PHILCO
RADIO ATLAS
OF THE WORLD

ATLANTIC
OCEAN

NEW EDITION...PRICE FIFTY CENTS

J. H. Atchison *Owner*

Foreword to Foreign Broadcast Reception

With a new 1936 American and Foreign Broadcast Philco, you are on the threshold of thrilling adventure and glorious entertainment. You'll be a Marco Polo, a Magellan or a Da Gama, faring forth at a touch of the dial into distant places and strange, exotic lands.

You'll hear voices and music from the far-flung corners of the earth that will reveal to you Philco's marvelous engineering perfection. For, properly installed with a Philco All-wave Aerial, a new Philco will bring you programs from across the seas with surprising clarity, regularity and volume! Used with this aerial, the Automatic Aerial Selector—which is built into every short-wave Philco—automatically switches-in the exact electrical values needed to maintain maximum power on each wave band.

Then too, if you are to enjoy short-wave reception to the utmost, you must know when and where to tune. It was to help you in this regard that this new Philco Radio Atlas was written. All the information contained herein

is authentic and accurate to the date of going to press. Follow it carefully and you will experience tremendously more exciting reception than those who tune blindly.

Philco dials are calibrated in megacycles. Thus, the station frequencies listed in this Atlas correspond closely to the actual dial settings at which these stations are received. After making sure the station you want to hear is on the air, set the wave band switch of your Philco to the section of the dial in which its frequency is located. Turn the dial to the frequency shown in the station list.

Then with the volume turned up so that you hear a rushing sound, move the dial slowly back and forth until the station comes in. Do not expect to hear a station every time it is on the air for there are many factors which govern short-wave reception such as skip distances, storms, your particular location, etc. But tune slowly and carefully. If the station can be heard at all, your Philco will bring it in.

Daventry	GSB	9.51	12:15 to 2:15 A.M., 12:15 to 5:45 P.M.

Nowhere in all Europe is wholly delightful radio entertainment more abundant than in England. The British Broadcasting Corporation sends out a vast wealth of varied programs for the benefit of listeners all over the world. Some are directed toward Africa, others toward India and Australia, but a great many are sent out expressly for listeners in Canada and the United States.

The Wireless Military Band with B. Walton O'Donnell conducting. This famous musical organization is heard frequently by listeners to the big short-wave stations at Daventry, England. They are shown broadcasting from one of the beautiful studios at Broadcasting House London.

When conditions are favorable, you can hear programs frequently, for England broadcasts all day long from early morning until mid-evening. And what programs! Variety shows, brilliant dance music from the smart Hotel Mayfair, the Metropole, and other centers of London night life, splendid symphony concerts from St. George's

Hall, news dispatches several times a day, enlightening talks by internationally-known personalities on economic and political topics, comedy sketches and recitals direct from Broadcasting House.

A dramatic sketch being broadcast from the studios of the British Broadcasting Corporation in Broadcasting House, London. Notice the unusual microphone equipment and the modernistic arrangement of clock and signal lights on the wall.

NETHERLANDS (Holland)

Location	Station	Freq.	Time (Eastern Standard)
Huizen	PHI	17.77	7:30 to 10:30 A.M. ex. Tue. & Wed.
Eindhoven	PCJ	15.22	7 to 11 A.M. Irregular
Dordrecht	PIIJ	7.08	Sat. 11:10 A.M. to 12:10 P.M.

The station at Huizen, PHI, is the one you'll hear most often from this little country. It is known throughout the world as "The Happy Station"—and with good reason. If you have never heard a program from this delightful broadcaster, you have a treat in store. Its programs are made up of rollicking Dutch folk tunes, modern dance music, light opera selections and the like—music of a care free, light-hearted nature. No wonder PHI is called "The Happy Station."

And no small part of its reputation is due to its famous announcer, Edward Startz, who acts as

Many American listeners hear Station PHI at Huizen, Netherlands, frequently. And here's the studio from which some of its broadcasts come.

IMPORTANT! To span oceans you need a scientifically designed aerial. Install a Philco All-wave Aerial to get everything your set is capable of giving.

DANCE MUSIC! NEWS! TALKS!

powerful short-wave stations in Europe!

master of ceremonies rather than announcer, on its delightful programs. Mr. Startz speaks seven languages and his happy-go-lucky, informal manner seems to take his audience right into the studio with him. Among regular listeners to his station, he is a distinct personality, a friend.

GERMANY

Location	Station	Freq.	Time (Eastern Standard)
Nauen	DJE	17.76	8 to 11:30 A.M. Irregular
Zeesen	DJQ	15.28	8 to 11:30 A.M.
Zeesen	DJB	15.20	3:45 to 7:15, 8 to 11:30 A.M.
Zeesen	DJD	11.77	Noon to 4:30 P.M. & 5 to 10:30 P.M.
Zeesen	DJA	9.57	12:30 to 2:15 A.M. & 5 to 9:15 P.M.
Zeesen	DJN	9.54	12:30 to 2:15 A.M.; 3:45 to 7:15 A.M.; 5 to 10:30 P.M.
Zeesen	DJC	6.02	Noon to 4:30 P.M. & 9:30 to 10:30 P.M.

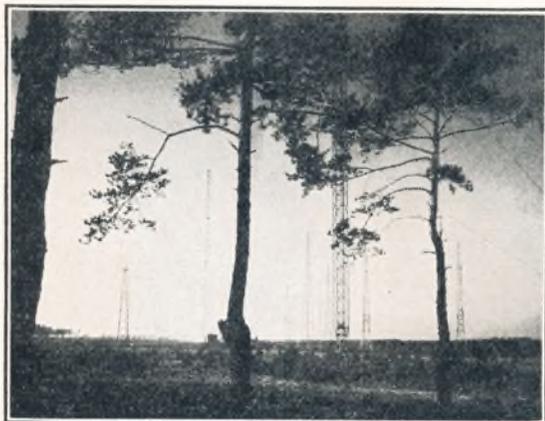

The big German short-wave stations at Zeesen, just outside Berlin, provide a really tremendous amount of fine entertainment for the radio listener. Germany takes its short-wave radio broadcasting most seriously. As a consequence, no effort is spared to make its programs interesting, educational and entirely enjoyable. You'll hear stirring military band music, gay Bavarian folk music and dances, swinging German waltzes, fine symphonic concerts, recitals by Germany's most talented instrumentalists, news dispatches in English, and plays. In fact, there's hardly any type of program that is not broadcast from one or another of these stations.

Rudolph Kayssler, eminent German actor, addressing an American audience by way of the German short-wave stations at Zeesen.

Germany utilizes a complicated system of directional antennæ which project several transmissions toward America daily. These programs are sure to be among your favorites.

This is an unusually striking photograph of the transmitting antennæ of the powerful German short-wave stations at Zeesen. A complicated system of directional antennæ enable the German programs to be received in America almost daily.

BELGIUM

Location	Station	Freq.	Time (Eastern Standard)
Brussels	ORK	10.33	1:30 to 3 P.M.

This little country provides some really fine short-wave entertainment through its principal station at Ruyssede. Like so many of the European nations, Belgium foresaw the advantages of keeping in constant, daily touch with her colonial possessions. Thus, ORK is used extensively to communicate with the Belgian Congo. Tune to this station and you're quite likely to hear news and government reports, in Flemish, as well as delightful Flemish music.

A studio rehearsal at Brussels. Many of the programs you hear from ORK at Ruyssede, Belgium, come from this studio.

FRANCE

Location	Station	Freq.	Time (Eastern Standard)
Pontoise	FYA	15.25	Daily 6 to 10 A.M.
Pontoise	FYA	11.90	3 to 4 A.M., 10 A.M. to 1:15 P.M. & 2 to 5 P.M.
Pontoise	FYA	11.71	3 to 4 A.M., 6 to 9 P.M. & 10 P.M. to Midnight

The gay, sprightly broadcasts from France have a sparkling quality. You'll truly delight in the songs of the boulevards, the toe-tickling dance music from the cafes in Montmartre and the happy folk songs that fairly breathe the atmosphere of the French countryside.

Recently the French government improved the transmitters and antenna systems of these three stations with the result that the French broadcasts come in surprisingly well. Whenever your spirits are low and you feel the need of gay music and happy song, by all means tune to France. You'll be more than repaid for your choice.

ITALY

Location	Station	Freq.	Time (Eastern Standard)
Vatican City	HVJ	15.11	10:30 to 10:45 A.M.
Rome	2RO	11.81	8:15 to 10:15 A.M. & 2:30 to 5 P.M.
Rome	2RO	9.64	Mon., Wed., Fri. 6 to 9:15 P.M.
Vatican City	HVJ	5.97	Daily 2 to 2:15 P.M., Sun. 5 to 5:30 A.M.

Ever since Station 2RO at Rome came on the air it has been a favorite among American short-wave listeners. However, with the inception of the American Hour, the popularity of this station has greatly increased. No longer does the listener have to unravel yards and yards of rapid-fire Italian to identify this station, for the American Hour is broadcast in English.

Photo Courtesy Radio News

Thousands of American short-wave listeners enjoy the American Hour from Rome three times a week. Above is shown Senator Guglielmo Marconi at the initial broadcast of this program from 2RO, during which he addressed his American audience.

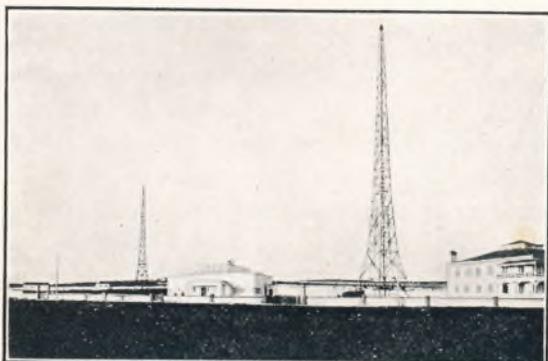

With the first broadcast of this program, Italy put into operation her new transmitting equipment which brought 2RO into many American homes at regular intervals. The programs are of

extremely high caliber—opera, as it's sung nowhere else in the world—news—dance music—symphonic concerts—recitals and even lessons in Italian.

PORTUGAL

Location	Station	Freq.	Time (Eastern Standard)
Parede	CTIGO	12.40	Tue., Thur., Fri. 1 to 2:15 P.M. Sun. 10 to 11:30 A.M.
Lisbon	CT1AA	9.59	Tue., Thur., Sat. 3:30 to 6 P.M.
Parede	CTIGO	6.20	Daily ex. Sat. & Mon. 7:20 to 8:30 P.M. Sun. 11:40 A.M. to 1 P.M.
Lisbon	CSL	6.14	1:30 to 7 P.M. Irregular

No longer is this little country the mighty colonial empire it once was. But the spirit of Portugal still lives, as any listener knows who has tuned to the stirring broadcasts from Lisbon. All the color and care free gaiety which for centuries has characterized the Portuguese is still retained in their music. That is why the radio listener loves to turn his dial to one of these stations.

The Radio Club of Portugal is a thriving organization. The group of buildings shown above belong to the club and house the club's own station, CTIGO, which you'll hear often.

Like many other countries, Portugal has realized the value of favorable publicity and has improved and enlarged the transmitter of the government-owned station, CT1AA. Portuguese broadcasts now reach America with surprising regularity and volume. The Portuguese Radio Club's station, CTIGO at Parede, is also heard here in the United States.

SWITZERLAND

Location	Station	Freq.	Time (Eastern Standard)
Geneva	HBL	9.59	5:30 to 6:15 P.M. Sat.
Geneva	HBP	7.80	Saturdays 5:30 to 6:15 P.M.

Those of you who are interested in events of international importance will appreciate broadcasts you are able to tune in from the League of Nations' stations at Geneva. From them you'll get a clearer insight into the significance of world

happenings. You'll hear the opinions and ideas of world figures. And thus you will be better able to formulate your own thoughts and theories.

The League of Nations' broadcasts go on the air once a week on Saturday afternoon. The program lasts 45 minutes, and consists of a 15-minute talk given in each of three languages, English first, then French, and lastly, Spanish.

SOVIET UNION (Russia)

Location	Station	Freq.	Time (Eastern Standard)
Moscow	RNE	12.00	Daily 1 to 6 P.M., Sun. 6 to 7 & 10 to 11 A.M., Wed. 6 to 7 A.M.
Moscow	REN	6.61	1 to 6 P.M.

There's a certain excitement and adventure about tuning in the stations at Moscow. Perhaps it is because of the element of mystery that surrounds the land of the Soviets. Or perhaps it is because of the excellent symphonic and choral music one hears by short-wave from this city. At any rate, Moscow is one of the most sought after stations in all Europe. To hear a broadcast from RNE or REN is a real radio thrill. Also those interested in Soviet activity will find the Moscow stations a prolific source of information and education.

You've heard about collective farmers in the Soviet Union. Here's a group of them listening in the fields to a broadcast from Moscow during a rest interval.

SPAIN

Location	Station	Freq.	Time (Eastern Standard)
Madrid	EAQ	9.87	Daily 5:15 to 7:30 P.M., Sat. 1 to 3 P.M.

Do you feel in the mood for a graceful tango? An exciting fandango or bolero? Or perhaps you'd like a dash of the bizarre as found in the weird melodies of the Spanish mountain folk. Then tune to EAQ at Madrid. The music from this station is thrilling and invigorating—different from

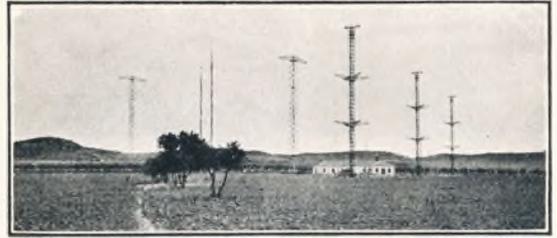

Photo Courtesy Radio News

Here is one of the most famous short-wave stations in the world—EAQ. Although its studios are located in Madrid, the transmitter, shown above, is at Aranjuez. You'll get almost daily reception from this station.

anything broadcast elsewhere in Europe. It is redolent of bright sunshine, gleaming tile roofs, gay, laughing señoritas and the spirit of the fiesta.

Then, of course, you may hear other types of programs, too—classical works, dance music and news dispatches in English. Madrid is another of the European stations that are received with unusual regularity here in America.

DENMARK and NORWAY

Location	Station	Freq.	Time (Eastern Standard)
Skamlebaek	OXY	6.06	Daily 1 to 6 P.M.
Jeloy	LKJ1	9.57	5 to 8 A.M. & 11 A.M. to 6 P.M.

Because of its lively rhythm and happy character, Scandinavian music is most appealing. And, of course, the logical places to hear such music are Denmark and Norway. Both have short-wave stations that are occasionally heard here in America.

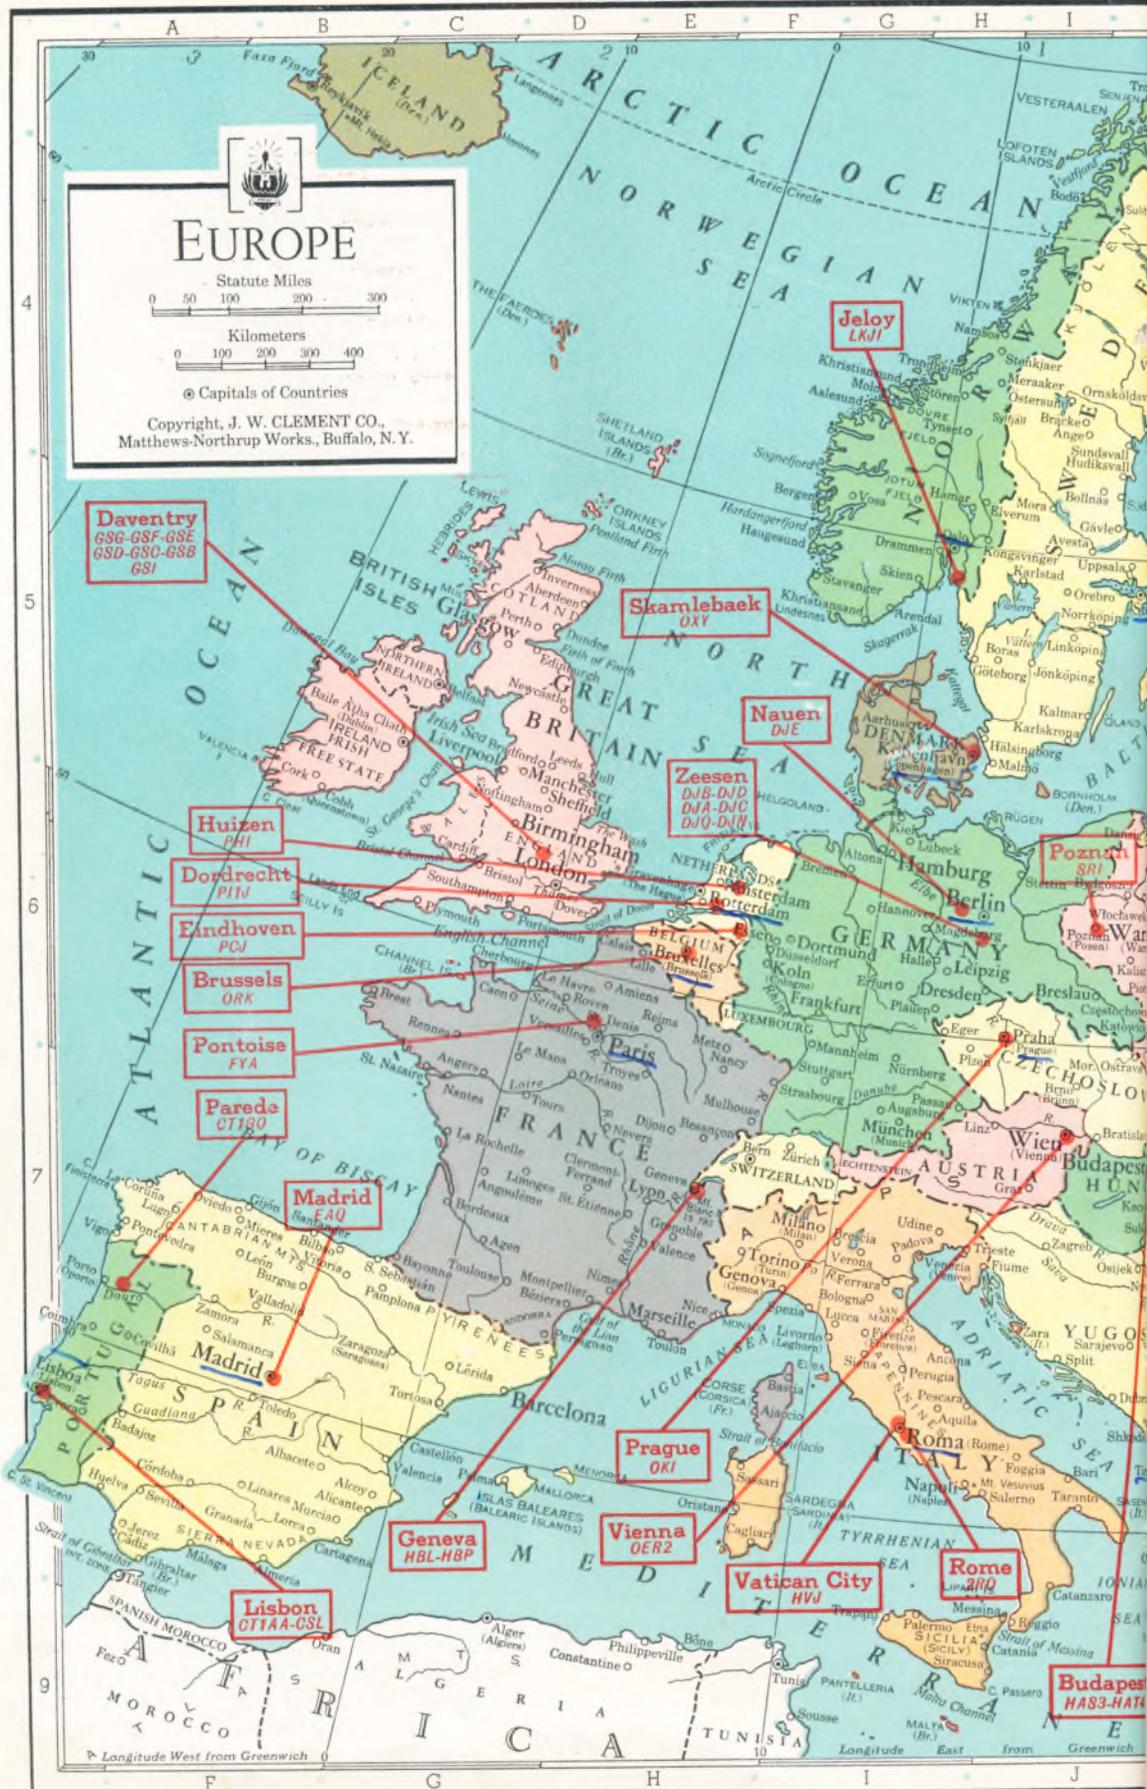

Many a listener has experienced the thrill of hearing the clock in the century-old town hall of Copenhagen strike out the close of Denmark's broadcasting activities for the day, or delighted in programs of gay music from Jeloy, Norway. Once you hear these stations, you'll try for them often.

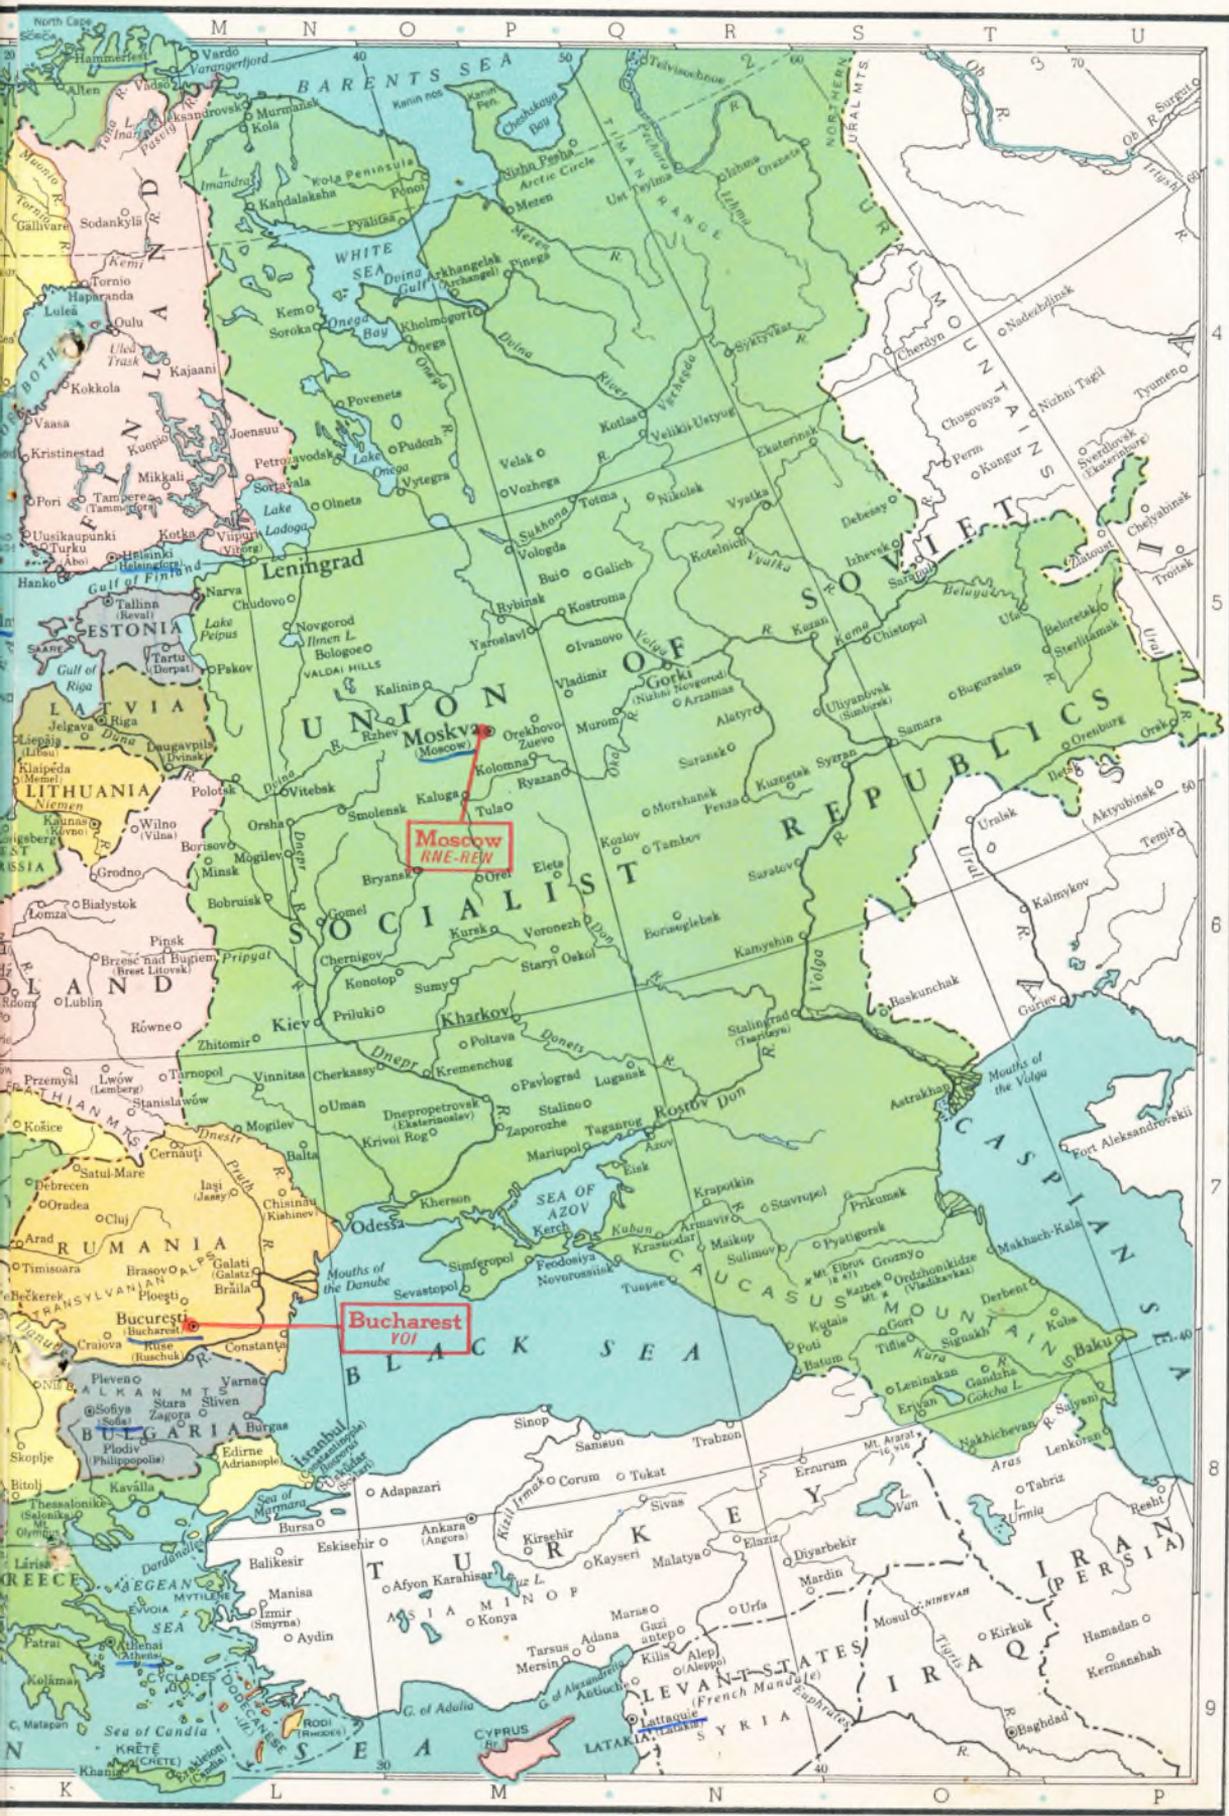

Grethe Otto, pleasant-voiced announcer at Copenhagen—one of the reasons why masculine listeners tune for this station.

As you can see from the size of the station listings above, Colombia has gone in for short-wave broadcasting in a big way. Practically every city of any size in this country has one or more short-wave stations that can be heard in America. Many give station announcements in both Spanish and English for easy identification.

And what programs! Melodic tangos! Rhythmic rhumbas! Pulse-stirring paso dobles! Fascinating native folk songs played and sung by native musicians!

Photo Courtesy Radlo News
One of the many fine stations you may hear from Colombia, South America. It is HJ4ABB at Manizales. Its operator, Albert Hoyn, stands beside the control panel.

You'll find Colombia a most prolific source of enjoyable entertainment. The stations at Barranquilla, Medellin, and Cali, especially, are sure to be among your favorites for evening entertainment because they are received almost nightly with splendid volume and clarity. For sparkling, rhythmic music tune to Colombia.

VENEZUELA

Location	Station	Freq.	Time (Eastern Standard)
Valencia	YV6RV	6.52	Noon to 2 P.M. & 6 to 10 P.M.
Caracas	YV4RC	6.37	4:30 to 10:30 P.M.
Caracas	YV3RC	6.15	10:30 A.M. to 1:30 P.M. & 4:30 to 9:30 P.M.
Caracas	YV2RC	6.11	10:30 A.M. to 1 P.M. & 5:15 to 10 P.M.
Maracaibo	YV5RMO	5.85	11 A.M. to 12:30 P.M. & 5 to 9 P.M.

There's romance in the very sound of such names as Caracas, Valencia and Maracaibo! And there's plenty of romantic entertainment broadcast by the short-wave stations in these Venezuelan cities! The South Americans are a music-loving people. Music is their principal means of recreation and relaxation. So, when you tune to Venezuela, you can be sure you'll hear programs that are full of color and rhythm.

South American music has enjoyed an even-increasing wave of popularity among Americans during the past few years. Listen to any dance

The little dark-eyed lady who is cuddling the microphone so affectionately is Josefina Carcano, actress and singer, who has helped so greatly in making YV2RC, Caracas, one of the most popular of all South American stations.

program right here at home and notice how many tangos, rhumbas and paso dobles are included.

Venezuela is a mountainous country. Thus, the transmitting towers of its principal short-wave stations are located at very high altitudes. Perhaps this explains why the Venezuelan stations are heard consistently by listeners here in America. Venezuelan time is almost the same as that of the eastern part of the United States and therefore these stations are excellent sources of delightful evening entertainment.

Many short-wave fans make it a practice to send the stations reports of reception in order to receive verification cards which they can display to their friends. The Caracas stations oblige such writers with handsome cards bearing a picture of the transmitter.

-TUNE TO SOUTH AMERICA!

broadcast from below the blue Caribbean!

Rosario Lozada, one of the reasons why thousands of short-wave receivers are tuned to YV2RC, Caracas, each evening.

the equator. Through HC2RL at Guayaquil, for instance, almost every type of program is provided, from splendid operas to modern dance music and folk tunes. Many a Philco owner makes it a point to tune to the stations at Guayaquil, Riobamba and Quito regularly. These stations have adequate power and surprising volume.

PERU

Location	Station	Freq.	Time (Eastern Standard)
Lima	OAX4B	6.25	Wed. 7 to 10:30 P.M.
Lima	OAX4D	5.78	Wed. & Sat. 8 to 11:30 P.M.

It has been only during the past few months that stations in Peru have been heard consistently in America. The Peruvians evidently have been envious of the manner in which the short-wave broadcasts of their neighbors have been enthusiastically welcomed by listeners throughout the Western World, and as a result have improved their broadcasting equipment and adopted more regular schedules. For now the Peruvian stations are providing fine entertainment regularly. You'll find them another delightful source of rhythmic music.

BRAZIL

Location	Station	Freq.	Time (Eastern Standard)
Rio de Janeiro	PRF5	9.50	Daily 5:30 to 6:15 P.M.
Pernambuco	PRA8	6.04	2:30 to 8:30 P.M.

While Brazil is not the prolific short-wave broadcaster that many of its South American neighbors are, its powerful station at Rio de Janeiro, PRF5, broadcasts some highly interesting entertainment every day. When this station first went on the air, its identity was unknown for several weeks because of its varying announcements entirely in Portuguese. However, the Radio Club of Brazil began to broadcast programs over it and announcements were then made in English and the mystery solved.

Photo Courtesy Radio News

Entrance to Station PRF5 at Rio de Janeiro—for some time a mystery station to the world's short-wave listeners. Thick jungle was cleared to build this popular broadcaster.

BOLIVIA

Location	Station	Freq.	Time (Eastern Standard)
La Paz	CP5	6.08	Daily 8 to 9 P.M.

Located high up in the Andes Mountains, station CP5 at La Paz is said to be the highest broadcasting station in the world. It puts out daily transmissions and its splendid situation has made its programs heard throughout the North American continent. Like programs from other South American countries, those from Bolivia are filled with the sparkle and gaiety inherent in the Latin race.

ETHIOPIA AND ITS HISTORY

The true origin of the Ethiopian people is shrouded in the mists of antiquity. It is generally accepted, however, that Ethiopia was the Biblical Land of Kush, mentioned so many times in the Old Testament. The first ruler of which we have any record is the half legendary, half real Queen of Sheba, who in approximately 1000 B. C. journeyed to Jerusalem where she fell in love with King Solomon and bore him a son, Menelik. The child was educated by the King in Jerusalem and when of age returned to Ethiopia to rule as Menelik I. So universally consistent are the records concerning the Queen of Sheba and Menelik that many students of Ethiopia are inclined to believe it historically accurate. Added authenticity is supplied by the fact that Ethiopia's central province, Shea, is also known as Shoba and Sheba.

It is from Menelik I that the reigning families of Ethiopia have descended in an unbroken line. The present ruler, Emperor Haile Selassie, is one of this line.

Wide World Photo

Aksum, Ethiopia—Scene as the High Priests gather for the annual religious fete at the Zion Church here. This edifice is but one of many located in this Ethiopian holy city. Aksum is one of the cities which have been captured by the Italians.

In the early history of this empire, Egypt was the controlling power and Ethiopia had to pay heavy tribute to the pharaohs. In about 800 B. C., however, Ethiopia conquered the Egyptians and became a free and independent nation. As such, it has remained ever since.

For several centuries Ethiopia controlled Egypt and the entire northeastern part of Africa. The Assyrian, Esarhaddon, finally overran Egypt in 672 B. C. and Ethiopian rule was thenceforth confined to their own country. In approximately 300 A. D., Christianity was introduced in Ethiopia by two Phoenician missionaries, Aedesius and St. Frumentius, who were shipwrecked and made pris-

oners by the Ethiopians. While in slavery, St. Frumentius taught the Christian religion and was finally consecrated a bishop.

During the next few centuries little is known of Ethiopia except that it was engrossed in repelling the invasions of the Moslems and in trying to bring back under Ethiopian rule various provinces which seceded and declared themselves independent.

Under Theodore II, however, the empire was moulded once more into a cohesive unit. Theodore was followed by Menelik II who continued to hold the empire together. After an extremely weak ruler, Lij Yasu, was overthrown, the present emperor, Haile Selassie, took the reins of government.

Haile Selassie has done more for Ethiopia than any of his predecessors. He has modernized his domain tremendously, building roads, installing modern plumbing and electric lights, and constructing modern buildings. One of his children has attended school in Europe, absorbing the knowledge and culture of today and it is the emperor's intention that all of his children shall enjoy the same opportunity. Thus, the future progress of his country is assured.

FOLLOW DAILY DEVELOPMENTS ON THIS MAP OF ETHIOPIA

You can add greatly to your knowledge of the Italo-Ethiopian situation by using this map in connection with newspaper and radio reports. When battles take place you can see just where they are fought. When gains are made you can follow them and better understand their significance. And because this map shows the topography of the country as well as the towns and cities, you can appreciate at all times the natural hazards with which the armies are contending. Use this map daily. It will make the happenings in Ethiopia tremendously more interesting and understandable.

Listen To Foreign Broadcast Stations on a New 1936

PHILCO

You can hear history in the making with a powerful new Philco. For there are several stations in Europe from which you can get almost daily reports on the situation in Africa and the efforts of the League of Nations to secure peace. Here is a list of the most important stations together with their frequencies and the times of their news broadcasts:

GSB London	9.51 megacycles	7:45 P. M. (Eastern Time)
GSA London	6.05 megacycles	7:45 P. M. (Eastern Time)
GSC London	9.58 megacycles	10:45 P. M. (Eastern Time)
GSL London	6.11 megacycles	10:45 P. M. (Eastern Time)
DJA Berlin	9.56 megacycles	8:15 P. M. (Eastern Time)
DJN Berlin	9.54 megacycles	8:15 P. M. (Eastern Time)
DJC Berlin	6.02 megacycles	8:15 P. M. (Eastern Time)
EAQ Madrid	9.87 megacycles	5:15 P. M. (Eastern Time)
2RO Rome	9.64 megacycles	M. W. F., 6 to 7:30 P. M. (Eastern Time)
HBP Geneva	7.80 megacycles	Sat. 5:30 to 6:15 P. M. (Eastern Time)
HBL Geneva	9.59 megacycles	Sat. 5:30 to 6:15 P. M. (Eastern Time)

In addition to these, there is Station IRG at Massaua, Eritrea, on 14.74 megacycles and Station ETA at Addis Ababa, Ethiopia, on 11.98 megacycles which may be picked up occasionally sending news bulletins to Europe. A Station ETB also at Addis Ababa on 7.62 megacycles is likewise reported to be on the air.

(Continued from front page)

at Aduwa. Following that defeat, Italy recognized the independence of Ethiopia. In 1906, Great Britain, Italy and France agreed to protect the independence of this country and in 1925, Great Britain and Italy stipulated more completely their intentions regarding Ethiopia. Italy was to give

Wide World Photo
The arrival in Addis Ababa of a minor chief with his retinue of riflemen. Under the feudal system in Ethiopia, each chief has to supply so many men to the army in case of national necessity, the number depending upon his importance.

Great Britain a free hand in its irrigation projects at Lake Tana, while Great Britain agreed not to oppose Italy's projected railroad between Eritrea and Italian Somaliland. In 1928, Italy and Ethiopia signed a twenty-year treaty in which Ethiopia was to have free use of the Italian port of Assab in Eritrea.

The country itself, approximately 350,000 miles in area, consists chiefly of an irregular, elevated table-land with a general elevation of 6,500 feet and rising in some parts to 10,000 feet. Its mountains rise to nearly 15,000 feet. One of the distinctive features of Ethiopia, and one that has been largely responsible for its independence for centuries, is the high escarpment that surrounds practically the entire central portion of the country. This escarpment rises almost sheer in some places to a height of 8,000 to 10,000 feet, forming a vast retaining wall along the

Wide World Photo
An Ethiopian soldier wearing his rifle beneath the peak of his cape where it is protected from wet and damp weather. Note the white tunic and trousers and the shoeless feet—all characteristic of the average Ethiopian.

top of which are located many of the important towns. This wall of rock is broken only in places by deep, rocky, almost impassable ravines and gorges. Thus, Ethiopia is naturally isolated on all sides and this is the reason why it has been unconquered for thousands of years.

There are two seasons, the rainy which lasts from June to September and the dry which comprises the rest of the year.

Its climate is determined by altitude. The lowlands are terrifically hot and unhealthy and are shunned by the natives. In Danakil province, a temperature of 160° has been recorded. The vegetation here is tropical, consisting of sugar cane, cotton, coffee, indigo, aloe, baobab, tamarind, banana, sycamore, fig and acacia. In the uplands, bamboo, palms, bananas, wheat, tobacco, pomegranates, oranges, lemons, olives and peaches are grown. In the highlands, where the elevation rises to nearly 10,000 feet, wheat, barley and oats are raised. Here also great numbers of cattle graze.

Wide World Photo
Addis Ababa—Here at the capital of Ethiopia, natives are pounding war drums, the primitive means of communication still used throughout the country. These drums beat out the first warning that Ethiopia was being invaded by the Italians.

Animal life is represented in the lowlands by the elephant, rhinoceros, hippopotamus, zebra, giraffe, gazelle and many birds, reptiles and insects; and in the highlands by the buffalo, antelope, lynx, hyena and lion. Minerals found in Ethiopia are iron, gold, coal, saltpetre, sulphur, copper and silver.

Because the interior of this African kingdom is so inaccessible, little is known about it and its estimated 10,000,000 inhabitants. Consequently few travelers have visited it. It was only in 1917 that the French completed the present railroad from Djibouti to the capital, Addis Ababa, a city of 60,000-70,000. It is the only railroad in the country, running 487 miles across French Somaliland into the interior. The only other entrances to the country are faintly defined trails or caravan routes.

Here's a fertile field for radio exploration!

JAPAN

Location	Station	Freq.	Time (Eastern Standard)
Nazaki(Tokyo) JVH		14.60	4 to 8 A.M. & 8:30 to 9:30 P.M.
Nazaki(Tokyo) JVM		10.74	1:30 to 7 A.M. & 7 to 11 P.M.
Nazaki(Tokyo) JVN		10.66	3 to 8 A.M.

A good example of how short-wave broadcasting is slowly but surely improving, enabling the listener to hear programs from the other side of the world, is found in the broadcasts from Japan. A year ago short-wave broadcasts from Tokyo were intercepted but rarely by listeners here in America. But now, several of the Tokyo stations are heard more regularly. In fact, special broadcasts are being sent out for listeners in America.

Photo Courtesy Radio News

Young Nippon listens-in. These little Japanese are children of Rear Admiral Yamamoto. They are listening to their father's voice as he broadcasts by short-wave from London.

And the programs from Tokyo are like nothing you ever heard before! Many a Philco owner, under favorable conditions, finds a particular delight in listening to quaint Japanese music.

INDIA

Location	Station	Freq.	Time (Eastern Standard)
Bombay	VUY-VUB	9.57	Wed. & Sat. 11 A.M. to 12:30 P.M.
Calcutta	VUC	6.11	Daily 9:30 A.M. to Noon, Sat. 11:45 P.M. to 3 A.M.

India, unfortunately, is one of the sections of the world from which short-wave entertainment cannot be obtained with any degree of regularity. For some unknown reason, the English have not given their Indian broadcasting stations anywhere near the power of those in England or Australia. The result is that reception of either the Bombay or the Calcutta stations is a real event in the life of any short-wave fan.

SIAM and INDO-CHINA

Location	Station	Freq.	Time (Eastern Standard)
Bangkok	HSP	17.75	SIAM 4:30 to 6:30 A.M. Irregular
Saigon	FZS	11.99	FRENCH INDO-CHINA Phones Paris mornings
Penang	ZHJ	6.08	STRAITS SETTLEMENTS Daily 6:40 to 8:40 A.M.
Kuala Lumpur	ZGE	6.13	MALAY STATES Sun., Tues., Fri. 6:40 to 8:40 P.M.
Singapore	ZHI	6.01	Mon., Wed., Thurs. 5:40 to 8:10 A.M. Sat. 10:40 P.M. to 1:10 A.M.

Siam is another of the Asiatic countries from which reception is uncertain. However, the station at Bangkok has been logged by more than one persevering Philco owner. And the peculiar type of Oriental entertainment to which they have been treated, has more than amply repaid them for their early morning exploration of the dial. Saigon, in French Indo-China, has been heard a little more frequently, for the French use this station to communicate directly with Paris.

OTHER COUNTRIES

Location	Station	Freq.	Time (Eastern Standard)
Shanghai	XGW	10.42	CHINA Tests near 6:00 A.M.
Hongkong	ZCK	8.75	Daily 11:30 P.M. to 1:15 A.M. Mon. & Thurs. 3 to 7 A.M.
Macau	CQN	6.02	Mon. & Fri. 3 to 5 A.M.
Khabarovsk	RV15	4.25	SIBERIA 1 to 9 A.M.

The Orient is full of exciting adventure for those who have the true spirit of exploration within them—for those who like to travel unbeaten

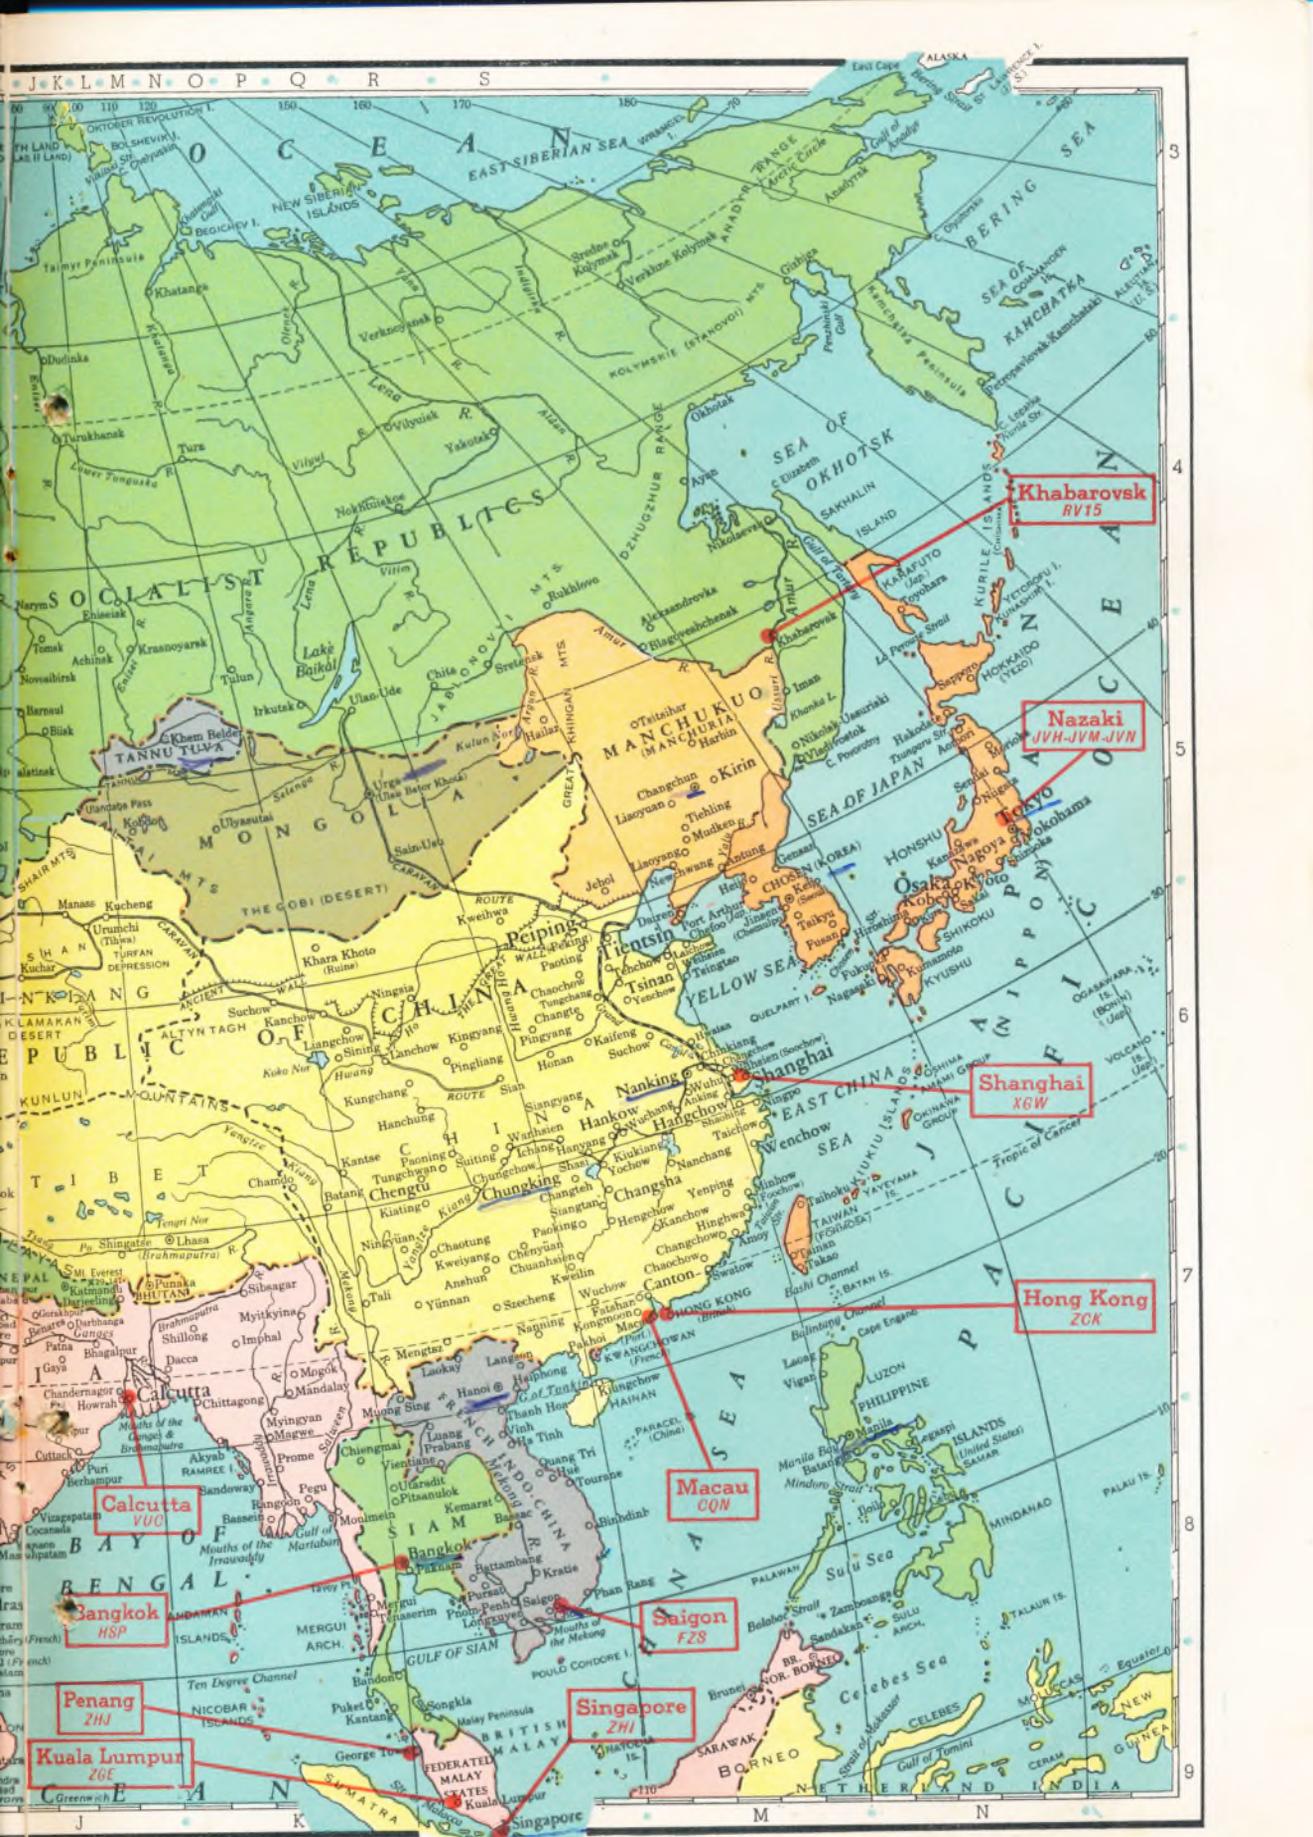

Comrade Ikramov, lute player, who is attached to the Tashkent Radio Centre, in Tadjikistan, Central Asia. Many unusual broadcasts come from stations in the U. S. S. R.

aerial highways that lead to Siberia, China, the Malay States and other far-off lands. The average listener, however, should not expect to hear these stations because of the many factors involved.

Bombay
VUY-VUB

HUNGARY

Location	Station	Freq.	Time (Eastern Standard)
Budapest	HAS3	15.37	Sundays 9 to 10 A.M.
Budapest	HAT4	9.12	Sundays 6 to 7 P.M.

Until only recently, Hungary could not be heard on the short-waves. Now, however, it is on the air with a regular broadcasting schedule. While not received here in America as regularly or as strongly as other European stations, excellent music

Almost every conceivable type of music is sent out by the short-wave stations of the world. For instance, here is a group of Blaa Mountain pipers broadcasting through the Vienna station.

is occasionally heard from the two stations HAS-3 and HAT-4. Hungary has become musically famous through Liszt's Hungarian Rhapsodies and through countless Hungarian dances by other composers. And this is in large part the type of music one may hear from Budapest—ranging all the way from somber symphonies to joyous, lilting gypsy music.

OTHER COUNTRIES

Location	Station	Freq.	Time (Eastern Standard)
CZECHOSLOVAKIA			
Prague	OKI	21.02	Schedule Indefinite
AUSTRIA			
Vienna	OER2	6.07	1 to 6 & 7 to 10 P.M.
ROUMANIA			
Bucharest	YOI	13.94	Schedule Indefinite
POLAND			
Poznan	SRI	9.57	Schedule Indefinite

The stations listed above are those which, because of insufficient power or irregular broadcasting schedules, are not heard regularly here in America. Don't expect to hear these stations, therefore, every time they are supposed to be on the air. However, when atmospheric conditions are extremely favorable, you may suddenly find one or more of them coming in.

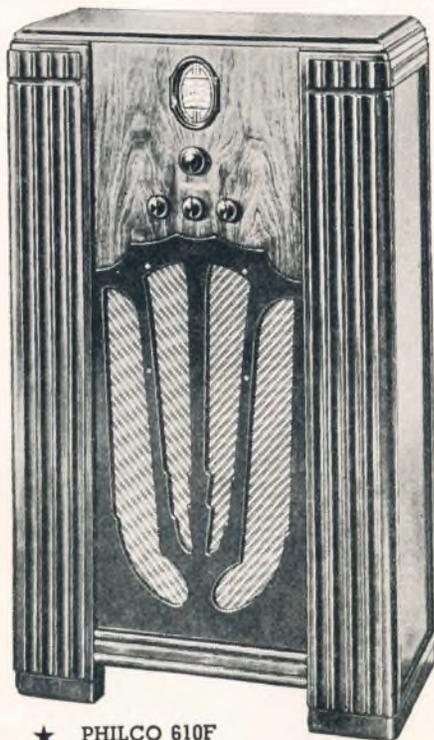

First Choice!

New 1936

PHILCO

You must see and hear the brilliant new 1936 Philcos to fully appreciate their remarkable tone, performance, beauty and value! Then you will understand why Philco is the "World's Fastest Selling Radio" — "first choice" of the nation!

Come in — see this Philco 610F today! It's a full-sized floor type model that, properly installed with a Philco All-wave Aerial, gives thrilling American and Foreign reception — at an amazingly low price! Latest features — beautiful satin-finish Walnut cabinet.

EXPLORE AFRICA BY RADIO!

There's adventure in reception from the Dark Continent

MOROCCO

Location	Station	Freq.	Time (Eastern Standard)
Rabat	RABAT	12.83	Sundays 7:30 to 9 A.M.
Rabat	CNR	8.05	Sundays 2:30 to 5 P.M.

When you tune for African stations, you stand upon the threshold of the great unknown. For African stations have considerably lower power than most of the other stations you'll hear. Consequently, you'll need a plentiful supply of luck as well as a powerful receiver to log this elusive continent. Take Morocco for example. Some time ago this station was heard almost weekly but recently it has been received but rarely. The stations at Rabat are owned by the French government and send programs to France in return for programs from the stations at Paris. If you hear "Radio-Maroc," be prepared for anything from scintillating French dance music to exciting desert songs broadcast by native musicians.

EGYPT

Location	Station	Freq.	Time (Eastern Standard)
Cairo	SUZ	13.83	Schedule Indefinite
Cairo	SUV	10.05	Schedule Indefinite

Egypt is one part of Africa which is heard from more often than other sections. Although the short-wave stations in this country are primarily phone stations used for radiophone communication between Cairo and the rest of the world, occasionally you may hear unusual broadcasts. Both SUV and SUZ will verify reception reports if you enclose an International Reply Coupon with your report. Thus these stations are tuned regularly by the fan who would add Africa to his list of continents received.

"Camel bells from Cairo!" Many a short-wave listener has heard them from just such a camel train as this. For this unique broadcast was just one that has been heard from the stations at Cairo.

BELGIAN CONGO

Location	Station	Freq.	Time (Eastern Standard)
Leopoldville	OPM	10.14	9 to 11 A.M.; 3 to 6 P.M.

What thrilling stories the Belgian Congo has given the world! It was here, in the very heart of "darkest Africa," that one of the greatest adventures of all time was staged—Stanley's search for Livingstone. The world waited for years after Stanley's entrance into the jungle before it knew the results of that expedition. Now, however, the Belgian government has a fairly powerful short-wave station at Leopoldville which maintains a regular schedule with ORK, Brussels.

Photo Courtesy Radio News
This little station, located at Lobito, Angola, in Portuguese West Africa, is the object of diligent tuning by avid short-wave fans all over the world. Call letters are CR6AA.

OTHER AFRICAN STATIONS

Location	Station	Freq.	Time (Eastern Standard)
Funchal	CT3AQ	9.37	Schedule Indefinite
Johannesburg	ZTJ	6.09	3:30 A.M. to 7 A.M. & 9 A.M. to 4 P.M.
Lobito	CR6AA	7.17	Wed. & Sat. 2:30 to 4:30 A.M.
Nairobi	VQ7LO	6.12	5:45 to 6:15 A.M. & 11 A.M. to 2 P.M.

You'll have to wait until reception conditions are extremely favorable to "catch" these stations. Nairobi, Johannesburg and Lobito operate on regular schedules, but they are not large transmitters and, as a consequence, are heard only by the avid fan who is willing to tune for them regularly, usually in the small hours of the morning. If you are successful in picking them up, you'll experience a thrill few others have enjoyed.

LISTEN TO ENTERTAINMENT

Australia and the islands of the South Seas

AUSTRALIA

Location	Station	Freq.	Time (Eastern Standard)
Sydney	VK2ME	9.59	Sun. Midnight to 2 A.M., 5 to 9 A.M.
Melbourne	VK3LR	9.58	Daily 3:15 to 7:30 A.M.
Melbourne	VK3ME	9.51	Wed., Thurs., Fri., Sat. 5 to 7 A.M.

No matter how many times you might receive the delightful broadcasts from Australia, you'll always feel excited at hearing voices and music from the other side of the globe! And that means many a thrill, because the Australian stations have the happy faculty of reaching America with surprising regularity. In fact, many experienced short-wave fans look upon the two principal stations, VK2ME and VK3ME, as "locals" because of the frequency with which their programs are heard. Experience counts in getting these stations.

Stirring symphonies, light opera selections, news

dispatches, dance music, and variety programs are broadcast. And, of course, announcements are in the broadest of British accents. For, thousands of miles from the mother country though it is, Australia is typically British in speech, music, and customs. Unfortunately, however, to hear the Australian stations at their best, you'll have to get up early, for their broadcasts are strongest between

Captain Atkins, whose band is broadcast from VK2ME, Sydney, Australia.

5 and 8 A. M., Eastern Standard Time.

REPLACE with

JAVA

Location	Station	Freq.	Time (Eastern Standard)
Bandoeng	YDA	6.12	5 to 11 A.M. Irregular
Bandoeng	PMY	5.15	6 A.M. to Noon

Next to Australia, Java is probably the most productive of short-wave entertainment from the other side of the world. Java is but a small island compared to neighbors like Sumatra and Borneo. Yet it is said to have more short-wave stations for its size than any other country. One or two of these stations provide fairly consistent broadcasting.

Java belongs to the Netherlands. Consequently the language is Dutch. But the entertainment which comes from Java may be anything from the latest dance tune to strange, ceremonial music played by Javanese natives. Tune your Philco to Java for some of the greatest thrills short-wave radio has to offer.

FIJI ISLANDS

Location	Station	Freq.	Time (Eastern Standard)
Suva	VP1A	13.07	12:30 to 1:30 A.M. ex. Sat. & Sun.

Here is another fascinating part of the world! The Fiji Islands have only recently been "discovered" by the short-wave listener, for only recently have they had a short-wave broadcasting station with sufficient power to reach American listeners. Every night finds hundreds of short-wave fans turning their dials toward Suva in the South Seas in search of radio adventure and romance. Why not join them? You'll have lots of fun.

FROM "WAY DOWN UNDER"!

broadcast fascinating, thrilling programs!

OTHER SOUTH PACIFIC SHORT-WAVE STATIONS

<u>Location</u>	<u>Station</u>	<u>Freq.</u>	<u>Time (Eastern Standard)</u>
	NEW ZEALAND		
Wellington	ZLT	11.05	1 to 7 A.M.
	PHILIPPINE ISLANDS		
Manila	KAY	14.98	5 to 7 A.M. & 7 to 8 P.M.
	HAWAII		
Kauhuku	KKII	7.52	Evenings Irregular

Although New Zealand possesses several short-wave broadcasting stations, this country is not one upon which you'll depend for everyday entertainment. It is one of those which you can hear only when conditions are extremely favorable.

The Philippines have several high-powered stations, the most frequently heard of which is KAY at Manila. Hawaii also is heard through any of several stations at Kauhuku. But they are phone stations used primarily for communication work between these points and the United States. Occasionally, however, they may be picked up relaying special broadcasts to or from America.

AERIAL DESIGN NOW HIGHLY IMPORTANT

For reception of stations on the other side of the world, the importance of having a Philco All-wave Aerial cannot be emphasized too strongly. Signals from stations like Melbourne, Bandoeng and Suva are extremely faint after traveling thousands of miles and it is absolutely essential that you have not only a powerful receiver but an aerial system that is especially designed to pull in these faint signals.

The Philco All-wave Aerial is specially engineered for this purpose. And in addition, it reduces to a minimum man-made static and local electrical interference. This aerial, then, does two things: it pulls in weak stations from really tremendous distances and it cuts down the noise so that you can identify these stations with greater ease and get more enjoyment from your armchair travels.

Travel Abroad

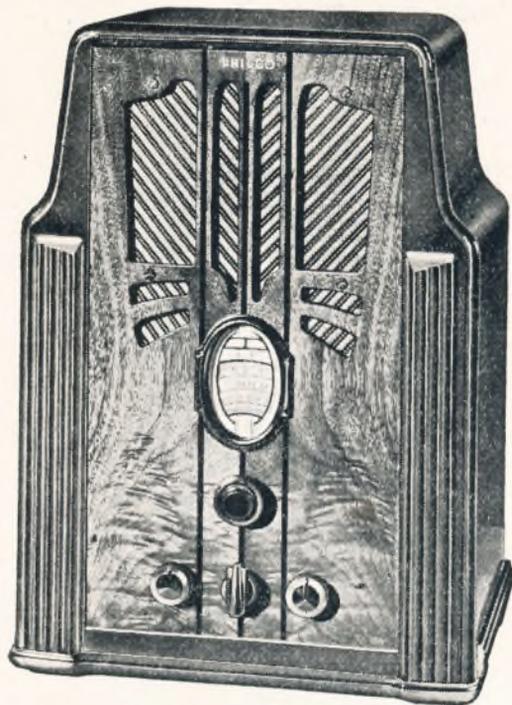

with this New 1936

PHILCO

You'll be delighted with the unusually clear tone, power and foreign reception of this latest Baby Grand Philco, properly installed with a Philco All-wave Aerial! You'll admire the beauty and grace of its newly designed cabinet — and you'll be amazed at its remarkably low price! Only Philco gives you every worth while feature in radio!

Here's a fascinating part of the world for the short-wave listener. As you tune to the multitude of stations you'll find here, you can easily imagine yourself as one of the early explorers upon a voyage of discovery. What exciting adventure you'll have! For these islands are full of tales of the old days when swashbuckling pirates and buccaneers

YOU'LL FIND IT HERE

thing from rhumbas to network programs

plundered Spanish galleons filled with gold and silver from the mines in Mexico. But the old order has changed, and now a dozen or more short-wave stations nightly offer delightful entertainment to the Western Hemisphere.

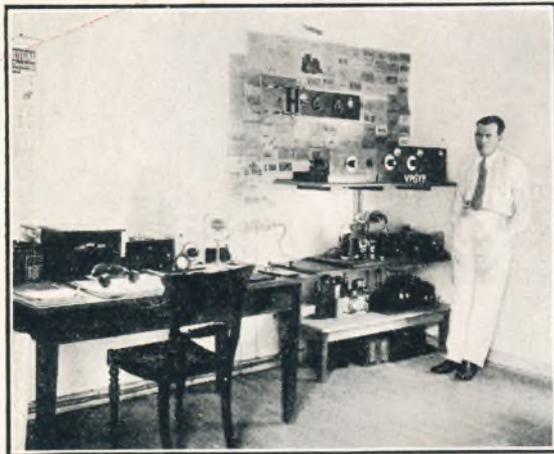

Photo Courtesy Radio News
Station VP6YP at Bridgetown, Barbados, British West Indies. Tune for this station on the 14 megacycle band.

However, this broadcasting of network programs by short-wave stations has one great advantage to the owner of an American and Foreign Broadcast Philco. Very often when conditions on the standard broadcast band are so unfavorable as to prevent satisfactory reception of a favorite network program, you can drop down to one of the Canadian or United States short-wave stations and hear the same program perfectly. For reception conditions are often much better on the short-waves than on the broadcast band. Remember this the next time static prevents enjoyable reception of network programs.

RADIO INSTITUTE AIDS PROGRAM LISTENERS

The Radio Institute of the Audible Arts was founded by Philco Radio & Television Corporation as a public service to the American people, to act as a clearing house of information on the broad phases of radio as an instrument of entertainment and culture and to stimulate public recognition and appreciation of the best in radio. Accordingly, the Institute has prepared various publications which it is distributing to members of organizations and individuals who are interested in the development of the audible arts through radio.

These publications include announcements of forthcoming important programs with comments on their contents, manuals that will aid in the appreciation of the types of programs that engage your special interest, special articles and talks on radio subjects, and a brochure on how to utilize radio in the teaching of music. If you would be interested in receiving such material, you may obtain it either from your Philco dealer or by writing The Radio Institute of the Audible Arts, 80 Broadway, New York City.

Periodically, Philco publishes in advertisements in the Saturday Evening Post and Collier's, a partial list of the programs recommended by the Institute. Many listeners use these advertisements as guides in their search for the more outstanding programs on the air.
