films. He returned to West Coast Sound Studios and Video Pictures as vice-president and production manager. Martin is now making pilot films for TV.

JAY BONAFIELD, general manager of RKO Pathe, a division of the RKO Radio Pictures, Inc., entered the motion picture field as a reel boy in the cutting department of Fox Movietone News. A native of Tunnelton, West Virginia, he was soon promoted to assistant editor, and then film editor, working on newsreels. In 1931 he joined Pathe as newsreel film editor, and in his years in that capacity personally edited such outstanding news stories as the Hindenburg disaster, the Lindbergh case, the Morro Castle fire, and presidential inaugurations. He was transferred to the short subjects department, where he became head of the editing department, and then to production manager.

W. WALLACE ORR, president, Tel Ra Productions, Philadelphia, is believed to be one of the largest producers of TV sports film. Tel Ra Productions, which he founded in 1948, produces "Telesports Digest," "Sports Spotlight," "Touchdown," "Greatest Pro Football Plays of the Week," and "Post Time, U.S.A." During the past eight years, his firm has produced more than 700 sports shows for TV use. Presently, along with its established sports programs and some TV commercials, Tel Ra Productions is placing emphasis upon color films. Thus far color is being used extensively in filming thoroughbred racing and major league baseball. Orr was an advertising executive for 27 years, being vice-president of N. W. Ayer & Son, Inc., 1944-48.

KERN MOYSE, president of Peerless Film Processing Corporation, has a wide variety of experience in his business background. He was born in Columbus, Georgia, graduated from Harvard, and then from St. Lawrence Law School. He went to work in the Texas oil fields, and spent a period in the banking business in New York, where he became the managing director of National Coal Company of Cuba, and followed this experience with 11 years as an insurance broker. In 1934 Kern became vice-president of Peerless, and in 1946, president. He is a director of the Association of Cinema Laboratories, and of the National TV Film Counsel, as well as a member of the Motion Picture and TV Engineers Society, and of the Radio and Television Executives Society.

SAM HERSH, president of Family Films, Inc., a prominent figure in the production and distribution of religious pictures, is no stranger to show business. For some time prior to 1948, Sam was a well-known film sales executive, handling his own pictures as well as features for several studios. Traveling extensively, it was meeting the actual buyer of films that catapulted Sam Hersh into the production of motion pictures. Noting that the film industry produced relatively few inspirational pictures, Sam decided to go into this type of production. In 1948, Sam formed Family Films, Inc. The company's prowess since has been illustrious. Family Films, Inc. has produced to date over 200 inspirational films for both the TV and church markets.

www.americanradiohistory.com

FRANK BRODOCK, general manager of Reela Films, Inc., Miami, moved to Florida in 1951 after 17 years as an account executive with the Jam Handy Organization, where he handled the Chevrolet and Lucky Strike accounts, with the thought of retiring. But Reela Films, then in its infancy, asked Brodock to take a position as sales manager. In two years, he increased Reela's billings three-fold and was greatly influential in getting the film company to the position where it now calls itself the "most complete film studio in the South." Upped to general manager in 1953, Brodock hired personnel for his executive staff in Hollywood, New York, and Chicago. Reela Films has produced TV and industrial films for a number of major cities in both North and South America.

HERBERT SCHEFTEL, chairman of the board of Telenews Productions, Inc., started his career as a member of the New York Stock Exchange, but soon became interested in the production of visual news. In 1938 the first theater television projectors were being demonstrated, and he foresaw the possibilities immediately. He became involved in a chain of newsreel theatres, but the war, in which Herb served as a major in the Air Force, intervened. After V-J day, he went to work in earnest producing spot news films for television. A graduate of St. Paul's School and Oxford University, Herb is a devotee of golf and bridge.

TOM LEWIS, president of Lewislor Enteprises, Inc., entered TV production after a brilliant career in advertising, radio and motion pictures. An advertising executive with Young & Rubicam, Inc., before the war, Lewis was vice president of radio production in charge of that organization's Hollywood office when he entered the Army in 1942. During World War II he created the Armed Forces Radio Service, of which he was commandant, and rose to the rank of full colonel. Following his return to civilian status, Tom was associated with a long list of radio's top-ranking favorites before entering the field of motion pictures to produce MGM's "Cause For Alarm." In 1953, he formed Lewislor Enterprises, Inc. and produced "The Loretta Young Show."

WILBUR J. STREECH, president of Wilbur Streech Productions, the TV commercial and animated film production firm, received early training as an animation artist for the Walt Disney studios. After Pearl Harbor, Wilbur served as a Captain in the Signal Corps photographic center in charge of the organization of production animation. Right after the war he became a partner in Triangle Films, when that firm was making a series of one reel musicals for Universal. In 1951, the UCLA graduate formed the present company on his own, some of whose clients include Cities Service, Brylcreem, Eno, and Kleenex.

SAUL J. TURELL, president of Sterling Television Co., Inc., has brought a merchandising approach to low budget shows and stand-by films that has made Sterling one of the largest distributors in the field. Saul is a native New Yorker. He attended CCNY and the University of Chicago. From 1942 to 1946 he was in the Army and spent most of his time, according to his own testimony, on KP. Serving in the South Pacific, New Guinea and the Philippines, Saul emerged from the service as Sgt. Turell. After the war he went to work for Official Films and after watching volume sales of home movie films, such as Castle and Official, he decided to launch Sterling Films in 1946, in partnership with Robert Rhoades. In 1949, when Bernice Coe joined the company, a TV department was inaugurated.

www.americanradiohistory.com

WALTER SCHWIMMER, president of Walter Schwimmer Productions, Inc., Chicago, is a Northwestern University graduate who has worked as a publicist, songwriter, radio station manager. He was a founder and partner of the Schwimmer and Scott Advertising Agency, from which he left on an indefinite "sabbatical" leave to set up and guide his radio and television program packaging company. Schwimmer bridged the gap from AM radio, with "Foto-Test," which went on the air over TV stations. His packaging firm has been well represented on some 250 AM markets with "Tello-Test," "Tune-Test," and the "Deems Taylor Concert." One of his principal innovations for TV was the inauguration of the "Miss U. S. Television" contest which made its debut in 1950

CHARLES E. SKINNER, president and executive producer of Charles E. Skinner Productions, Inc., was surrounded by show business almost from birth. He attended school on Hollywood motion picture lots, and acted as an assistant director on feature pictures at the age of fifteen. A long-time member of the Screen Directors Guild, Charlie used his Hollywood know-how in positions with the Jam Handy Company, and first transferred his talent from Hollywood to television when he converted the original "Big Story" series from radio to television. His film credits, besides seventy-three "Big Story" films, include "Murder in 'A' Flat," and "Les Paul and Mary Ford." His latest production is "Sgt. Preston of the Yukon."

CHARLES Z. WICK, president of Telefilm Enterprises, formed that distributing organization after an exhaustive study which enabled him to present detailed plans to a prominent group of investors. Charlie has always made us of his talents for both music and commerce. While an undergraduate at the University of Michigan, he formed orchestras which made him $26,000 in one year. He later studied law at Western Reserve University, was admitted to the bar in 1943, then organized a band to play in a Cleveland hotel at night, and set up a day time law practice. In 1943 Tommy Dorsey engaged him to handle legal and business affairs for his orchestra, and to write musical arrangements. Charlie is married to the former Mary Jane Woods and they have two sons, Charlie, Jr., and Douglas

FLETCHER SMITH, president of Fletcher Smith Studios, Inc., producer of TV films, commercials and industrial films, started his business career at the age of 18, with a graphic art enterprise based on a capital of $200. He entered the animation field through doing special effects for M-G-M studios, then began developing industrial accounts. In 1938, he set up his own sales organization and branched into live action films, first on location, then on sound stages. During World War II, he devoted himself exclusively to shooting educational films for the government. With the end of the war and the advent of TV, he went into production of filmed TV commercials. Fletcher relaxes from his duties through hobbies of woodworking and amateur painting, and learning to play the Hammond organ.

HERBERT R. PILZER, president of Circle Film Laboratories, Inc., is the son of a prominent Viennese film producer, and has an extremely broad technical and business background. Born in Vienna, he was educated at the Theresianische Academy in that city, and continued his studies at the Marigny Institute, and at the Sorbonne in Paris. During 1941-42 Herb produced a number of films for the war effort in association with the Harmon Foundation. The following year he joined Circle Films, and three years later, in 1946, was elevated to the position of general manager. Quickly realizing the future of film on television, he oriented the firm toward that objective. In 1953 Herb was elected president of the firm

www.americanradiohistory.com

HENRY MORLEY, president of Dynamic Films, Inc., a graduate of Yale University with a degree in economics, also did post-graduate work at NYU and CCNY in engineering. His business career in the movie industry began with J. A. Maurer, Inc., designers and manufacturers of sound equipment. He started in sales but quickly moved himself into production and he was made general manager of the firm. Post-war, Henry, along with Nathan Zucker, a Yale classmate, formed Dynamic Films, Inc. From the beginning they concentrated on films for TV when not turning out industrial and sponsored films. They handled every phase from script writing through photography, sound recording and editing. Today, as president, Henry brings to the job the technical and engineering background which has spelled success for Dynamic.

MILTON J. SALZBURG, president of Cornell Films, Inc., and of Pictorial Films, Inc., has been actively engaged in some form of show business since he was 17 years old. He launched his career at the Roxy Theatre in New York and from that springboard went on to the production end of films as an assistant film editor, then on to the production of his own films, making many outstanding documentaries. Three of them which established him firmly in this field were "Pattern for Survival," "Target, U. S. A.," and "FDR-Hyde Park." In 1953, he formed Award Television Corporation, of which he is president, to produce package film programs for use on television stations around the country. One of his TV film innovations is a series on golf, featuring the champion golfer, Jimmy Demaret.

BURT BALABAN, president of Princess Pictures, Inc., received his first experience with Paramount Television in 1946, after a tour of duty with the Marine Corps as a combat photographer. A native of Chicago, Burt attended Roanoke College, Virginia, and summers worked for the National Screen and Photographic Studio. He spent fourteen months in the Pacific, making D-day landings in the Marshalls, Saipan, and Guam, along with extensive aerial photography on bombing missions. His first work with Paramount TV was obtaining film programs for KTLA and WBKB, Chicago, Later, he managed the firm's film department, and was in charge of film programming, and the company's syndicated program distribution.

JERRY FAIRBANKS, head of Jerry Fairbanks Productions, started his career as a cameraman in the movie industry, then began producing films and short subjects. Winner of two Motion Picture Academy Awards, he was the first to take the plunge into the filmed TV field. Under contract to NBC, he made the first series seen on video: "Public Prosecutor," "Crusader Rabbit," "Jackson and Jill," "Bigelow Theatre," "Silver Theatre," and others. Fairbanks also developed the MultiCam System which permits filming and sound recording by two or more cameras. Fairbanks is now one of the leading commercial film makers in the business and at present is doing television commercials, industrial telefilms and feature length films for both television and motion picture projection.

MOE KERMAN, president of Regal TV Pictures, Inc., has had a long and varied background in the motion picture business. His father was one of the first motion picture exhibitors in the borough of Brooklyn, and the son followed in his footsteps as an exhibitor when he was 14 years old. Not long after that, he set up his own independent film outfit called "The Kerman Film Exchange." He once produced movies under the Mutual Production Corp. banner, and these movies are now being shown on TV. He started in TV movie distribution in 1948, when he bought the entire Hal Roach Studio Library for TV.

www.americanradiohistory.com

CHARLES DAND, Director of the Films and Publications Division of British Information Services in New York City, was born in Dundee, Scotland, on April 24, 1902. After he received his education at Glasgow University, he was in newspaper work from 1922-29, during which time he contributed to many British and American journals. From 1929-35, he worked as a scenario editor for London's Associated Sound-Film Industries, and as a writer and director of documentary and instructional films. He returned to journalism for two years, after which—in 1937—he entered British government services as Public Relations Office, Edinburgh. During the war, he was with the Scottish Education Dept., Edinburgh. He returned to London in 1949 with the Central Office of Information and came to New York in 1952.

VINCENT J. NOLA, head of Nola Studios, Inc., was born in Italy and came to the U. S. at the age of ten. With money saved from a paper route he studied voice in Buffalo and later transferred to New York where he resumed his studies and later established himself as a vocal coach. Realizing the pressing need for rehearsal studios he established 16 of them in Steinway Hall, and equipped most of them with recording facilities. Needing more space, he brought his total number up to 32 with rooms in the WMCA building, six of which are equipped for making tape and disc transcriptions as well as for making TV films.

CHARLES B. BROWN, vice-president in charge of sales and program procurement for Bing Crosby Enterprises, has a background which ranges through all phases of selling, merchandising, promotion, and management. Much of his experience and "know-how" was gained as program manager of KFI, director of advertising, promotion, and research at NBC, and director of advertising at RCA Victor. While at RCA, Brown originated National Radio Week. His first film venture was an assignment from John Royal at NBC to film Admiral Halsey's return from the Pacific which was later televised over NBC-TV. Brown is also a vice-president of NAMSCO (North American Merchandising and Sales Corporation) Enterprises, Inc., which is the merchandising and sales promotion arm of Bing Crosby Enterprises, Inc.

GEORGE BAGNALL, president of George Bagnall and Associates, Inc., became identified with the motion picture industry after a long experience in the financial field. He joined the Fox Film Company in 1928 as comptroller of its West Coast Studios and later was placed in charge of all finances. He joined Paramount Studios in 1935 as studio treasurer and later was named executive studio manager. In 1937, he was named vice-president of the company. He resigned in 1941 to join the Alexander Korda producing organization, serving as vice-president and general manager until 1942, when he was designated vice-president of United Artists. In 1952, he formed his present company, establishing offices in various leading cities, including New York and Chicago, and acquiring new product for distribution.

CHARLES MICHELSON, president of Charles Michelson, Inc., is one of the principal contacts between Australian and American television. He is the buying agent for much of the TV programming planned for "down under," and has purchased many radio scripts for Australian use. U. S. shows using his library include the "Hallmark Hall of Fame," "GE Theatre" and "Studio One." Mickey, a Columbia graduate, worked in the stock exchange and the family export firm before turning to the entertainment field. He began selling radio transcriptions in the early thirties, and through the years his operations expanded to a world-wide scale. Lately, the firm has included domestic TV distribution in its operations.

www.americanradiohistory.com

JACK J. GROSS, a native New Yorker, had his first taste of the entertainment field as a movie-house usher. This led to a job as cinema theatre projectionist in St. Joseph, Mo., and from there he joined Maupin's Chatauqua Concert Orchestra—a road show which toured the country performing under the auspices of churches, clubs, etc. Following many years of managing theatres, Jack finally settled as manager of the West Coast RKO Hill-Street theatre in Los Angeles, later becoming Western Division manager of RKO theatres. In 1939, he became a producer at Universal in Hollywood until 1943, then he became executive producer at RKO. After a series of outstanding movie successes, Jack joined with Philip Krasne to form Gross-Krasne, Inc.

HAROLD R. LIPMAN, television film manager at Audio Productions, Inc., New York, is a graduate in Mechanical Engineering at Rutgers University. He has been engaged in motion picture production for nearly 20 years, with experience in animation, special effects, optical printing, live action direction and production, processing and design of special equipment. He joined Audio Productions, Inc., in 1936. During the war years he was with the Army's First Motion Picture Unit at Culver City, Calif., and later was assigned to the film production unit covering the Burma campaign at South East Asia Command headquarters in Ceylon, where he spent nearly two years. In 1946 he returned to Audio Productions, where he has specialized in the production of films for TV.

EMANUEL H. DEMBY, president of Demby Productions, Inc., is a spare-time writer, and author of "My Forty-Year Fight For Korea," published by A. A. Winn & Co., in 1952. His first break into radio came at 15 when he did a news program on WMCA. Before the war Manny was an independent producer and writer, and was also a director for the Winer Co., and Arthur Rosenberg agencies. He wrote and produced "One Year Ago Today," and "It Takes a Woman." After discharge at the end of the war, during which he did a wire recorded show from Paris, "The Rainbow Corner," he organized the present firm. Plan—to shift to feature films for theatre showings, present productions include "Hollywood to Broadway," "What's Playing," and "How To Be a Cowboy," all produced in New York.

HELEN "BIJOU" KELLEHER, president of the Empire Broadcasting Corporation, one of the oldest recording studios, was catapulted into the recording business following the death of her husband, Gerald. "Bijou" had received early preparation for her duties due to her early association with the financial and commercial world through her banker father and shipbuilder brothers in Kingston, New York. Further business acumen was gained at Marymount College, and by the receipt of a Masters degree from Fordham University. Since she took over the helm of Empire in 1943, the firm has grown from four recording machines to 30. Empire does chiefly the mechanical work for ad agencies and stations, on transcription, spots, and jingles.

WILLIAM SELDEN TODMAN, partner with Mark Goodson in Goodson-Todman Productions, was born in New York City on July 31, 1916. He received degrees from Johns Hopkins University and from N. Y. U. Following his first job as a copy writer for a New York advertising agency, he became a freelance radio director and a writer for Red Book Magazine. This was followed by writing and directing for a number of BBD&O radio shows. Later, he joined the Biow Company as N. Y. Producer for "The Philip Morris Playhouse," Crime Doctor," and "Take It Or Leave It." Joining with Mark Goodson, Todman and his partner have inaugurated the following TV successes: "What's My Line?" "I've Got a Secret," "Two for the Money," "It's News to Me," "The Name's the Same," "The Web,' and "Beat the Clock."

www.americanradiohistory.com

JIM JEWELL, president of Jewell Radio and Television Productions, Chicago, began his radio career in New York in 1926 with Channon Collinge. Two years later he moved to Detroit, becoming drama director of WXYZ and the Michigan Radio Network. In 1939, Jim moved to WWJ as program and production director where he held the title of "original producer-director" of such Detroit originations as "The Lone Ranger," "The Green Hornet" and "Challenge of the Yukon." In Hollywood he was director and writer to Warner Brothers. In 1941, Jim went to Chicago as vice president of Stack-Globe Advertising Agency, and later joined MacFarland-Aveyard & Company as vice president in charge of radio. In 1945, convinced that Chicago was ideal for TV and radio shows as an origination point, Jim founded his own business.

PETER M. ROBECK, sales manager of the film division of General Teleradio, possesses a well rounded background in merchandising and sales. Born in Wisconsin but raised in California, Pete had his first position with CBS interrupted by five years in the Air Force. After V-J day he became merchandising manager of KTTV and of the Columbia Pacific Network. The young graduate of the University of California advanced to become sales manager of the station, followed by a position as sales manager of Consolidated Television Sales. After a series of merger agreements with Jerry Fairbanks, Inc., the firm altered its name to Consolidated Television Sales. Pete later joined General Teleradio.

JACK ASHER of Lab-TV has been a photographic salesman in 46 of the 48 states, missing only Washington and Oregon. In the industry for over a quarter of a century, Jack has been associated with the Gevaert Co., and for eight years with the photographic advertising page of the old New York Sun. He has also been a photographic buyer and consultant for U. S. Navy Ships Stores, and advertising manager of Photo Trade News. Jack has been an active Mason for many years, and is a member of the Society of Motion Picture and Television Engineers.

ED THORGERSEN, veteran news and sports commentator, opened his own offices in 1953 to produce and participate as a TV personality in live and filmed programs, for both sports and industrial exploitation and sales promotion. Ed's microphone career began back in 1927 as an announcer with NBC, broadcasting news, sports, and special events. Six years later Ed joined the expanding editorial staff of Movietone News where his face and by-line acquired national prominence via the newsreel screen. With broad experience in the field of film shorts, Ed projected his talent into many award-winning pictures in the short subject field, and ultimately became identified with the production of "Ed Thorgersen's Sports Review."

DAVID A. BADER, vice president and general manager of Atlantic Television Corporation, has a rich background gained in careers both here and abroad. He joined Universal Pictures in 1920, and was with them until 1935 as manager of press campaigns, and as personal representative for Carl Laemmle. In 1936 he formed a literary firm in London, David A. Bader, Ltd., and in 1938 became president of Literary Corporation Ltd. He worked with George Pal Productions from 1940 to 1942. After handling the trade relations department for Twentieth Century-Fox, he entered the 16 mm. field, editing and publishing trade periodicals. In 1952 Dave joined Commonwealth TV as executive assistant to Mort Sackett, and in 1954 joined Atlantic as executive vice president in charge of sales. He is also VP of the parent company, Astor Pictures Corporation.

www.americanradiohistory.com

DAVID PIEL, independent producer of commercial productions, TV spots, sales training films, slide films; creator-producer-director of the new "Story Films" now running on "Captain Kangaroo" over CBS-TV. During Piel's days at Yale, he conducted a radio program called "Gullible's Travels." His children's "spectacular," "Golden Time," (in color) was produced for NBC-TV with Simon & Schuster for Christmas-time viewing. He got his first start in theatrical and commercial films with Louis de Rochemont's "Your World and Mine" series—36 geography films aimed at children. Has to his credit many documentaries, two of which won awards at the Venice Film Festival; one of his training films was awarded first prize by N.A.V.P.

DON L. KEARNEY, vice-president in charge of sales for the American Broadcasting Company film syndication division, was assistant maanger of ABC-TV before taking his present post. A native New Yorker and a graduate of Fordham University, Don was a sports reporter and commentator on several local stations before World War II. After Pearl Harbor he served in the European Theatre as an infantry and public relations officer, and returned to civilian life with the Katz Agency, and later with the Mutual Network as sales manager for cooperative programs. In 1951, Don moved over to ABC as manager of TV spot sales, and soon moved up to become national sales manager of ABC owned TV stations.

MAX ALEXANDER, vice-president and secretary of M. and A. Alexander Productions, was born in Cassell, Germany, and first entered the motion picture industry in Berlin in a production capacity. Among other producing organizations he was associated with were UFA Studios and Universal. After gaining a reputation in several European capitals, he came to Hollywood and joined Abe and Julian Stern, the pioneer producers. In 1931-32 he was associated with Phil Goldstone in several producing ventures. Max then formed his own firm and made more than 100 pictures, many in association with his brother, Arthur Alexander, for release through PRC, Grand National, and other independents. In 1949 he and Arthur formed M. and A. Alexander Productions.

G. RALPH BRANTON, president of Interstate Television Corp., TV film producers and distributors, has an extensive background in theatre management which led to his entry in the TV field. He served as supervisor for F & R Theatres in Minneapolis, as director of operations for the Publix New England circuit, and later general manager with partnership status in the Tri-States chain in Iowa and Nebraska. He later moved to the West Coast as vice-president of Allied Artists, a post he held during the wide expansion of that company's activities. He formed Interstate TV in 1952. Branton believes "Mass audience, like mass merchandising is a product of this mid-century. Neither the theatre nor television has yet remotely realized the full audience potential within its grasp."

AL STAHL, president of Animated Productions, had his first cartoon strip nationally syndicated when he was only 17 years old. He became, in succession, an animator for Max Fleischer and story-gag editor for Terrytoons, then continued in technical animation work for the Army Signal Corps during World War II. He opened his own studios after V-J Day, and produced his first animated cartoon show in 1946. A pioneer in the television field, his firm has created and produced TV animated and live advertising for leading agencies and has made great strides in photography of stylized animation. Al developed slide-motion and multi-plane animation for NBC-TV. He is a member of the board of National Television Film Council.

www.americanradiohistory.com

PHILIP N. KRASNE, partner with Jack Gross in Gross-Krasne, Inc. is a native of Norfolk, Nebraska. A graduate of the University of Michigan, Phil obtained his law degree from the University of Southern California in 1929 and engaged in the practice of law, specializing in motion picture matters. In 1936, he became engaged in independent motion picture production and began to produce the famous "Charlie Chan" series. This he followed up quickly with production of "The Falcon" series and then, with Fred Ziv, acquired the rights and began filming the famous stories, "The Cisco Kid." In 1950, Phil switched his production activities to TV As president of Cisco Kid Pictures, Inc., he produced 39 Cisco Kid TV films, all made in color. Thereafter, Phil sold his interest to Ziv, and in 1952 joined with Jack Gross.

JAMES A. LOVE, president of Lally and Love, film producers, has been in one form of show business or another all his life. His family travelled as a vaudeville team in his early years. When his father became a motion picture theatre manager, Jim's first theatre job was bicycling features to his father's theatres. He then became assistant projectionist and worked part time throughout his school years. Jim joined Warner Brothers in their booking department upon leaving school. While doing military service in The Coast Guard, he entered the production field as a film editor. Later, he was the founder of Cineffects Productions for Nat Sobol. When that organization was disbanded, he formed the company which he now heads. Jim is married, and has one child, James Allen, Jr., who is three.

WESLEY GIBBS of Lab-TV started in the Kodak Research Laboratory in 1918 and has been engaged in many lines of technical photography, as well as being a noted writer on photographic subjects for over 35 years. His experience includes time as a cameraman in the old days at Fort Lee, chief physicist of the Fleischman Yeast Laboratory, chief photographer of Liberty Magazine, and for over 12 years in charge of the technical work at the Gevaert Co. During World War II, Wesley was on the War Production Board in charge of photo equipment production and allocation, later handling surplus photo property through the Treasury Department. Wesley is a well-known film exhibitor in salons throughout the country, and an Associate of the Royal Photographic Society of London.

ROBERT M. SAVINI, president of Atlantic Television Corp., started in the film industry in 1900 when he invested in a penny arcade in New Orleans, when he was only 16. He has been connected with the film industry ever since. In 1904 he formed Dixie Films, a distribution company, and later owned a chain of theatres In 1926 he came to New York and founded Astor Pictures, the first company to distribute major re-issues When television was just starting, he was among the first to rent pictures to the new medium, supplying RCA and DuMont's early experiments. He formed Atlantic Television in 1950.

ARTHUR ALEXANDER, president of M. and A. Alexander Productions, and a member of the board of directors, began his career in the department store field in Germany, where he was born and educated. When he switched to motion pictures he joined the Universal Studios in Frankfort, Germany, and in 1929 came to Hollywood as an assistant director, and a year later joined his brother Max in organizing a new firm. The company produced over 100 features in the independent market, and later for PRC and Grand National. In 1949 they entered the television distribution field, and now handle more than 200 properties. The brothers Alexander also handle the production of television commercials and spots.

www.americanradiohistory.com

LLOYD L. LIND, vice president and general sales manager of Interstate TV Corporation has been with Allied Artists Pictures, Corp., Interstate's parent organization for over 21 years. He served as assistant to the president, Steve Broidy, for several years and was supervisor of all Allied Artists exchange operations. In 1939, Lind made his first feature sale for TV, and NBC purchased a full length feature for telecasting in New York. With this in his background, it was a natural for him to take over the reign of interstate's sales department. Among the products currently distributed by Interstate are the "Ethel Barrymore Theatre," "The Amazing Tales of Hans Christian Andersen" and a group of features and westerns. Their "Little Rascals" series is now playing in top national markets.

MANNY REINER, general sales manager for IFE Releasing Corporation, joined the firm in October of 1955. Manny has had extensive experience in motion pictures, radio, television and domestic and foreign film sales. Prior to his present position he was vice president of Guild Films, Inc., and had also been vice president in charge of sales at PSI-TV, Inc. He joined Warner Bros. back in 1933, and then was associated with MGM, Monogram Pictures and Paramount. From 1942 to 1946 Manny was film officer in Europe for the OWI and from 1946-50 he was general manager in Latin America and Australia for David O. Selznick. A stint as foreign manager for Sam Goldwyn added further experience to Manny's already full career.

WILLIAM MIESEGAES, president of Transfilm Inc., was born in London of Dutch parentage. He entered film production by way of Indonesia where, as an exporter of rubber and sugar, he took advantage of the local scene and turned to amateur photography. Many years later, still an amateur, he produced a travelogue, "On the Road to Acapulco," which was booked into the Guild Theatre in New York. In 1941, he turned professional and, with Walter Lowendahl, founded Transfilm. First productons were civil defense films. By 1946, the firm was operating at capacity and facing further expansion. As of today, more than 100 full-time technicians staff the company which, in the Transfilm Building, operates complete motion picture, animation and slidefilm production facilities.

ARTHUR A. "ARCHIE" MAYERS, general manager of Standard TV, was at one time general manager of Colorfilm and while in that post helped establish the present Cinecolor. Archie's next move was sales manager of Atlas Cinephone and then sales manager of World Pictures Corp., a position he held for 12 years. In 1942 Archie became assistant to Jules Levy, president of Mayfair Productions. In 1950 he organized and headed, as president, Unity Television Corporation, and also served as general manager. Five years later he disposed of all his interests in Unity, and in the latter part of '55 became general manager of Standard. Archie has served as president of the National Television Film Council and is currently vice president in charge of distribution for the council.

EDWARD SMALL, co-founder and chairman of the board of Television Programs of America, ran away from his Savannah, Georgia, home at 15 to go into vaudeville, first as a performer, and later as a producer and manager. In 1942 he went to Hollywood for a brief stay, but instead soon establised himself as the leading manager in Hollywood, representing as many as 300 leading names. Ed has been closely identified with launching and developing the careers of some of the all time film greats, including John Gilbert, Corinne Griffith, Norma Shearer and Robert Donat, who was an unknown when Small chose him for the lead in "The Count of Monte Cristo." Still under contract to United Artists as an independent feature producer, Small has made over 150 feature films, 27 of which make up the Edward Small Feature package.

www.americanradiohistory.com

ROBERT SANDE, president of Song Ad Film-Radio Productions, Hollywood, founded the firm in 1950. A native Californian and a graduate of the University of California's Santa Barbara campus with majors in both speech and music, Sande pioneered the merchandising with music technique for TV and radio commercials. His earlier background as both a top professional musician and an advertising agency executive are probably unique in the film-radio production world. Sande's talents, together with those of Don Estey, Del Porter and Larry Greene, his partners, have built Song Ad Film-Radio Productions into one of the largest producers in the business, serving many of the nation's top agencies and advertisers. Their specialty, fully integrated film-radio merchandising campaigns that give sponsors extra mileage per dollar.

FRANK FERRIN, owner of the production company bearing his name, produces, writes and directs "Andy's Gang," the TV film series starring Andy Devine and Nino Marcel. Ferrin created the property for radio in 1940 as "Smilin' Ed's Gang" with the late Ed McConnell. It began on TV in 1950. After McConnell's death in 1954, Ferrin discontinued the radio show and changed the TV film version to "Andy's Gang." Ferrin entered radio via WTCN in his native Minneapolis, some thirty years ago, with the comedy act "Nels and Ole." Later he organized Midwest Recordings, Inc., radio transcription firm, and then joined Henri, Hurst and McDonald in Chicago as VP in charge of radio. In 1942 Ferrin moved to the Leo Burnett Agency in the same capacity. In 1946 he formed the Frank Ferrin Co.

SIDNEY PAUL SOLOW, vice president and general manager of Consolidated Film Industries, has been affiliated with CFI since he graduated from New York University in 1930. Advancing from chief chemist to plant superintendent to his present position as head of the Hollywood lab, Sid Solow has been instrumental in the growth of CFI to its current status as one of the top TV film laboratories in the nation. In addition to directing a company that processes some 70% of all west coast produced film for TV, Sid is active in the Academy of Television Arts and Sciences, Academy of Motion Picture Arts and Sciences, the Society of Motion Picture and Television Engineers, and virtually every charity involving the motion picture industry. He has been a lecturer in Cinema Arts at the University of Southern California since 1947.

MAURICE BECK, together with Ed E. McLemore produced a film series entitled "Texas Rasslin'" which has proven to be one of the highest rated sports shows on TV. This film started when they realized that wrestling in other states lacked color, speed and roughness so desired by the spectators. A native Texan, Maurice aspired to be an attorney, but after two years of legal study, changed to banking by accepting a job at the Federal Reserve Bank in Dallas, where he graduated from the American Institute of Banking. Leaving banking he acquired an interest in one of the largest power laundry and dry cleaning plants in Texas and operated this business for seven years, before entering the entertainment field.

MAURICE UNGER, vice president in charge of West Coast operations for Ziv Television Programs, Inc., was born and raised in Cincinnati. After completing his education, he joined Grandpa Brands Inc., a liquor firm in 1934, and remained there until 1947, working with its affiliated firms as general manager. He also served as president of its Tom Collins Corp. From 1947 to 1950, he was president of the Charles A. Maish Company. Then, in 1950, he joined the Frederic W. Ziv Co. When the firm went into TV production five years later he moved to the West Coast, where he now heads up the firm's TV film operations. Expansion of these operations has included the acquisition of the American National Studios, to accommodate the widened scope of Ziv production schedules.

www.americanradiohistory.com

MARCEL LEDUC, president of Inter-TV Films Ltd., Montreal, and International TV Film Services, Ltd., New York, producers and distributors of television film, had a wide variety of experience in his business background before he became identified with the television film industry. For many years he was active in the export, import and financial fields. In 1953 he formed TV Cooperative Film Sales Co., Inc., distributors of television film. This company was dissolved when International TV Film Services was organized in 1954. In 1955 Inter-TV Films Ltd. was formed in Montreal, P. Q., Canada, with offices in many leading cities, including New York, Los Angeles, Montreal, Toronto, London, Paris, and Rome.

G. CARLETON HUNT, president of General Film Laboratories Corporation, has been connected with the entertainment industry since 1923. He started out with the Hunt theatre chain, moved in 1929 to the Warner Theatres, spent several years as production and stage manager with various stage groups, and was associated for 10 years with RKO Studios as assistant head of the editorial department. Mr. Hunt was elected Governor of the Academy of Motion Picture Arts and Sciences, and has recently been made a Fellow of the Society of Motion Picture and TV Engineers. He entered the TV field in 1951 through the acquisition of Paramount Picture's film laboratory. In allied fields, he is an officer of the Fonda Corporation, builders of motion picture processing equipment, and is vice-president of Unicorn Engineering Corporation.

DANIEL HERBERT KAHN, treasurer and sales manager of Olympia Film Productions, Inc., has a broad and unique background in film and television. A graduate engineer, he has served a rough apprenticeship in practically every phase of the advertising and film business. The second World War interrupted his engineering studies at Bucknell University, and after serving in the Navy, he entered the United States Naval Academy at Annapolis. He was graduated an Ensign in 1949, in time to serve through the Korean War. On leaving the service, he joined the New York Port Authority where he specialized in preparing manuals on handling electronic equipment. In 1953, he became Media Director and account executive at the Lester Harrison Advertising Agency. He joined the staff of Olympia Films early in 1955. His Hobbies? Three: Sailing in the summertime; skiing in the winter; music at all times.

MELVIN GOLD, president of Mel Gold Productions, Inc., started his film career with MGM in Chicago in 1931 as assistant office manager, soon moving to the Reinheimer circuit to manage theatres in Hammond, Indiana. His later experience includes the operation of his own advertising agency, advertising manager of Filmack Trailer, and manager of the Vogue Theatre, Hollywood. In 1943 he joined National Screen Service and served as director of advertising, and later as east coast film production and TV manager. In June, 1954, he formed the Mel Gold Productions. In 1948 Mel founded the National Television Film Council, and has served as both president and chairman of the board. In February, 1955, he was elected an honorary lifetime president. Mel is a member of the Academy of Television Arts and Sciences, of the Variety Club, and of Cinema Lodge.

JOSEPH S. SALZBURG heads the motion picture and TV film service company bearing his name. The firm supervises the production and editing of theatrical, non-theatrical, commercial, and TV films for producers. Joe has been associated in executive and managerial positions with Pictorial Films, Pathe, Associated Artists Productions and Motion Pictures for Television, Inc., before organizing his own firm. During World War II, Joe was a G. I. production supervisor with the first motion picture unit of the Army Air Forces. He has been called in for special film projects of the Department of Defense from time to time. Known and liked by all in the film business since his knee pants days, Joe is a native New Yorker and a member of the Motion Picture Pioneers.

JOHN H. MITCHELL, vice-president and sales manager of Screen Gems, Inc., started his career by way of the mail room of Erwin, Wasey, & Co., and was quickly promoted to the radio department. A native of Rochester, New York, Jack then spent six years with the Mutual Network, organizing and managing the first sales service department. Following his war service, he joined the Honel Corp., and was instrumental in obtaining exclusive area distribution for a number of American products. In 1948, as United Artists television vice-president and general manager, John helped organized UA's TV department. In 1952, he joined Screen Gems, Inc., the TV production and sales subsidiary of Columbia Pictures.

DON FEDDERSON is the creator and producer of the phenomenally popular CBS teleseries, "The Millionaire," and "Do You Trust Your Wife?," as well as the long-running program "Life With Elizabeth." Fedderson is also readying three new video series for coast to coast presentation this coming season. Don came to television after an eminently successful career in radio, and was immediately outstanding as a showman in the new medium. He was the original producer of the Liberace shows on TV, and today he heads one of the biggest production organizations in Hollywood. He was born in Beresford, S. D., and grew up in Kansas City, where he began his business career as a newspaper advertising salesman. From ad selling in San Francisco, he drifted into radio, graduating from jobs as station manager into the production end of the industry in Hollywood.

EDWARD NASSOUR, vice president and treasurer of the Nassour Pictures, Inc., producers of feature films, television films, and television commercials, in association with his brother, William, built the Consolidated Studios in 1945. Five years later the property was sold to the Los Angeles Times, and at the present time station KTTV is on the site. Ed is the producer of the television film series, "Sheena, Queen of the Jungle." He has invented and developed many technical processes for the motion picture industry, including Regiscope. As a producer and director, he just completed "Beast of Hollow Mountain" starring Patricia Medina and Guy Madison, in Technicolor Cinemascope for United Artists.

HARRY FLEISCHMAN, president of Louis G. Cowan, Inc., producers of 1955's greatest hit, and one of television's all-time greats, "The $64,000 Question," is a native New Yorker, but grew up "down east," to wit, in Portsmouth, New Hampshire. The popular Cowan prexy, an ardent golfer, received his degree from Boston University, following which he was associated with Gilbert Miller for over a decade and a half, mostly as general manager. Harry devoted the greater part of a two year sabbatical to bringing his golf score into the low seventies, and is still trying to improve his game. In April, 1951, he joined the Louis G. Cowan, Inc., organization, and four years later, in August of 1955, became president of the production firm.

KENNETH HYMAN, executive vice-president of Associated Artists Productions, Inc., entered the television field in 1947, when the industry was just getting started. As a member of the sales staff of Associated Artists Productions, Ltd., one of television's pioneer feature film distributors, he was an early advocate of the programming strength of Hollywood's feature product in the television picture. He left AAP to serve in the United States Marine Corps. After two and a half years in service, he joined a production unit of Monogram Pictures, working as an assistant director. With actual production experience behind him, he returned to AAP in 1953 on a sales mission to take up once again the use of feature film on TV.

TV Film Production Abroad

LAYMEN looking at film production abroad by American companies, for distribution here in the United States, are of the general opinion that it is cheaper to produce overseas than in the U. S. Most of them base their opinions on the cheaper labor that is accessible outside of this country, but the consensus of opinion of film producers, who are producing films abroad for distribution here, is that in the long run, costs are equal. This is primarily due to the facts of importing actors to foreign countries, and the longer period of time it takes to make pictures there.

☆ ☆ ☆

The European continent, mainly France and Italy, as well of course, as England, have been the locations that have primarily been used up to the present time. The Asiatic countries have been virtually left untouched, and according to Julien Bryan, head of the International Film Foundation, Japan would be a likely place to produce films, due to the comparatively low cost of labor and rental of equipment, as well as the industriousness of the Japanese, and the fine color reproductions made there. As far as actors are concerned, the producers can employ Americans, as well as other English speaking peoples, and their families living there.

☆ ☆ ☆

The real boom in foreign film production by Americans, for distribution here, is over. The boom was a boom only when it was new. It has settled down now due to the equalization of costs, but the industry can look forward to seeing more films produced abroad by Sheldon Reynolds, as well as such companies as Official Films, Guild Films and ABC Films.

LIST OF FILM SERIES, COMPANIES WHICH PRODUCED THEM AND WHERE SHOT

ABC Films — current

1. "Douglas Fairbanks, Jr. Presents" — England, Italy, Germany
2. "Sheena, Queen of the Jungle" — Mexico
3. "Three Muskateers" — Italy

Outlook — Company will start:

1. "The Americano" — half-hour series — Spain

Guild Films

1. To co-produce 39 half-hour films in England.

Outlook: Company is expanding internationally. It is in the process of determining what countries to expand in.

Official Films

1. "The Adventures of the Scarlet Pimpernell" — England
2. "Robin Hood" — England
3. "The Buckaneer" — England
4. "A Knight of the Round Table"—England (tentative title)
5. "Mr. Pastry" (shooting pilot) — England

Outlook: Official Films will do three series yearly abroad.

NBC Film Division

1. "Crunch and Des" — Bermuda

Outlook: NBC Film Division has no plans for continued production abroad.

National Telefilm Associates, Inc. distributing:

1. "Lilli Palmer Show" — London, England
2. "Television Playhouse" — England (one hour dramas — current)

Both NTA shows produced by Harry Alan Towers.

Television Programs of America

Approximately 10 or 15 "Count of Monte Cristo" episodes shot in England.

Outlook: If renewed, "Captain Gallant" will be shot in Africa.

Ziv TV

Shooting background material for "Man Called X," in Paris, West Germany, Rome, Mexico City, and Latin America.

www.americanradiohistory.com

Commercial Television in Great Britain

APPARENTLY, British commercial TV is having an easier time with its growing pains than even optimists expected. Losses at the end of the first quarter of operation were reported as slightly below those calculated by the two program contractors handling the programming in the London area. Based on first quarter figures, cost of airing programs during the first year of operation will run at between $22,500,000 and $25,000,000, while revenue from advertisers will total somewhere between $20,000,000 and $22,500,000, leaving a deficit of from $2,500,000 to $3,000,000.

The ITA (Independent Television Authority) required program contractors to show financial resources of $3,525,000 before receiving a franchise, this requirement being based on the assumption that British commercial TV would follow the American pattern, showing a loss for three years before it began to pay off.

☆ ☆ ☆

Estimates are that in order to break even this year, with production costs running at current high levels, 90 per cent of commercial availabilities would have to be sold out. At present, about 70 per cent of the commercial positions have been sold.

The two contracting companies, Associated Rediffusion and Associated Television, provide all programming in the London area, the former producing all weekday shows and the latter all weekend programs.

Extension of the ITA service into Birmingham and Manchester may brighten this picture for them with added revenue and less production cost. The Birmingham schedule uses Associated Rediffusion shows on the weekend and Associated Television programs during the weekdays.

☆ ☆ ☆

Both companies initially originated seven hours of shows per day but withdrew from the morning hours when they found this time unsalable. This was one of the several sad factors commercial TV in Britain learned the hard way. There were many lessons thus learned. A much heralded concert program which did not come through with an audience and caused a quick retreat from cultural type programming. The pace at which TV gobbles up time and talent, in spite of the much publicized findings in America, was underestimated and this was reflected particularly in drama shows which achieved a high level during the first few weeks of operation but suffered an abrupt decline immediately thereafter.

There are reports that the contractor companies found outbreaks in staffing necessary once operations got underway. The matter of personnel left BBC positions for the more lucrative offers held out by program contractors.

The impact of commercial TV on the BBC TV operation, apparently has been a healthy one though it did put a premium on some programming through competitive bidding. BBC had to up the ante in bidding for such events as sports. BBC has signed contracts to televise some of the most important sports events to be available to the medium during this year.

☆ ☆ ☆

Estimates of the commercial TV audience in the London area during the last week of January were based on 600,000 of the 1,500,000 TV homes in the area owning all-channel sets. A little under 8,000 all-channel sets were being sold per week, and a like number were estimated as being converted to receive both BBC and ITA telecasts. Potential audience in Birmingham is estimated at one-half that of the London peak, 400,000 sets having been converted as of January 31.

As a market for American TV film fare, law puts strict limit on the amount of programming which can be bought, stipulations requiring that 75 per cent of the programming must be British product.

☆ ☆ ☆

However, this aspect of the scene has already brought added revenue to U. S. TV film producers, substantial sales having been consumated on several American series. This is a two-way lane, American advertisers providing a substantial chunk of the advertising revenue now being collected for ITA programming.

The rate structure for advertising has required revision and probably will undergo further readjustment. In approximate dollar amounts, a minute of advertising on a weekday costs $900 in off-peak hours and about $2800 in the peak period (7:55 10:05 p.m.).

Advertisers have no actual voice in the placing of commercials but program contractors are cooperative in spotting them to reach the type of audience an advertiser is attempting to reach. There is no such thing as program sponsorship permitted in Britain.

Phenomenal results have been reported by some American firms using commercial TV in England, several cases of 100 per cent increases due to TV advertising being listed.

Most rating services report an even division of audience in the London area, reports in January running approximately 60 to 40 in favor of BBC on weekdays and the opposite on weekends.

U. S. Educational Radio And Television

By
MATTHEW
SEIDMAN
Staff Writer

EDUCATIONAL radio has had a fierce and fluctuating history since radio came into its own some 30 odd years ago. In a 15 year period, up to 1936, 168 different educational institutions were granted 202 broadcasting licenses, with 73 being taken out in 1922 alone. With the inception of broadcasting license grants for educational institutions, came the inception of loss or abandonment of licenses, so that by January 1, 1937, 38 institutions held licenses. Only 20 of the total 202 licenses granted from 1921 to 1936 were held for the entire period. All 38 educational stations holding licenses in 1937 were AM.

☆ ☆ ☆

Immediately after 1945, FM channels became available for educational stations, and by 1951, more than 100 educational stations were on the air. Most of them transmitted on FM. Institutions rushed to get FM broadcasting licenses, since FM was supposed to be the future of the broadcasting medium, until television came into being.

☆ ☆ ☆

Coverage via educational radio stations was spotty, and only Alabama, California, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Ohio, and Wisconsin had anything that resembled statewide coverage, with Wisconsin being the only state with a statewide network. In 1950, Seymour N. Siegel of WNYC, initiated the development of the Tape Network, in an effort to link up stations. As the development grew, it became a cooperative enterprise of the National Association of Educational Broadcasters.

With the coming of commercial television, came the rush for grants for educational TV stations. Primarily due to lack of funds, number of grants for educational TV stations greatly outnumbered the stations on the air. Radio has a history. Television is making one now.

☆ ☆ ☆

Many people have argued that educational television is useless, because commercial TV outlets can accomplish what is being done by the educational stations. Programwise, educational outlets beam not only to adults, but to school children of various ages. Aside from classroom TV being used as a supplement to the teacher, and courses taught on television, programs include cultural type shows like some seen on the BBC and CBC. Shows which some advocates of American television, as opposed to BBC type TV programs, feel would be forced down the throats of viewers if beamed on regular commercial outlets. Various discussions, like "Talk O' The Teens," in which teenagers quiz civic leaders and officials on youth problems; music shows, such as "Music For Moderns," which programs contemporary music giving a brief history about the music and composer whose music is being aired that day, and programs designed for in school listening and viewing which aid the teacher in her daily tasks, are some of the programs which educational stations transmit.

☆ ☆ ☆

Regular commercial stations also transmit "culture," but it is argued that they do not do so on such a comprehensive scale. In the five year period television has come into being for class-room and home-study use, more than 400 college-level courses have been given by TV.

As far as education itself is concerned, relating to the broadcasting medium, Franklin Dunham, chief of radio and television, U. S. Office of Education, states, "Education is slow to accept new methods until they justify themselves under trial. Today we have a healthy record of achievement with radio over 25 years experience." Amount of achievement is debatable, with many saying there has been failure if the criterion is the gap between potentiality and actuality.

LIST OF EDUCATIONAL STATIONS ON THE AIR IN THE U. S.

• 22 non-commercial AM stations operating • 10 commercial AM stations operating • 125 non-commercial FM stations operating • 3 commercial FM stations operating • 18 TV stations licensed and operating • 3 TV stations operating on a non-reserved channel • 248 TV channels have been assigned to U. S. cities, 80 on VHF • 24 cities have construction permits, or applications pending for TV stations.

Famous First Facts In U. S. Television

THE FIRST:

AUDIENCE participation telecast was charades presented on August 7, 1941, and telecast by Station WNBT, New York City.

Baseball game (collegiate) telecast was the Columbia University-Princeton University game, played May 17, 1939, at Baker Field, New York City. The game lasted ten innings and was won by Princeton 2-1. It was telecast by Station W2XBS, New York City, and was announced by Bill Stern.

Baseball game (major league) telecast was the National League game played at Ebbets Field, Brooklyn, N. Y., August 26, 1939, between the Cincinnati "Reds" and the Brooklyn "Dodgers." Two cameras were used alternately by Station W2XBS, New York City, according to the play. Leo Durocher, manager of the "Dodgers," William McKechnie, manager of the "Reds," and close-ups of several players were telecast during the intermission of the double-header game.

☆ ☆ ☆

Basketball game telecast was played February 28, 1940, at Madison Square Garden and telecast by Station W2XBS, New York City. Fordham University played the University of Pittsburgh (Fordham 37-Pittsburgh 50) followed by Georgetown University versus New York University (Georgetown 27-New York University 50).

Book review telecast was Ernest Boyds review on May 3, 1938, over Station W2XBS, New York City, of Sidney Spencers **The Greatest Show on Earth.** It combined photographs and text to explain the economic problems of mankind. While Boyd was talking, the review opened with a telecast of the reviewer followed by numerous pick-ups of photographs from the book.

Circus telecast was the Ringling Brothers Barnum and Bailey circus whose three hour show was telecast April 25, 1940 from Madison Square Garden, New York City by Station W2XBS, New York City.

☆ ☆ ☆

Color television (high definition electronically scanned) demonstration was given September 3, 1940, for the press over Television Station W2XAB of the Columbia Broadcasting System, New York City. The telecast was from the high-power transmitter atop the Chrysler Building, New York City. It had a 343-line quality and used a 4.5 megacycle band, the same frequency required for ordinary black and white images. The telecasts were received in black and white, but a color disc placed in front of the receiver tube enabled the audience at the station to view the picture in color. The apparatus was invented by Dr. Peter Carl Goldmark, Columbia Broadcasting Systems chief television engineer.

Construction permit for a commercial television station was granted June 17, 1941 to WNBT of the National Broadcasting Company, Inc., New York City to operate on 50,000-56,000 kilocycles. A license to cover this construction permit was also granted June 17, 1941 effective July 1, 1941.

☆ ☆ ☆

Electronic television system using the pick up device known as the Iconoscope, which displaced the mechanical system by means of motordriven scanning discs, was invented by Vladimir Kosma Zworykin of Wilkinsburg, Pa., who obtained patent No. 2,141,059 on December 20, 1938. The patent covered forty claims and was assigned to the Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. His application was filed December 29, 1923.

Football game telecast was played at Randalls Island, New York City, September 30, 1939, between Fordham University and Waynesburg College and telecast by Station W2XBS, New York City. Fordham won 34 to 7.

Hockey game telecast was played February 25, 1940, at Madison Square Garden, New York City, between the New York "Rangers" and "Les Canadiens" of Montreal and telecast by Station W2XBS, New York City. The "Rangers" won 6 to 2.

☆ ☆ ☆

King and Queen to be televised were King George VI and Queen Elizabeth of England who, on June 16, 1939, visited the New York World's Fair, New York City during "British Week."

Moving picture premiere telecast was a two-reel short "Patrolling the Ether," which was telecast April 10, 1944, simultaneously by WNBT of New York City, WRGB of Schenectady, N. Y., and WPTZ of Philadelphia, Pa. It depicted the wartime activities of the radio intelligence division of the Federal Communication Commission in tracing illegal and espionage radio transmitters. It was produced by Metro-Goldwyn-Mayer and released April 22, 1944, twelve days after its premiere by television.

Opera (complete) telecast was presented December 23, 1943, by Station WRGB of the General Electric Company, Schenectady, N. Y. The presentation was Humperdinck's "Hansel and Gretel."

Reprinted with consent of "Famous First Facts" published by H. W. Wilson Company.

www.americanradiohistory.com

Famous First Facts In U. S. Television

Political campaign telecast was on October 11, 1932, when the Democratic National Committee broadcast a television show from the studios of the Columbia Broadcasting System, 485 Madison Avenue, New York City.

☆ ☆ ☆

Political convention telecast was the twenty-second Republican Convention, June 24-29, 1940, at Philadelphia, Pa., when Wendell Lewis Willkie of New York and Charles Linza McNary of Oregon were nominated for President and Vice President respectively. The telecast was made by W2XBS of the National Broadcasting Company, New York City, 49.75 megacycles.

Presidential address telecast from the White House was on October 5, 1947, when President Harry S. Truman's speech about food conservation and the world food crisis was telecast from Washington, D. C., and relayed to New York City, Philadelphia and Schenectady. He proposed meatless Tuesdays, and eggless and poultryless Thursdays.

Programs regularly telecast were begun May 11, 1928, on a three times a week schedule from the General Electric Station, WGY, Schenectady, N. Y. The image consisted of 24 scanning lines repeated 20 times a second.

☆ ☆ ☆

Puglistic telecast was the Lou Nova-Max Baer fight, June 1, 1939, at the Yankee Stadium, New York City. Sam Taub was the announcer. Referee Frank Fullam halted the bout in the eleventh round and awarded the decision to Nova.

Pugilistic telecast of a championship heavyweight fight was June 19, 1946 when Joe Louis defended his title against Billy Conn at the Yankee Stadium, New York City. Louis won by a knockout in the eighth round.

Stratovision world series telecast was made October 11, 1948, when the sixth game of the world series between the Boston "Braves" of the National League and the Cleveland "Indians" of the American League, played at Boston, Mass., was transmitted from the stratovision plane flying at 25,000 feet over the Pittsburgh area.

Television commercial license was granted to Station W2XBS of the National Broadcasting Company, New York City on July 1, 1941. It is now WNBT. Operations were required four hours a week, but approximately fifteen hours a week were presented.

Television demonstration (public, large-scale, intra-store) was staged at Gimbel Brothers, Philadelphia, Pa., from October 24 to November 14, 1945, inclusive using RCA-Victor equipment. A preview was held October 23, 1945. Approximately 25,000 people viewed the demonstrations at the auditorium and at twenty telesites scattered at strategic locations on the seven floors of the department store. Eleven daily demonstrations of about ten minutes each were given showing millinery, home furnishings, shoes, scarves, furs, nursery furniture, toys, curtains, interior decorating and hair styling.

☆ ☆ ☆

Television image (transoceanic) was received February 8, 1928 at Hartsdale, N. Y., by Robert M. Hart, owner of short wave station W2CVJ. The sound vision, a picture of Mrs. Mia Howe, was sent across the ocean from Station 2 KZ, Purley, England, two kilowatt power, by John Logie Baird of the Baird Television Development Company of London, England, using short radio waves.

Television network demonstration (distant) was held on February 1, 1940, when members of the Federal Communications Commission at General Electric Station W2XB, Schenectady, N. Y., witnessed a program telecast from New York City, approximately 130 miles distant. It was received at a relay station on the 44-50 megacycle band by means of a rhombic antenna, supported by four 128 foot towers, and rebroadcast to the Schenectady-Albany district.

☆ ☆ ☆

Track meet (intercollegiate) telecast was the 19th annual Intercollegiate A.A.A.A. track and field championship meet at Madison Square Garden, New York City, telecast March 2, 1940, by W2XBS. Twenty-three colleges participated in the various dashes, runs, relays, high hurdles, shot put, pole vault, weight throwing, broad jumps and high jumps. New York University won with twenty-seven points.

Weather map telecast from a land sending station to a land receiving station was sent August 18, 1926, from Radio Station NAA, Arlington, Va., and received at the Weather Bureau Office, Washington, D. C. The demonstration was arranged by the Jenkins Laboratory, Washington, D. C.

Radio's Future Is Local Program Building

By
PIERRE WEIS
General Manager
World Broadcasting
System

TAKE a good look at radio's values today, and you'll see that radio is surviving the toughest competition it has faced, particularly at the local level where radio is closest to the audience and the advertisers it serves.

Radio's future, at the local level, is indeed splendid. Mature broadcasters have shaped and reshaped their program schedules until now they can point to solid successes for spot and program advertisers, and large loyal audiences.

☆ ☆ ☆

We at World have been part of that success, and are proud of our role. We have made tremendous changes in our service in the past year, and designed it to be of greater help than ever to the program and sales departments of our 1,000-plus subscribers. The secret is simple — more and more new ideas, and more and more talent.

For example, we are constantly exploring new avenues in bringing the finest recording talent into our service. Our 1956 talent budget, which we recently announced, will be 23% higher than last year's, and our marquee sparkles with such new stars at World as Doris Day, Victor Young, Eddie Bush, Bobbie Hackett and Mimi Martel, joining World's popular artists like David Rose, Lyn Murray, Ray Bloch, Sauter-Finnegan, Helen O'Connell, Ken Griffin, The Sportsmen, Three Suns and a host of others. Musical selections by these talented artists, presented on local radio stations at times designed to reach top audiences, thus becomes top sales vehicles.

☆ ☆ ☆

Radio stations are also learning that they compete best when the station has developed its own individual "personality" — a sort of corporate identity in the minds of radio listeners. This is developed through the amount of programs and airings of a "service" nature that a station carries. With this in mind, we have developed a whole series of recorded Time Signals, Weather Jingles, Tune-In Jingles, Feature Program Signatures — all designed to help stations in building themselves into a familiar, tuned-to source of entertainment and information.

The local and regional advertiser is also establishing himself as the dominant source of income to radio outlets. He now finds a wide choice of programming available to him. But his advertising must be able to match the high calibre of his program selections. World plans for 1956 a series of campaigns built around special jingles and other attention-getting devices for local beauty shops, bakers, restaurants, taxi cabs, drug stores, grocers, supermarkets, furniture stores, apparel shops, jewelers and even diaper services. With the aid of such jingles, local advertisers can build selling campaigns with the same tool used by the leading advertisers in the country.

☆ ☆ ☆

There is another phase of the radio business whereby stations are gaining radio strength. Since we service a huge list of stations and employ top people on our staff, we have at our disposal a very large promotion department. And, we are in a position not only to come up with sound new ideas and new promotions but to do a most thorough job in the preparation of exciting sales and production tools to insure success. We are able to produce these merchandising aids — which range from multicolored posters and store display materials to station promotion jingles — with tremendous impact because of our resources which would be impossible and unecomonic for an individual station to attempt to duplicate.

No doubt you have seen our nationwide radio promotion campaign, "Radio's Big Little Man," in action.

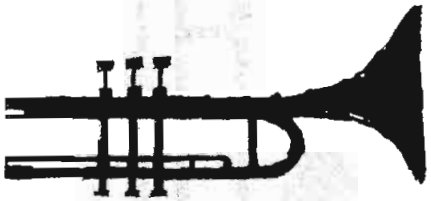

☆ ☆ ☆

We announced it to the radio industry at last year's NARTB Convention. Since then, nearly 500 stations have joined in the campaign to focus advertiser and audience attention on local-level radio, and have intensified their local sales campaigns. Many top broadcasters have told us that "Radio's Big Little Man" is just what was needed to give radio new status and a new surge of audience attention.

The campaign — which, with its list of prizes and top-notch merchandising drives, for World, stations and their advertisers an investment of more than $1,500,000 — is designed to bring many additional values to local radio advertisers, such as increased store traffic, larger sales volume, and the advantages of being part of a community-wide promotion.

The basic idea, of course, is good. But what is really putting it across with radio stations is the tremendous assortment of merchandising and promotion materials made available to our stations, which not only has made it easy for them to sell their sponsors but has also given them the tools to make the promotion a success with listeners.

ASCAP

the music of America

For more than forty years the members of the American Society of Composers, Authors and Publishers have supplied our nation's tremendous entertainment world with its basic ingredient—the music of America. An **ASCAP** license grants the commercial user of music the right to perform the Society's entire repertory in one complete package. The top tunes of television, radio and records, tomorrow's song hits, yesterday's favorites, hits from Broadway and Hollywood, as well as the best in the field of classical and religious music are always available through an **ASCAP** license.

☆ ☆ ☆

THE clearance of music copyrights for commercial performance is a major responsibility of television and radio program builders. The large and increasing use of music in these programs would impose almost impossible tasks upon the music users were it not for the facilities developed by the American Society of Composers, Authors and Publishers (ASCAP) to meet the questions of copyright clearance. This great American performing right society, and similar societies in other countries, reflect in their operations the tremendous growth of radio and television.

Through the simple machinery of a blanket agreement between a licensee and a performing right society, the licensee obtains complete clearance of the Society's complete catalog. ASCAP spends more than three million dollars annually in its maintenance of program service to its licensees. Without the overall service obtainable through the Society, the individual operators would face a host of problems of research and other costly details of day to day operation.

ASCAP now is in its 42nd year of service to its members and its licensees. With a membership now in excess of 4,000, its repertory covering two generations of composers, authors and publishers embraces American music of every conceivable sort. In addition, foreign societies grant to ASCAP the right to license their repertories, so that the ASCAP license opens to its holder vast stores of music the world over.

ASCAP maintains headquarters at 575 Madison Ave., New York City, with 25 branches throughout the country. Officers as of Jan. 1, 1956, are:

Stanley Adams ..... *President*
Otto A. Harbach ..... *Vice President*
Louis Bernstein ..... *Vice President*
John Tasker Howard ..... *Secretary*
Saul H. Bourne ..... *Treasurer*
George W. Meyer ..... *Asst. Secretary*
Frank H. Connor ..... *Asst. Treasurer*

The Board of Directors comprises 12 writers and 12 publisher-members, elected biennially, the writers by writer-members, the publishers by publisher-members, for two year terms. The directors are: Writers: Stanley Adams, Gene Buck, Paul Cunningham, L. Wolfe Gilbert, Oscar Hammerstein II, Otto A. Harbach, John Tasker Howard, Alex C. Kramer, A. Walter Kramer, George W. Meyer, Deems Taylor, Jack Yellen; publishers: Louis Bernstein, Saul H. Bourne, Irving Caesar, Frank H. Connor, Max Dreyfus, Bernard Goodwin, Donald Gray, Jack Mills, Abe Olman, J. J. Robbins, Gustave Schirmer, Herman Starr.

ASSOCIATED MUSIC PUBLISHERS, INC.

By CHARLES A. WALL
President and Treasurer

☆ ☆ ☆

ASSOCIATED MUSIC PUBLISHERS, INC., a wholly owned subsidiary of Broadcast Music, Inc., serves the radio and television industry in the field of serious music. It is recognized at the present time as one of the principal publishers and exploiters of contemporary music in the United States and controls a very extensive and expanding catalog of orchestral, band, chamber, instrumental and choral works by foremost American and foreign composers. In addition AMP also represents exclusively in the United States many of the most famous serious music catalogs of Europe such as Breitkopf & Haertel and Schott of Germany, Schott and Universal Edition of England, Universal Edition of Austria and Switzerland, Eschig and Enoch of France, Union Musical Espanol of Spain, Suvini Zerboni and Sonzogno of Italy, and many others.

•

AMP is also the sole selling and exploitation agent in the United States for serious works published by Broadcast Music, Inc., and BMI Canada, Ltd. All performing rights are cleared through BMI.

The Board of Directors of the company are as follows:

Sydney M. Kaye, Chairman of BMI Board, Chairman; Carl Haverlin, President of BMI; William S. Hedges; Paul W. Morency; J. Harold Ryan; Charles A. Wall, President and Treasurer.

Officers of the company are: Charles A. Wall, President and Treasurer; Karl Bauer, Vice President; Richard French, Vice President; Benjamin V. Grasso, Vice President; Robert J. Burton, Secretary.

•

Foreign and domestic music catalogs represented.

BROADCAST MUSIC, INC.

By CARL HAVERLIN
President

DURING each day of the sixteen years of its existence Broadcast Music, Inc., has adhered steadfastly to one basic principle—competition is healthy and necessary. Because of this credo, BMI operates as a competitive force in the field of performing rights. Because it believes in competition, BMI operates in a manner intended to benefit all composers, all writers, all music publishers, all users of music.

The result has been to establish an open door and an open market place for all creators of music and for all publishers of music. Benefits of the BMI policy continue to flow not only to well established publishers and writers but to the newcomers who have come into the field since the creation of BMI.

In order to maintain a constantly growing source of music and to provide a steady challenge to the progressive composer, writer, and publisher, BMI has devoted its attention to all types of music. As a result, national, indeed world-wide, interest has been focused on fields of music once considered geographically limited or intellectually esoteric. The resultant democratization of musical elements has developed a truly American music, one which is made up of many forces, popular, country and Western, rhythm and blues, concert. Because of this, the creators and the developers of these musical forces have found new opportunities.

Today, BMI is proud of the fact that so many publishers, composers and writers have found inspiration and remuneration in the open market place.

BMI begins its seventeenth year of existence as it did its first . . . dedicated to the one basic principle—competition in music is as healthy and necessary as in any other field of American endeavor.

OFFICERS OF BMI: Carl Haverlin, President; Sydney M. Kaye, Vice-president and General Counsel; Robert J. Burton, Vice-president in charge of Publisher and Writers Relations, Secretary; Charles A. Wall, Vice-president in charge of Finance; Roy Harlow, Vice-president in charge of Station Service; Glenn Dolberg, Vice-president in charge of Station Relations; Jean Geiringer, Vice-president, Foreign Relations; Harry P. Somerville, Vice-president, Non-Radio Licensing; Robert Sour, Assistant Vice-president, Publisher Relations.

DIRECTORS: (elected annually): Sydney M. Kaye, Chairman; Herbert V. Akerberg, John Elmer, Joseph E. Baudino, Carl Haverlin, William S. Hedges, Herbert Hollister, Leonard Kapner, Paul W. Morency, Ernest Lee Jahncke, Jr., J. Leonard Reinsch, J. Harold Ryan, G. Richard Shafto and James E. Wallen.

CELEBRATING OUR 25TH ANNIVERSARY

SESAC

PAUL HEINECKE, PRESIDENT

LICENSING THE PERFORMANCE,
MECHANICAL OR SYNCHRONIZATION RIGHTS IN
"THE BEST MUSIC IN AMERICA"
TO THE ENTIRE ENTERTAINMENT INDUSTRY,
RADIO, TELEVISION, MOTION PICTURE, TRANSCRIPTION
AND PHONOGRAPH RECORD COMPANIES, THEATRES,
CONCERT HALLS, HOTELS, ETC.

PRODUCERS OF THE FAMOUS **SESAC TRANSCRIBED LIBRARY**

THE BEST MUSIC IN AMERICA SESAC

A REPERTORY OF DISTINCTION

www.americanradiohistory.com

SESAC, INC.

By PAUL HEINECKE
President

☆ ☆ ☆

IN February, 1956, SESAC celebrates its 25th year of service to the entire entertainment industry, and so I'd like this to be a salute to all SESAC's business associates: radio and television stations, affiliated publishers, phonograph record and transcription companies, the producers of transcribed programs, film companies, opera houses, orchestral societies, ballrooms and hotels.

I'm aware that our mutual growth and success could not have been possible without the complete faith we have in each other, and a bright, burning hope that each succeeding day and year would bring about even greater achievement to music publisher and music user alike.

I have always been an unflinching advocate of the performance licensing organization, and along with all SESAC's employees, I am dedicated to our purposes and proud of our accomplishments. It is gratifying, indeed, to realize that the contents of SESAC's 284 different publishers' catalogs are found on hundreds of thousands of phonograph records, transcription libraries, transcribed programs, live talent, radio and television shows, filmed commercials, feature films; also in the legitimate theatre, motion pictures, symphony orchestras, ballet theatre, choral societies, and throughout the schools and churches of America.

It is also exciting to share in the enthusiasm of our affiliated publishers in their drive to develop and promote their catalogs, and for me to realize conclusively that SESAC music performances on over 3,500 AM and TV stations due to increased use in all programs media are on a greater upswing than ever before.

Here then, on our 25th anniversary, it is heartwarming to see the fruits of our combined efforts—essential, in-demand publishers whose catalogs make satisfied music users of our licensees. As to the future, we shall continue to use as our buckler and our shield the eternal qualities of faith and hope, knowing full well that these, coupled with diligent and honest effort, shall inure to the benefit of all music producers and users everywhere.

an Ampex can keep your accountant happy too!

it can cost less per hour than any other recorder you can buy

A few cents per hour is all it costs in the long run . . . because year after year an Ampex continues to perform within original specifications (18,000 known hours of service in one actual instance). Inevitably it requires fewer adjustments and parts replacements than machines of lesser quality. And because an Ampex is the recorder that everyone wants, it maintains the highest percentage of its original value. For lasting economy, buy the best — buy Ampex.

For further information, write to Dept. MM 2290

SIGNATURE OF PERFECTION IN SOUND

Distributors in principal cities (see your local Telephone Directory under "Recording Equipment"). In Canada, Ampex American, 70 Grenville Street, Toronto, Ontario.

Industry Faces Excellent 1956 Prospects

By
HENRY C. BONFIG
President
CBS-Columbia
A Division of the
Columbia Broadcasting
System

IN 1956 the television-electronics industry enters its tenth post-war year with an impressive record behind it and excellent future prospects. The industry can look forward to continued heavy volume in black-and-white set sales, a radio sales year, equal at least to 1955, and a marked increase in color production and sales.

Television's past record certainly can be pointed to with pride. Since 1946 some 46 million video receivers have been sold. This record for a decade compares most favorably with the forty years the automobile industry needed to roll up 32 million car and truck registrations.

☆ ☆ ☆

All signs point to good 1956 economic health for the nation. Gross national product, employment, housing starts, marriages and subsequent new home units, personal income rising, capital outlays by business and construction all are up. The keynote of the nation is strong confidence. The television-electronics industry will be well able to keep pace with the country's prosperity.

In 1956, the industry should be able to make and sell seven million black-and-white television sets and between 200-300,000 color sets. The radio set industry can sell upwards of fourteen million receivers in 1956, including automobile radios.

At this time, approximately 67% of American households have television. Conversely, this also means that one-third of the nation's households do not have video — a sizable market, indeed.

☆ ☆ ☆

The black-and-white prospects grow increasingly good with each passing day due to the replacement and multiple set markets. Replacement figures for 1955 key the trend. In January, 1955 one out of every five sets sold was a replacement; by the year's end the ratio was close to one to three. At the start of 1955 only 4% of the sets in use were second sets; by the end of the year, according to RETMA figures, that ratio jumped to nearly 10%.

With 38.8% of the nation's television sets three years or older, and close to 11% having screens under 17 inches, a wonderful re-sell opportunity exists for alert dealers.

Retail prices of black-and-white sets should remain fairly steady in 1956 as the industry will find it difficult to pass further production, component and labor cost increases on to the consumer.

There was increasing interest in color television all during the 1955 Fall selling season. This interest was piqued by greater top quality programming and various color promotions which took place, largely during the month of December. These promotions proved that, if it is merchandised properly, color TV can be moved.

☆ ☆ ☆

However, in 1956 the industry still must face, realistically, several problems before it can "get off the ground." These problems include overall production techniques, high sales costs, increasing dealer education on color selling and promotion, service education, more consumer excitement.

One more important point must be brought up. That is, if color is to get started as a mass medium it must be stimulated by all industry all-out effort — and not the work of but a small group. If the industry makes a concerted drive in all phases of production, sales, merchandising and promotion, color television can really get started in 1956!

Prospects for radio loom their brightest in years, with transistors as the chief stimulant. Transistors can be classified as the first really new sales stimulant in radio since the tuning refinements and original miniaturization efforts that characterized the 1930's. Indeed, the advent of television has accelerated the trend toward flexible, tailored use radios, and the sales curve has certainly reflected this since 1946.

☆ ☆ ☆

On the broad fronts of black-and-white, and color television, radio and the government-industrial apparatus fields, CBS-Columbia plans to keep pace with anticipated overall industry growth. This will be accomplished in an orderly manner, with an accompanying increase in industry position. The progress that we have charted will be a steady process of building, and one of teamwork with our distributors and retail outlets.

THE TELEVISION CODE OF THE NARTB

☆ ☆ ☆

PREAMBLE

TELEVISION is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

THE REVENUES from advertising support the free, competitive American system of telecasting, and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obligated to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

THE AMERICAN businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

TELEVISION, and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

IN ORDER that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

www.americanradiohistory.com

ADVANCEMENT OF EDUCATION AND CULTURE

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and co-operation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. In furthering this realization, the television broadcaster:

a) Should be thoroughly conversant with the educational and cultural needs and desires of the community served.

b) Should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

c) Should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

ACCEPTABILITY OF PROGRAM MATERIAL

Program material should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has toward his society. Furthermore:

a) (i) Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

(ii) Words (especially slang) derisive of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combatting prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

(iii) The Television Code Review board shall maintain and issue to subscribers, from time to time, a continuing list of specific words and phrases, which should not be used in keeping with this subsection. This list, however, shall not be considered as all-inclusive.

b) (i) Attacks on religion and religious faiths are not allowed.

(ii) Reverence is to mark any mention of the name of God, His attributes and powers.

www.americanradiohistory.com

(iii) When religious rites are included in other than religious programs, the rites are accurately presented, and the ministers, priests and rabbis portrayed in their callings are vested with the dignity of their office and under no circumstances are to be held up to ridicule.

c) (i) Contests may not constitute a lottery.

(ii) Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward, rather than for the quality of the program, should be avoided.

d) Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually nor justified as a solution for marital problems.

e) Illicit sex relations are not treated as commendable.

f) Sex crimes and abnormalities are generally unacceptable as program material.

g) Drunkenness and narcotic addiction are never presented as desirable or prevalent.

h) The administration of illegal drugs will not be displayed.

i) The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

j) The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with Federal, state and local laws, and should concentrate on the subject as a public sporting event.

k) In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

l) Exhibitions of fortune-telling, astrology, phrenology, palm-reading, and numerology are acceptable only when required by a plot or the theme of a program, and then the presentation should be developed in a manner designed not to foster superstition or excite interest or belief in these subjects.

m) Television drama shall not simulate news or special events in such a way as to mislead or alarm. Reference is made to the section of the Code on News.

n) Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

o) The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

p) Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

q) Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

r) The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

www.americanradiohistory.com

s) The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

t) Law enforcement shall be upheld, and the officers of the law are to be portrayed with respect and dignity.

u) The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

v) Suicide as an acceptable solution for human problems is prohibited.

w) The exposition of sex crimes will be avoided.

x) The appearance or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

y) The use of animals, both in the production of television programs and as a part of television program content, shall, at all times, be in conformity with accepted standards of humane treatment.

RESPONSIBILITY TOWARD CHILDREN

1. The education of children involves giving them a sense of the world at large. Crime, violence and sex are a part of the world they will be called upon to meet, and a certain amount of proper presentation of such is helpful in orienting the child to his social surroundings. However, violence and illicit sex shall not be presented in an attractive manner, nor to an extent such as will lead a child to believe that they play a greater part in life than they do. They should not be presented without indications of the resultant retribution and punishment.

2. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. (Attention is called to the general items listed under "Acceptability of Program Materials.") Television is responsible for insuring that programs of all sorts which occur during the times of day when children may normally be expected to have the opportunity of viewing television shall exercise care in the following regards:

a) In affording opportunities for cultural growth as well as for wholesome entertainment.

b) In developing programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

c) In reflecting respect for parents, for honorable behavior, and for the constituted authorities of the American community.

d) In eliminating reference to kidnapping of children or threats of kidnapping.

e) In avoiding material which is excessively violent or would create morbid suspense, or other undesirable reactions in children.

f) In exercising particular restraint and care in crime or mystery episodes involving children or minors.

DECENCY AND DECORUM IN PRODUCTION

1. The costuming of all performers shall be within the bounds of

www.americanradiohistory.com

propriety, and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

2. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

3. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

4. Racial or nationality types shall not be shown in television in such a manner as to ridicule the race or nationality.

5. The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

COMMUNITY RESPONSIBILITY

A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

TREATMENT OF NEWS AND PUBLIC EVENTS

News

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. Commentary and analysis should be clearly identified as such.

4. Good taste should prevail in the selection handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

5. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

6. Pictorial material should be chosen with care and not presented in a misleading manner.

7. A television broadcaster should exercise due care in his supervision of content format, and presentation of newscasts originated by his station; and in his selection of newscasters, commentators, and analysts.

8. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

9. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words

www.americanradiohistory.com

or phrases which do not necessarily imply that the material following is a news release.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. Because of the nature of events open to public, the treatment of such events by a television broadcaster should be effected in a manner to provide for adequate and informed coverage as well as good taste in presentation.

Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. In keeping therewith the television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to its fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. The provision of time for this purpose should be guided by the following principles:

a) Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

b) Programs devoted to the discussion of controversial public issues should be identified as such, and should not be presented in a manner which would mislead listeners or viewers to believe that the program is of entertainment, news or any other character.

Political Telecasts

Political telecasts should be clearly identified as such, and should not be presented by a television broadcaster in a manner which would mislead listeners or views to believe that the program is of any other character.

Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community, as part of a well-balanced program schedule, adequate opportunity for religious presentations.

2. The following principles should be followed in the treatment of such programs:

a) Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

b) Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

c) Religious programs should be presented by responsible individuals, groups, and organizations.

d) Religious programs should place emphasis on broad religious

www.americanradiohistory.com

truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

3. In the allocation of time for telecasts of religious programs it is recommended that the television station use its best efforts to apportion such time fairly among the representative faith groups of its community.

PRESENTATION OF ADVERTISING

1. Ever mindful of the role of television as a guest in the home, a television broadcaster should exercise unceasing care to supervise the form in which advertising material is presented over his facilities. Since television is a developing medium, involving methods and techniques distinct from those of radio, it may be desirable, from time to time, to review and revise the presently suggested practices.

(a) Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

b) A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called "trailer" announcements). To this end, the program itself should be announced and clearly identified BOTH AUDIO AND VIDEO before the sponsor's advertising material is first used, and should be signed off BOTH AUDIO AND VIDEO after the sponsor's advertising material is last used.

c) Advertising copy should contain no claims intended to disparage competitors, competing products, or other industries, professions or institutions.

d) Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

e) Television broadcasters should exercise the utmost care and discrimination with regard to advertising material, including content, placement and presentation, near or adjacent to programs designed for children. No considerations of expediency should be permitted to impinge upon the vital responsibility towards children and adolescents, which is inherent in television, and which must be recognized and accepted by all advertisers employing television.

f) Television advertisers should be encouraged to devote portions of their allotted advertising messages and program time to the support of worthy causes in the public interest in keeping with the highest ideals of the free competitive system.

g) A charge for television time to churches and religious bodies is not recommended.

ACCEPTABILITY OF ADVERTISERS AND PRODUCTS

General

1. A commercial television broadcaster makes his facilities available

www.americanradiohistory.com

for the advertising of products and services and accepts commercial presentations for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility, taking into consideration the characteristics of the medium and the form and content of the particular presentation. In general, because television broadcast is designed for the home and the family, including children, the following principles should govern the business classifications listed below:

a) The advertising of hard liquor should not be accepted.

b) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to federal and local laws.

c) Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

d) The advertising of firearms and fireworks is acceptable only subject to federal and local laws.

e) The advertising of fortune-telling, occultism, spiritualism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is not acceptable.

f) Because all products of a personal nature create special problems, such products, when accepted, should be treated with especial emphasis on ethics and the canons of good taste; however, the advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups is not acceptable.

g) The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is not accepable.

2. Diligence should be exercised to the end that advertising copy accepted for telecasting complies with pertinent federal, state and local laws.

3. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

ADVERTISING OF MEDICAL PRODUCTS

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer, and the following principles and procedures should apply in the advertising thereof.

www.americanradiohistory.com

a) A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

b) Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe", "without risk", "harmless", or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

Contests

1. Contests should offer the opportunity to all contestants to win on the basis of ability and skill, rather than chance.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof should be made acceptable.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (see Time Standards for Advertising Copy.)

Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of the listeners.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

Time Standards for Advertising Copy

1. In accordance with good telecast advertising practices, the time standards for advertising copy are as follows:

www.americanradiohistory.com

Length of Program		Length of Advertising Message (minutes and seconds)	
	News Programs	All Other Programs	
(minutes)	Day and Night	Class "A" Time	All Other Hrs.
5	1:00	1:00	1:15
10	1:45	2:00	2:10
15	2:15	2:30	3:00
25		2:50	4:00
30		3:00	4:15
45		4:30	5:45
60		6:00	7:00

2. Reasonable and limited identification of prize and statement of the donor's name within formats wherein the presentation of contest awards or prizes is a necessary and integral part of program content shall not be included as commercial time within the meaning of paragraph 1. above; however, any oral or visual presentation concerning the product or its donor, over and beyond such identification and statement, shall be included as commercial time within the meaning of paragraph 1. above.

3. The time standards set forth above do not affect the established practice of reserving for station use the last 30 seconds of each program for station break and spot announcements.

4. Announcement programs are designed to accommodate a designated number of individual live or recorded announcements, generally one minute in length, which are carried within the body of the program and are available for sale to individual advertisers. Normally not more than 3 one-minute announcements (which should not exceed approximately 125 words if presented live) should be scheduled within a 15-minute period and not more than six such announcements should be scheduled within a 30-minute period in local announcement programs; however, fewer announcements of greater individual length may be scheduled, provided that the aggregate length of the announcements approximates three minutes in a 15-minute program or six minutes in a 30-minute program. In announcement programs other than 15 minutes or 30 minutes in length, the proportion of one minute of announcement within every five minutes of programming is normally applied. The announcements must be presented within the framework of the program period designated for their use and kept in harmony with the content of the program in which they are placed.

5. Programs presenting women's services, features, shopping guides, market information, and similar material, provide a special service to the listening and viewing public in which advertising material is an informative and integral part of the program content. Because of these specal characteristics the time standards set forth above may be waived to a reasonable extent.

6. Even though the commercial time limitations of the Code do not specifically prohibit back-to-back announcements, such a practice is not recommended for more than two announcements, either at station break or within the framework of a single program.

7. Any casual reference BY TALENT in a program to another's product or service under any trade name or language sufficiently descriptive to identify it should, except for normal guest identifications, be condemned and discouraged.

www.americanradiohistory.com

8. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade mark or slogan may be used only incidentally. They should not obtrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

Dramatized Appeals and Advertising

Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience or it should be made apparent from the presentation itself that the portrayal is dramatized.

Sponsor Identification

Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

★

REGULATIONS AND PROCEDURES

The following REGULATIONS AND PROCEDURES shall obtain as an integral part of the Television Code of the National Association of Radio and Television Broadcasters:

I

Name

The Name of this Code shall be the Television Code of the National Association of Radio and Television Broadcasters.*

II

Purpose of the Code

The purpose of this Code is cooperatively to maintain a level of television programming which gives full consideration to the educational, informational, cultural, economic, moral and entertainment needs of the American public to the end that more and more people will be better served.

III

Subscribers

Section 1. Eligibility

Any individual, firm or corporation which is engaged in the operation of a television broadcast station or network, or which holds a construction permit for a television broadcast station within the United States or its

* "Television Board. The Television Board is hereby authorized:—(4) to enact, amend and promulgate standards of practice or codes for its Television members, and to establish such methods to secure observance thereof as it may deem advisable; —". *By-Laws of The National Association of Radio and Television Broadcasters, Article VII Section 2, B. (4).*

www.americanradiohistory.com

dependencies, shall, subject to the approval of the Television Board of Directors as hereinafter provided, be eligible to subscribe to the Television Code of the NARTB to the extent of one subscription for each such station and/or network which it operates or for which it holds a construction permit; provided, that a non television-member of NARTB shall not become eligible via code subscription to receive any of the member services or to exercise any of the voting privileges of a member.

Section 2. Certification of Subscription

Upon subscribing to the Code, subject to the approval of the Television Board of Directors, there shall be granted forthwith to each such subscribing station authority to use the "NARTB Television Seal of Good Practice", a copyrighted and registered seal to be provided in the form of a certificate, a slide and/or film, signifying that the recipient thereof is a subscriber in good standing to the Television Code of NARTB. The seal and its significance shall be appropriately publicized by the NARTB.

Section 3. Duration of Subscription

Subscription shall continue in full force and effect until thirty days after the first of the month following receipt of notice of written resignation. Subscription to the Code shall be effective from the date of application subject to the approval of the Television Board of Directors; provided, that the subscription of a television station going on the air for the first time shall, for the first six months of such subscription, be probationary, during which time its subscription can be summarily revoked by an affirmative two-thirds vote of the Television Board of Directors without the usual processes specified below.

Section 4. Suspension of Subscription

Any subscription, and/or the authority to utilize and show the above-noted seal, may be voided, revoked or temporarily suspended for television programming, including commercial copy, which by theme, treatment or incident, in the judgment of the Television Board constitutes a continuing, willful or gross violation of any of the provisions of the Television Code, by an affirmative two-thirds vote of the Television Board of Directors at a regular or special meeting; provided, however, that the following conditions precedent shall apply: (1) The subscriber shall be advised in writing by Registered Mail of the charges preferred; (2) Such subscriber shall have a right to a hearing and may exercise same by filing an answer within 10 days of the date of such notification; (3) Failure to request a hearing shall be deemed a waiver of the subscriber's right thereto; (4) If hearing is requested by the subscriber, it shall be designated as promptly as possible and at such time and place as the Television Board may specify. Oral and written evidence may be introduced by the subscriber and by the Television Code Review Board (hereinafter provided for). Oral argument may be had at the hearing and written memoranda or briefs may be submitted by the subscriber and by the Television Code Review Board. The Television Board of Directors may admit such evidence as it deems relevant, material, and competent and may determine the nature and length of the oral argument and the written argument or briefs to be submitted. The Television Board of Directors shall decide the case as expeditiously as possible and shall notify the subscriber and the Television Code Review Board in writing of the decision.

www.americanradiohistory.com

Section 5. Additional Procedures

The Television Board of Directors shall, from time to time, establish such additional rules of procedure as, in its opinion, may be necessary for the proper administration of the Code; provided, that special considerations shall be given to the procedures for receipt and processing of complaints and to necessary rules to be adopted from time to time, taking into account the source and nature of such complaints; such rules to include precautionary measures such as the posting of bonds to cover costs and expenses of processing same; and further provided, that the Board of Directors shall take the steps necessary to insure the confidential status of any proceedings before it.

Section 6. Amendment and Review

Because of the new and dynamic aspects inherent in television broadcast, the Television Code, as a living, flexible and continuing document, may be amended from time to time by the Television Board of Directors; provided that said Board is specifically charged with review and reconsideration of the entire Code, its appendices and procedures, at least once each year.

Section 7. Termination of Contracts

All subscribers on the air at the time of subscription to the Code shall be permitted that period prior to and including the earliest legal cancellation date to terminate any contracts, then outstanding, calling for program presentations which would not be in conformity with the Television Code, provided, however, that in no event shall such period be longer than fifty-two weeks.

IV

Rates

Each subscriber shall pay 'administrative' rates in accordance with such schedule at such time, and under such conditions as may be determined from time to time by the Television Board (see Article VII Section 2.B (3) and (4), *By-Laws of the NARTB*) ; provided, that appropriate credit shall be afforded to a television member of the NARTB against the regular dues which he or it pays to NARTB-TV.

V

The Television Code Review Board

* Section 1. Composition

The Television Board of Directors shall establish a continuing committee entitled the Television Code Review Board, upon the promulgation of the television code. The Review Board shall be composed of five members, all of whom shall be from the Television membership of NARTB. Members of the Television Board of Directors shall not be eligible to serve on the above specified Review Board. Members of the Review Board shall be appointed by the President of the NARTB, subject to confirmation by the Television Board of Directors. Due consideration shall be given, in making such appointments, to factors of diversification of geographical location, company representation and network affiliation. Those members appointed, following promulgation of the Code, shall serve until immediately following

* Amended February 4, 1953.

www.americanradiohistory.com

the annual NARTB Convention of 1953. Immediately following the end of the meeting in 1953 there shall be appointed three members who shall serve for two years and two members who shall serve for one year starting at the time of appointment.

Starting in 1954 and every even numbered year thereafter, two members shall be appointed for two-year terms; and then in every odd numbered year thereafter, three two-year members shall be appointed.

Limitation of Service

A person shall not serve consecutively as a member of the Review Board for more than two two-year terms or for more than four years consecutively, after April 30, 1953.

Section 2. Quorum

A majority of the membership of the Television Code Review Board shall constitute a quorum for all purposes unless herein otherwise provided.

Section 3. Authority and Responsibilities

The Television Code Review Board is authorized and directed:

(1) To maintain a continuing review of all television programming, especially that of subscribers to the television code of the NARTB; (2) to receive, screen and clear complaints concerning television programming; (3) to define and interpret words and phrases in the Television Code; (4) to develop and maintain appropriate liaison with government agencies and with responsible and accountable organizations and institutions; (5) to inform, expeditiously and properly, a subscriber to the Television Code of complaints or commendations, as well as to advise all subscribers concerning the attitude and desires program-wise of accountable organizations and institutions, and of the American public in general; (6) to review and monitor, if necessary, any certain series of programs, daily programming, or any other program presentations of a subscriber, as well as to request recordings, aural or kinescope, or script and copy, with regard to any certain program presented by a subscriber; (7) to reach conclusions, and to make recommendations or prefer charges to the Television Board of Directors concerning violations and breaches of the Television Code by a subscriber; (8) to recommend to the Television Board of Directors, amendments to the Television Code.

A. Delegation of Powers and Responsibilities

The Television Code Review Board may delegate, from time to time, such of its above-specified responsibilities, as it may deem necessary and desirable, to a Staff Group of the NARTB-TV.

B. Meetings

The Television Code Review Board shall meet regularly once each quarter of the calendar year on a date to be determined by the Chairman. The chairman of the Review Board may at any time on at least five days' written notice call a special meeting of the Board.

COMMERCIAL AM PROGRAMS OF 1955

(NETWORK)

The following pages contain a complete alphabetical listing of program titles of the four national radio networks' commercial programs heard during the 12-month period ending Dec. 31, 1955. Listing includes program title, sponsor and product, network and the advertising agency handling the account. Compilation has been made through the cooperation of ABC, CBS, MBS, and NBC. Programs are all of 13-week duration or longer.

A

PROGRAM	ADVERTISER AND PRODUCT	NETWORK	ADVERTISING AGENCY
Adventures of Rin-Tin-Tin	National Biscuit Co. (Nabisco)	MBS	Kenyon & Eckhardt

COMMERCIAL TV PROGRAMS OF 1955

(NETWORK)

The following pages contain an alphabetical listing by program title of the four national television networks' commercial programs during 1955. The programs listed are for the 12-month period ending Dec. 31, 1955. Listing includes program title, sponsor and product, network and the advertising agency handling the account. Programs are all of 13-week duration or longer. Compilation has been made through the cooperation of ABC, CBS and NBC.

"Printed Letterpress"

. . *is like Sterling on Silver*

Just as the word Sterling has been used to mean high quality silver since the 12th century, Letterpress is the standard for comparison of printed material.

Sterling quality in printing can be achieved only with the Letterpress process. The Letterpress printed product has clarity, snap, punch and detail. The blacks are truly black. The halftone dots have a firm, sharp outline.

Letterpress methods are mechanical, controllable and, therefore, precise. Letterpress provides true proofs, the greatest flexibility in the use and re-use of plates.

Quality is taken for granted today in national magazines, textbooks, Bibles and manuals, because they are finely printed by Letterpress.

Whatever your next printed piece might be—if it is worth putting ink on paper, it deserves Letterpress printing . . . and you pay no more for its sterling quality.

Specify it by name: Print it Letterpress!

BARNES PRINTING CO., INC.

229 WEST 28th STREET NEW YORK 1, N. Y.

"In this great land of ours science flourishes under freedom. It is one of the conspicuous dimensions of freedom. But its victories will be empty unless we safeguard our heritage of liberty, unless we protect at every step our freedom to think, to research, to invent, and to develop."

David Sarnoff

Chairman of the Board
