NEW YORK WEDNESDAY, DECEMBER 19, 1962

PIONEER?

A pioneer pioneers to get out of a rut. To explore. To open frontiers. To bring about new concepts. It's not the easiest calling. Everything must be learned the hard way. The risks are large and incessant.

There were few broadcasting guideposts when we started out 35 years ago. What have we learned from it all? This:

You must first make yourself a responsible citizen and a good neighbor to the community as a whole. Only in this way can you build loyal, responsive audiences – the real success of any station. In short, it's good business to operate in the public interest.

THEY BOUGHT

"The New York audience would expect to see this high quality programming on WNEW-TV." John E. McArdle, Vice President and General Manager, WNEW-TV, New York, N.Y.

"... a beautiful show, a magnificent show, a cultural blending into our entire program format." Donn R. Colee, Vice President and General Manager, WTTG, Washington, D.C.

"A particularly well-produced show of high quality. A worthwhile adjunct to our programming." Van Beuren W. DeVries, Vice President and General Manager, WGR-TV, Buffalo, New York

"For the first time the viewers in our area will have the opportunity to view on a regular basis a symphony orchestra. The filming is excellent." Robert Lunquist, Sales Manager, WICU-TV, Erie, Pa.

"It's the kind of program balance we were looking for. An extremely well-produced series." Robert C. Wiegand, General Manager, WTVN-TV, Columbus, Ohio

"It looked too good to turn down. It's the best good music program I've seen." Irving Waugh, Vice President and General Manager, WSM, Nashville, Tenn.

NBC-

the network that attracts more people whenever all networks cover a national event... whether it is election night or the flight of an astronaut or a Telstar broadcast or a president's report on a crisis.

and the second second

The reason? NBC News leads in bringing world news to the nation rapidly, accurately, responsibly.

A Chronicle of Growth

TV's Past Indicates a Boundless Future

By WALTER D. SCOTT

Executive Vice President, NBC Television Network

THE major eras of television are chronicled in the twenty-five years of Radio Television Daily logotypes. When radio ruled the airwaves, and television was still in its experimental stage, the daily newspaper of broadcasting began—on February 9, 1937 — as RADIO DAILY.

After World War II, the dramatic, though limited, expansion of home television was accompanied by a significant change in the newspaper. The front page logotype remained RADIO DAILY, but a special inside section which first appeared January 5, 1948, was headed TELEVISION DAILY. Two years later there were only one million television sets in American homes, but the abundant evidence of spectacular growth to come resulted in the logotype we know today, RADIO-TELEVISION DAILY.

One more change has been made as the newspaper has kept abreast of the rapid advancement of the medium. Even before the first trans-Atlantic television broadcast via Telstar, the sub-logotype was supplemented to read "The International Newspaper of Radio and Television."

As the pages of RADIO-TELEVISION DAILY have reported, television's expansion in little more than a decade surpasses any other modern industry —whether automobiles, plastics or frozen foods. The medium's possibilities are limitless, and its plans for the years immediately ahead are already on the drawing boards.

Providing a New Service

The impetus for television's initial growth was the providing of a new service; adapting that service to the changing needs and desires of our viewers and advertisers was the motivating factor in building television into the most powerful communications force in history. Service is the key to the continuous upward curve of more people watching and more advertisers placing more money than ever before into television.

We are in two businesses: we provide information and entertainment to our viewers, and provide a sales vehicle for our advertisers. We must anticipate needs and set trends to meet rapidly changing patterns in Walter D. Scott was with Hearst Radio, Inc., in 1937, as a national spot radio salesman. The following year he joined the National Broadcasting Company as a spot sales account executive. He was named eastern sales manager in 1949, and two years later was promoted to New York radio network national sales manager. Mr. Scott was appointed to the new post of administrative sales manager for the radio and TV networks in 1952. He held this position until he was elected vice president and national sales manager, television network, in 1955, and was named vice president of TV network sales in 1958. He assumed his current position of executive vice president, television network, the following year and was elected to the board of directors of NBC in 1960.

both these areas.

Flexibility has long been a part of the NBC Television Network service. As pioneers in such areas as participating programs, color and specials, we have successfully opened new horizons. To viewers we bring a schedule of balance and diversity, to advertisers we bring a flexibility which permits them to use network television as it fits their needs.

Developments for the Future

Here are some developments that visionary men of the industry foresee or that are in fact already in motion:

Future television sets will retain only a basic relationship to today's models. Most—and eventually all will be color. To keep pace with an increasingly mobile society, portable, transistorized sets will become as commonplace as pocket radios are now.

In the home, the current picture tube will give way to a flat, wall screen—up to wall size if desired and the viewer will operate it with remote controls at his side.

Home tape equipment will permit recording of programs, even, through the use of a timing device, when the set owner is absent.

Live broadcasts of the Olympic games, the pageantry of the Papal court, bullfights in Spain, mountain climbing in Switzerland, World Fairs, United Nations meetings—already signaled by Telstar—will be broadcast to the entire world.

Even interplanetary television is within the industry's realm of possibilities, and one day the people of the earth may be as familiar with the dark side of the moon as they are with their own country's landscape.

As more channels become available it may be possible to obtain on television a basic four-year college education at home.

International television can play a major role in formal education. Students in England may hear lectures in American History from a professor standing at a rostrum in Harvard, and Shakespeare courses may originate on the banks of the Avon.

A Force in the Nation's Economy

Historians looking back years hence may find America's thriving 1960's as antiquated as a pre-industrialized America of the 18th century seems now. Many of the best-selling products and services of the future will be things now unknown, as were stereophonic sound, aluminum wrap, fluoridated toothpaste and hair sprays a dozen years ago. Television's role as a powerful catalyst in the nation's economy will continue to grow, and mass consumption will stimulate mass production in the continuum in which television serves as a unifying force.

The future for television is boundless. The giant steps the medium has made in so short a time will be surpassed by strides of much greater proportion. No one can be positive in identifying the next major development, but whatever its nature it will serve, as the medium has served since its inception, to increase man's familiarity with the dynamic, complex world in which he lives.

Television Circles the Globe

A '37 Experiment is Today's Byword

By MERLE S. JONES

President, CBS Television Stations Division

IN 1937, the year RADIO-TELEVISION DAILY began publishing, the world was facing the start of the most destructive war in history. Radio was playing a prominent role in reporting the details of the crises as they developed. Newsmen stationed around the world were broadcasting reports to the anxious American listening audience.

It is interesting to note that even in those hectic days, research leading to the development of television was taking place. A year earlier CBS disclosed that it had set aside a large sum of money for experiments in television. In 1937, we ordered one of the world's most powerful television transmitters for installation atop the Chrysler Tower together with what was then the most modern electronic camera equipment for film and live transmission. This equipment was originally designed to pick up and transmit 343line electronically produced images. While construction was still underway, we announced that it was being modified to an even higher standard television image, 441 lines. In 1941, the standard was raised to the present 525 lines.

Along with the ordering of the Chrysler transmitter 25 years ago, CBS established its television program center in the Grand Central Terminal Building to provide the first full-scale working model in this country of a complete television unit operating under conditions of actual daily production. The studio plant became a laboratorv for the development of program and production techniques.

World-wide Television

Looking back to 1937, we can appreciate the dramatic growth and development television has had in a relatively short time as the most effective means of disseminating entertainment and information. With the launching of Telstar last summer, we can look beyond the confines of this country to the day when we may realize instaneous transmission of television pictures around the globe.

Such instantaneous transmission is still in the experimental stage; however, we can observe the impact of television around the globe at the present time. By the end of this year, there will be more television sets out*******

Merle S. Jones was manager of the western division office of CBS Spot Radio Sales in 1937, and later that year was appointed general manager of KMOX, St. Louis.

In October, 1944, he left KMOX to join the Cowles Broadcasting Co. as vice president and general manager of WOL, Washington, D. C., but returned to CBS in July, 1947, as general manager of WCCO, Minneapolis-St. Paul. He shifted to Los Angeles in 1949, to become general manager of KNX, and of the Columbia Pacific Network. In 1951, he assumed the additional duties of manager of KTSL (TV) (now KNXT) in Los Angeles. In July of that year, Mr. Jones was appointed vice president in charge of CBS Owned Television Stations and General Services. He became CBS Television executive vice president in 1956, and was named to his present post in March, 1958.

side the United States than within for the first time in history. Many foreign broadcasters have taken advantage of the vast experience and knowledge gained by the American broadcaster through years of experimentation. With greater frequency we observe American interests active abroad in assisting the development of the medium.

Aid to Foreign 'Casters

CBS is proud of the role it has played in assisting foreign broadcasters to establish television in their countries. With local interests, we are in partnership with production companies in Buenos Aires, Argentina, and Lima, Peru. These companies have the most modern production facilities available and produce program product for the Latin American television market. Last November the first television station to operate in Trinidad-

www.americanradiohistory.com

Tobago, in which CBS has an interest, went on the air. Our Engineering Department acted as a consulting engineer for the Trinidad-Tobago Television Company Ltd. We conducted a survey from which resulted recommendations regarding transmission standards, coverage, site location, system design and operational methods of television service for Trinidad and Tobago.

Drawing on its experience in the design of studios in the United States, the Engineering Department also provided consulting services for the construction of studio operations for the new television station. Following the initial broadcast, our services to the new station continue in order to provide the company with whatever assistance is required to maintain a high quality of television service. This is an excellent example of how we can employ our know-how abroad to increase the circulation and effectiveness of the medium.

American TV Programs Abroad

American television programs licensed for broadcast abroad are among the most popular shows in various parts of the world. The International Sales Department of CBS Films currently licenses 76 program series in 61 countries. CBS Newsfilm is widely distributed throughout the world and is an important means of news dissemination during this critical period in history.

For the past two years, the CBS Owned television stations have conducted an International Program Exchange. Through this exchange, American audiences can see programs produced abroad while audiences overseas view a program produced in the United States. Plans are now being formulated for a continuation of the exchange in 1963.

I do not believe that those who were working in the laboratories 25 years ago could have predicted the result of their experiments and studies. We can be proud of our industry as it continues to grow and meet its responsibilities all over the world.

Television's Rapid Maturity An Amazing Progress with a Recent Past

By THOMAS W. MOORE Vice President in Charge, ABC TV Network

THERE can be no question that in its short life span, television has matured rapidly and well. What was once the primary outlet for the propagation of groaning wrestlers and roller derbies is today the world's most powerful and effective method of communication.

If you look hard enough, and wait long enough, you can still ferret out an occasional wrestler or a derby, but it is difficult.

What you do find is a balance of informational, entertainment, sports and special programming that reflects positive achievement in television's maturing process.

The process will, of course, never cease. Television grows more each day, in accomplishment as well as stature. A by-product of accomplishment is the increased responsibility we all share.

But I wonder if we who work in the medium and who contribute to its growth are keeping pace with its growth in certain respects?

Television's Strength

I wonder if some of us, without realizing it, are prone to underestimate the continuing day-to-day stability and strength of television — especially at the start of every new season?

In certain quarters, the understandable desire for a "smash hit" seems to have beclouded practical thinking. Individual programs, complete week nights and even whole schedules have been in brief but intense conversations and, in headlines as well as in columns, written off once the first ratings were received.

Programs that were scheduled by networks and purchased by advertisers with great optimism in the spring are suddenly "also rans" in the first weeks of October.

But are they really? History proves not.

Without question the programming blockbuster of 1961-62 was "Ben Casey." Yet the very first national rating report of last season gave no indication of the tremendous eventual success of the show. That report showed "Ben Casey," with an average 30.0 share, being soundly trounced by an established show which had a 39.1 share.

The "Ben Casey" audience did not

Thomas W. Moore attended Mississippi State College and the University of Missouri, from which he received a bachelor's degree in journalism in 1939. Upon graduation he joined the Meridian Mississippi Star as classified advertising manager. In 1941, he enlisted in the U.S. Navy and served for five years as a naval aviator. After his discharge in 1945, he worked in advertising and public relations on the west coast. Mr. Moore joined CBS-TV Film Sales in March, 1952, as an account executive, and was named general sales manager, New York, in 1956. He joined ABC in November, 1957. as vice president in charge of sales and was promoted to vice president in charge of television programming in 1958. He was named to his present post in March. 1962.

emerge over night — it grew over a number of weeks to make the program one of television's most successful. For "Casey" is not just another television show. It is a dramatic anthology within a basic frame of reference. It has drama, humor, sympathy and action. But above all it has style. A continuing dramatic style that came out of creative planning.

The "overnight hit" is not the rule in television, it is the exception. "Casey" is an example of the rule, as are "77 Sunset Strip," "Dr. Kildare," "Donna Reed," "Real McCoys" and "Maverick" — all of which started at low levels and built audiences throughout the season.

Audience is the key word.

The Audience Decides

A show is really an amount of time filled with plot and characters until it is sampled by an audience. Then comes success or disappointment.

Already established viewing patterns must be changed when the new season arrives. But it takes time for the audience to establish its new patterns.

www.americanradiohistory.com

By all reason, that time is not excessive. When a show premieres in mid-September, a true picture of its appeal is evident by mid-November.

But when it is not there by one or two weeks, the panic buttons are pushed, and the "I told you so's" resound.

Trigger-fast depression on the part of those who program and who buy indicate not only a basic lack of fundamental television education but a lack of confidence in their own judgment.

Those of us who are exposed to this "first book depression" live with it. But we have not been able to understand it and hope we never adjust to accept it.

Unless you believe in a product, you should not sell it. And you certainly should not buy it. The audience will tell you if your selection was right or wrong, when it has had a chance to make up its mind. Not before.

Twenty-five years ago, when this paper was born, it was called RADIO DAILY. There was no television. Our past is recent. Our progress is amazing.

Television's Growth

Back at the start of the '50's, there were fewer than five million TV sets in the nation. The network cables had just started their coast-to-coast stretch; there were only 101 TV stations in the United States.

When the Korean War freeze on TV stations began thawing in 1953, we were able to add new affiliates. That year, we instituted new programming concepts, such as the "ABC Album" which featured outstanding talents in the entertainment world; we boosted the signal power of our owned-andoperated TV outlets to provide better reception for our viewers throughout the country, and added talent, enhancing our "know-how," which helped considerably to bring us along to our present position today.

Some believe that television's "millennium" occurred years ago. They should observe more carefully. Television is progressing and has made the American people a better informed people. It has not only increased their knowledge, it has made them vitally aware of the world they live in.

Our belief in television and in its future is unshakable; our belief in our network must be the same.

Radio-Television Daily 25th Anniversary, 1937-1962

This is the beautiful gateway to the Brulatour courtyard in New Orleans. Beyond it are the studios of WDSU-TV.

Through these gates pass the most popular television performers in New Orleans . . . the most skilled technicians . . . and the happiest advertisers.

The New Orleans area is now a \$2-1/2 billion market—and the gateway that leads to WDSU-TV opens this market for more and more advertisers every year.

Radio Highlights In Retrospect

'37 Reflected Broadcasting's Future Pattern

By ROBERT F. HURLEIGH President, Mutual Broadcasting System

TURN back the calendar a quarter **L** of a century in the field of broadcasting and glimpse the shape of things to come. During the course of 1937, much of the pattern for the next twenty-five years in communications was set, and in retrospect, I would like to recount these years of vivid broadcasting history and to refocus in listeners' minds some of the highlights of this era—17 years after Dr. Frank Conrad of Westinghouse began broadcasting phonograph music and baseball scores as a research hobby from his barn in East Pittsburgh.

The year 1937—four years after the Mutual Broadcasting System was born when WOR, Newark, WGN, Chicago, WLW, Cincinnati, and WXYZ, Detroit linked together for programming services — was filled with many outstanding and phenomenal communication accomplishments. Perhaps the biggest single news story to hit the airwaves that year was the explosion in mid-air of the German dirigible Hindenburg, which was eyewitnessed and described over radio by Fred Morrison. It was also the year Shirley Temple made her radio debut—over Mutual, and Gabriel Heatter was still receiving fan mail for the remarkable 52-minute ad lib at the famous Lindbergh kidnapping trial in New Jersey the year before. Other sensational stories in 1937-each winning the nation's ear and enduring for great historical importance—include the disappearance of Amelia Earhart in the Pacific; King George VI's coronation in London not too long after the Prince of Wales broadcast his heart-rending farewell to the throne "for the woman I love"; Joe Louis winning the world's heavyweight title; the death of John D. Rockefeller; and the passing of Marconi---the man who invented the medium which brought these and countless other events to an intensely interested nation of listeners.

Twenty-five years ago, there were less than 700 stations on the air, today there are over 3500.

During a typical week in 1937, America heard 105 hours of programming piped by Mutual to its 83 affiliates. Fulton Lewis, Jr. and George Hamilton Combs started their dis-

Robert F. Hurleigh was director of news and a newscaster with WFBR, Baltimore, in 1937. He had been news editor for WOL, Washington, D. C. from 1934 to 1935, and was with WCAO, Baltimore, prior to joining WFBR.

He left WFBR in 1941 to become central division manager for the Associated Press. In 1943, Mr. Hurleigh joined CBS as a news analyst, and later became director of news for WGN, Chicago, and mid-west bureau chief of MBS, from 1945 to 1953. That year he was named Mutual's director of Washington operations, a post he held until 1957, when he became vice president in charge of the web's Washington operations. He was named president of Mutual in 1959.

tinguished broadcasting careers that year. So did "The Shadow," the prototype of hundreds of mystery shows that were to fill the air later.

Most of the world was still at peace then, but preliminary rumblings were so universally audible that all of us who watched international affairs found the state of peace a most un-easy one. The only "war" in America at the time was the friendly radio feud between Jack Benny and Fred Allen. H. V. Kaltenborn and Raymond Gram Swing came into prominence in '37, and house bands of eighteen to twenty pieces were regular broadcast features of networks. and yes, even local stations. International broadcasting was very spotty the signals faded and were unreliable, but a year later, one of the dramatic radio highlights was the globe-girdling flight of Howard Hughes reported by direct broadcasts from his plane in transit.

Just prior to Pearl Harbor, radio found itself exalted to new heights as the nation's forum for important discussions of our foreign policy. With 30 to 40 million listeners tuned in simultaneously, the spoken word gathered a tremendous importance. With radio's new maturity came a growing appreciation by sponsors of the worth of its advertising time. The

www.americanradiohistory.com

industry net rose from 45 million dollars in 1940 to 108 million in '41.

Major Bowes, after nearly 1,000 weeks on the air, finally bowed out as the war made a number of changes in radio. Radio's box-office bulged in 1943 with the four networks earning 150 million dollars in billings—an alltime high. The prevailing trend, despite the war-or rather, because of it—was humor. Mutual continued its tremendous uptrends in ratings, facilities and billings. The station total rose to 207 in 1943 as Miller McClintock took office as the first paid president of Mutual. The network purchased its first broadcasting theatre, the Longacre.

Several years later, under the presidency of Edgar Kobak, Mutual created strong blocs of mystery and adventure series for radio, originated such historic participation shows as "Queen for a Day," "Juvenile Jury" and "Twenty Questions" and was noted for its symphonic and musical features such as "Chicago Theatre of the Air." But, radio's format had to change. Television became the glamor medium, and did a great job. It still does—from astronaut liftoff to baseball, from election debates to football.

But when it comes to communication, radio's personal, flexible touch can't be beat. The sound medium has become more mobile, providing more news and information programs than ever before. Mutual set the pace for this modern-day concept in its service to stations, which now number 502.

Yes, celebrating an anniversary as RADIO-TELEVISION DAILY is doing is always a happy occasion. We in radio are grateful to this industry publication for its continuous support and keeping us abreast of the daily listening patterns and challenges in broadcasting. Reviewing radio's growth over the past twenty-five years, and, more specifically, in synopsizing a few of the highlights of 1937, we are aware of the tremendous effect of the prevalence of radio in American life today, and with the continued confidence of our listeners, our advertisers, and our affiliates, network radio is assured of its influential position in the broadcasting industry for many more twenty-five years to come.

Who was Vince Edwards before he changed his name?

ABC didn't think him up. Didn't discover him. Vince Edwards was a good actor then, as now.

But unsung.

What we did was to develop a great television show with a juicy male lead. And then, find the actor for it.

You, the viewer, did the rest.

Granted when it happens once, as in the case of Casey, it could be luck. But then, what about James Garner as Bret Maverick? Clint Walker as Cheyenne? Efrem Zimbalist, Jr., as Stu Bailey?

Or, from this year's crop, Vic Morrow of "Combat!", Tim Conway of "McHale's Navy," and Marty Ingels and John Astin of "I'm Dickens... He's Fenster"?

On the evidence, it's a talent for building new talent. For creating the kinds of shows with parts that take young actors and rocket them to fame. Fast.

It's show business—with the emphasis on show.

And it's something else. Something very important. It's ABC's young, enthusiastic approach to television entertainment. A need to get away from the over-tried, the overtrue. A need to strike out anew and afresh.

It's, in sum, a part of the alert, young creative ferment that characterizes ABC's entire approach to programming.

It attracts, as it must, alert audiences, responsive to change. And, by the same token, alert sponsors—responsive to the value of reaching such audiences.

BROADWAY GOES LATIN starring Edmundo Ros

A Public Service Industry Radio's Goal Remains Unchanged

By WILLIAM K. McDANIEL Executive Vice President, NBC Radio Network

"BROADCASTING represents a job of entertaining, informing and educating the nation and should, therefore, be distinctly regarded as a public service."

That is how General David Sarnoff, speaking as RCA General Manager in 1922, saw the industry he helped create. Those words which have characterized broadcasting throughout the intervening years, never rang more true than in 1962, the year when NBC Radio devoted 79% of its regular schedule to news-informationalcultural programming.

Of course there have been changes in network radio, both in emphasis and format, since that historic night of Nov. 15, 1926, when NBC's first radio program went on the air with an array of top theatrical and concert stars over a network of 25 stations.

News and information, always an important component of our programming, have taken over an everlarger role, keeping pace with the demands of this faster-moving, momentous age, providing listeners with up-to-the-minute knowledge of current events.

And the format of network radio formerly consisted primarily of program vehicles running from 15 minutes to an hour and more in length, of big name stars appearing in definite, fixed time slots week after week. Among the earliest stars: Eddie Cantor first appeared on NBC Radio in 1926; Fred Allen made his debut on the network in 1930; the NBC premieres of Jack Benny, Ed Wynn, Jack Pearl and Groucho Marx came in 1932; Jimmy Durante and Bob Hope in 1933.

Technological advances brought about a change in this network radio format. The American radio audience became more mobile, and had more leisure time to spend on the go. Along with this came changes in the radio set itself—car radios, portables, transistor sets supplemented the traditional living room model. And television unquestionably made inroads on the in-home leisure time.

With a large portion of the radio audience listening on a tune in—tune out basis throughout the day, single program sponsorships one time per week no longer were the best route William K. McDaniel entered broadcasting in 1938 as a page with NBC, and the following year became a sales executive with Scripps-Howard Radio. After World War II service, he joined KMPC, Los Angeles, as an account executive. In 1948, he shifted to the sales manager post at KABC-TV in the same city, and two years later was appointed manager of the western division network sales departfor ABC. Mr. McDaniel joined NBC Hollywood, as division manager of spot sales in 1951, transferred that year to KNBR, San Francisco, as sales manager, and later became general manager of the station. In 1956, he was named vice president in charge of sales for the NBC Radio Network. He became vice president of the network in 1960, and was advanced to his current post the following year.

to large national audiences. Economical and efficient network radio advertising now is achieved primarily through multiple commercial exposures spaced through the day and through the week so as to reach big audiences cumulatively.

In developing our present-day programming line-up, we were guided in large measure by these two factors, growth in the importance of news and information and heightened mobility of the radio audience.

We led the way to greater emphasis on news and information, with a series of moves beginning with the introduction in 1957 of "News on the Hour," the industry's first series of network hourly news broadcast 17 times each weekday. Eventually, the other radio networks followed suit.

We augmented "News on the Hour" in 1960 with the addition of "Emphasis," a series of five-minute news features and commentary aired eight times daily on weekdays by members of our news staff. It is another pro-

www.americanradiohistory.com

gramming concept emulated by the other radio networks.

Since our introduction of the revolutionary weekend program, "Monitor" (1955), we have been increasing our air news and information content. The biggest breakthrough along these lines came in 1961 with introduction of the Frank McGee segment of "Monitor" on Sunday nights. This three-hour segment acts as a "Sunday Newspaper of the Air," presenting a comprehensive up-to-the-minute news and feature wrap-up of events around the world.

Another news breakthrough within "Monitor" came in 1961 with creation of "Ring Around the World," featuring NBC News correspondents all over the globe reporting local reactions to key news developments.

Advertisers evidently agree that we've hit on the right approach to programming, because in 1962 we enjoyed our third consecutive year in the black. In fact, 1962 was our best year in a decade. NBC Radio in 1962 accounted for over 40% of the total time sold by the three top radio networks. We have had 75 different advertisers during the year, and, Nielsen has consistently reported that in homes reached, the top five advertisers were all on our network.

Highlighting our programming in 1962 were the award-winning "Democracy in America" series; the "Know Your FBI" series prepared in cooperation with FBI Director J. Edgar Hoover; and further refinement of the news-oriented three-hour segment of Monitor hosted by Frank McGee on Sunday nights.

Special programming is added to the regular schedule—at times as much as 50 extra hours in a month in response to developments in current affairs. Among the special program highlights of 1962 were extensive coverage of the Cuban Crisis, events in Mississippi, U. S. Astronaut flights, and election coverage.

Our sports coverage included such events as the National League Playoffs, the World Series, the America's Cup yachting races, and several postseason football contests.

It is quite evident that network radio as a communications medium is going to play an even more significant part in the news, information, cultural and entertainment programming of the future. Solid reasons are behind the growth and unique success of the four stations of Metropolitan Broadcasting Radio, a division of Metromedia,Inc.Individual personality.Character.Service.These are the attributes that have made our radio stations distinctive,important and honored members of their respective communities.The "quality operations" philosophy of our Radio division, also characterizes our Television and Outdoor Advertising divisions.**METROMEDIA**

Twenty-Five Years of Radio: Twenty-Five Years of Change

By ARTHUR HULL HAYES President, CBS Radio

A BACKWARD look at radio over the last twenty-five years produces one perhaps unexpected conclusion. The dynamic thing about this medium is not how much it has grown but how much it has changed.

Radio's statistics of growth are familiar to everybody. And they are dramatic. But all they mean is that a medium which was extremely popular in 1937 has become much more so. Of far greater significance to those who look deeper is the fact that virtually the only thing 1962 radio has in common with 1937 radio is the use of sound itself. Beyond this, radio in 1962 is a brand new medium. It is inevitable that a change in the focus of our living should be reflected in the nation's radio programming. This is proper because we broadcast to satisfy while we inform and entertain the public.

It is a new medium of news and information, the most nearly universal there is. It is a new medium for entertainment, supplying a kind of personal companionship unique among mass media. Finally it is even a new medium in physical appearance, radio sets having changed from the console to the capsule; the latest transistors are about the size of cigarette lighters!

A New Medium of News

You really appreciate what has happened in news and information by looking at a typical 1937 schedule of sponsored network radio programs. One for December 1, 1937, shows a five-minute news strip weekday mornings, another on weekday evenings, one five-minute broadcast on Saturday and another on Sunday. There were also scattered programs of comment and discussion. But the basic news schedule totalled 60 minutes a week.

As of December 30, 1962, the CBS Radio Network will present 955 minutes of news and news analysis a week. (And every station presents abundant local news to complement national and international coverage.) Stations want news and information because of their added value in a world of Cold War and Hot Prospects. They want these services from us because (1) network radio continues to perform them best and (2) stations cannot begin to provide such coverage and background for themselves.

Today, radio alerts listeners to major events whenever and wherever Arthur Hull Hayes was eastern sales manager for CBS Radio Spot Sales in 1937.

He graduated from the University of Detroit in 1926. After one year in the national advertising department of the Detroit News, he spent the next five years with the Campbell-Ewald Advertising Agency where he organized the radio department. He joined CBS in 1934, as an account executive for CBS Radio Spot Sales, and was appointed eastern sales manager one year later. Mr. Hayes became sales manager of WABC (now WCBS) in 1938, and subsequently was named general manager of the station. In 1949, he was appointed vice president, San Francisco, and general manager of KCBS. He was named president of CBS Radio and a member of the board of directors of CBS, Inc., in April, 1955.

they occur — around the world, and above it, in space. As recently as 1944, when an event of such magnitude as the Normandy invasion occurred late at night, many did not learn of it until the next day because radio stations could not all be alerted to the news. Today, thanks to NetALERT, this can't happen. Using this system, our network alerts its stations to major developments and special broadcasts at any hour, whether stations are on or off the air. It enables our affiliate stations to bring their communities first word of important news with a round-the-clock consistency never before possible.

More than hard news, radio now brings listeners a kind of information programming undreamed of twentyfive years ago. As of December 30, CBS Radio, for example, will present 63 five-minute "Dimension" programs a week. They cover fascinating topics, from developments in medicine to the week in space; from life behind the Iron Curtain to life inside the White House. Radio can also play a unique role in continuing the nation's cultural heritage—especially with our young people in mind—through great symphonies, discussions of literature and the humanities. Such programming and CBS Radio is by no means alone in it — gives listeners a richer background, a greater understanding of the world we live in.

A New Medium of Entertainment

In 1937, the family assembled in the living-room to hear elaborate, fulldress radio entertainment. Radio in 1962 is still busy providing entertainment but it is highly personal. Arthur Godfrey, Garry Moore and Don Mc-Neil talk to the individual listener. Their style is informal and relaxedas befits entertainers who know they are accompanying the housewife as she works and in her car as she shops. Radio, in short, has left the world of illusion and make-believe, and expresses itself in terms of real people, of actuality. And the success of this great change of style is reflected in the ever-increasing sale of radio sets, particularly battery and transistor portables.

A New Medium in Appearance

Propped upon the ironing-board, the work-bench and the barbecue table today are transistors. The day of the Glenn flight, I saw a policemen directing traffic with one hand and holding a tiny radio to his ear with the other. These sights are not surprising to those who have noted the astronomical sales of battery-transistor portables. Listeners have spent over one billion dollars on them in the last five years. And they are using them—as the new Nielsen studies of this listening so clearly show. According to these studies, battery-portable listening adds almost 50 per cent to plug-in listening on a yearly basis.

To conclude this brief discussion of radio then and now — and I have only skimmed the highlights of the great changes in this remarkable medium let me borrow a sentence from Paul White, the late, celebrated head of CBS News. He used it in talking about radio's immediacy in news. But it applies to the whole history of the medium.

"The present tense," he said, "is our most exciting tense."

The present tense has always been radio's most exciting tense. And it will continue to be.

Returns as a Major Factor in 1962

By ROBERT R. PAULEY President, ABC Radio Network

WHEN the first edition of RADIO DAILY appeared on the market 25 years ago, its pages were replete with stories concerning the radio industry. For radio was THE industry of 1937. Jack Benny, Fred Allen, Bob Hope, Bing Crosby—the biggest entertainers in show business — were radio regulars.

This may come as a shock to some people, but radio—through "Flair," "Dimension," "Monitor"—still boasts the biggest names in show business.

If there are still people in the industry who are not aware that the likes of Dick Van Dyke, Gertrude Berg, Jack E. Leonard, Boris Karloff, Mimi Benzell and Jackie Mason can be heard regularly on network radio, then what I am about to say will be an even greater surprise.

Radio is no longer the depressed industry it was two or three years after the upsurge of television. Now, for the first time, we have facts and figures to prove that radio is very much alive and a major factor in American life.

When I was appointed head of ABC Radio two years ago, it was my firm belief that there was a place for network radio in the overall broadcasting industry. It was not my contention to compete head to head with a giant that added pictures to words. But if network radio were to have a place at all, we felt that words it presented would have to be more informative, more entertaining and more appealing to a different audience than the one that day in and day out sat glued to a television set.

The fact that we sought out a specific "young adult" market and presented this huge market with bright, fast-paced, intelligent programming is old hat to the industry. What is new is our conclusive success in achieving our goal.

We expected success more than a year ago. But the burden of proof rested on us. We had to prove that network radio was being reborn a giant to the advertiser, to his agency and, yes, to the newspaper and magazine reporters who made their living writing about radio and television. We had to prove our worth to the same sponsors whom radio helped make giants 25 years ago.

Robert R. Pauley first entered broadcasting with WKOX in Framingham, Mass., while studying at Harvard for his Master of Business Administration degree, which he received in 1951. Upon graduation, he became an account executive for WOR, New York, a post he held until August, 1953. At that time he joined the NBC Radio Network. and was with NBC until 1956. Mr. Pauley became an account executive with the ABC Radio Network in October, 1957. He was promoted to eastern sales manager in March, 1959, and was named vice president in charge of ABC Radio in April of the following year. He was elected president of the Network in September, 1961.

The proof we sought for so long was furnished us on Nov. 8. A veteran research analyst, whose system we felt offered a far more realistic evaluation of radio listening habits, announced that an average of well over 7,000,000 adults were listening to Arthur Godfrey's CBS radio program each September day; that close to 7,000,000 adults were hearing "Flair" and "Breakfast Club"; that all of network radio was being heard by three times as many people as has been estimated by any radio network ratings service in the past several years.

On the surface, it would seem easy for an outsider to scoff. Why should we believe these results rather than any other, we were asked. One of the most effective answers — and there are many—is that never before had any continuing ratings service truly measured people who were listening to sets out of their homes. Our last radio ratings service didn't even measure people—it measured homes.

This service counted its out-ofhome audience only as a percentage of the in-home audience. We spent much time and money during these past 18 months trying to find out why

We questioned the logic of these ratings figures. We soon discovered the answer. It was true that people were buying more radios. They were buying transistor radios. They were buying automobiles with radios. The makeup and listening habits of the people in these United States had been changed over the past decade, but our old ratings services had not been keeping pace with these changes.

We gradually had been changing into a mobile nation. We spend more time on the beaches, in our backyards, in our cars. Our old ratings service—when measuring plug-in sets in the house—discovered that fewer people were at home and, therefore, they reported fewer listeners. When they further applied their percentage of in-home listeners in order to measure out-of-home listeners, the results proved even more insufficient. A percentage of nothing is still nothing!

It was because of this illogical system that we turned to other sources for proper measurement of radio audiences. We chose Sindlinger & Company because this service talked with people and discovered first-hand if and where they were listening.

This new service measures who is listening, where he (or she) is listening, his age, his income, his buying habits and his buying plans.

This, then, is the first time in radio network history that a radio network advertiser can determine exactly where his dollar will be going and to whom it will be going. For the first time, he can make a realistic evaluation of radio spending in comparison with other media. For the first time, he can see that there are people listening to radio—and a great many more than some advertisers thought.

In October, Don McNeill and his "Breakfast Clubbers" left their home base in Chicago to broadcast live from LaCrosse, Wisconsin, for two days. A total of 9,600 people — standing room only crowds both days—turned out to see this show—a radio show.

For the first time, network radio can stop saying that "we're coming back." We are back.

Radio-Television Daily 25th Anniversary, 1937-1962

CAN \$1.9 BILLIONS BE WRONG?

By ARTHUR PERLES Editor, RADIO-TELEVISION DAILY

IN 1916 — almost a decade before this industry newspaper was born —a 25-year-old immigrant engineer, David Sarnoff, then employed by American Marconi, wrote a memorandum to his boss. It began:

"I have in mind a plan of development which would make a radio a 'household utility' in the same sense as the piano or phonograph. The idea is to bring music into the house by wireless."

A few short months ago—46 years later—the same person, now board chairman of Radio Corporation of America, stated, as his company prepared to launch its Relay satellite into outer space:

"Communications satellites are forerunners of a system that within the coming decade will provide virtually instantaneous telegraph, telephone, data, television and other forms of communications to practically any point on earth. They open a dramatic vista of unlimited range for linking the world in a common dialogue, with incalculable effect on the thinking, the understanding, the culture of all mankind. . . . By 1965, it is estimated that present international communications facilities will reach saturation in many areas. . . . "

If Gen. Sarnoff's prophecy seems a little hard to believe—even in the light of the present-day accelerated speed of spatial science, just try to imagine how "way out" his memo must have been nearly a half-century ago.

In the intervening years, legions of men and women, with the minds of giants and the American spirit of enterprise, have entered broadcasting and all its allied fields. They have helped build an industry which has led the world toward a better tomorrow.

These are the very men who inspire hope that mankind's greatest goal to live at peace with his neighbor may yet be realized through the sciences and arts of communication, leading to mutual understanding.

Yet, undeniably great as have been the accomplishments of American broadcasting because of the inspired industry of its executives and employees, there are those whose critical talons would tear it to pieces and render it puerile by bureaucratic dominance.

That this danger exists today was evident only three weeks ago when Criticism of radio and television is a two-face proposition. When constructive—at least in intent—it is always welcomed as beneficial by every responsible broadcaster. Those shafts which are obviously unjustified should be discarded because in too many cases their aim is a newspaper headline rather than the truth.

A study in contrast is offered in the following, from recent remarks by publicity-friable FCC chairman Newton N. Minow, the other by Dr. Frank Stanton, CBS Inc., president, widely regarded as an intellectual and brilliant spokesman for the industry:

Minow: "The basic trouble is that too many broadcasters underestimate the audience. I believe they think the people are not particularly bright . . ."

Stanton: "The mass media, by definition, deal with very large and inclusive groups of our population, and all of them together reach virtually all groups . . . with regard to the arts and knowledge specifically, it is the media that have brought an intensified awareness of the art or knowledge, made it more generally available and usually done both."

NBC board chairman Robert W. Sarnoff, eldest son of the broadcasting pioneer cited above, found it necessary to observe in behalf of TV that "it is a time to pause, to show our medals, to nurse our bruises, to count our blessings. . . . Ironically, when we contemplate the problems confronting us as a medium and industry, it is striking how many of them spring from the sheer power and pervasiveness of TV . . . how often the very influence and impact of this medium are presented as reasons to restrict control and shape it to special ends. However, freedom, rather than restriction, promises a free society its greatest benefits from its most powerful medium of expression."

Since so much of what I have written herein is by direct quotation, perhaps it would not be amiss at this time to recall some words of the President

www.americanradiohistory.com

of the United States. It was in 1959 when Senator John F. Kennedy (D. Mass.) said:

'The great days of the television industry are ahead. Its service in the public interest is just beginning, and in time we will look back to the present difficulties (legislative haranguing over quiz shows) as merely a misstep on a long and ultimately successful climb."

History records the first commercial broadcast on radio as of Aug. 28, 1922, when the Queensboro (N. Y.) Corporation paid \$100 to sponsor a ten-minute talk on housing for a coop realty development. In 1961, U. S. broadcasting's total gross revenue was \$1,909 millions. That staggering figure is exclusive of the hundreds of millions of dollars produced annually by the peripheral enterprises serving both radio and TV.

Could this sizeable wedge of our nation's total gross outlay possibly represent financial profligacy on the part of businessmen who invested in air time to help sell their goods and services? Would they have chosen as vehicle for their sales message, broadcasting if it were not proper and beneficial, were unwanted and rejected by the populace? To imagine such a state certainly would be sheer madness itself.

I realize it would be wishful lightheadedness to hope that logic could possibly silence those who today stalk the airwaves armed for the kill. They are still as wrong as that forgotten complainer who in the early 20's ranted about "a commercial snake with rattlers in the garden of entertainment."

If snake it is to be, then broadcasting may proudly unfurl a banner emblazoned with the motto of those early Americans of a couple of centuries ago: "Don't tread on me." They knew what they wanted when this country was created.

The people demonstrated by every honest count of radio and TV dialers that they appreciate today's broadcasting. If the opponents of commercial radio and TV have a modicum of intelligence in their warped makeup, they will cease carping and turn their energies instead to helping the industry strive toward its ultimate goals.

10 OUTSTANDING RADIO NEWS HIGHLIGHTS OF 25 YEARS AGO

IT II

Radio scoops newspapers in covering Hindenburg disaster moments after the tragedy.

Sweeping investigation of radio and the FCC called for in the Senate.

New radio union is set up; Actors Equity, Musical Artists Guild and Screen Artists Guild financing radio unit with own autonomy.

FCC merges three divisions; new board supplements broadcast, telephone and telegraph units.

FTC grants music code, approves music publishers; song writers and publishers in accord on ASCAP pact which runs to 1950.

FPC head Frank R. McNinch named chairman of the FCC.

Radio is top entertainment medium; Fortune Magazine survey shows listeners exceed moviegoers.

Largest radio audience on record hears British coronation ceremony.

NAB reorganizes and John Elmer succeeds C. W. Myers as president.

CIO moves to organize radio technicians.

the state

The road to market has to pass Main Street. **To reach Main Street U.S.A.**, **turn at Mutual.** Main Street, U.S.A. is the big "buy-way"—the street that sells through local radio. Mutual owns Main Street, U.S.A. lock, stock and big town—with 453 listenable affiliates everywhere. If you want to sell where the buying is biggest, check the signpost and turn at Mutual. *LANDMARK: Mutual delivers* 97 of the top 100 Main Streets in America. **Mutual Radio 30** A Service to Independent Stations.

RADIO'S CHRONOLOGY OF MILESTONES

James C. Maxwell of Cambridge University, in 1867, outlined and predicted the action of electromagnetic waves.

Dr. Mahlon Loomis of Washington, D.C., was granted the first patent for a wireless system, in July, 1872.

------ * -

Marconi filed application for the first British patent for a wireless system in 1896, and flashed the first wireless signals across the English Channel in 1899.

- ★

-*-

The audion vacuum tube was invented in 1906 by Dr. Lee DeForest.

Reginald Fessenden transmitted the human voice by wireless on Dec. 24, 1906.

RCA was organized in 1919, and acquired the Marconi Co. and the radio activities of General Electric.

- ★ -

Operating as an experimental station, WWJ in Detroit, went on the air Aug. 20, 1920.

Broadcasting began "officially" with the Harding-Cox election returns aired on Nov. 2, 1920, by KDKA, Pittsburgh.

WBZ, Springfield, Mass., began broadcasting Sept. 27, 1921, as the first station to be regularly licensed.

Warren G. Harding became the first U. S. president to speak on radio with a broadcast on June 14, 1922, carried by WEAR (now WFBR), Baltimore.

The first two-way radio conversation was held between Dea Beach, N. J., and the S. S. America, 400 miles at sea, in 1922.

- ★ -

The first major court room battle to be aired was the Scopes trial in 1925, covered by WGN, Chicago.

NBC was organized in 1926, with WEAF and WJZ in New York as key stations.

KFI in Los Angeles broadcast the first coast-to-coast hookup on Jan. 1, 1927, when it aired the Rose Bowl game.

____★-

Licensed for 50,000 watts regularly and 450,000 watts experimentally, WLW in Cincinnati began operation on May 1, 1934.

The FCC was organized on July 11, 1934, to succeed the Federal Radio Commission.

MBS was formed and began broadcasts in 1934, with a four-station hook up.

MEASURE OF LEADERSHIP

Broadcast leadership isn't always best measured by audience surveys. Take the case of WFIL-TV, Philadelphia. Although a consistently strong "survey" leader for more than five years, the true measure of WFIL-TV leadership is found in the station's record of community involvement.

For example, the WFIL Studio Workshop. Three production companies, organized and directed by WFIL-TV personnel, are now "on the road" in Delaware Valley, presenting community fund-raising performances for a variety of neighborhood projects at no expense to the various sponsoring organizations. The Studio Workshop presentation of "Hedda Gabler" in its television premiere in prime time on November 30 played to an audience of some 366,000 people, in competition against formidable network opposition.

WFIL-TV is the survey leader in Philadelphia. More important, WFIL-TV is the community interest leader in Philadelphia.

ILADELPHIA, PENNSYLVANIA

Represented by Blair Television
RATIV H **LIGHTS 1937-**

At the end of 1937, there were 723 licensed broadcasting stations in the United States, plus 20 licensed experimental stations.

- ★

Today—there are 3,712 AM stations and 989 FM stations on the air.

On February 1, 1938, the number of network stations were: CBS, 115; Mutual, 76; NBC, 143.

Today — the network affiliate totals are ABC, 424; CBS, 189; Mutual, 502; NBC, 189.

Radio time sales exceeded \$125,000,000 in 1937, compared with \$108,000,000 in 1936; national network billings accounted for approximately 55 per cent of the amount.

Today — gross radio time sales are estimated at \$622,000,000, with networks accounting for over five per cent and local and spot sales accounting for the rest. \star

Out of the 31,500,000 American families in 1937, over 25,000,000 had radio sets; 4,500,000 homes had two or three sets and there were in excess of 5,000,000 radio-equipped autos.

Today — there are 53,300,000 families, and more than 52,180,000 families have radio sets; and there are in excess of 46,900,000 automobiles equipped with radios.

The public spent approximately \$500,000,000 in purchasing 8,000,000 radio sets in 1937, compared to 8,248,755 sets sold in 1936, when the all-time record was set.

Today — approximately \$765,000,000 was spent by the public in purchasing 22,500,000 car and home radio sets.

×

A Fortune Magazine survey in 1937 on favorite pastimes gave radio first place with 18.3 per cent; movies 17.3 per cent; magazines and books 13.8 per cent; hunting and fishing 11 per cent; spectator sports 10.4 per cent; newspapers 7.1 per cent.

Today — in an average week, radio reaches 90 per cent of all U. S. radio homes. The listening averages indicate over 60 per cent in the evening, and more than 75 per cent in the morning and afternoon.

- ★ The average radio set was in use a total of four hours daily in 1937. Today — the average is one hour and 44 minutes.

*

Music averaged about 62 per cent of total program hours on U. S. stations. Today — about 92 per cent of station programming consists of popular music programs.

The information and the abundance of photographs presented in the following pages is not an attempt to present a history of broad-casting. There is too great a divergence of opinion within the industry to undertake such a task. Rather, we have assembled a photographic parade of happenings and pioneering personalities whose imagination and faith have established broadcasting as one of the world's leading media of communication and entertainment.

CHARLES A. ALICOATE Publisher

ASCAP – the American Society of Composers, Authors and Publishers – an unincorporated, non-profit membership association of the 8500 outstanding men and women who write and publish our nation's songs, the Society also represents the music of more than 50,000 writers of other countries \equiv The Society, which was organized in 1914, has always served the public by encouraging musically creative talent. Its members represent every phase of musical literature: the popular songs of today, the standards of yesterday, the Broadway and motion picture hits, as well as the leading symphonic and concert works, religious, folk and country music.

GUGLIELMO MARCONI PIONEER INVENTOR

1874-1937

Marquess Guglielmo Marconi, inventor of wireless telegraphy, pictured above at St. Johns, Newfoundland, in 1901, where he intercepted a transatlantic signal from Cornwall, England. His work in the field of wireless transmission led to the ultimate development of our broadcasting system. In 1909, Marconi won the Nobel Prize for his pioneer work, an award he shared with Karl Braun.

HALF HOUR FIRSTS in N.Y.C. and it's tied for first in 26th.

From sign-on to sign-off this is the astonishing PULSE of WLIB. It's ahead of the other Negro station in New York City just about every single minute it's on the air. It's first for the first 25 half-hours and tied for first during the 26th.

No other radio station in New York gives you as much total coverage of this vital "specialized market" — a market that encompasses 1,600,000 people with a spendable income in excess of \$2-billion. Get the complete story today.

Pulse has just completed a socio-economic study of the Negro Community of Greater New York. It's the first of its kind made since 1952. We believe you'll find some fascinating facts to help you in your media planning. It's yours FREE. Just write to WLIB.

Radio-Television Daily 25th Anniversary, 1937-1962

PUBLC SERVICE IN DEPTH ON WSB

Service – in depth – is traditional at WSB! Example: the station produced a complete campaign for the 1962 "Safety-Thon".WSB Radio asked 500 area service stations to help, and gave prizes for their best efforts. Posters and a giant shopping center display were used, in addition to announcements, interviews, reports and a slogan contest.

Affiliated with The Atlanta Journal and Constitution. NBC affiliate. Associated with WSOC/WSOC-TV, Charlotte; WHIO/WHIO-TV, Dayton.

A roundup of headline highlights gathered from the pages of Radio - Television Daily since its original publication in Feb., 1937.

1937

Webs in building dilemma; rate card or account method discussed at conference by NBC and CBS officials.

President Roosevelt will be called upon to decide the number of channels to be allotted commercial television interests.

Defer organizing actors; hands off policy adopted for time being by American Federation of Actors toward radio talent.

Clash on Dickstein Bill; Tibbett appears for and Damrosch against measure to curb alien talent.

Music code hearing set; parley to stamp out bribery of radio talent is called by Federal Trade Commission.

A T & T seeks patent control; rights to all present and future communications development sought by phone company.

Bill asks 5 year license; Congressman Charles Anderson introduces measures for longer licensing of broadcasting stations.

Newspapers file applications for 103 new radio stations, FCC analysis reveals.

Would curb radio chains, proposed congressional probe seeking full light on expansion by network and newspapers.

INS news via short wave; special news service for the smaller stations started by Hearst subsidiary.

Re-sale of station license is attacked at House hearing.

Foreign radio going commercial; poor programs and unprofitable operations swinging sentiment to American methods.

Radio research report; field tests now underway for data on coverage and listening habits of nationwide audience.

CBS Television site set; transmitter to be located atop Chrysler Building will be most powerful station of its kind.

Lift music restrictions; publishers loosen up on film songs used in sustaining programs, obviating title mention.

Revise setup for ASCAP; forming administrative committee headed by E. C. Mills—Paine will be general manager.

5 language news programs; service in Italian, German, Polish and Portuguese being made available by Van Cronkhite Association.

NAB seeks music refund; committee is named to retrieve money paid Warner Bros. subsidiary—copyright bills endorsed.

Radio unionizing looms; Supreme Court decision is expected to spur organization among networks and individual stations.

Two million rise in home sets seen by CBS this summer.

CIO moves to organize technicians in radio field. Sues W.U. over baseball; WJBK, Detroit, files action to compel telegraph company to furnish scores of league games.

National Association of Performing Artists seeks to restrain radio stations from using phonograph records for sustaining or commercials.

Press-Radio is renewed; new bureau agreement is extended for another year—publishers adopt friendly station attitude.

Five day week for NBC; announcers, producers, sound men on five-day week—WNEW will follow, other union deals on.

20th Century-Fox to censor radio programs of its stars.

Radio playing Santa to films; 545 free minutes for one picture.

Hollywood NBC coast center; immediate transfer of western headquarters to movie capital is ordered by Lenox Lohr.

Radio's Hindenburg coup; disaster news is on air within a few minutes—WLS gets dramatic scoop recording on scene.

Coronation's record web; biggest radio audience on record will hear crowning ceremonies—American networks open before daylight.

Enlarge television screen; new tube enabling larger image are described by RCA men at final meeting of radio engineers.

A F of L moves to keep CIO out of radio field. Social security headache; artists are reluctant to pay while bureaus and legal staff seek to comply with the law.

Union signs WABC-CBS; 5-year agreement with Guild includes 40-hour week and wage increase— WOR deal reported next.

CIO air campaign in fall; labor union will use radio exclusively in coast-to-coast drive employing a staff of commentators.

Radio set sales up 17%; BMA sees 9,000,000 sets sold this year—labor troubles blamed on Congress at Chicago meeting.

Civic groups want time; educational leaders in nationwide move for evening spots on three major networks—calling on FCC.

Transradio suit settled; \$1,700,000 action against NBC, CBS, AP, UP, INS et al adjusted—Transradio recognized as news agency.

AFM to push disk ban; President Weber in annual report sees national action to curb electrical transcriptions.

25% of time to education; NBC further emphasizes cultural programs in signing Dr. Angell of Yale as counsellor.

American Guild of Radio Artists seeking to organize all skilled radio employees.

CIO moves dent radio business; network in complicated situation due to strikes affecting sponsors' activities.

New probe bill is filed; resolution by Senator

www.americanradiohistory.com

White calls for a sweeping investigation of the entire industry and the FCC.

Summer bugaboo licked; more major accounts riding through the warm weather---stations are doing bigger business than ever.

FCC fate again in doubt; death of Senator Robinson, sponsor of bill to preserve FCC entity, gives rise to new speculations.

New high in ET shows; no letdown in musical transcriptions this summer—heavy gains for record-ing laboratories.

President Roosevelt lauds accomplishments of radio.

Television patents pooled by Farnsworth and AT & T.

New radio union setup; Actors Equity, Musical Artists Guild and Screen Actors Guild financing radio unit with own autonomy.

NEA service enters radio field; press association affiliated with the Scripps-Howard group will supply program material to stations.

Webs tackle AFM job; station relations department assigned the task of lining up affiliates to meet union situation.

FTC grants music code; approves music publishers; petition for trade practice setup.

Cantor heads radio union; American Federation of Radio Artists elect officers—local charter granted New York and Los Angeles.

McNinch FCC Chairman; President drafts chairman of Power Commission to succeed Prall—Craven replaces Stewart.

Six months business up 28.7%; broadcast advertising up \$14,624,253 in first half of year---increase tops all media---seasonal drop less.

Demand web AFM help; network affiliates propose cutting sustaining program costs to pay musicians.

Philco adding stations; 30 outlets already added to original list on disk series—still more stations to be included.

AFM contract held up; standard provisions being revised as Weber warns that 200 network affiliates must accept it.

Management regulations opposed; U.S. Chamber of Commerce declares broadcast must be free to select and edit programs.

CBS-Canadian hookup; American and Canadian networks join in commercial broadcast for International Silver.

320 stations air series; record audience hears opening game in annual baseball classic—many commercial shows edged out.

Key stations and AFM agree; NBC and CBS outlets in New York, Chicago and Hollywood come to terms with musicians' union.

FCC merges 3 divisions; McNinch announces a board of six and himself will supplant broadcast, telephone and telegraph units.

ET men to fight edict; transcription manufacturers will fight AFM regulations—IRMA contract now acceptable to musicians' union.

Song writers and publishers in accord on ASCAP pact which runs until 1950.

New television permit sought by General Electric. Coaxial cable test termed satisfactory.

Radio probe being put off; Congress favors giving FCC Chairman McNinch chance to straighten things out before inquiry.

FCC rapped at Chicago parley; freedom of broadcasting from political interference demanded at educational parley—program standards urged. one radio station in the nation's top ten markets surpasses all others in weekly penetration^{*} KANOX

"THE VOICE OF ST. LOUIS"

* Cumulative Pulse, 1962

KMOX Radio is a CBS Owned station represented nationally by CBS Radio Spot Sales Warners buying Muzak; expansion of wired radio music service planned by film company—seen as step toward television.

Radio is top recreation; Fortune survey shows listeners exceed moviegoers. Elliott Roosevelt heads Hearst; becomes president

and general manager of radio interests. Government control bill looms; Senate to get

measure when new session begins in January. '37 was big—'38 to top it; billings up, networks

expand, more drama, better music, unions move in, television creeps along and Hollywood splurges.

1938

ARTA starts new drive; localized campaign is begun to sign up all stations.

FCC may ask license fee for radio; secret report made to Congress along with annual review.

90% of affiliates sign AFM deal; majority of 273 independent stations have accepted musicians plan.

Canadian policy attacked; ex-vice chairman of radio commission raps government competition with private firms—sees 50% U.S. programs.

\$8-Million tax seen in Senate Bill; proposed measure placing radio under Public Service Commission has far-reaching authority.

400 stations in used car drive; 16 agencies cooperate in placing extensive spot campaign for auto industry.

Redrafting disk license; AFM counsel advises plainly written clauses to avoid legal kickbacks.

Coast stations crippled by flood; 12 outlets in Los Angeles are forced off the air temporarily—many western originations canceled.

748 stations in national airmail week; record network is assembled to promote event.

Sponsored records get underway; Chesterfield and Canada Dry reported first accounts using 25-word advertising announcements.

Indies will meet AFM; committee selected after stormy session, will seek best terms possible—ET firms find selves 'in the middle.'

Farnsworth reveals new tele projector.

Late-hour shows wary; song requests being carefully scanned for hidden messages after stations receive FBI leads.

Los Angeles dailies toss out radio news and columns.

Agencies eye hockey as next season fare.

Network standbys piled up gross; increased budgets by foodstuff; soap and cigarettes are responsible for record first quarter gross.

FCC rejects congress probe; by vote of 5 to 2 commission decides not to invite investigation but let Congress originate own moves.

Experimental television schedule back on NBC on 5 hour basis.

Minton berates dailies; Senator from Indiana defends radio and accuses press of 'trying to strangle the air.'

1940 airing of Olympic Games will cost \$2,000,000. FCC hands down rules; proposes series of new regulations and okays 25 clear channel 50kw stations

as rural service aid. Unions no budget bar; leading time users planning usual next season shows despite labor troubles in industries.

Newspapers still militant; strong anti-radio sentiment.

Two tele receivers, Du Mont and Television Corp. of America, go on sale; curious public takes peek.

NAB appoints Neville Miller paid president. Baird tele receiving sets will be sold to theatres.

House probe defeated; Connery resolution is badly whipped by vote of 234 to 101; proponents die hard, debate bitter.

Web billings at peak; major networks' cumulative total for six month period up 5.9%; \$37,957,151 gross.

Disk license accepted; ET men and AFM agree on final form to go into effect.

Philco asks permit for tele outlet.

Film company in tele field; third picture outfit gets affiliation as Paramount buys into Du Mont; Warners and RKO-Pathe set.

Resume NBC television; will start a new series with live talent and films; revision made to conform to RMA standard.

WQXR to experiment with tape methods.

NAB wants united front; entire industry to be represented in any ASCAP discussion; basic pact will apply to all.

Radio-Television Daily 25th Anniversary, 1937-1962

Music code's washout; no U.S. law against paying artists for plugging songs says FTC; restraint of trade hint.

Television standards to FCC; RMA hopes to stabilize industry if transmission changes are okayed by government experts.

Foreign accounts shaky; several ad agencies stand to lose important revenue if commercial radio is killed abroad.

Storm hits key outlets; for first time both NBC and CBS in New York schedules are disrupted; reroute commercials.

War events come first; Hitler's talk cancels commercials as climax to a heavy weekend; CBS scoop on FDR message.

Webs to remain on job; although possibility of war fades major nets not to relax vigil.

Paid listing now acceptable in 237 newspapers at line rate.

Muzak starts test of new ad service.

\$10,000,000 television setup; head of British concern confirms Scophony plan, including sets selling around \$200 each.

Radio strictly on own; expenditures by leading advertisers in past 10 years disapproves claim that air hurts other media.

Majority of air employees unionized in past two years.

Tele talent reservoir; William Morris Agency joins forces with Du Mont-Paramount combine; events and theatre tie-up.

1939

CBS begins its testimony for FCC probe committee.

New radio transmission, Columbia U. professor promises new era for industry.

FCC revives web deals, digs up old stock swap with picture company.

More two-web sponsors; 34 national accounts used two or more major nets.

FDR for new FCC setup; writes two Congressmen to establish definite policies to guide clear interpretations.

Four A's holds its ground as AFRA seeks closed shop.

Chicago blizzard-bound; web schedules completely disrupted as actors and others are unable to reach stations.

AFRA-webs-agencies sign; unique pact charges AFRA and nets with maintaining the AFRA shop; settle AGRAP complications.

NBC television scripts ready for shooting.

Wheeler bill to Senate; provides for three-man commission to prevent lost motion.

Unions eye engineers; both CIO and AFI units plan drive following success of AFRA move.

Baird's television invasion; important English firm to establish giant screen projection suitable for theatre audiences.

FCC's complaint department; adopts new procedure in acting on complaints against stationsstronger discipline hinted.

Industry policies stated; strong plea against any censorship voiced by NAB board in statement favoring larger FCC.

Fort Wayne television center; Farnsworth moving entire facilities and will erect huge transmitters—to retain Philadelphia office.

www.americanradiohistorv_com

Compare air-newspapers; testimony on value of

two medias in leading markets highlight FCC probe hearings. Live talent television tests conducted by Zenith.

Radio continues to improve say 61% of leading critics; editors see gains while the faults seem trivial.

Seeks juvenile standards; joint committee on children's shows headed by women groups plans wide improvement campaign.

Sarnoff makes urgent plea for radio-televisionpicture cooperation.

Radio salutes the Fair; networks and local stations unite in lending full cooperation to the 'World of Tomorrow.'

Network tele hopes rise; following success on 1-mile phone-wire engineers plan new tests in seeking cable substitute.

OK shortwave sponsors; FCC lifts restrictions and allows international commercial shorts.

Newspapers peace move; definite trend toward amity seen as publishers realize radio news makes public news conscious.

Form wired tele group; Otterson heads new firm planning to install wired tele system as feasible method.

Sponsors up air budgets; advertising investments on networks show 11 industries advanced billings \$3,227,739 in 6-month period.

58 shows back to nets; heavy schedule returning within 60 days on three major networks dispels fear of war hurting business.

War ups radio budget; compensation for foreign market loss being sought by increase in domestic sales.

New recording method; process perfected by RCA-NBC based on higher frequencies, eliminates all distortion, noises.

Music plan before SEC; Broadcast Music Inc. files its data for stock issue.

1940

Webs gross \$83,000,000; \$10,000,000 over previous year for three major networks.

Tele hearing gets serious; ramifications over RMA standards keep Chairman Fly on the alert; Du Mont battles 'freezing.'

Shubert music settlement; 32 suits discontinued with radio gaining access to 23 operettas via ASCAP sans restrictions.

BMI operative next week; board meeting decides against delay as over \$200,000 reposes in bank; Miller sees much more coming.

FM gathering momentum; 12 experimental transmitters in use with 5 manufacturers making receivers; investment now \$1,500,000.

Tompkins to head BMI; plans vast scope in his operations which will offer much employment to writers and arrangers.

Radio's big war-news job; on 24 hour sked, resourceful webs again bring full coverage, both for listeners and papers.

Senate hears tele story; Fly defends recent action —Sarnoff foresees billion dollar industry; Barbour introduces FCC bill.

Fox Film's air budget; \$500,000 for network exploitation is first large-scale picture business; premieres to be plugged.

Super market survey; nationally distributed brands lead in sales where backed by radio; influence on housewives.

BMI seeks ANA backing; offers free service for theme songs and arranging department facilities.

Record licenses illegal; U.S. Circuit Court of Appeals voids licensing of phonograph records, also 'vested' rights of manufacturers-artists.

450 network affiliates; compare with 199 on June 1936 revealing vast coverage boost for webs in all markets.

Advertisers okay BMI; will cooperate fully with networks in music fight; membership now increased to 365 outlets.

Radio tops all media; surpasses both newspapersmagazines comparative time study shows; sponsor identification high.

Web billings at new high; \$90,000,000 year possible as major networks strangle August bogey; cumulative total soars.

CBS shows color tele; special demonstration reveals sharp, detailed transmission from films; to license receiver manufacturers.

890kc. while four others are on 920; directional

antenna changes.

Grant 16 power boosts; four stations involved on

45

NEWS

Every day, nearly three million* people turn to these men. Their voices and their names are familiar. They report the news for WOR RADIO. \blacksquare Only WOR broadcasts fifteen minutes of news every hour on the hour throughout the day. Only WOR moves so efficiently to cover all the news everywhere it happens — by helicopter, by mobile unit, by newswire. \blacksquare WOR brings the news to a larger audience than any other station in America, greater by half a million than the daily circulation of the nation's most widely read newspaper. \blacksquare When people want to know what's happening anywhere, anytime, they turn to the men who report the news for **WARD DANIO 710**

> R K O GENERAL

www.americanradiohistory.com

Newspaper Guild of NY Page One News Award 1962 fm 98.7

*Pulse, February 1962

AFM bans co-op show; participating network type program hard hit by musician union's new restrictive order.

Tele election coverage; complete pictorial story to show returns-progress of candidates in elaborate NBC plan.

FM goes commercial; FCC working fast gives 15 outlets okay to sell time immediately they find it feasible.

FDR praises industry, sees no government control. No M-G-M-ASCAP contract; performing rights pact still pends covering 3 movie-firm companies; Sam Fox another holdout.

Hotels start BMI co-op; 'nation's hosts' swing into high gear to assist broadcasters fighting ASCAP's music hold.

1941

FCC sees tele activity; sixth annual report covers commercial possibilities; progress seen throughout entire industry.

CBS billings rose 18.8%; cumulative 12-month total revenue is \$41,025,549; December gross reveals 8.2% increase.

New color tele patent hailed as workable.

RCA's large screen tele; highlights two-day tour for FCC with hour-long show.

Independent movie exhibitors favor cooperation with BMI.

ASCAP signs U.S. decree; with crisis over, more cheerful note is in evidence as leading firms give Society confidence vote.

Aluminum ban hits ET's; manufacturers of blanks for masters see grave situation as OPM holds metal is needed for defense.

Buildup of smaller publishers current move of BMI staff.

U.S. offered FM patents; Major Armstrong extends government free use, also to any designated concern working on war orders.

Webs now holding off commercial tele rush.

Radio's biggest switch; 800 stations on new frequencies completely on sked; moving day campaign held successful.

RCA-Theatre tele plan; will market large screen apparatus but do no programming; sees need of outside producing units.

Radio opens bond drive; over 700 stations in largest hookup take FDR-other officials' talks; future programs being set.

BMI slashes fees as members vote to continue music fight.

First tele theater set; large screen going into the Rialto as part of regular entertainment is on a commercial basis.

Trammell again hits FCC; calls ordered sales of Blue 'brutal' and warns unlimited power placed in hands of commission.

Movies losing against radio Gallup tells RKO gathering.

Tele goes commercial; years of research and \$25,000,000 plus FCC okay takes new medium out of the laboratory.

ANPA challenges FCC; declares commission is without power to bar newspapers from engaging in the broadcasting industry.

Nation's leading advertisers favored radio in budgets.

Commercial tele boom; fall outlook optimistic as sponsors indicate full co-operation; Don Lee files application for commercial CP.

Theatres eyeing tele from box office view.

Radio's defense time; more than \$8,000,000 in facilities donated by the industry during six months ending July 1.

Emergency plans set; government to keep hands off during war but will assist stations; super web planned to cover entire country.

Grid dough hits peak; expenditures to reach \$2,500,000 mark during coming season; fuel curb no barrier for gas sponsors.

Senate okays 'no tax;' approves committee action killing proposed levy; way now cleared for FCC franchise plan.

Three new tele grants; Philadelphia, Milwaukee and Los Angeles set with commercial licenses; also okay three more FM stations.

Web gross \$105,000,000; estimate for major network billings indicate increase of \$10,000,000 in the current year's total.

BMI will slash rates; board approves new 8 year

blanket contract; estimated \$1,000,000 income seen next year.

Radio covers the war; all web-station programs overboard to bring public first-hand information during 24 hour schedule.

Air clients optimistic; no serious budget changes expected, say leading agency executives—also numerous sponsors.

Bolster saving drive; sponsors, agencies, stations pledge unprecedented aid of every kind to push sale of bonds-stamps.

Webs eye normal sked; will return to regular hours on air within few days unless emergency requires additional time.

Standard war practice; first large scale co-ordination plan set for New York territory; all official information from central source.

1942

CBS-NBC to fight suits; federal action was long expected but network officials maintain move is grave mistake.

Tele defense bond program results in tremendous sale.

Halt new-station CP's; number of standard outlets frozen at the present level, also power; to price fix receiver parts.

Webs rushing production; building strong reservoir of shows for both summer replacements and possible priority casualties.

To halt set production; manufacturers get 4 months to ready plants for war work.

Networks granted stay; Federal Court delays FCC enforcement of rulings until Supreme Court can pass

on web's appeal.

Webs feeling war jolt; status not too bad as cancellations begin to offset newly signed business.

Murrow hits U.S. censors; criticizes handling of news by U.S. as 'cumbersome' and 'confusing;' no reaction from the Capital.

AFA wartime ad guide; outlines 39 points as important means toward aiding American war effort, and stabilizing nation's economy.

Expand tele in defense; big job ahead in training of workers as 50,000 complete first course; new hour dramatic series.

Radio's share of advertising \$225,000,000, as third media.

Record audience looms; radio gaining listeners as theaters lose patronage due to tire ban; blackout tests also a factor.

Courts overrule FCC; supreme tribunal approves temporary suspension of commission's ruling on duplication of frequencies,

WPB final authority; stringent curtailment of construction on projects of \$5,000 or more moves FCC out of the picture.

National talent pool; organization to aid war effort set by actor union; will centralize source of services given gratis.

Deems Taylor made ASCAP head; board action ousts Gene Buck, who served since 1923 for radiominded musical authority.

War Department makes request; radio's key morale job is illustrated by Army's demand, sponsors add Howaiian station to hookup.

Hit freeze-squeezers; applicants for CP's receive warning on seeking critical materials; told to save money and time. New CBS rate structure; first important revision since 1939 has two-way discount change to **encour**age maximum nets.

Direct air bond sales; U.S. Treasury to appoint broadcasters as sales agents; will ship bonds on consignment basis.

List essential radiomen; BWC classifies all types of personnel needed to carry on broadcasts both standard and shortwave.

Mutual's discount plan; six point setup to encourage larger network reveals simple format geared to war-time economy.

AFM clarifies ET status; states commercial disks may be made if performed once and destroyed or deposited with union.

Talent cost going lower; higher bracket particularly hard hit as budgets are drawn tighter; web discounts pave way.

New U.S. international setup; plans vastly expanded shortwave use in psychological warfare move; government cooperating in operation.

Television holds strong; stations on both coasts still continue their operations and experiments despite drastic wartime cuts.

OWI's language plans; strong anti-axis ET's being readied in six languages; best available talent to be utilized.

Treasury okays ET firms; recognizes 17 independent disk studios which may do business with all government agencies making recordings.

Web-AFRA compromise; three networks agree to 10% increase for sustaining artists; approval is expected by the WLB.

1943

Congressmen talk radio; newly convened lower house members reveal dislike of commentators in particular, also the FCC.

Set up new AFRA scale; basic sustaining pacts in final form as okayed by the major networks; goes to WLB for approval.

\$2,000,000 phone savings; minimum estimate of industry benefit by A T & T wire-charge reductions

may also aid affiliates. 56,560,000 in U.S.A. hear Casablanca news.

600,000 disks sent overseas in first six months of war.

CBS 1942 net profit at \$4,100,000 mark.

Chain rule hearings ends; U.S. Solicitor General in high court oppose plea to stay enforcement of FCC's new regulations.

FCC fund slash blocked; Speaker Rayburn defends commission as controlling influence over air; second cut move also beaten.

Set government food campaign; time will be bought in drive to induce use of unrationed commodities; expect \$100,000,000 in ads.

Agree on 10% AFRA rise; minimum scale for sponsored shows sought 19% cost-of-living-boost but work out compromise.

Network program trends; first war year saw definite change in character of public's demand; news popular, drama declines.

2nd Treasury Ioan co-op; full industry support being offered following Morgenthau's message; three week drive planned.

583 of 722 stations report profit for 1942.

High court song ruling; hold writers can dispose of rights years before anticipatory benefit even if it is 'bad business.'

OPA-Treosury department laud work of radio.

National spot business holds up; first quarter of 1943 showed gains over last year in active clients; 9 major groups increased time.

Editors hit web decision; Washington dailies take lead in citing threat to free speech in event of authority abuse by FCC.

Stress womanpower need; McNutt asks additional 2,000,000 for essential war work; radio will aid expansion campaign.

BMI's new-song preview; audition board of program managers participate in novel presentation of newly-published selections.

Radio leads advertising ríse; shows sharpest increase of all media in Department of Commerce study; March billings set record.

House hears FCC attack; Representative Herbert of Louisiana hits chain rules along with Supreme Court decision; sees blow at free speech.

ET men appeal to WLB; transcription companies submit case for mediation seeking to end ban on

Radio-Television Daily 25th Anniversary, 1937-1962

AFFILIATE

SAN ANTONIO, TEXAS

recordings by the AFM.

Taft asks chain rule stay; wants enforcement by FCC deferred while Congress considers subject of regulations and free speech.

Sales manager open up; condemn 5 minute commercial shows also hitch-hike announcements; mull revision of standard contract form.

\$500,000 AFM band tour; over 500 live concerts will be given in out-lying communities as result of Roosevelt-Petrillo confab.

Radio's bond-sale totals; U.S. Treasury reports \$80,243,968 sold by 455 stations in 12 month period —19% to New York State outlets.

Call equipment adequate; engineers of General Electric see no obsolescence resulting from war developments; FM and tele increase expected.

Cox resigns under fire; head of House FCC investigating unit dramatically bows out; was charged with taking illegal lobbying fee.

"Film does the unusual"

"BECAUSE IT'S MOISTURIZING!" That's the selling proposition in an unusual 60-second Lux Soap television commercial.

To make customers feel the moisturizing difference, high-speed photography stops motion, captures the sparkle and brilliance of creamy, moisture-laden lather. Shooting is on Eastman film with prints on Eastman print-stock. Two steps—negative and positive. Both Eastman! Both of vital importance to sponsor, network, local station and viewer!

Moral: Plan carefully . . . go Eastman—all the way! Always give the producer time to give you top-quality prints! For further information, please get in touch with Motion Picture Film Department

Robert Sarnoff named NBC president; Weaver upped to chairman of board. NTA acquires coveted TV features; David Selznick

features set for video distribution. Agency program promotion booms; contest for-

mula seen as heavy agency trend.

1956

Columbia Pictures to release 104 features to television. Rate card hike widespread; survey shows rise in both radio and TV.

Scope of Senate probe revealed; intense study of entire industry is planned.

Committee probes advertising practices; Senator asks FTC about untrue advertising on air.

Mutual reveals new sales concept for web; plan to guarantee cost-per-1000 to clients.

Closed circuit TV used in ad agency meet; BBD & O staffs gather in 15 cities.

Warner Bros. sells 750 film package for \$21 million to Associated Artists Productions.

TV bid for World Series may hit \$7 million; four offers made; Gillette among bidders.

TV advertising values hotly debated; ability to move durable goods argued.

RKO makes bid for TV business; Glett announces availability of studio.

Spot TV topped \$103,872,000 during last quarter of 1955.

Crowell-Collier buys 7 more stations; 5 radio and 4 TV outlets bought in 2 days.

Portable TV makes heavy impact; retailers report much consumer interest.

New color system uses black and white equipment; camera filter is basis of process.

Telethons: broadcasters' problem; high-powered charity drive methods analyzed in a survey of

expanding solicitations in 1956. M-G-M enters large scale TV to distribute own

backlog. FCC proposes all-UHF TV system; commission requests all comments on solution be submitted.

Ten Philadelphia stations indicted; radio rate fixing charged by grand jury.

\$16,250,000 for baseball package; NBC buys radio-TV rights to World Series, all-star game.

Spot radio volume tops \$54 million; five month total 17.8% above 1955 level.

Charges A T & T has 'dictator' power; radio executive makes bitter attack at hearing.

FTC cites 9 radio-TV advertisers; charge promotion practices were illegal.

Radio-TV salaries second highest; average earnings hit \$6,333 in 1955.

Protest ban on newsmen visit to Red China; letter asks State Department reconsider passport rule.

M-G-M, KTTV in film-ownership deal; \$5 million for pictures—25% of station stock bought.

M-G-M TV signs \$20 million in pacts; CBS, Triangle and King purchase library rights.

FCC calls all-industry meet to push 'crosh' UHF program.

Weaver quits as NBC chairman; Frey also resigns, four new executive vice presidents appointed.

Urges 5-year license term; chairman cites benefits from longer term.

FTC sets up radio-TV probe unit; false, misleading ad claims to be investigated.

Goldenson takes over as ABC president; new organization policies at ABC planned.

20th Century-Fox buys into NTA film web; sells rights for \$30,000,000 on pre '48 pictures.

West Coast availabilities SRO; survey shows good spot time scarce on stations.

Crowell-Collier station deal off; new financing difficulties end plan.

1957

FCC flayed in report issued by House Small Business Subcommittee; recommendations center about removal of regulatory agencies from under White House control.

Nielsen Coverage Service Report No. 2, showing listings which indicate shrinkage of radio station circulation, touches off a hot controversy in the industry.

John L. Burns elected a director and president of RCA, succeeding Frank M. Folsom.

About 76 per cent of American households now have TV sets, Census Bureau reports, in its August,

1956 survey; this compares with 73 per cent in a similar 1955 survey.

Walt Disney Productions and ABC complete negotiations on a new contract for more than \$9 million and 130 hours of TV programming in 1957-58.

President Eisenhower's second inauguration is covered by CBS and NBC with the newly developed Ampex video tape recorder, marking the first time this new system is used for covering a news event.

J. Walter Thompson introduces color telecasting via its closed circuit channel; the agency is one of the first to display great faith in color TV.

National Association of Radio and Television Broadcasters' board of directors approves proposal that its name be changed to National Association of Broadcasters.

RCA annual net profit tops \$40-million peak in 1956; NBC increases evening color programming by 500 per cent over the preceding year.

FCC Commissioners split on the question of deintermixture, and appear to agree only that there will be no major shift of TV to UHF in a number of years, if then.

Robert F. Hurleigh, director of Washington operations for Mutual, has been named national news and special events director of the radio network.

Academy of Television Arts and Sciences votes "Requiem For A Heavyweight" as best single program of the year; best new program series: "Playhouse Ninety."

Civil anti-trust action in Federal District Court in New York City against Loew's, Inc.; Justice Department action against olleged block booking of feature films to TV stations.

Former President Herbert Hoover receives Keynote Award at 35th annual convention of NARTB; he is cited for "encouraging the growth of radio from its infancy."

ABC Radio network formed as separate, autonomous subsidiary of American Broadcasting-Paramount Theatres, Inc.; Robert E. Eastman named president of new organization.

Two hundred fifty station and network owners and managers form Society of TV Pioneers.

A jurisdictional lighting dispute, which CBS claims is without precedent in the history of its network, prevents WCBS-TV from televising Antoinette Perry Awards.

United Artists decides to handle own TV distribution of backlog of feature films.

FCC decides it has authority to okay toll-TV; commission grants an "adequate" trial of pay-asyou-see TV.

RCA plans national color push; to use spot radio-TV.

John C. Doerfer named chairman of FCC, succeeding George C. McConnaughey; Frederick W. Ford is named FCC Commissioner.

A \$15 million program of TV film production for 1958 is announced by Warner Bros.

The Mutual Broadcasting System is sold by RKO Teleradio Pictures to a group of West Coast businessmen headed by Paul Roberts, president, and Armand Hammer, board chairman.

MGM-TV's feature library is sold to 57 TV stations for a dollar total slightly under \$50 million.

NBC purchases WJAS-AM-FM, Pittsburgh, for a reported price of \$725,000.

www.americanradiohistory.com

Total television revenues in 1956 rise to \$897 million, up 20 per cent over the previous year.

FCC acts to OK toll TV test for a three-year period, after a long battle; debate over approval continues in Congress.

RKO Studios in Hollywood and Culver City, Calif., are purchased by Desilu for over \$6 million.

FCC tightens up on its approval of station sales following extensive Congressional criticism; FCC report recommends regulation of networks and calls for other strong limitations of practices, such as an end to network option time.

Baltimore passes $7\frac{1}{2}\%$ tax on advertising and on the receipts of advertising media, including radio and TV; court fight sure in a case that may set a precedent.

Electronics industry sets new record in production and dollar volume in 1957, announces James D. Secrest of the EIA.

Los Angeles OK's pay TV by narrow margin; vote passes over opponents' "ultimatum" threat to hold a public referendum on the issue.

CBS buys Philadelphia stations WCAU AM-FM-TV, and related properties for \$20 million, "largest package" deal ever.

FCC gets first pay TV request, as Philadelphia firm with idle UHF CP, files application.

lence probe.

"THOSE D____* COMMER-CIALS!"

The reformer curses the commercial as "evil"; the pragmatist regards the commercial as a "necessary evil"; today's economic realist hails the commercial as "necessary"... and in the public interest.

Advertising is public persuasion—an effort to get someone to do something—an extension of the face-to-face persuasion that is as old as Eve seeking Adam. In a complex society advertising is an indispensable substitute for this personal salesmanship. It helps create mass demand and in turn mass production, mass employment and a high standard of living.

Corinthian believes it more than coincidence that the increases in gross national product and consumer sales in the past decade have correlated so closely with the growth of television viewing and television advertising. The television commercial has become the vital ingredient of a mass production and mass consumption economy. It combines public persuasion with face-to-face personal selling.

So the next time your mother-in-law curses the commercials, remind her that THEY SATISFYvital economic needs.

Telstar Intros the New Communications Age

World Salutes 'Old Glory' Via First Space Satellite

This is no ordinary photograph of Old Glory waving in the breeze. It is actually off the face of a TV receiver and represents the first historymaking transmission via an actual communications satellite in outer space. The picture signal was bounced off AT&T's Telstar whose principal purpose was to test the reliability of active satellites for sending broad band microwave radio signals—accomplished with spectacular results. Theory gave way to proven fact as the pictures were received with excellent clarity at the Andover, Me., earth station, where it had originated, and also at Holmdel, N. J.; Goonhilly Downs, in England, and at the Pleumeur Bodou stations in France. The following night, Telestar scored again when the

nation's three major networks aired the first east-west telecasts to the earth stations in France and England, across the tremendous span of the Atlantic. It was a glorious tribute to the American spirit of cooperation between business and government. This heralding of a new communications age holds undreamed possibilities for the future.

It Took 400 to Produce

It took some 400 scientists, engineers and technicians at Bell Labs to develop Telestar and its associated microwave experiments. Here is one of the later steps in their mountainous labors to send world communications techniques hurtling forward. A satellite model is being put into a special thermo-vacuum chamber for tests to determine the thermal effects of sunlight on the actual 170-pound sphere, originally calculated to orbit at an altitude ranging from 500 to 3,000 nautical miles above the earth. COMMAND AND TELEMETRY ANTENNA

Earlier theoretical suggestions had been made that artificial "moonlets" be used for world-wide communications. But it remained for Bell Telephone Labs' Dr. John R. Pierce in 1954 to make the first concrete proposals that space satellites be used for overseas communications. This was three years before Russia's Sputnik I was orbited. In a technical paper published the following year. Dr. Pierce analyzed two methods for communicating via satellites: by reflecting signals off mirror-like "passive" satellites or by transmitting to "active" satellites which would catch and amplify the signals before retransmitting them back to earth.

Echo 1, the National Aeronautics and Space Administration's ten-storyhigh reflecting balloon satellite, orbited in August 1960, proved Dr. Pierce's ideas. Voices and still photographs were "bounced" off Echo I in experiments in which Bell Labs and its unique Holmdel, N. J. horn antenna were major participants.

Then the Bell System lauched its own experiment, Telstar, world's first satellite built and paid for by private industry. Within hours of its July 10, 1962, launching—made from Cape Canaveral by NASA, engineers had successfully sent conversations, TV and telephoto microwave transmissions from the station in Maine, up to Telstar in space—and back to earth.

Here is the way American TV viewers saw former President Eisenhower in an NBC video network broadcast, via Telstar transmission, from Stockholm, Sweden.

Radio-Television Daily 25th Anniversary, 1937-1962

A recent experience at Adam Young Inc. documents the new role of today's representative and offers a glimpse into the future.

One of our radio stations instituted a new market concept. There was, of course, the special sales campaign alerting agencies in New York and eight other important advertising centers to the change. We prepared the sales presentation tape, evaluated programming, created the market story and produced an elaborate hard-cover promotion piece.

The "national salesman" of 20 years ago never would have believed it. <u>Today's representative</u> lives it. He and his stations believe in the promise of tomorrow.

ADAM YOUNG

STATION REPRESENTATIVE

de.

Paul Ruhle on his way to work during the 1937 flood of the Ohio Valley. Chief announcer for WCMI, Ashland, Ky. at the time, he is now manager of WSIX, Nashville.

Robert E. Kintner, left, president, NBC, when he was a member of the New York Herald-Tribune's Washington bureau. He is shown here interviewing James M. Landis, then chairman of the Securities & Exchange Commission.

Tommy Tito, sales manager of WAZL, Hazleton, Pa., circa 1932.

George S. Dietrich, station manager of WNBC, New York, photographed in 1937.

J. Roy Stockton (back to camera) relays the progress of the 1921 National Amateur Golf Tournment in St. Louis. This was one of several tests of wireless equipment before KSD, St. Louis, took to the air in 1922. Stockton, now retired, was then a sports writer for the St. Louis Post-Dispatch.

C. Roy Hunt, when he was treasurer and general manager, KOIN, Portland, in 1931.

Eric Salline, photographed twenty-five years ago, is presently national manager, affiliate relations, for CBS Radio.

Walter D. Scott, executive vice president of the NBC-TV Network, when he was a radio spot sales account executive for NBC in 1937.

In 1937, Leonard H. Goldenson was assistant to the executive in charge of theatre operations for Paramount Pictures, Inc. He is now president of AB-Paramount Theatres and ABC.

President of Storer Broadcasting Co.

in 1936, George B. Storer is now board

chairman.

Barry Sherman, executive vice president of WQXI, Atlanta, as he appeared twenty-five years ago.

The broadcast of the famous 1925 Scopes trial, covered exclusively by WGN, Chicago. Clarence Darrow, chief defense counsel, is at right holding fan.

Radio-Television Daily 25th Anniversary, 1937-1962

THE BRITISH BROADCASTING CORPORATION

Congratulates

RADIO – TELEVISION DAILY

on its

25 years of service to broadcasting

THE BRITISH BROADCASTING CORPORATION

is also proud of its own broadcasting service

BBC's first public sound broadcast service started 40 years ago on 14th November 1922

London

1962: a control room in Broadcasting House, London

BBC's television service, the first in the world, started regular broadcasting 26 years ago,

1962: a "MAIGRET" episode is produced before six television cameras at Television Centre, London

Of the considerable annual programme output of the BBC television network, over 85% is originated by BBC Television in its own studios or from its 27 film camera teams.

Last year BBC Television Enterprises distributed recorded programmes in 87 separate countries: the quantity involved represented an increase of 130% on the previous year's total, which was in turn an increase of 120% on the total for the year before that.

The BBC Television Film Department's annual output is equivalent to 700 full length feature films.

The Design Department of the Television Service provides scenery for 3,700 separate productions each year. One production set is completed every 20 minutes of every working day.

RADIO

TELEVISION

1936: Sophie Tucker sings before a single BBC television camera

In its 40th year the BBC provides three networks in sound radio, a national television network, and an extensive service of broadcasting to other countries. More than 25 million people look at BBC television and over 26 million people hear some BBC sound radio each day in Great Britain.

Over 14,500 hours of sound broadcasting are carried by the three networks in Britain each year.

Today the BBC broadcasts to the world outside Britain in 40 languages for some 86 hours each day.

BBC Sound Transcriptions distributed some 900 separate programmes in over 100 different countries last year.

CONGRATULATIONS ON YOUR 25th ANNIVERSARY!

Seated, George F. Bissell, president and general manager of WEAV, and Gordon Besaw, then engineer. WEAV, Plattsburgh, N. Y., is a CBS affiliate which went on the air in 1935.

C. W. Myers, who organized KOIN, Portland, in 1926.

Bern Enterline at the microphone of WJBL in Decatur, 1938. He is now known as Rex Dale, and is with WZIP, Cincinnati.

Boh Hope and Shirley Ross in a scene from "Thanks For The Memory," a 1938 Paramount production.

In 1937, Clair R. McCollough was president of WEST, Easton, Pa. and WAZL, Hazleton, Pa. Today, he is general manager of the Steinman Stations.

David H. Morris, pictured when he worked on the American-Statesman newspaper in Austin twenty-five years ago, is president and general manager of KNUZ, Houston.

Sam Cook Digges was a columnist for the Washington (D. C.) Daily News twenty-five years ago. He is now administrative vice president of CBS Films.

William K. McDaniel is executive vice president, Radio Network, NBC. Photo was taken when he was a senior at Duke University.

W. E. Goetze, vice president of Time-Life, Inc. and KOGO-TV, San Diego, photographed twenty-five years ago.

James D. Shouse, vice president in charge of broadcasting at Crosley Broadcasting Corp. in 1937, is today chairman of the board.

In 1933, Charles H. Crutchfield, right, was master of ceremonies for a musical program by Arthur Wenige and the Ramon Brothers, on WBT, Charlotte. Today, he is executive vice president of WBT-AM-FM, WBTV, and WBTW.

Robert K. King, (right) vice president of Capital Cities Broadcasting Corp. and general manager of WKBW-TV, Buffalo, pauses on his way to a remote broadcast from Guani in 1945 when he was assigned to Armed Forces Radio.

The lady was sitting enjoying her lunch at a Los Angeles outdoor restaurant when smoke began to billow from a nearby office building. "Fire! Call Channel 5!" she sputtered through a mouthful of chicken salad. I But there was no need. KTLA's Telecopter and Telemobile already were on their way to the scene. Within minutes, regular programming on Channel 5 had been swept aside for live coverage of the blaze from the air and the ground. The lady hadn't told the Channel 5 News crew anything it didn't already know. But what was meaningful about her reaction was that she, like so many Southern Californians, no longer think of news or their city's welfare without automatically thinking of Channel 5. There's no wonder: Twenty-four minutes after the start of the Bel-Air fire, worst in the history of Southern California, KTLA's Telecopter-Telemobile remote broadcast phenomenon was at the scene with live coverage that lasted seventeen hours. It was the same with the Beachwood Canyon flood. The Hollywood Hills fire. The first Vandenburg Missile firing. The Democratic Convention. The de of Nikita KI road disaste tragedy. Ac Police and away from o it on Chann wrote to S Stretch Adl tioned myse as my offit That's why Television N excellence October 4, by a televi of the Asso sponsoring KTLA, Para sented Nati

tion. The death of two Los Angeles newspapers. The visit of Nikita Khrushchev to Los Angeles. The Santa Fe Railroad disaster. The Pacoima air collision. The Kathy Fiscus tragedy. Ad infinitum. 📱 That's why in Los Angeles, Police and Fire Departments, in warning people to stay away from disaster areas, tell them to go home and watch it on Channel 5. 🚦 That's why the Mayor of Los Angeles wrote to Station Vice-President and General Manager, Stretch Adler following the Hollywood Hills fire: "I stationed myself before the television and used your report as my official contact as to what was happening. That's why when the Southern California Radio and Television News Association handed out ten awards for excellence in Television News Coverage the night of October 4, six went to KTLA, more than had been won by a television station in a single year in the history of the Association. I Whether you're seeking news, or sponsoring it, experience shows it pays to turn to KTLA, Paramount Television Productions, Inc. Represented Nationally by Peters, Griffin, Woodward, Inc.

Robert F. Hurleigh, president of the Mutual Broadcasting System, is shown above when he was a staff announcer in 1937 for WFBR, Baltimore.

Leonard J. Patricelli, shown directing a WTIC musical program in the early thirties, is today vice president in charge of programming for WTIC-TV, Hartford.

President of Storer Broadcasting Co., George B. Storer, Jr., photographed twenty-five years ago.

Franklin Roosevelt and friend John Mack of Poughkeepsie, after they had just completed a broadcast on WKIP, Poughkeepsie, N. Y., in support of their candidates for local office in the early forties.

Walt Framer, with WWSW, Pittsburgh twenty-five years ago, is now executive producer of Walt Framer Productions.

Bernard Neary, before a CBS mike in 1927, is general manager of WGBS, Miami.

During the 1940 campaign, Peter Grant, right, interviews Wendell Willkie, GOP presidential candidate, on WLW, Cincinnati. Behind Willkie is James Cassidy, then World War II correspondent, and in the center is Cecil Carmichael, then head of publicity for WLW. Fred Thomas, former WLW staff newsman now associated with Cincinnati's ETV station WCET, is in far right corner.

Robert Rich, vice president and general sales manager, Seven Arts Associated, when he was an undergraduate at Oberlin College in 1937.

Herbert K. Landon, when he was publicity director for WOV, New York, in the late thirties. He now heads his own public relations and publicity firm.

Robert E. Dunville, on the executive staff of WLW, Cincinnati, in 1937, is now president and general manager of Crosley Broadcasting Corp.

James Seiler (left), sound man, and writer Joe Brechner discuss "Detour to Happiness," a program aired on WRC, Washington, D. C., in 1940. Today, Seiler is head of ARB and Brechner is president and general manager of WLOF-TV, Orlando, Fla.

A 1927 photo of a Lakeside Park Ballroom dance, aired on WAZL, Hazleton, Pa. At center of stage is Kitty Kahler; to her right is Tommy Tito now WAZL sales manager; to the left Vic Diehm, now president and general manager of WAZL. Jack Robel, standing at Diehm's left is orchestra leader at the station.

BRYAN MICHIE REPORTING FROM TWW

I would like to draw attention to some of the programmes produced by TWW. There are brief details below.

In addition, may I remind all TV producers that my programme purchases for TWW include the first run of many filmed series – exclusively for showing on the screens of our two and three quarter million viewers.

SOME 1962 TWW PROGRAMMES

Dartmoor A special feature on the most historic and notorious prison in Britain, including some exclusive 'inside' interviews. (half hour)

les The land of St David in 1962, specially written for TWW by the novelist Gwyn Thomas. (half hour)

An original film tribute to Dylan Thomas, produced by Jack Howells. (half hour) Music and song from Wales, starring Ivor Emmanuel. (45 minutes)

John Betjeman and Gwyn Thomas look at many of the interesting places in their region and give their own inimitable comments. (half hour)

Hyperion A sporting documentary highlighting the accomplishments of this famous racehorse, with interviews from The Duke of Norfolk, Sir Gordon Richards, Lord Derby and other distinguished figures. (half hour)

The Bath Festival is among many regional events from which special entertainments are devised. A number of TWW quiz programmes have subsequently received network production. The TWW Remote Unit has been used by CBS for special recordings in Great Britain.

When we were five and twenty

Our happiness knew no bounds

Accounts we had aplenty

And millions liked our sounds.

When we were five and twenty

We heard many a wise man say

Even greater success is ahead for you-

Now we are six and twenty

And 'tis true, 'tis true.

Daily

Mort Bassett & Co. Special Representative — Radio and TV Stations

Teleservice,

Ned Jay, promotion director of WAGA-TV, Atlanta, in 1927.

KGO sports commentator Ira Blue, as a neophyte broadcaster in 1937. He is still with the San Francisco station.

In 1921, J. W. Weed built this transmitter panel and operator's desk for KGW, Portland. At left is a home-made phonograph used for transmitting records; music had to be picked up by mike in front of phonograph.

Lawrence Welk started his champagne music at the suggestion of Phil Davis, music director of WCAE (now WRYT), Pittsburgh. Picture was taken during a WCAE pick-up and feed to the Mutual Network about 1938.

After crime fighting for the FBI twentyfive years ago, Frank M. Headley is today president and treasurer of H-R Representatives

HISTORY MAKING EQUIPMENT

Portable radios became popular when RCA developed this battery-operated 199 tube.

The acorn was the first successful tube for the reception and transmission of UHF signals.

An early television film chain, used in 1938 in conjunction with the Eiffel Tower television station, built by the Paris Laboratories of International Telephone and Telegraph Corp.

Development of this battery-operated two-tube amplifier in the early twenties made it possible to add a loudspeaker to the tuner so that the entire

family could enjoy programs without

Radio broadcasting gained in popularity in the early twenties when crystal sets and headphones were introduced.

headphones.

In 1906, Dr. De Forest patented the Audion (left) in which for the first time a third element called a grid was added to the two-element Fleming valve, grand-daddy of all vacuum tubes. The first tube to operate direct from alternating current in the home was the 227. This tube relegated the messy storage battery to the automobile.

The Aeriola Senior, Westinghouse's one-tube set using the WD-11 tube, went on the market in the early twenties. It ended the reign of the crystal receiver.

Early radio sets using tubes depended on this UV-201 Radiotron for station reception.

An artist's conception of the world's first demonstration of communication by microwaves in 1931. This commercial link between Dover England, and Calais, France, was designed by European subsidiaries of International Telephone and Telegraph Corp.

### Radio-Television Daily 25th Anniversary, 1937-1962

۲

ł

## **25 YEARS**

is a fair average for the time put forth by W. J. German, Inc., management personnel in the Television Industry, and it is still a youthful spirit that pervades... a youthful spirit engendered by the happy associations with our untold number of friends whom we have been permitted to serve.

## When Boston Needs a Helping Hand!

W. Hahe and Television is always at hand, estending the reoperation merical by Greater Beston's worthwhile philamlingic groups Recently, WNAC Radio invited 20 leading businessmen to participate in a full broadcast day, explaining the need for giving to the United Fund. Simultaneously, Television extended its far-reaching hand, for the benefit of the United Fund. Whatever if he Toost Toord, Heart Fund, Bed Frost Muscular Hystrophy, Multiple Sciences, Bay Science, an emergency call for them

mericanradiohistory.co

WNAC Radio and Television is there, serving the Commonwealth with quality...interest...and public service.
