THE NSI® TECHNIQUE

INTRODUCTION

NSI techniques and procedures used in compiling the audience estimates in this Viewers in Profile® (VIP®) are described in the current edition of the NSI Reference Supplement. The user should refer to the Supplement for information regarding the sample plan, data reported, examples of standard error calculations, as well as for additional detail on other related topics including those treated briefly below.

The use of mathematical terms to express the audience estimates therein should not be regarded as a representation by NielsenTV that they are exact to the precise mathematical values stated.

I THIS NSI ANALYSIS PROVIDES THE FOLLOWING AUDIENCE ESTIMATES:

WEEKLY CUMULATIVE AUDIENCES (Net Reach) — By Daypart

- **DMA Households:** the total number of different TV households reached one or more quarter-hours for the average week and for the 4 weeks of the current measurement period. Cumulative audience percentages for households are based on Meter records only.
- **Station Total Households:** Weekly cumulative audience reported in thousands of households is for the average week of the latest all-market measurement period (Nov., Feb., or May) as well as July.

AVERAGE QUARTER-HOUR AUDIENCES — By Daypart and/or By Quarter-Hour or Half-Hour

- **HUT (Households-Using-Television):** television households in the Metro/DMA Area with a TV set turned on as a percentage of Metro/DMA Area TV households.
- **PUT (Persons-Using-Television):** persons in television households in the DMA that are viewing any station as a percentage of persons in DMA television households.
- **Metro/DMA Area Rating:** television households in the Metro/DMA Area tuned to a specific station as a percent of the Metro/DMA Area TV households. DMA ratings are also shown for selected persons categories.
- **Metro/DMA Area Share:** television households in the Metro/DMA Area tuned to a specific station as a percent of the Metro/DMA Area TV households with a set turned on.
- **DMA In-Market Share:** an estimate of the DMA household 4-week share of viewing received by a local commercial station in comparison to the other local commercial stations in the market. This estimate is only reported in the Daypart Section.
- **Trend Guide Data:*** DMA HUT and Shares are provided for the a) Daypart and Time Period Sections where data are based on the same Daypart/Time Period for the indicated measurement periods (see column headings) and b) Program Audience Averages Section where data are recomputed based on the "normal" program time period in the current VIP for the indicated measurement periods (see column headings).
- Users are reminded that Trend Guide data are subject to variations due to several factors, such as sampling error and seasonal variations in television viewing. These factors, as well other considerations outlined in Section IV of this VIP should be recognized in using and comparing data from several measurement periods.
- **Station Total Audience:** total U.S. TV households reached.
- **Percent Distribution of Station Total Households:** When Station Total Households are reportable in the Home market they are also shown distributed on a percentage basis between the Home Metro area, the Home DMA and up to three selected adjacent DMA's. Where applicable, ratings are also shown for the adjacent DMA's. These data are reported for all dayparts during all-DMA measurement cycles only.
- **Audience Composition:** in numbers of persons viewing and their distribution by the demographic categories shown — reported in terms of DMA Ratings and/or Projected Total Persons reached.
- **Time Period Section:** Audience estimates are shown (a) as 4-week averages for the dates shown on the cover (exclusions due to special events or other unusual circumstances, if any, are listed on Page 3), and (b) as program time period estimates excluding preemptions, if any. Such "pure" program audience estimates are reported for local stations only.
- **Adjacent Quarter-Hour (½ hour) Averages:** The average of data for the current quarter-hour and the previous quarter-hour, reported for each time period break. Shown are DMA household ratings plus Station Totals for households and selected demographic categories.
- **DMA Weekly Ratings:** DMA Household audiences reported for each week of the measurement on a program average time period basis.
- **Program Audience Average Section:** A retabulation of the program audiences (excluding preemptions where applicable). For a description of the rules and procedures for averaging audience data for this section, see the NSI Reference Supplement.
- **Persons Share Section:** Persons in the DMA tuned to a specific station as a percent of the DMA Persons-Using-Television (PUT) for this survey interval and three prior intervals.
- **TV Households and Persons Trend Section:** Households Using Television (HUT) and Persons Using Television (PUT) are trended for all-DMA measurement periods for this period and four prior years. Rating and Share data are summarized for local commercial stations.

To avoid the implication that the reported averages represent normal operating conditions at all times, a section on "Operating Notes" is included showing dates and times of unusual operating conditions as reported by the stations.

II AREAS MEASURED

Metro Area: the Metro Area is the Metropolitan Statistical Area (MSA) as defined by the Office of Management and Budget to county line basis to include counties having over 50% of their population in the Metro Area. In the absence of an established Metro Area, or where in NielsenTV's judgment a Metro Area may not represent the TV market(s) served by a group of TV stations, a group of counties may be substituted to serve this purpose. Such an area is titled.

JULY 2000

COPYRIGHT 2000 NIELSEN MEDIA RESEARCH - PRINTED IN USA

TABLE 1 - UNIVERSE ESTIMATES - JAN. 2000

AREA	TOTAL HOUSEHOLDS	TV HOUSEHOLDS	TV HOUSEHOLDS BY COUNTY SIZE † A	B	C	D
METRO	494,400	489,540				
DMA	570,900	565,230		533,400	31,830	
%		100		94	6	
NSI	2,025,800	2,001,790	939,480	896,830	159,470	6,010
%		100	47	45	8	LT

TOTAL HOUSEHOLDS are estimated by Market Statistics (MS), used by special permission of that organization. They are the base against which television ownership percentages have been applied.

TELEVISION OWNERSHIP PERCENTS are Nielsen Media Research estimates based on combining historical projections from the 1960 and 1970 Censuses with estimates from the NSI telephone interviews from a number of all market measurement periods.

HOUSEHOLDS ARE OCCUPIED HOUSING UNITS. The household universe estimates shown in Table 1 are estimates of year-round households, i.e., housing units occupied year round. Seasonal housing units which are occupied only during certain seasons of the year are not included in the Household Universe Estimates. Thus, the number of households during the survey period may differ from the estimate in Table 1.

† See NSI Reference Supplement for definition of county size. LT Less than 1%.

TABLE 2 - PENETRATION ESTIMATES

AREA	PERCENT OF TV HOUSEHOLDS BLACK %	HISPANIC %	MULTI-SET %	CABLE TV %	VCR %
METRO	4.0	4.9		82	
DMA	3.7	4.5	75	79	84
PROVIDENCE	18.5	18.6	NA	NA	NA
NEW BEDFORD	6.4	7.5	NA	NA	NA

Multi-set estimates are based on the metered sample. Multi-set, Cable TV and VCR estimates are based on the latest available data. Black and Hispanic estimates are as of January 1, 2000. See NSI Reference Supplement for detail.

TABLE 3 - SAMPLE SIZES: HOUSEHOLDS

AREA	METER SAMPLE IN-TAB AVG.	DIARY SAMPLE(1) INITIALLY DESIGNATED HOUSEHOLDS LISTED	UNLISTED	TOTAL	IN-TAB DIARY HOUSEHOLDS LISTED	UNLISTED	TOTAL
METRO	291 (EST D)	1642	1956	3598	536	406	942
DMA(INCL METRO)	340 (2)	1911	2153	4064	622	455	1077
NON-DMA	---	1943	1812	3755	573	455	1028(3)
NSI(INCL DMA)	340	3854	3965	7819	1195	910	2105

(1) The Non-DMA (Diary) sample is combined with the DMA meter sample for compiling Station Total households; the entire diary sample is used for Audience Composition data.

(2) Yields an approximate equivalent simple random sample size of 663.

(2) + (3) NSI Area Station Total households herein are based on these in-tab samples and yield an approximate equivalent simple random sample size of 2780.

Equivalent simple random sample size is a term sometimes used for the statistical equivalent of the sample size for computing sampling errors or statistical tolerances.

For sample selection procedures in Total Telephone Frame markets, see NSI Reference Supplement.

NOTE: VIEWING IN ADJACENT DMA'S IS NOT LIMITED TO NSI AREA COUNTIES IN TABLE 5. THE ABOVE LIST OF COUNTIES DOES NOT NECESSARILY REPRESENT ENTIRE AREA FOR WHICH VIEWING OCCURS TO STATIONS IN THIS MARKET. SEE INSIDE BACK COVER FOR FURTHER STATION TOTAL AREA DESCRIPTION.

Initially, approximately 29% of the predesignated Providence DMA basic meter sample households are recruited and installed. For a typical report period, approximately 32% of the installed meter sample are predesignated households.

Audience estimates are computed separately for each week. Reported multi-week averages are the average of the appropriate individual week audience estimates. Some of the above counties may have been combined for projecting individual week audience estimates. Viewing among the households in the in-tab sample for all counties that are combined are projected to the Total TV Households for the combined counties. These county groupings are available upon request.
M = Metro County; D = Designated Market Area County (for definition see Section II).
** The DMA meter sample currently approximates 374 television households in which meter equipment is installed; 372 households (including households replaced during the survey period) provided records meeting Nielsen Media Research accuracy standards during one or more days of this survey interval, including 340 households on the average individual day.

† See NSI Reference Supplement for explanation of County Size.

TABLE 7-MINIMUM REPORTING STANDARDS & RELATED

See the NSI Reference Supplement

RELATIVE STANDARD ERROR (1 STANDARD ERROR)

Relative Error Tables (see first page of Program Audience Averages and Time Period Audiences Sections) are provided to aid the user in assessing the sampling error of reported audience levels. Household and persons audiences equal to or less than the audience levels listed in the tables are estimated to have a relative standard error in the range of 25% or more or 50% or more at the one standard error level. Audiences below these levels are of marginal statistical significance and are reported as a convenience to users who may wish to combine them with audience estimates of other persons categories, time periods or measurement cycles to yield composite estimates whose relative standard error will be less than that of its parts.

TABLE 8A-STANDARD ERRORS:FOUR WEEK AUDIENCE ESTIMATES

Estimated standard errors of four week audience estimates are as follows, subject to the reminders in Sections VI.A. and VI.B. of this VIP. See NSI Reference Supplement for instructions and illustrations of the use of Table 8A.

Use the following Tables to estimate standard errors for four week audience estimates.

	HOUSEHOLDS			PERSONS	
METRO OR DMA HHLD. RATINGS	5-DAY AVERAGES (±PTS.)† METRO	DMA	IND. DAYS (±PTS.) DMA	5-DAY AVGS. (±PTS.)† DMA	IND. DAYS (±PTS.) DMA
1%	.3	.2	.4	.2	.3
5%	.6	.6	.8	.5	.7
10%	.9	.8	1.2	.7	1.0
15%	1.1	1.0	1.4	.8	1.2
20%	1.3	1.2	1.6	1.0	1.3
35%	1.6	1.4	1.9	1.2	1.5
50%	1.6	1.5	1.9	1.2	1.6

		HOUSEHOLDS (±)		PERSONS (±)	
PERCENT NSI AREA TV HHLDS**	STATION TOTAL ESTIMATES (HHLDS.)	5-DAY AVERAGES †	INDIVIDUAL DAYS	5-DAY AVERAGES †	INDIVIDUAL DAYS
1%	20,000	2,400	3,800	2,100	3,300
3%	60,100	4,200	6,500	3,700	5,700
5%	100,100	5,500	8,300	4,800	7,300
7%	140,100	6,500	9,700	5,800	8,600
10%	200,200	7,900	11,400	7,000	10,100
15%	300,300	9,800	13,600	8,700	12,000
20%	400,400	11,400	15,200	10,000	13,400

** Not meant to imply Station Total audiences are limited to viewing NSI Area households.
† May also be used to estimate daypart statistical tolerances. See the NSI Reference Supplement.

The chances are about 68 out of 100 that an estimate from a perfect probability sample would differ from a complete census of TV households from the same sampling frame by less than the standard error. The chances are about 95 out of 100 that the difference would be less than twice the standard error.

For example, if a DMA household rating estimate of 20% has a standard error of 2.5 rating points, then the chances are about 68 out of 100 that the estimated rating would have differed by less than 2.5 rating points from the rating from a complete census, and the chances are about 95 out of 100 that the estimated rating would have differed by less than 5.0 rating points from the rating from a complete census.

If a station total estimate of 100,000 has a standard error of 10,000, then the chances are about 68 out of 100 that the estimated station total would have differed by less than 10,000 from the station total from a complete census, and the chances are about 95 out of 100 that the estimated station total would have differed by less than 20,000 from the station total from a complete census.

TABLE 8B-STANDARD ERRORS: ONE,TWO AND THREE WEEK AUDIENCE ESTIMATES

To derive standard error estimates for one, two or three week audience estimates, obtain the four week standard error estimate using Table 8A and multiply the appropriate factor below.

	Standard Error Factor			
	Households		Persons	
Number of Weeks	5-Day Averages	Individual Days	5-Day Averages	Individual Days
1	1.12	1.40	2.00	2.00
2	1.04	1.15	1.41	1.41
3	1.01	1.05	1.15	1.15

For example, if an individual day DMA household rating of 20% has a four week standard error of 1.5 rating points, then the two week standard error is 1.7 rating points (1.5 x 1.15). If an individual day persons station total of 60,000 has a four week standard error of 5,000, then the two week standard error is 7,050 (5,000 x 1.41).

Some users apparently regard all audience estimates as having equal or almost equal reliability. For some, the sole reference to reliability is the household sample size. However, reliability varies considerably among the various audience categories because of differences in sample sizes and similarity of viewing among members of the same household.

Column 1 of Table 6 provides in-tab sample sizes for the weeks included in the reported period. Note that almost all of the demographic categories have in-tab samples smaller than the household in-tab sample. The factors in column 3 of the DMA section of Table 6 are the relative difference of DMA persons ratings standard error estimates and DMA household rating standard error estimates for the same rating level. For example, a factor of 1.25 for a demographic category means its standard error estimate is 1.25 times as large as the standard error estimate for a DMA household rating of the same level. Note that almost all demographic categories have factors larger than 1, i.e., most DMA demographic rating standard error estimates are larger than the standard error estimate of a DMA household rating of the same level. One, two and three week audience estimates have higher standard error estimates than comparable four week audience estimates. The factors at the bottom of Table 8A are the relative increase in standard errors for one, two or three week averages.

Differences in standard errors should be recognized in using or interpreting audience estimates, particularly those subject to large relative errors such as individual week ratings or demographic categories with small age ranges.

See the NSI Reference Supplement for additional information regarding standard error estimates.

MARKET DATA (CONT'D)

LT	Less than the lowest reported percent.
NOR	Normal average P.A. data. See NSI Reference Supplement.
NA	Data Not Available.
NR	Station Not Reportable.
OFF	All quarter-hours of time period for this week were Off-Air.
Δ	First or second quarter-hour excluded from average: Off-Air.
\	Indicates week(s) of telecast in markets where no weekly ratings are reported.
*	Totals include only stations reportable in this market (including satellites/affiliates, if any). HUT/PUT in the Metro/DMA includes all viewing to reportable and non-reportable stations.
**	See Quarter-Hour/Half-Hour detail.
'	(P.A.) Program starts earlier than printed time. (See Program Index).
'	(P.A.) Program starts later than printed time. (See Program Index).
‹	Data Withheld. In-tab sample size in area measured is below minimum standard for publication. See Table 7 and Section III.
‹‹	Below Minimum Audience Standards.
- -	Special Event deleted.
#	Multi-Week Average including Other Programming or technical difficulties.
X	Previous measurement programming same as current measurement.
+	Audience Estimates shown for parent station plus satellites/affiliates.
≠	Programming carried by satellites/affiliates is known to differ from programming of a parent station, including satellite Off-Air periods.
→	Start time for cross-reference to P.A. section.

TABLE 11 - STATION OPERATING NOTES

For the measurement period covered by this analysis, the following station operation 'interruptions' were reported by stations originating in this market. Please consult the stations for further details.

Minimum Number of Minutes for Inclusion: Longer than four and one-half cumulative minutes within a quarter-hour.

Type of Interruption:

A. Off the air
B. Loss of or corrupted video*
C. Loss of or corrupted audio*
D. Loss of program feed*
E. Power reduced by 50% or more*
F. Cable System(s)Difficulty*
G. Satellite/Translator Difficulty*
H. Other (See Note Below)*

*Station has the option to exclude affected telecast(s) from the averages as defined in the NSI Reference Supplement.

STATION	DAY	DATE	TIME SPAN	TYPE-INTER
WLNE	SAT	07/15/00	10:10PM-10:16PM	A
WLNE	SAT	07/15/00	12:22AM-12:50AM	A
WPRI	SAT	07/15/00	12:22PM-12:27PM	A
WPXQ	THU	07/20/00	10:15AM-02:45PM	E

HH'S Waiting For Two Good Days			1
Specifications Issued Not Yet Installed			39
Dormant Sample Points**			0
Total Specifications Issued to Field			414
In Phone Center			46
Total Sample Points			460
PROVIDENCE, RI-NEW BEDFORD, MA Sample Performance Indicator*			**25.4%**

* The reserve sample consists of on-line HH's in sample balanced markets that are not used in the reporting sample. As of 1/98, the Washington, D.C., Denver, San Francisco, Houston, Atlanta and Dallas metered samples utilize the sample balancing methodology. Please consult The NSI Reference Supplement for more information. Reserve HH's in-tab are those reserve HH's that pass the editing rules but do not contribute to the report.

** Dormant sample points exist only in area probability meter markets. Please consult the NSI Reference Supplement for more information.

*** In metered markets that utilize sample balancing, the **Sample Performance Indicator** is equal to (basics in-tab, including Reserve) divided by (total sample points minus dormant and uninstallable specifications). In all other markets, the **Sample Performance Indicator** is equal to (reporting basics in-tab) divided by (total sample points minus dormant and uninstallable specifications).

WHAT MRC ACCREDITATION MEANS

The Nielsen Station Index and Metered Market Services have been accredited by the Media Rating Council since 1965. To merit continued MRC accreditation Nielsen Media Research, Inc.: (1) adheres to the Council's Minimum Standards for Media Research, (2) supplies full information to the MRC or its auditors regarding all details of its operations, (3) conducts its measurement services substantially in accordance with representations to the subscribers and the Council and (4) submits to and pays the cost of thorough on-going audits of the Nielsen Station Index and Metered Market operations by CPA firms engaged by the MRC. In addition to sizable annual audit charges, Nielsen Media Research, Inc. provides office and file space for MRC auditors as well as considerable staff and computer time involved in various aspects of these inspections.

Further information about the MRC's accreditation and auditing procedures can be obtained from Executive Director, Media Rating Council, 200 West 57th Street-Suite 204, New York, NY 10019.

George Ivie
Executive Director
Media Rating Council

SPECIAL NOTES

TO OUR CLIENTS

WE CALL YOUR ATTENTION TO THE PERMISSIBLE USES OUTLINED ON THE INSIDE BACK COVER OF THIS VIEWERS IN PROFILE ANALYSIS. ANY UNAUTHORIZED USE OF THIS ANALYSIS OR USE OF ITS CONTENTS BY A NON-CLIENT IS A COPYRIGHT VIOLATION WHICH MAY, UNDER FEDERAL COPYRIGHT LAW, SUBJECT THE VIOLATOR TO CRIMINAL PENALTIES OF IMPRISONMENT FOR ONE YEAR AND A $10,000 FINE AND CIVIL DAMAGES OF $50,000. WE ASK YOUR COOPERATION IN PROTECTING YOUR INVESTMENT IN THE LEGITIMATE USE OF THESE DATA. THANK YOU.

SPECIAL NOTICE

DATA REPORTED FOR A SPECIFIC CABLE NETWORK OR OTHER INDIVIDUAL LOCAL VIEWING SOURCES MAY REFLECT TUNING AND/OR VIEWING ACROSS ALL HARDWIRED CABLE SYSTEMS AND/OR ALTERNATIVE DELIVERY SOURCES, INCLUDING SATELLITE (DBS/DSS, C-BAND OR KU-BAND) OR WIRELESS CABLE (SMATV & MMDS), WHICH COULD CARRY THAT SPECIFIC CABLE NETWORK OR OUT-OF-MARKET BROADCAST NETWORK FEED.

THE USER OF THESE REPORTED RATINGS DATA CONTAINED IN THIS ANALYSIS IS REMINDED THAT THE DATA, AS REPORTED, THEREFORE MAY NOT REPRESENT TUNING AND/OR VIEWING TO ANY ONE LOCAL CABLE SYSTEM(S) OR INTERCONNECTS(S) AND MAY INCLUDE TUNING AND/OR VIEWING VIA SATELLITE OR OTHER ALTERNATIVE DELIVERY SYSTEM TO SPECIFIC CABLE NETWORKS AND/OR OUT-OF-MARKET BROADCAST NETWORK FEEDS. IN ADDITION, TO THE EXTENT THAT REPORTED VIEWING INCLUDES HOUSEHOLDS VIEWING VIA SATELLITE (DBS/DSS, C-BAND OR KU-BAND), THOSE HOUSEHOLDS WILL NOT RECEIVE THE SAME LOCAL COMMERCIAL CONTENT AS HOUSEHOLDS WHICH VIEW THE SAME PROGRAMMING VIA CABLE SYSTEMS OR OVER THE AIR.

SPECIAL NOTICE

Based on an analysis of the number of households mailed diaries in this DMA for the first week of this measurement period, additional gross sample may have been selected and distributed evenly across weeks 2, 3 and 4 of this measurement in order to achieve the targeted number of households mailed for this market.

SPECIAL NOTICE

In a continuing effort to improve cooperation in the local market diary samples, Nielsen Media Research conducted a methodological research study during all four weeks of the July 2000 survey period among a 2% of the live production sample in which a first class stamp was used for the return postage of the diary instead of a business reply indicia.

In addition, the age of householder question was asked in the diary placement call so that test results can be evaluated by age.

Please contact your Nielsen Media Research representative for additional information.

SPECIAL NOTICE

In a continuing effort to improve cooperation in the local market diary samples, Nielsen Media Research conducted a methodological research study during weeks 1 and 2 of the July 2000 survey period among 1.5% of the phone records in 33 markets that receive bilingual treatment. The purpose of this study was to test the use of a bilingual pre-recruitment call postcard among high Hispanic penetration telephone records to see if it will improve the representation among Hispanic sample homes. Bilingual interviewers began the diary placement interview in the language in which the respondent answered the phone.

In addition, the age of householder question was asked in the diary placement call so that the test results can be evaluated by age.

Please contact your Nielsen Media Research representative for additional information.

SPECIAL NOTICE

In a continuing effort to improve cooperation in the local market diary samples, Nielsen Media Research conducted a methodological research study during weeks 3 and 4 of the July 2000 survey period among 2.7% of the live production sample across all markets. The purpose of this study was to test the effectiveness of the receivable channel roster that is mailed to cable diary households on cooperation, demographics and viewing levels.

In addition, the age of householder question was asked in the diary placement call so that test results can be evaluated by age.

Please contact your Nielsen Media Research representative for additional information.

SPECIAL NOTICE

Effective with the editing of diaries for the July 2000 survey period, Nielsen Media Research has modified how diary-keeper entries of 'tuning without anyone watching or listening' are edited. As a result of this modification, such entries will no longer be considered in determining if a household is forced as out-of-tab.

Please see the Client Notice dated June 23, 2000 (Nielsen Media Research Modifies Diary Editing Rule Effective with the July 2000 Survey), also available on the NSI client web site, or contact your Nielsen Media Research representative for additional details.

¤ 4-Week Time Period Averages

II AREA MEASURED (Cont'd.)

Central Area and is so delineated on the market map. For text purposes, the terms Metro and Central are interchangeable.

Designated Market Area (DMA) county assignments are made as follows:

A. In general, for an NSI market to qualify for, or retain, a DMA, all counties combined in the Metro/Central Area(s) must meet either of the following conditions: (1) the commercial stations assigned to the NSI market must achieve the largest share of the 7 AM to 1 AM average quarter-hour household audience in the Metro/Central area, or (2) one commercial station in the Metro/Central area must achieve a larger share of the 7 AM to 1 AM average quarter-hour household audience than any commercial station outside the market. In the absence of a Metro/Central area, the home county(s) of the commercial station(s) in the NSI market will be treated as a Metro/Central area.

B. All other counties including Metro/Central counties not qualifying under A. above will remain in the current DMA if the commercial stations in that market achieve the largest average quarter-hour audience share, 7 AM to 1 AM.

C. Each county (or sub-county) is assigned to one and only one DMA.

D. County assignments are reviewed and updated annually each spring based on information accumulated to date.

NSI Area: Comprises the Metro Area (if any) and additional sampling areas targeted typically to include, per NielsenTV estimates, approximately 95% of the average quarter-hour U.S. audiences to stations reportable and assigned as local to the NSI market. In general, NSI Area assessments are made each spring, based on information accumulated to date. Based on these assessments, NSI Areas are either verified or modified for subsequent measurements. In this manner, NSI is able to reflect audience changes which may have resulted from changes in antenna, channel, power, programming and the like.

Station Total Area: during the three all-market measurement periods, plus the July all-DMA measurement period, station total audiences are based on viewing data obtained from both within and outside a station's NSI Area regardless of location within the continental U.S. Although the sampling areas specified for a market's NSI Area typically account for virtually 95% or more of the average quarter-hour audience to a station, **viewing outside the NSI Area is also added to each station's total audience.**

See the NSI Reference Supplement for the procedure used to obtain station total audience for other measurement periods.

A more complete discussion of areas measured will be found in the NSI Reference Supplement.

III SAMPLING METHODS

Metered Households: Used for NSI television audience measurements of HUT, Rating and Share, the Meter uses wireline transmissions to a central office for home-by-home reporting of receiver tuning information for metered TV receivers.

Diary Households: In addition to the Meter sample described above, a separate sample of diary households from the NSI Area is surveyed for each measurement period. This sample of diary households is selected and used in the NSI Area as in every other Area with the exception of existing Metered Market DMA's. Household audiences for the latter areas are determined from the Meter sample and Audience Composition information is determined from diaries. For additional details, see the NSI Reference Supplement.

IV MEASUREMENT METHODS ARE DESCRIBED IN THE NSI REFERENCE SUPPLEMENT.

V REPORTING STANDARDS

Station Reportability: In order to be reportable, a station originating in and/or assigned as "local" to the DMA of this market must deliver a DMA cume audience in the Sunday-Saturday 7 AM-1 AM daypart equal to or greater than 9.5% to be reported in all sections of this analysis. If the DMA cume audience is at least 2.5% but less than 9.5%, the station is reportable in the Daypart Section and the Daypart portion of the Persons Shares Section only.

Stations originating outside the local DMA are reported in this VIP:

(a) In only the Daypart Section and Daypart portion of the Persons Shares Section if they achieve a Sunday-Saturday 7 AM-1 AM DMA cume audience of at least 19.5% but less than 49.5%.

(b) In the Daypart, Time Period and Persons Shares Sections if they achieve a Sunday-Saturday 7 AM-1 AM DMA cume audience greater than or equal to 49.5%.

Cable program sources originating outside the local DMA are reported in the Daypart Section and Daypart portion of the Persons Shares Section if they achieve a Sunday-Saturday 7 AM-1 AM DMA cume audience of at least 19.5%.

Households: The minimum standards for DMA household ratings (before rounding) are shown in Table 7 of the VIP Market Data Section.

The symbol < < is used to indicate levels below minimum audience reporting standards and to avoid the connotation of zero audiences. Station Total households estimates are reported for those periods in which the DMA rating for the station meets minimum reporting standards.

All data should be used in recognition of the related sampling error. Section VI provides additional comment on the sampling and non-sampling errors. It is also recommended that the interests of a user seeking more precise audience estimates for time periods or audience estimates for time periods or audience segments with relatively low audience levels, would best be served through special studies using specially structured samples disproportionately allocated to measure the segment of interest.

Tabulations from the viewing records yield "zero audiences" for some audience composition categories. Such "blanks" should not be interpreted as connotating zero audience levels in the universe.

VI STATISTICAL INTERPRETATIONS AND RELATED

A. STANDARD ERRORS:

Since the audience estimates in this VIP are obtained from a sample, they may differ from estimates based on a complete census of TV households in the same sampling frame and using the same methodology. The audience estimates are also subject to non-sampling variability. See item B.

Standard error is a measure of sampling variability for a probability sample. The standard errors apply only to a perfect probability sample. The achieved sample is not a perfect probability sample primarily because some households do not cooperate. For additional detail, including examples of standard error calculations, see the NSI Reference Supplement.

1. **Households:** Table 8A provides estimated standard errors for four week ratings and Station Total household audience estimates. Factors to be applied to standard error estimates from Table 8A to derive standard error estimates for one, two or three week periods are also provided.
2. **Persons:** The procedure to obtain the standard error estimate for a persons audience estimate is described in the NSI Reference Supplement.

The standard error estimates shown in or derived from Table 8A are approximations to the standard errors of audience estimates shown in this analysis, and provide an indication of the order of magnitude of the standard errors rather than the precise standard error for any specific audience estimate.

To meet the various needs of users, it is necessary to provide audience estimates for small units, such as small age/sex categories, small geographic areas and for one, two or three week periods. Even though such estimates may be subject to large relative errors, providing such estimates enables the user to combine them in various ways such that the composite estimate may have smaller relative errors.

Even estimates with large relative errors can be useful if only very large differences are of concern. Not providing such information would result in withholding information that might be useful by itself or in combination with additional information.

The standard error estimates published in this VIP or that can be derived from the published standard error estimates, describe the limitation of the audience estimates as clearly as possible without burdening every user with vast detail.

The responsibility for the use of information based on samples, including judging the magnitude of errors and recognizing situations where differences are of no statistical significance, lies with the user of such information.

B. REMINDERS:

General

Data in this VIP are also subject to qualifications other than the statistical tolerances arising from the use of sampling. For example, the accuracy of these data may be affected by: (1) the quality of sampling materials and sampling techniques that yield the sample design; (2) the inability to secure cooperation from all households in the predesignated sample or the failure of the cooperating household to provide usable data, sometimes referred to as non-response error; (3) matters of definition such as listening and/or viewing vs. tuning; (4) accuracy in the reporting of a) viewing and/or b) the characteristics of the household or individual, sometimes referred to as response error; (5) techniques that permit inspection and rejection of faulty information from the sample, quality of data processing, inspection of final tabulations, and similar production techniques illustrative of and sometimes categorized as administrative accuracy safeguards. Therefore, non-sampling errors cannot be warranted to be absent.

Diary Sample

Recognizing the use of a telephone universe and problems of response and non-response errors. NielsenTV does not intend to imply that all TV households in the areas sampled are distributed in the proportions shown for the in-tab sample in Table 6. Comparable U.S. Census data are not available for comparison with the predesignated sample. The user is reminded also that in-tab sample counts give disproportionate weights to the various Sampling Areas, to the extent that sampling rates and/or cooperation rates vary by Sampling Area.

Audience projections can be expressed as percentages of the NSI Area universe estimates shown in column 4 of Table 6. Such percentages do not take into account in the base audiences from outside the NSI Area. Therefore, this procedure typically results in a slightly larger percentage than would be computed for the NSI Area alone.

Clients are also advised that diary records tend to understate TV audiences during daytime time periods, toward the close of the 7-day diary week, and during late-evening time periods. The foregoing statement is based upon the results of NielsenTV research, comparing the results of National samples, and is not necessarily applicable to any one market or station.

If the proportion of households belonging to a particular ethnic or socio-economic group is lower among the television households **available for selection** in the sample used for this analysis than among all television households in this market, then that group will be under-represented in the sample **selected** for diary placement by NielsenTV. The effect on the audience estimates reported herein may or may not be significant, depending upon considerations such as: (1) the proportion of all television households belonging to that group, (2) the extent that viewing patterns for households in that group differ from the market as a whole, and (3) the extent to which that group is under-represented in the sample. Likewise, if the proportion of households in that group returning usable diaries is less than that for the entire sample (because of non-cooperation or other failure to return any diary, language barrier, educational levels, inability to provide viewing data or other reasons) that group will be under-represented in the sample. The effect on the reported audience estimates will depend upon considerations similar to those listed above.

For Total Telephone Frame sample selection procedures – see the current NSI Reference Supplement.

VII PERMISSIBLE USES OF THIS ANALYSIS

EACH NSI CLIENT IS LEGALLY OBLIGATED – BY CONTRACT – NOT TO LEND THIS ANALYSIS OR COPY ANY SUBSTANTIAL PORTION THEREOF OR OTHERWISE DIVULGE THE CONTENTS, EXCEPT AS SUMMARIZED BELOW. This analysis is furnished pursuant to Client's employment of NielsenTV to secure these data for the Client's confidential use and is furnished on the basis of Client's representation that it has a continuing legitimate business interest in the subject matter herein and on Client's agreement that the divulgence of the contents will be limited as follows:

Advertiser Clients:

(a) To Client's own organization – including sales representatives.
(b) To Client's own Advertising Agencies, active or prospective, provided that the data will not be used for time-buying purposes or otherwise except only for serving the Client.
(c) To Stations contracting for this service.
(d) To Program Producers and Artists serving or negotiating with Client's organization.

Advertising Agency Clients:

(a) To Client's own organization.
(b) To Client's clients and prospective clients excluding stations who are non-clients to this service.
(c) To Program Producers and Artists serving or negotiating with Client's organization.
(d) In connection with time-buying, to stations contracting for this service.

Station Clients, Station Representatives, Producers and Other Clients:

(a) To Client's own executives – including sales representatives.
(b) To Agencies, Advertisers and others having a legitimate business interest in the subject of this analysis, provided that no divulgence will be made to non-client stations or their representatives under any circumstances and that this analysis will not be lent to nonclients, whether Advertisers, Agencies, Stations or others.

NielsenTV's prior written approval is required for quotation of these data in advertising, promotion or press releases. Such approval may be withheld unless the quotation is in accordance with NielsenTV's policies as may be indicated to Client in writing from time to time. No officer or employee of NielsenTV is authorized to give oral approval of any form of publication.

WARNING: Nielsen Media Research's reports consist entirely on subscription revenues. Both the agreements with our subscribers and Federal law (17 USC 101 et. seq.) prohibit the copying and/or distribution of this Report without Nielsen Media Research's consent. Our contracts further prohibit disclosure of the contents of these reports to non-subscribers. Any violation of these prohibitions will be treated as a breach of contract and willful copyright infringement, for which Nielsen Media Research will seek the maximum Federal penalties including attorney's fees and cost of enforcement.
