## *A M Radio Log*

### *28th Edition*

Over the years we have dedicated each edition of the Log to a club member or Log contributor who has supported the effort to serve the hobby. This year I have decided to dedicate the Log to the Paul Swearingen. Over the years Paul has been a constant contributor to DX NEWS and the past editor of many columns. He has been the Publisher of DX NEWS magazine for nearly twenty years and more recently e-DXN.com. Paul will be retiring as Publisher in June 2008. I salute him for his many years of dedication to the Broadcast Band DX hobby and the National Radio Club (Wayne Heinen August 15th 2007)

We continue to track the development of IBOC (In Band On Channel) digital audio. It is now available to broadcasters on a full time basis and this new modulation method is known to cause co-channel interference for DX'ers. We have added it to the individual listings (see page 3), as well as adding a listing by location on page \*\*\*.

Formerly called the *National Radio Club Domestic Log*, the first edition of the *National Radio Club Log* was published by mimeograph and hand-typed stencil in Boston in 1968, with John Callarman providing the typing and the original Boston Publishing Committee the hand labor. The second and third editions were published in Boston as the Boston Publishing Committee changed the method of print for **National Radio Club** publications to commercial offset. A "mid-term" edition was published by the New Jersey Publishing Committee in 1975 and a new edition of the **National Radio Club Log** in the fall of 1976. The log also underwent another technological change when in 1978 the log information went from 3" x 5" cards to a computerized system. In order for us to keep you abreast of the ever-changing AM dial scene, the logbook is now published annually, just prior to the start of the fall listening season.

The roots of the **National Radio Club AM Radio Log**, though, date back to the 1930's when RADEX magazine published a log, and the '40's and '50's when the Newark News Radio Club BCB editor Carroll Weyrich produced an annual medium wave log.

The accuracy of an endeavor like the **National Radio Club AM Radio Log** cannot be guaranteed, primarily because changes occur daily in the vast amounts of information contained in this publication. Network, format, schedule, and address information is very volatile, and since there are no central sources to which all this information must be reported, it requires close monitoring by many people to keep this information up to date. Information from the FCC and from the stations themselves, as well as from you the user of this log, help to keep the information current and accurate.

The National Radio Club publishes *DX News* 30 times a year. By subscribing to *DX News* magazine, you will receive important AM station changes within 3 weeks after we first hear of them.

The National Radio Club is a non-profit organization beginning our 73rd year of service by radio enthusiasts for radio enthusiasts. The people who publish the **National Radio Club AM Radio Log**, *DX News* magazine and *DX Audio Service*, some with many years of background in the professional broadcasting field, are as interested as you are in the need for accurate and fast information. We hope you will consider joining us as we explore the ever-changing world of AM broadcasting and distant reception.

This edition has received numerous updates by many **National Radio Club** members and other interested AM radio hobbyists. Special thanks go to **Bill Hale** for an exhaustive effort to correct many errors to the Federal Communications Commission data that appear in the log. Bill's work on this edition assures you of the most up-to-date power and antenna information available anywhere. For our Canadian data, a special thanks to **Shawn Axelrod** for that information. Bill and Shawn were by no means the only participants in this Club effort to continue to bring you the best and most accurate log. Many updates were gathered from the FCC database and some network web pages that are available. However, we've found many web pages with data that are hopelessly outdated.

This log is updated through *DX News* Volume 74 Number 29 and IRCA's *SOFT DX Monitor* through the Volume 44 Number 30.

It is of great importance that the users of the *AM Radio Log* pass to us changes as they occur. The accuracy of the *AM Radio Log*'s next edition will be due to the input of DX'ers which helps us keep this publication database up to date. Your input to the next addition can come to us by mail or by Internet e-mail:

# How to read the AM Radio Log

## Call

The call letters of the station or an indication that it is a Voice of America (VOA) station. Calls of stations that have not previously operated New Not on Air or CP FROM on a given frequency contain a #. W# C# K# (with a number for database integrity) indicate New Not on Air stations with no assigned call letters. A small "n" is a nighttime only operation.

## City of license

City of License is shown or in certain cases, cities of authorized station identification. These are shown as they appear in the FCC data base. Even though you may hear multiple cities announced during an ID, that is usually for promotional reasons. My local KCKK-1600 ID's as "Lakewood-Denver"; Lakewood is the City of License, and Denver is the major market that is served.

## Station Classes

This discussion focuses on AM radio stations contained in the NRC AM Radio Log, specifically those in the United States and Canada. References are made to stations in other countries in North America as pacts were established between the nations' regulatory agencies as to the enforcement of rules regarding broadcast stations in this region. Since signals in the AM broadcast band travel beyond political borders, such agreements were necessitated. Most of the definitions are those of the U.S. Federal Communications Commission.

The story of classes of radio stations goes back to the North American Regional Broadcasting Agreement, which divided the (then) Medium-Wave radio spectrum into three groups of stations: one which served large areas (clear channels); those which served a smaller geographic area (regional channels); and a third for small communities and rural areas (local channels).

Although signals in the medium-wave frequencies are absorbed into the ionosphere during daylight hours, hence ground wave DX is limited by strength of signal, its path, and the receiver. But, they bounce off this level of sky at night and travel hundreds, even thousands of miles.

Protection was granted to a select few stations which were designated I-A Clear Channel operations. These stations were allocated to frequencies upon which only one station was authorized to operate at night, and transmitted from a single, efficient tower with a power of 50,000 Watts (50 kW). These stations were afforded protection not only in their primary service area, they were also protected in their secondary service area. Most of these stations, especially those in the middle of the continent, could be heard coast-to-coast. In the late 1960s, it was determined that vast areas of the west which could not receive interference-free primary service from an authorized AM station nor did not receive a signal strength of at least 1 mV/m from an authorized FM station. These areas were called "white areas". A second nighttime facility, designated Class II-A, was authorized on each of these frequencies occupied by a I-A station. These stations were licensed with up to 50 kW day and night but had to protect the I-A station at night. By the early 1990s, the rules had been altered again whereby the former I-A stations received nighttime protection to only 750 miles from their transmitter, and now many stations occupy these frequencies.

All former Class I-A stations are now designated Class A. All newly-authorized nighttime operations on the former I-A channels, however, must protect the Class A stations so none of their signal will enter this imaginary 750-mile circle. In a couple of cases, this limitation has been shortened. Some of the new nighttime authorizations utilize as little as 1 Watt. Only two of the former 1-A clear channel stations operate with directional antenna systems: WWL-870 in New Orleans, Louisiana; and WBZ-1030 in Boston, Massachusetts. In these cases, this decision was elective as both are coastal cities and the signal is directed inland, away from the adjoining bodies of water.

On each of the following channels, one Class A station is authorized in the U.S., operating with a power of 50 kW, non-directional, day and night: 640, 650, 660, 670, 700, 720, 750, 760, 770, 780, 820, 830, 840, 870, 880, 890, 1020, 1030, 1040, 1100, 1120, 1160, 1180, 1200, and 1210 kHz.

Canadian "Class A" stations are assigned to the following frequencies: 690, 740, 860, 990, 1010, and 1580 kHz.

Mexican "Class A" stations are assigned to the following frequencies: 730, 800, 900, 1050, 1220, and 1570 kHz.

The lone clear channel authorized for the Bahamas is 1540 kHz. Class A, Class B or Class D stations may be assigned on 1540 kHz but are restricted to limiting its signals in the direction of the Bahamas. Also, no station located less than 650 miles from the Bahamas is licensed to operate at night on 1540.

Canada and Mexico do not follow the same guidelines when assigning more than one station on these frequencies. And, a few Mexican stations on their clear channels have used power levels as high as 250,000 Watts.

On the frequencies 680, 1110, 1500, 1510, 1520, 1540, 1560, typically two "Class I-B" stations were authorized to operate with 50 kW at night, but each was restricted somewhat by utilizing directional antenna patterns which protected the other station. Other stations on these frequencies either had to reduce power and/or employ a directional pattern so as not to interfere with these stations, or shut down altogether during nighttime hours. Former Class I-B stations have also been designated as Class A. Class B and Class D stations are licensed on these frequencies.

Several frequencies were designated as shared clear channels. They are: 540 (Canada and Mexico), 940 (Canada and Mexico), 1000 (U.S. and Mexico), 1060 (U.S. and Mexico), 1070 (U.S. and Canada), 1090 (U.S. and Mexico), 1130 (U.S. and Canada), 1140 (U.S. and Mexico), 1190 kHz (U.S. and Mexico) and 1550 (Canada and Mexico). On these frequencies, the designated countries were allowed to assign "Class 1-B" stations, with the only restriction being they could not interfere with stations on the same frequency in the other country.

Even older stations on the regional channels received some degree of protection. Stations on these frequencies were limited to 5 kW of power. Although these regional channels were populated by 60-70 stations, only a few were authorized to operate at night. Most employed multiple tower systems to direct their signal away from the few other stations authorized on those channels at night. The majority of stations on these channels were licensed to operate during daylight hours only and were called "daytimers". Lobbying on behalf of the Daytime Broadcasters Association in the 1980s resulted in the authorization for almost every station on these regional channels to operate at night but with very low power, typically from 10 to 100 Watts. Today, a few stations on regional channels have been authorized to operate with up to 50 kW but must employ highly directional antenna systems, especially at night. Regional channels are 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, 1600, and the new "expanded band" of frequencies (created in the mid-1990s) from 1610 through 1700 kHz. The majority of stations in the expanded band operate non-directional with 10 kW daytime and 1 kW nighttime.

The need for local radio service reached many small towns and the "Local Channel" was created. The six local channels are 1230, 1240, 1340, 1400, 1450, and 1490 kHz. Originally, these stations were authorized 250 Watts day and night, non-directional. But even these low-powered stations have seen change. In the early 1960s stations on the local channels were authorized to increase their daytime power to 1000 Watts while nighttime operation was limited to 250 Watts. Then in the 1980s, they were allowed to leave their 1000 Watts radiating 24 hours a day. The theory was that they were only going to interfere with one another. Even with their maximum power, signals on these frequencies rarely are heard greater than 20-30 miles. However, during rare opportunities, some of these stations have been logged by DX'ers several hundred miles away. There are a few U.S. stations on

these Local Channels which use directional patterns, but generally they are in the Northeast where stations are spaced closer than other areas. Also, there are some Canadian stations on these frequencies which are authorized higher powers but also must utilize highly directional antenna patterns to avoid interference.

In 1987, all AM radio stations in the U.S. were classified as A, B, C, or D.

#### **Class A**

A "Class A" station is an unlimited-time station that operates on a clear channel and is designed to serve a primary and secondary over an extended area at relatively long distances. Its primary service area is protected from objectionable interference from other stations on the same and adjacent channels, and its secondary service area is protected from interference from other stations on the same channel. "Class A" stations must use not less than 10 kW, nor not more than 50 kW.

#### **Class B**

A "Class B" station is an unlimited time station which is designed to serve only a primary service area. "Class B" stations are authorized to operate with a minimum power of 0.25 kW (or, if less than 0.25 kW, an equivalent RMS antenna field of at least 141 mV/m at 1 km) and a maximum power of 50 kW, or 10 kW for stations that are authorized to operate from 1610-1700 kHz. There are some "Class B" stations in Canada on the "Local Channels".

#### **Class C**

In the U.S., all stations on the Local Channels are "Class C".

#### **Class D**

"Class D" stations operate either daytime, limited time or unlimited time with nighttime power less than 0.25 kW and an equivalent RMS antenna field of less than 141 mV/m at one km. Class D stations shall operate with daytime powers not less than 0.25 kW nor more than 50 kW. Nighttime operations of Class D stations are not afforded protection and must protect all Class A and Class B operations during nighttime hours.

## **Antenna Codes**

**by Bill Hale, AM Switch editor**

I received a question in the form of a muse on the DX Audio Service asking what is the meaning of all the letter-number designations when reporting stations' facilities. All of these combinations appear in the NRC's AM Radio Log, but not everyone has a Log. So, we're happy to answer the query with the following:

The letters D, U, and sometimes but rarely an N, an L, or ST, when paired with a number designates the station's operating hours and its antenna pattern status. A 'D' means Daytime. An 'N' means nighttime. An 'L' means limited time, of which there are only a couple of those left. An 'ST' means Shared Time, meaning two or more separate facilities in the same city on the same frequency share time during the broadcast day. The 1240 frequency in Decorah, Iowa is one of only a couple of these situations left in the U.S. And finally, the one we hear probably 99% of the time nowadays is the letter 'U', which stands for Unlimited time operation.

The numbers that follow the letter designate one of 25 different combinations of a station's antenna pattern. Now, I might add that these letter/number combinations are a National Radio Club invention, we'll call it, but have been widely accepted and used in the DX community. The FCC has its own set of identifiers, but they don't cover all the combi-

nations like we do.

Let's first look at stations that broadcast during the daytime only. That group of stations is getting smaller in number all the time, but there still are quite a few. Since they are Daytimers, their letter is a 'D'. If the station is non-directional, their number is '1', so we end up with D1. If they use a directional pattern, their number is '3' and we end up with D3. But, wait! What happened to '2'? We didn't forget it, and will get to that later. The time right after sunrise in the morning and before sunset in the evening is a very critical time for Medium Wave signals. The ionosphere is in transition in the morning can't decide whether to bounce that radio wave back to earth as it has been doing all night, or to absorb it as its properties allow when the sun hits it. The same thing happens in the afternoon, only in reverse. The mix of unpredictable skywave with the groundwave signals of a station means that interference to other stations is possible. This is of particular concern when the stations involved cover wide areas, where it may be daylight in one segment and approaching dark in another. So the FCC has established two periods during this skywave/groundwave mix time. In the morning it's from local sunrise to two hours after local sunrise and in the afternoon from two hours before local sunset to local sunset. This is where the term 'Critical Hours', or as we abbreviate it CH, comes into play in our discussions. Most Unlimited Time stations operate with more power during the day than at night, so even though they are authorized to operate at their daytime power they may cause interference to other stations on the same frequency during these transition periods. Not all stations have to worry about critical hours. Generally, it's only stations which are doing some kind of upgrade in power, or a new station being authorized, where the FCC may apply a Critical Hours authorization. Some Daytimers also have CH authorizations.

Twenty or 25 years ago, all stations were authorized to operate with powers in steps which were nice and even, like 250, 500, 1000, 5000, 10000, 25000, and 50000 Watts. And there were hundreds and hundreds of stations that were Daytimers. So let's say a Daytime station with 500 Watts wants to raise its power, but the next step is 1000 Watts. If they were to increase to 1000 Watts, chances are they would cause interference to another station. That's why they have only 500 Watts in the first place. But ... if they could raise their power to, say, 742 Watts without interfering, that would give them a better local signal. So, through the years, the FCC has relaxed the rules and made it possible to have a power level of almost any quantity, as long as the equipment is set up in such a way to keep it stable.

<i>Code</i>	<i>Day</i>	<i>CH</i>	<i>Night</i>	<i>Code</i>	<i>Day</i>	<i>CH</i>	<i>Night</i>	<i>Code</i>	<i>Day</i>	<i>CH</i>	<i>Night</i>

N2	-	-	DA1								

\*New

Older transmitters were factory-built to be 1000 Watts, or 5000 Watts or whatever. But newer transmitters are capable of maintaining power between those old steps at about any level needed.

So now, stations can be authorized power levels which just barely fall short of interfering with others during normal daylight hours. But . . . what happens during Critical Hours? The fact hasn't changed that at 500 Watts everybody was happy. Now during Critical Hours, our 742 Watt station may cause interference to one or more stations. The FCC says that our station must use the original daytime level of 500 Watts during Critical hours. So, our example can sign on with 500 Watts, at Local Sunrise plus two hours can increase it to 742 Watts, then at Local Sunset minus two hours they must kick it back to 500 Watts. If a Daytimer is non-directional, remember they are designated D1 even if they have a CH power. But, if a Daytimer is non-directional, but utilizes a directional pattern during the Critical Hours, guess what? Drum roll, please. D2! If a Daytimer is normally directional D3, but uses a separate pattern during CH operation, that's D4! There's one more category for Daytimers: 'D5'. That's when a daytime station is directional during daytime hours, but non-directional during CH operation. In reality, there aren't many D5 operations, but they do exist so we must keep track of them.

Let's look at some other examples: Most of the formerly-designated I-A clear channel stations, such as WABC- 770 in New York, WGN-720 in Chicago, KMOX-1120 in St. Louis, and KFI-640 in Los Angeles are 50 kW day and night non-directional. We designate them as being U (for Unlimited Time) and 1 (for non-directional), and of course, their powers are all 50,000 Watts day and night. So they are U1 50000/50000.

Now, say a station is non-directional during the day and directional at night. Since they broadcast day and night, their letter is 'U' and their number is '2' meaning directional nights only. If a station is directional all hours using the same power and pattern, their designation is 'U3'. Different patterns day and night with the same power? Or same pattern but different power levels day and night? They're both 'U4'.

We've covered the basic group of five daytime-only and four unlimited-time designations. It's when we get into the unlimited-time stations with Critical Hour operations that things get crazy. Unlimited time operation with three different patterns, daytime, critical hours, and nights? That's 'U7'.

Directional days and Critical Hours, and nondirectional nights? That's 'U13'. Unlimited time with the same pattern day and night but a different pattern during CH operation? 'U17'. Well you get the idea.

There is a station in Indiana on 1080 which has applied to operate with one pattern and power level between local sunset and 6 PM local time, and another pattern and power level at local sunset in Dallas when WTIC in Hartford and KRLD in Dallas switch to their nighttime patterns and protect each other. I'm not sure how we'll handle that one, if approved. Maybe with 'U13 point 5'?

Here is a chart with all the combinations we have so far which appear in AM Switch:

## PSRA/PSSA Authorizations

Let's press on to two other categories of operation, namely Pre-Sunrise and Post-Sunset. These are commonly referred to as PSRA and PSSA, meaning "Pre-Sunrise Authority" and "Post-Sunset Authority".

Now some history. We all know, medium-wave signals travel greater distances during non-daylight hours. Older, established stations that had been on for years were pro-

tected from interference, both day and night. In other words, new stations could be licensed, but were authorized as daytime-only, and would have to protect the coverage areas of the older stations. In the northern states during the winter months, some stations only operated 7 or 8 hours a day. Many of these stations complained that they were at a disadvantage when it came to being able to program during the very lucrative drive-time hours, and weren't able to be there during the critical early morning hours when they were needed. So they, with the help of their lobbying group, the Daytime Broadcasters Association, got the FCC to relax the rules allowing daytime stations to sign on at 6 AM and/or remain on until 6 PM local time. Naturally, in the summer months here in North America, those two periods of time are usually blessed with sunshine, so Pre-Sunrise and Post-Sunset usually is a factor only in the dark of winter. Okay, so now these Daytimers get to sign on before sunrise and stay on after sunset. But that means they will most likely cause interference to Fulltime stations that had been operating during those hours of semi-darkness for several years. So the FCC said to these stations, "you can come on at 6 AM and/or stay on until 6 PM, but at a lower power level before local sunrise and after local sunset". The FCC's rules are very clear when specifying the amount of power permissible during these periods, but interestingly the calculations must only consider the co-channel stations, not the adjacent-channel operations. Neither PSRA nor PSSA can exceed 500 Watts. Initially, when the PSRA and PSSA authorizations were announced, the FCC said that power must be increased and reduced at different levels, determined by the amount of daylight. As an example, say a station's daytime power was 500 Watts and local Sunrise was 7:45. At 6 AM they could sign on with 18 Watts, boost it to 229 Watts at 7 AM, and come up to full power at 7:45. That caused a lot of problems as a variable adjustment would have to be employed. Remember, this was in the vicinity of 25 to 30 years ago, when technology isn't what we think of today, and computers were just being introduced to the broadcast community. Unfortunately, the FCC is very stingy when it comes to posting the PSRA and PSSA power levels, so we are at a disadvantage when we attempt to report that information. We have been successful in obtaining a few, but most remain unknown. I'm not sure if this step-up/step-down procedure is even still in force.

## Time Zones

A = Atlantic (E +1) or Alaskan (E -4) N = Newfoundland (E +1 1/2) E = Eastern C = Central (E -1) M = Mountain (E -2) P = Pacific (E -3) H = Hawaiian (E -5) (+) = Does not observe Daylight time

## Hours of Operation

Listed in 24-hour format. Hours in () are Sunday or days specified.

24 hr	All-night operation Silent Period unknown
24 hr M0000-0555	Indicates Monday morning silent period
NSP	No Silent Period
Silent	Station was off the air at press time.
LSR	Local Sunrise
LSS	Local Sunset
LSS+	Operates up to two hours after local sunset with a PSSA

## Slogans and other Notes

//CBK-540 indicates the station is parallel CBK which operates on 540khz. //CFQC 92.9 would be operating in parallel CFQC FM 92.9.

//La Cadena Cristiana is a station that is in a larger group of stations that operate in parallel. These are listed in the Groups section of the instructions on page xii

**SX** Operates a synchronous transmitter on the same frequency in the location shown.

Some stations use a slogan instead of their call signs to identify themselves to their listening public. Slogans appear in quotes.

Also, some additional program information is listed here when a station may carry an unusual language or music type.

## Additional Powers

This column shows powers used in the special hour categories as outlined in the Definitions of Operating Hours section of these instructions. If known, we list PSSA powers here. Those stations that we know have no PSSA powers are also listed as having none. Also found in this section are Special Operating Authorities designated as STA . The FCC under certain situations will allow a station to operate with facilities other than those shown on their license. These include conditions such as lower power non-directional operation in the event of a tower being destroyed.

In some cases you will also find conflicts listed in this area. This occurs when the official FCC information doesn't currently match the station's claimed parameters.

## Application & Permit Codes

**Applications for New Stations;** Since many of these applications are never approved we have stopped trying to include them in the LOG. This information is available from the *AM Switch* column in both *DX News* and the *DX Audio Service*.

**New Not on Air;** The station has been granted permission to operate by the licensing authority but is not yet on the air.

**AP** = Application (AP U1 1000/1000) The station has applied to the licensing authority for a change to an on-the-air station . This is the first step in the process. If approved, a Construction Permit will be issued.

**CP** = Construction Permit (CP U1 1000/1000) The application was approved and the construction permit granted.

**FROM:** The station has applied for (AP FROM 700) or has been granted a Construction Permit (CP FROM 700) on this frequency; however, it is still currently operating under the frequency listed to the right of the "from". The call will end with a # sign.

**TO:** The station currently operates on this frequency and has either applied for the other frequency (AP TO 700) or has been granted a CP for the other frequency (CP TO 700).

## Formats

<b>AC</b>	Adult Contemporary current hits
<b>AC/EZL</b>	Light Adult contemporary
<b>AC/OLD</b>	Adult Contemporary Based Oldies
<b>Americana</b>	Mix of Rock, Country, Bluegrass and Folk music
<b>AOR</b>	Album Oriented Rock. Current and Classic Album cuts
<b>Beach</b>	Surf Oriented Oldies
<b>BIZ</b>	Business Format
<b>Brokered</b>	Programming sold to individuals and organizations in blocks. This can included infomercials, ethnic, religious or anything that the purchaser may want to air.
<b>C&amp;W</b>	Country & Western
<b>CHR</b>	Top 40 Rock
<b>CLA</b>	Classical Music
<b>EE</b>	English Language Programming
<b>ETH</b>	Programming directed at various Ethnic groups
<b>EZL</b>	Also called "Middle of the Road"
<b>FARM</b>	Agricultural oriented programming
<b>FF</b>	French Language Programming
<b>GOS</b>	Gospel (Southern Gospel when used alone)
<b>JAZ</b>	Jazz Programming
<b>JJ</b>	Japanese Language Programming
<b>KID</b>	All Kids Programming
<b>NAGE</b>	New Age music some current jazz and folk
<b>NOS</b>	Nostalgia Music of the 30's, 40's, 50's; Big bands, "standards"
<b>NWS</b>	News
<b>OLD</b>	Oldies (Anything pertaining to Older Rock Music)
<b>Polka</b>	Polka Music
<b>RAP</b>	Rap or Hip Hop style music
<b>REL</b>	Religious Programming
<b>REL:AC</b>	Contemporary Christian Music
<b>Rock</b>	Rock'n Roll of some form
<b>Rock/OLD</b>	"Classic Hits" classic rock
<b>ROK</b>	Heavy Metal Music
<b>SPT</b>	Sports or Sports Talk Programming
<b>SS</b>	Spanish Language Programming
<b>Tejano</b>	A mix of English and Spanish language music and announcements
<b>TLK</b>	Talk Programming (generally telephone call-in programs)
<b>Tourist</b>	Travelers Information and tourist attraction promotion
<b>UC</b>	Programming for a Black audience "Urban Contemporary"
<b>VAR</b>	Variety (CBC net is a good example) a bit of everything - also "fill in" music or features when a brokered format station does not sell all its time. You never know from one day to the next what they'll do!

Many specialty and foreign language and foreign music formats are actually spelled out in the format area of the given station. The *AM Radio Log* is meant to be a DX'ers tool and is not intended to be an ultimate guide to the myriad of formats that have surfaced over the years.

":" indicates a combination of formats or language and format, e.g.=SS:REL would indicate that the station has religion in Spanish.

"/" is used to separate multiple formats and does not indicate day/night formats. e.g., C&W/CHR

d= day format; n=night format; an = all night e.g., C&Wd/ACn

am = morning programming

## Notes on Networks

ABC, JRN and WW1 are suppliers of a great variety of specialty formats. These include almost every music format from NOS to ROK. WW1, A and JRN also carry a variety of talk shows that are syndicated. There are stations that have news from one source and music programming from another source. In some instances, like the WW1 AM-only NOS format "Memories", slogans are used almost exclusively and there is never a mention of the actual network affiliation. Many network stations do their own newscasts, using only voice cuts from the audio services or the networks. Some will pick up the network commercials and integrate them into their own broadcasts without using network newscasts. Many stations carry specific services from a network. Many stations listed with A for ABC may only carry Paul Harvey.

And all those who contribute their timely loggings to the National Radio Club's DX News Magazine and the National Radio Club's DX Audio Service

## About The National Radio Club

Our magazine, *DX News*, is a must for the serious or casual DX'er and is only available through the **National Radio Club**. Subscribing to either *DX News* magazine or to *DX Audio Service* entitles you to membership privileges, including discount prices on many **National Radio Club** products.

In the early days of radio broadcasting, when the listening audience was comprised of amateur operators, experimenters, engineers and the like, a new hobby had its beginning. DX, in the parlance of telegraphers, meant long distance, and gradually came to mean distant reception as well. The early listener had usually constructed his own receiver, and his big thrill was not just from the news or the music he heard, but the realization that his assortment of glass and wires with a bed-spring antenna was really bringing in voices and music all the way from Pittsburgh, Chicago or Los Angeles!

It was a natural development for the hobbyist to tune up and down the dial, logging the numerous stations that could be heard. These stations were eager to hear from their listeners. This was the only way, at the time, that they could learn how well their signal was getting out. Listeners were asked to write letting the station know from where, how well, and under what conditions the station's signal had been heard. In return, stations began sending cards or letters thanking the listener and confirming his or her reception. With the collecting of these verifications (QSL's), the DX hobby was born.

Numerous clubs were formed in those early years for the sole purpose of exchanging information about equipment, antennas, tuning tips and general information about the hobby and the stations. The **National Radio Club** was one of these early pioneer clubs, getting its start in York, Pennsylvania in 1933, when a small group of DX'ers organized and began to mimeograph a bulletin, *DX News*. Now after 70 plus years of continuous operation, *DX News* is still the premier publication for the medium wave (AM) DX'er. Membership soon spread from York to all parts of the U.S. and Canada and now to members around the world.

Over the years the **National Radio Club** has gained recognition as a leader among DX clubs. The **National Radio Club** has pioneered many areas, the offset printing of bulletins, the *NRC Domestic Log* (now *AM Radio Log*), numerous books on antennas and receivers, and information books on the hobby. The **National Radio Club** is still growing and improving, with new books and the *DX Audio Service* one-of-a-kind Audio Magazine.

*DX News* offers 30 bulletins per year, weekly in winter, monthly in summer, over 750 pages a year of DX and radio information. The *DX Audio Service*, established in April 1985, is designed to serve the sight restricted, or traveling DX'er, and is popular with commuters, who listen as they drive to work. *DX Audio Service* consists of a 90 minute cassette and is issued once a month. Features are similar to *DX News* but extends its coverage to FM, a Travelogue and Marketscope features.

For a copy of *DX News* write **NRC** - Box 5711 - Topeka, KS 66605-0711 and enclose a first class stamp. For a sample copy of *DXAS*'s cassette write **NRC**, Box 164, Mannsville, NY 13661 and enclose \$3.00.

If you are interested in AM DX'ing, write for a sample of our magazine or our audio service. We would be happy to welcome you into the **National Radio Club** family!
