

WHITE'S RADIO LOG

An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Short-Wave Stations

THIS is the second part of *White's Radio Log*, now published in three parts twice each year. This format change, the first in over two decades, enables the Editors of RADIO-TV EXPERIMENTER to offer to its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM stations by Location, U. S. FM stations by states, Canadian AM stations by location, Canadian FM stations by call letters, Canadian FM stations by location, and the newly expanded world-wide short-wave section.

In the June/July issue of RADIO-TV EXPERIMENTER, the *Log* will contain the following listings: U. S. AM Stations by Call

Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, and the expanded Short-Wave Section.

In the event you missed the first part of the *Log* published earlier this year, you will have a complete copy of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER during 1964. The three consecutive issues are a complete volume of *White's Radio Log* that offers complete listings with last minute station change data that can not be offered in any other magazine or book. If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the short-wave bands, you will find the new *White's* format an unbeatable reference.

QUICK REFERENCE INDEX

U.S. AM Stations by Location	125
U.S. FM Stations by States	134
Canadian AM Stations by Location	138
Canadian FM Stations by Call Letters	138
Canadian FM Stations by Location	139
World-Wide Short-Wave Stations	139

U. S. AM Stations by Location

Abbreviations: C.L., call letters; Kc., frequency in kilocycles; N.A., network affiliation—A: American Broadcasting Co.; C: Columbia Broadcasting System, Inc.; M: Mutual Broadcasting System; N: National Broadcasting Co., Inc.

World-Wide Short-Wave Stations

The World-Wide Short Wave Stations section of *White's Radio Log* is, as its name implies, a log, that lists stations actually monitored by listeners in the United States, Canada and overseas. It is *not* intended to be a listing of *all* shortwave transmitters licensed as such listings contain numerous inactive transmitters, and low powered stations which are rarely heard by DX'ers. The stations listed here, therefore, are those most often reported and consistently heard during the past few months. Many have been monitored by DX CENTRAL the official RADIO-TV EXPERIMENTER monitoring post in New York City.

Because of the fact that this log represents actual monitoring reports rather than data taken from published program schedules received from the stations, you may find that frequencies (and operating times) given here differ from *official* listings. This is because foreign short-wave stations frequently operate several kilocycles away from their assigned (and announced) frequencies. In addition, the schedules of these stations are often changed and the changes are not published in the schedules until many months later. We feel that the type of log which *White's Radio Log* is presenting represents a very realistic picture of the current status of short-wave broadcasting, and is something which cannot be obtained from any other sources.

Let us know. Although you will be able to hear a great majority of the stations listed here, keep in mind that there will undoubtedly be a number of stations which cannot be heard at your location—just as there will be many stations which you will here which are not in our listing for this issue. We invite you to submit your short-wave broadcast station loggings for inclusion in forthcoming issues.

Please be sure to include the following information on each station reported to us: approximate frequency, call sign and/or station name, city and country, time heard. Send this information to: DX CENTRAL, *White's Radio Log*, c/o RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, N.Y. 10022, U.S.A.

For the DX'er. If you care to roam the bands for DX, we present here some information which will be of invaluable use to you in tracking down DX stations.

It should be noted that most short-wave broadcasting stations operate within 9 specific frequency bands, established by international agreement. Each of these bands has a number, corresponding to the average wavelength of the frequencies within the band. The 9 bands are as follows:

- 60-meter band= 4750 kc to 5060 kc
- 49-meter band= 5950 kc to 6200 kc
- 41-meter band= 7100 kc to 7300 kc
- 31-meter band= 9500 kc to 9775 kc
- 25-meter band= 11700 kc to 11975 kc
- 19-meter band= 15100 kc to 15450 kc
- 16-meter band= 17700 kc to 17900 kc
- 13-meter band= 21450 kc to 21750 kc
- 11-meter band= 25600 kc to 26100 kc

Although the current radio propagation conditions have made the high frequency bands (11 and 13 meter bands) relatively poor for DX'ers, the other bands are generally good during certain periods of the year. As a general rule, the following bands are "hot for DX" during the times indicated:

- 60-meter band= Winter nights.
- 49-meter band= Winter nights.
- 41-meter band= Winter nights.
- 31-meter band= Nights, all year.
- 25-meter band= Nights, all year.
- 19-meter band= Days all year, and Summer nights.

WHITE'S RADIO LOG

16-meter band=Days, all year, and
Summer nights.

13-meter band=Days, all year.

11-meter band=Days, all year.

Time to listen. The times shown in the Short-Wave Section of *White's Radio Log* reflect only the fact that the stations happened to be monitored in one part of the world at a particular time. Since the schedules of these stations probably span several hours time, you should check a station's frequency several times over a two or three hour period if it is not heard at your location at the time it is listed here. Stations will probably be heard on additional frequencies not listed here (Radio Moscow, for example, operates on about 150 different frequencies).

All times shown here are in the 24-hour EST clock system. For example, 0800 is 8:00

A.M. EST, 1200 is noon EST, 1800 is 6:00 P.M. EST, and so on. For conversion to other time zones, subtract 1 hour for CST (0800 EST is 7:00 A.M. CST), 2 hours for MST, 3 hours for PST.

The following abbreviations are used in *White's Radio Log*: BC—Broadcasting Company, Corporation, or System; E—Emissora; R—Radio or Radiodiffusion; V—Voice or Voz.

This Month's Specials. If you're interested in sitting in on what may very well be cloak and dagger activities, we direct your attention to two stations operating on approximately 6400 and 6800 kc/s between the hours of 1500 and 1800 EST. You will hear a woman announcer reading off numbers in German and playing the "River Kwai" march. These transmissions are also frequently reported around 2100 hours on approximately 9900 kc/s. A news item from an overseas agency claims that these transmissions are allegedly instructions for spies.

Good DX! (And don't forget to report your loggings to DX CENTRAL.)

Experimenter's Crossword

(Puzzle on page 115)

If you had to stop to think in the midst of the Experimenter's Crossword to find a word, you will discover that you did not finish all of the puzzle in the ten minutes allocated. The time limit for this puzzle was determined by actual tests. A few experimenters solved the puzzle and were clocked. Although we tried to make the Experimenter's Crossword as comprehensive as possible, our sample group was too small for testing purposes. One sure way to learn whether our ten minute time limit is accurate or not, let us know how you did.

To rate yourself, deduct one point for each unfilled box in the puzzle. If you score 90 or over, you deserve a *Technician* rating, 80 to 89 puts you in the *Experimenter* group, 70 to 79 means you should spend more time keeping your nose in theory books, and 69 and under—buy as many back issues of RADIO-TV EXPERIMENTER as you can find and start boning up for the next puzzle.

Now that you know your rating, you may agree with us, or you may want to take issue with us. Either way, please let us know what you think. Send a postal card to the Editor, RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, New York 10022 and comment on the time interval. If you believe ten minutes is enough, say so. Otherwise, let us know what you believe time limit should be. We're waiting for your cards. ■

Putting Out On Part 15

By Alvin H. Bloodworth

"... and a can of beans. 10-4"

"This is PDG122 cutting out . . .
. . . 'till further notice."

"Okay, dear, as long as you're at
the office and not at some bar!"
