

"THE DX RADIO MAGAZINE FOR ACTIVE SHORTWAVE LISTENERS"

Vol. VII No. X

KEYNOTES

Editor: OLIVER ELLSWORTH 2043 West 75th Street, Los Angeles, California 90047

CONGRATULATIONS TO 9 NEW FULL MEMBERS

KENT BREITUNG ADDISON, IL

CHARLES FRANCK VIRGINIA BCH. VA

WILLIAM HEATH JR. LOUISVILLE, KY

CHESTER HOWARTH SPOKANE, WA

KEN HAMILTON SAN DIEGO, CA

EDWARD INSINGER PLAINFIELD, NJ

JOHN MORITZ YOUNGSTOWN, OH WILLIAM YOHANA UPPER SADDLE R. NJ

GRANT MANNING ESCONDIDO, CA

Certificates of Full Membership and a copy of the SPEEDX Constitution are being mailed concurrently herewith to each of the above new members.

SPEEDX WELCOMES THE FOLLOWING NEW ASSOCIATE MEMBERS

DAVID STIFFLER	RICKY BAUM	DANIEL MORISSEAU	STEVE SHOTOLA
NEW YORK, NY	GAINESVILLE, FL	OMAHA, NE	LA GRANGE PARK, IL
BRIAN SAADE	VICTOR DEWITT	RANDY LINDSEY	JERRY HOOK
FONTANA, CA	ALLIANCE, NE	LINDENWOLD, NJ	FT LAUDERDALE, FL
LEE ANDERSON	RON SEILER	EDWARD STROH	BARRY RIDDIFORD
OLYMPIA, WA	B.C.,CANADA	RIVERDALE, IL	SOUTH AUSTRALIA
PEGGY THOMPSON	JEFFREY HOPKINS	ROBERT RUST	JOHN PRATH
LA CRESCENTA, CA	SCRANTON, PA	EUGENE, OR	FT LAUDERDALE, FL
SEIJI ARAMAKI	GREG PAOLINI	ROGER PETERSON	WAYNE LAKE
JAPAN	STAMFORD, CT	NEW CANAAN, CT	SAN FRANCISCO, CA
THOMAS KELLY	BILL HARANG	JAMES GARMS	JOHN HOOGERHEIDE
NEW YORK, NY	SAN JOSE, CA	SUN CITY, AZ	BRANDENBURG, KY
ALLEN MORSE	FRANK SCHLINKE	JULIO LAPON	NORMAN HILL
JUNEAU, AK	MILWAUKEE, WI	MINEOLA, NY	FAIRFAX, VA
CHRISTOPHER BONNER	We ar e also ve	ery happy to welcom	e back a few
HAMILTON, OH	former SPEEDX	ERS, Serge Neumann,	where have you been.

We are looking forward to hearing from all of you often. SPEEDX urges you to support the various sections by sharing your knowledge and your loggings with the full membership.

MERRY CHRISTMAS SPEEDX STYLE

SPEEDX will again raise funds for the HANDICAPPED AID PROGRAM (HAP) by the SPEEDX will again raise funds for the HANDICAPPED AID PROGRAM (HAP) by the use of an artistically designed Holiday Greeting page, however we need your cooperation. The names of each of you donating \$1.00 or more will appear on the page in the December issue. Your way of wishing all your DX friends Happy Holidays. In lieu of sending those friends a Christmas card, send a donation to SPEEDX Headquarters in Elsinore as soon as possible. Please indicate that the money is for the HAP Christmas Fund, SPEEDX style. Keep in mind the December issue will go to press on November 25th. Please give us time to insert your name on the traditional Holiday page and in the hands of the publisher by deadline. We want to be sure your name appears on the page. and do not want the issue to be late. do we. page, and do not want the issue to be late, do we.

This program is an important program, as the money raised is used to help HAP through the coming year with their many projects.

(Keynotes continued on page 55)

RESEARCH/COMPILATION/REDACTION by A. W. BRCOKS Oakdale, Connecticut 06370 74 Massachusetts Road

MY DESERT IS CALLING (or "Get Your Camel Over The Hump"): How well I remember my initial account. How well I remember my initial account. eral unanswered reports over a couple of years I finally let out a plaintive, yet public, cry. A few DXers respond-ed immediately with the pertinent information..., the post what all this is about the post number of Werner Storg..., and the next report But. the exper- but a How well I remember my initial attempts to QSL the Broadience of Hawaii SPEEDXer Dennis Streveler was stranger by far. Recently Dennis received an immediate reply to his d BSKSA report...and it brings back memories of my literary adventures with Brasilia's Luthero Toledo ... , Dennis's reception report was returned to him in an envelope with no return address. Scribbled on the back of his report was the following handwritten message "I am afraid nobody here understands what all this is about - but it was very kind of you to write whatever you wanted. I can, in return give you a tip to make some money: start asking your local antique dealers for GOSS CHINA which will double in value quite soon." Wonder if Luthero has an Arab cousin?

GIVING YOU THE SHIRTS OFF OF THEIR BACKS: Radio Sweden now has T-shirts available in blue with yellow "Keep In Touch" text for its listeners. Price is \$3 (US), which includes postage. State size...extra small, small, medium, large, or extra large...when ordering from Radio Sweden

AND ZIP CODES MOVE THE MAILS: Limited mail service to Lebanon was resumed last January as noted by Bob Butterfield ... and expansion of postal service to Viet-Nam is pointed out by Andris Straumanis. The latter includes standard postcards, as well as letters and letter packets weighing up to four ounces ...

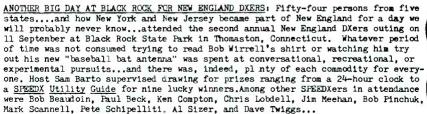

YOU'RE NOT LIKELY TO HEAR IT ON RADIO THAILAND, BUT ... villagers north of Bangkok may have found a way to beat high meat prices. In a UPI release forwarded by Glenn Hauser it is noted that these citizens killed at least 20,000 rats one weekend to protect their fields...then ate the rodents... according to one official, "Rats eat our crops so we'll eat them." Though it is probably of as little comfort to you as it is to me, the Thai rats are hardly the same as the garbage-eating sewer variety of the American big city...these rodents feed from the bountiful paddy crops of the local peasants. Farmers estimated losses of more than \$500,000 to the munching rats this year alone. So a weekend hunt was organized with the Saturday night rat barbecue as the main attraction. Rumors abound that a sign was erected on the spot proclaiming "over 23 billion served".... You deserve a break today

SYMPATHY NOTES: Sincere condolences to our first SPEEDXer-of-the-Year, Bill Shaw, whose beloved wife passed away on 11 July after a lengthy bout with cancer ...

ACORNS FROM OAKDALE:

.. continued use of saccharin will result in artificial diabetes

OBIVIOUS TO CONSEQUENCE "DX MONTAGE" MARCHES ON WITH

.... IF YOU MUST BLAME SOMEONE FOR THIS CONTINUATION, MAKE IT ALAN W. BROOKS!

SAVE TIME AND \$\$\$\$; Florida SPEEDXer Tommy Lunstrum feels there is a way to save both postage and time. While browsing through the WRTVH some time ago Tommy noted that a couple of pages listed the addresses of religious organizations in the United States..., and also noticed that under the headings were listed the stations these groups owned or operated. So he wrote to the main addresses and asked for the schedules of these stations. Two of these organizations replied with schedules for all their affiliates and three of the others indicated that they had forwarded member Lumstrum's address to their stations for forwarding of schedules direct. Tommy points out that he saved about three dollars from just the six stations contacted this way...

TRANS WORLD RADIO

DX MONTACE'S MINI-SUPPLEMENT TO THE WORLD RADIO-TV HANDBOOK 1977: For those of you waiting breathlessly for word on the interval signal being used by Trans World Radio's new outlet on Merizo's Mount Schroeder in Guam...here it is...the first line of the evangelical Protestant missionary hymn "We've A Story To Tell To The Nations"...,and it is rendered in a chime-like instrumentation:

THE PASSING OF "ORANGES AND LEMONS": Those of you who have been listening to the BBC in recent weeks may have noticed that the station has changed its identification signal from the old English nursery-rhyme tune "Oranges and Lemons" to a simple peeling of bells. Member Roger Peterson presumes that London has some good reason for this change ... nevertheless, he feels a lot of old listeners are going to miss that famous tune ... Roger first heard it in France in 1944 in the farm house of a member of the French Underground who was helping him escape to Spain after his B-17 had been shot down ... and notes that tune brought hope to thousands of Frenchmen who were waiting for the Allied invasion. Aside from the nostalgia. the new I.S. sounds like a couple of others and might just lead to some confusion ...

RADIO FRANCE INTERNATIONAL-ST.FIERRE RELAY: the French Government, perhaps with an eye on uranium deposits and other natural resources in northern Quebec, is planning "a cultural and economic blitz" on the Province and promoting its independence. That's what a CTV television report stated a while back according to an item forwarded by SPEEDXer Wesley Rogers. The report on this "French Connection" suggested that France has vested interests in an independent Quebec, since that would remove roadblocks said to be in the way of French access to Quebec uranium. The report further stated the former colony of St. Pierre and Miguelon ... now a Department of France ... is "suddenly being transformed with a new naval base, an air base, and a powerful radio transmitter to broadcast French culture into Quebec and Acadia."

<u>ALL THE NEWS THAT'S FIT TO RELAY</u>: You do not have to be an SWL very long to become totally familiar with the "timeliness" of "news" broadcasts from the "eastern bloc" transmissions. This strip clipped from the local media by the sharp-eyed Jack Jones may go a long way to-ward explaining the relay method employed by these agencies...

VICTOR DEWITT Victor would like to hear from other members who have used a freq readout or counter with the DX-160. Write to Victor at:Long Lake Route, Alliance, NE 69301.

E. V. "SANDY" BLAIZE Sandy is looking for a schematic for a Motorola 12 volt mobile SW converter. It uses a 12AT7 tube and covers 4.7 - 16 MHz. Sandy also needs a service manual for the ARR-15 aircraft receiver. He would like to borrow the manual to copy. Write to Sandy at:417 Ridgewood Drive, Metairie, LA 70001.

<u>FRG-7 DIGITAL READOUT</u> Readout for the FROG will be available in early October from HRO, 2620 West La Palma, Anaheim, CA 92801. Cost is \$135.00(plus tax in CA). Price includes buffer(which must be installed inside your set) and UPS return to you. This outboard unit is 6'' x 2'' x $6\frac{1}{2}$ '' and is powered from your set. Send money with your order, and of course, your FROG. Ham Radio Outlet also has package deals on new FRG-7s: FRG-7 with digital readout is \$405.00. Modified FRG-7 with digital readout is \$434.00. All prices are plus tax in California and are good in the USA only. Foreign inquires welcomed.

<u>RECEIVERS</u> I have on hand spec sheets from Sanyo, Panasonic and Sony on some new receivers. Most are portable, most have frequency readouts & most are in Japanese so I can not read them. A few may hit the US market next year, I'll keep you posted. Thanks to all who sent spec sheets to me. If you come across spec sheets for new receivers, especially in English, send them to me. If I get specs in English, or learn Japanese, I'll publicize the sets.

LARRY BROKKWELL Larry has sent in a short review on the McKay-Dymek DA-100 Antenna. Test was made using a Drake SPR-4 w/modifications, a 50' long wire antenna and a KS Preselector.

At first trial the McKay-Dymek DA-100 appears to increase the S-meter reading considerably. However, if the receiver is tuned carefully using the S-meter, and the DA-100 is then switched on, the S-meter gain is only minimal. The audio gain is hardly noticeable. In comparison with the KS Preselector, the Dymek does not approach the S-meter gain produced by the Preselector.

For the SWLer without space problems the only advantage of the DA-100 is it's ability to stabilize the incoming signal. This is visable on the S-meter where the fluctuation of the pointer is eliminated. For the SWLer with space problems(i.e. apartment dwellers) the DA-100 is ideal. It delivers a signal strength equal to, or slightly in excess of, that produced by a standard long wire antenna, but requires only space for an inconspicuous (56") whip, and does not require a ground plane or radials.

Disadvantages noted: On some frequencies, or signals, the DA-100 appears to amplify the noise to signal ratio, and the audio is clearer without the DA-100. On frequencies where two or more signals share the channel, the DA-100 appears to bring all these signals to the same level, creating a jumble of signals impossible to untangle. Normally the listener could await normal fading to free the stronger station for identification.

Conclusion: Ideal for space limited SWLer. For the average SWLer, hardly worth the investment. A good Preselector, with amplification, offers more.

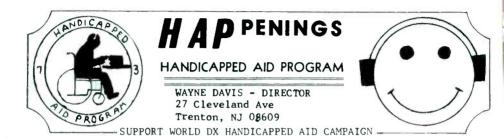

Thanks for that review Larry. The McKay-Dymek DA-100 is available from:McKay-Dymek Co., P. O. Box 2100, Pomona, CA 91766. Or phone toll free 800-854-7769(In California the toll free number is 800-472-1783). I believe the price is \$145.00. Write or call for info.

AUTEK QF-1 AUDIO FILTER 'Sometimes member' Neal Perdue sent in this note after reading my short write-up on the QF-1 in the June column, and buying one. "Thanks! It's fantastic! My receivers are the SW-4A & HA-600A, and they need all the help they can get on select-ivity. The flexibility and usefulness of the QF-1 is almost unbelievable. With band-scanning in 'rough' tune positions, and careful tuning on tough ones, I can literally raise stations that 'weren't there'. The het-null feature just has to be heard to be believed! Thanks again. (signed Neal Ferdue).....

The QF-1 is a very useful piece of equipment after one masters its operation. This unit is <u>not</u> for the fast knob twister or the impatient! It's excellent if operated properly. Available from:Autek Research, Box 5127-B, Sherman Oaks, CA 91403. Cost:\$55.00(+tax in CA)

Thanks for all the help this month gang! Keep it coming.

73 Ralph

To get things rolling this month, the Handicapped Aid Program would like to offer a well deserved pat on the back to our friend Clayton Howard, the recipient of the International DXer of the Year award, and Glenn Hauser, who was cited as the North American DXer of the Year at this year's ANARC Convention.

HAP would like to offer special congratulations to Ted F. Poling of Beardstown, IL for his selection as HAP Man of the Year. We at HAP were particularly pleased to confer this honor on Ted, since his long years of service in the formative years of the program exemplify the true spirit of HAP.

Ted became involved in the program back in it's early days after reading about HAP in an article published by Woody Seymour of the American Short Wave Listener's Club. He was later encouraged by Woody to become vice chairman of the Pals program, which offers HAPies a DXer to visit and offer hobby tips and assistance. Ted was later promoted to the post of Pals Chairman.

Later, Ted joined the HAP board of directors where he played a vital role in the establishment of policy and formation of the HAP International Coordinating Committee, a body that establishes guidelines for overseas HAPs.

Upon the resignation of Bill Panschke, Poling assumed the post of HAP Assistant Director. Ted served HAP in this capacity until July of 1975 when HAP Director, Gene Moser resigned to enter private business, passing the director's gavel over to Ted.

In other convention related matters, HAP would like to express it's thanks to Jeff White and Kevin Mikell for their hard work in making the HAP auction such a success. Through the donations of many DXers attending the parley, the sale of a wide variety of hobby related items raised a total of \$176.50 for HAP projects. By the end of the evening, the total was raised to \$250.33 thanks to the kind donations from those at the convention. This cash will be used to purchase a new supply of Realistic DX-40 receivers to help keep up with our membership growth.

Speaking of receivers, you've probably seen announcements of HAP's equipment drive in various club publications. We need your help! So far in it's early weeks, the drive has been supported by four DXers who have donated equipment for use of disabled DXers. We still have a long way to go, however, since we have several applications on hand that cannot be processed because of the lack of suitable equipment. So why not check into those dark uncharted corners of your radio shack, and see if you have a receiver, book or some other piece of gear that could be put to good use by a disabled newcomer to the hobby. If you find something that you would like to donate, just drop me a line at the above address, and I will rush shipping instructions your way. A complete list of donors will be published in this space at the conclusion of the drive.

In other developments since my last column, HAP has been given the capability of offering a new service to our blind members. Through the efforts of Jim Conrad and Mac Leonhardt of NASWA, a master tape of the popular "DXing According to NASWA" publication has been provided to HAP headquarters for the distribution to our newly added blind members. This tape can now be copied onto cassettes and sent to the HAPies with their new member package.

In closing, I'd like to remind everyone to keep their eyes and ears open for the announcement of our new tape series which will be available in the near future. Until the next time, Best of DX. 73's Wayne.

A NEW DIRECTION FOR BRAZIL

Radio Nacional de Brasília has announced the cancellation of a contract with the Swiss firm of Brown Boveri which provided for the installation of seven more 250 kw HF transmitters in addition to the one already in operation. The reason given was the escalating cost and a shift in official policy. Both are quite believable owing to the problems Brazil is having with its Balance of Payments and the cessation of the International Service in favor of broadcasts to Amazonia.

Speaking of those broadcasts, the BBC MS this past month noted that the Rondon Project organization has been retained to determine the kind of programs that should be beamed to the Amazon Region. Moreover, during the "week of the Fatherland", 4-10 September, the Brazilian Communications Minister, Euclides Quandt de Oliviera, inaugurated the new shortwave service for Amazonia. This service will include reports every 30 minutes on matters such as health, agriculture and regional festivals as well as two hours of popular music. These new broadcasts are aired from 1900 -2400 GMT on 11780 khz.

----- 00000 -----

The new 100 kw transmitter of Radio Nacional de Chile is being widely reported on 15150 and 15130 khz where the program "The Voice of Free Chile" is booming in with powerhouse signals. This transmitter was inaugurated on 7 July by President Pinochet and is the first of a series being supplied by Harris.

----- 00000 -----

Political parties in Venezuela, Colombia, and Costa Rica are gearing up for elections to be held in the near future and DXers can expect to hear an increasing number of politically oriented programs. Election campaigns often bring extended broadcasts as well as reactivation of dormant transmitters so look for them.

Speaking of elections, the names you'll hear a lot of from Costa Rican stations in the next few months are the Presidential candidates: Rodrigo Carazo, Partido de Unidad; Rodrigo Gutierrez Saenz, Coalición de Vanguardia; Luis Alberto Monge, Partido de Liberación Nacional; and Guillermo Villalobos, Partido de Unificacion Nacional.

----- 00000 -----

Sweeping the bands this past month we note several interesting catches. Radio Tawantitsuyo, 6175 khz, has been logged just after its 1000 GMT sign-on. You need good ears to catch this Peruvian but the programming is unmistakeable. A real surprise was the English language programming on S.O.D.R.E. noted 0255 - 0315 GMT on 9515 khz. This 20 minute segment featured news, weather, and a travelogue with frequent requests for program comments to Dirección de Radiodifusión SODRE, Mercedes 823, Montevideo, Republica Uriental de Uruguay. The BBC MS reports Radio Nacional de Paraguay active on 9735 khz but so far no reports here. What was, however, is Emisora Paraguay which was noted on 6015 khz with sign-on around 0930 GMT. This is the time of year to look for those goodies from down under so catch them while you can.

Learned today I'll be spending next week in Venezuela so I'll cut this short. Before I turn things over to Tim, however, a reminder that loggings should go to him, not me. I do forward those received but several weeks delay can result. A big month, so on with the loggings...

-DX FLASH

The following items come from the BBCMS and can only be relayed with their premission.

**BOLIVIA

....

Radio Pitai in Santa Cruz was observed on their regularly scheduled frequency of 9607 on July 8 after being off the air for undisclosed reasons for the past sonth.

**CHILE

On July 21 La Voz de Chile was monitered On 9581 at 0230 in Spanish. English is scheduled from 0250-0310. This frequency replaces 9561. La Voz de Chile was also noted on a second new frequency of 11825 which replaces 11810. It is used from 1305-1510. The language schedule is as follows: 1305-1325 EE, 1325-1350 SS, 1350-1410 RR. 1410-1425 FF, 1430-1450 EE, 1450-1510 SS.

**NETH. ANTILLES

According to a recent announcement this summer from Radio Nederland their English services will be cut back. Programs will be reduced from 70 minutes to 20 minutes. The only exception is Happy Station. It will be carried for the useul 70 minutes. Personally I'm glad to see that they don't plan to cut back on this great show.

PERU

R. Nacional on 9530 announced that they are changing networks. They will join "Cadena Nacional" sometime before the end of the year.

Before we end for this month I would like to say a few things about this column. I have been recieving reports from some people way after the 15th. I recieved in the mail this morning a batch of loggings. There must be a deadline. Jim Whitehead is also recieving reports. If you send them to him the chances are that they will get here to late to make the column.

I tried some ideas that people sent me on how to improve the column. I'm open to ideas sugestions, and criticism. Don't be afraid to send them to me.

Be careful of the loggings that you send to editors. I recieved a report from somebody in New York. There was no name on the envelope or on the loggings. The loggings were typed so I can't compare handwriting. Also try to make your handwriting ledgeable. I have to really struggle sometimes to real loggings. Your coperation is really appreciated. It makes a slow job go faster. Thanks.

We had arecord show for this month. 71 reporters. Now that winter is here lets have all of you send in your best loggings next month. I cut out VOA and RCI so I could aqueeze the other meaty ones in. I'll do that most of the winter because of the lack of space. Hell that's it see you next month.

73's July

	Ciao!	This month's column done by yours truly, Bob Butterfield,

Ciao! This month's column done by yours truly, Bob Butterfield, substituting for Peter who'll be back next month. It's been about a year since I last did a column (the then Europe/Africa section) so excuse any mistakes on my part. Quite a response from the 71 reporters this month and we had to do quite a lot of editing to cut down to five pages, so don't be disappointed if all your loggings don't appear. A special "Hi ya" to all familiar names. 'Til next time ... '13 Bob 18

FLASH-----FLASH-----FLASH-----FLASH-----FLASH-----FLASH

From Bob Donly comes this news about the SABC and RSA's new xmtr's: In a letter to Bob, P.V.D.M. Martins of the SABC states: Concerning Radio 5, I wish to inform you that the station's shortwave outlet became operational on 8/1/77. Reception in the U.S.A. however, is unlikely, as the antenna radiation pattern is umbrella shaped which means that the signal level in the U.S.A. will be either non-existant or very weak. The English, Afrikaans and Springbok outlets are radiated on directional antennae..... He goes on further to say that the new 500 KW transmitters of Radio RSA, will take the air on November 6, 1977.

RADIO 5 Schedule: 0300-0530 1530-2200 0530-1530

3388khz 3388khz 6010khz

RADIO RSA - - - - -

From Glenn Hauser: 'Qaddafi seems to have a thing for even hundreds, for all of his new high power xmtrs showed up here, on 11700, 6100, 9500,15100. All heard at many times, with 9500 best in eves to NAm. Coincidentally R. Clarin soon redisappeared from the freq. of 11700, still gone as of 8/29. checked almost every day."

MORE ON THE LIBYAN SCENE FROM Woody Smith:

Weody states: 'According to a British Pirate Radio magazine which I have (<u>Monitor Magazine</u>, c/o Roland Pearson, 31 Avondale Road, Benfleet, Essex 557 1EH, England. 3IRC's or \$1), the station on 6205khz is indeed MEBO II, from the Libyan coast, with the 'unmistakable voice of Robin Banks himself' (Robin was the announcer for Radio Nordsee International, former occupants of the MEBO II's xmtrs.) Also in the German language, Radio News, in one of its few English headlines states, MEBO II back on the air, on 6210 khz. The article goes on to give an address for the MEBO II as: L.J.B., P.O. Box 333, Tripoli, Libya. L.J.B. stands for, get this, the Libyan Arab People's Socialist Jamahiriyah BCST. CORP., what a mouthful!!! That's the first address I've seen for this mystery station, so go after them boy's and do not forget to report any answers to inquiries. Thanks Woody for this bit of enlightenment......wlo

From Richard Ginbey: Swaziland Commercial Radio which has been operating recently under the slogan 'Swazi Radio' has undergone another name change to 'Radio SR.' English programming has been cut and is now Mon-Fri from 0700-0900, none on Saturday, but on Sunday from 1600-1630 and 2000-2200.

Thanks to the 52 reporters this month, and please keep up the good DX. My apologies to Bob Donly, after I typed all of this Bob, I found your packet of 10 loggings under my chair, sorry Bob, but thanks for the SABC info. and I promise it won't happen again. If anyone wants to get an answer from me in a hurry about something, write me at: 14 Strafford Ave. Apt. B-7, Durham. NH 03824. mv school address. 9/18/77 BCNU in 30.... Wayne

MARCONI 75th ANNIVERSARY SPECIAL EVENT STATION -- The ARRL has announced that during the week of Jan. 14-22, 1978, the first two way radio transmission between the United States and Europe by Guglielmo Marconi in 1903 will be celebrated by the operation of <u>KM1CC</u> from the original Marconi station location in South Wellfleet, <u>Massachusetts</u>. The Town of Barnstable Radio Club of Cape Cod is the sponsor, and will be operating KM1CC on the 160m through the 10m bands, cw, ssb, RTTY, and slow scan TV. A 2 fm and 6 SB station is also planned. The FCC has approved the use of A2 on all amateur bands and the famous sound of the 240 hz rotary spark gap Marconi station will be reproduced for CW QSOs. British hams will be operating a special event station at the original Marconi Station location at Polchu, England. A message from President Carter will be passed from KM1CC to England during this period. The QSL Manager for KM1CC is: Special Marconi Anniversary envelopes are available from KiVV R. J. Doherty RFD#1, 14 Pine Street Sandwich, Massachusetts 02563.(10 for \$1.50 postpaid). (Certain Mass. ute DXers have attached some significance to the fact that in the special call assigned by the FCC, <u>KM1CC</u>, the first and last letters of the call constitute my initials. There is probably

SYD EDWARDS, our man in Australia, has compiled lists of Royal Australian Air Force freqs and SP & SEA aeradio freqs for his fellow SPEEDX ute DXers:

SOUTHEAST ASIA (SEA3) AERADIO FREQUENCIES (SLA) ALHADIO FREQUENCIES 2987, 5673*, 8868*, 13288, 17965 2987, 5673*, 8868*, 13288, 17965 2987, 5638, 8868*, 13288, 17965 (+ = SEA1) 5673*, 8868*, 13288, 17965 2987, 5673*, 8868*, 13288, 17965 5638, 8868, 13288 Darwin (VKD) Perth (VKP) +Kuala Lumpur Singapore Jakarta (POB) Ulung (POJ) SOUTH PACIFIC (SP6) AERADIO FREQUENCIES Auckland () 2945, 5638*, 8847*, 13304, 17909 Nandi (3DN) 2945, 5638*, 8847*, 13304*, 17909 Sydney (VLS) 2945*, 5638*, 8847*, 13304*, 17909 Tahiti () 2945, 5638*, 8847, 13304, 17909 Sydney (VLS) Tahiti () 17909 2945, 1 Norfolk Is. (*indicates most used frequencies These stations all are AM and operate 24h daily. ROYAL AUSTRALIAN AIRFORCE FREQUENCIES "Airforce" is used for the voice calls, e.g., "Airforce Darwin". "RAAF" no longer used in RAAF voice calls. Z following times = GMT r freqs seem to be AM. FREQUENCIES 0900-2100Z: OTH Darwin AXT AXJ Perth (Pearce) Sydney AXF Townsville AXH #indicates most used freqs. 3032 khz is SSB, all other freqs seem to be AM.

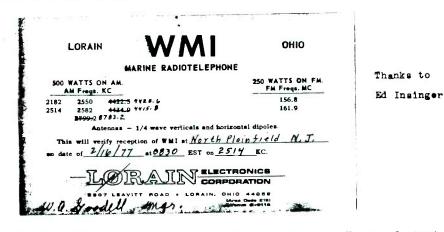

UNID'S ID'D: Well, maybe not. Two SPEEDX uters have uncarthed different information re the unidentified VNP on 8474a with a CQ mkr. BILL TRUBEE-HI has found it listed as a navigational beacon at Cape Levesque, Western Australia. With a CQ marker, Bill? MEL HICKMAN-OR found it in an Admiralty List with the QTH of Haiphong, Vietnam(!) and 1000w & traffic lists every hour on the hour. And it's a little difficult to decide between these two IDs: VNP of course lies within the callsign bloc assigned to Australia, but a navigational beacon with a CQ mkr is unusual. Is there an Aussie shore station at Haiphong?! Or could it be a Vietnamese station with an eccentric callsign?

Sam Ward of 104 S. Westmoor Ave., Columbus, OH 43204 is trying to get tapes of U.S. NOAA Weather Radio stations, and is particularly interested in the NOAA stations at Concord, N.H., Burlington VT, Anchorage AK, Honolulu HI, Eugene OR, Seattle WA, Wilwaukee WI, NYC, Dallas, Corpus Christi & Brownsville TX, all CA stations, Indianapolis IN, Providence RI, and the new stations in Albany & Syracuse NY when they come on the air. If any SPEEDXer can help him he prefers recordings on open reel but cassette will also be fine.

OSL REPORTS

Editor: Bill Cleveland 2441 Fairview Drive Visalia, Calif. 93277

Verified Countries -- 140

Deadline: 15th of month

The number of reports and the number of reporters are both down this month, but to the faithful and the seven new reporters, my thanks.

With reference to the reports from Laos last month, I have a further communication from Dave Peters which I would like to quote for whatever moral it may contain: "In reference to my letter from Laos, well I made a homemade QSL card and sent it to them and thanked them for the letter, but told them I was hoping for a full data QSL. And I told them why I prepared the enclosed card and ask them would they be so kind and sign it and it would confirm my report. On the 22nd day I looked in my mail box and there is the homemade QSL card duly signed and with the Laos seal and two Laos stamps. The date was May 7, 1977, Time-GMT 1240 hours and the Freq 6130. The signer was: Chaleun VONGSAM-ANC, Title: Director General" Guess that proves that a little extra work does pay off.

As usual, reports are assumed to have been made in English unless indicated to the contrary; please do not indicate sites for R. Moscow xmsns unless a site is indicated on your QSL.

Europe

ALBANIA: R. Peking Relay, <u>9780</u>, date/fqy cd "Logging camp in Mountains" in 18d air, no rp (PECENKA IN), logo cd + pennant in 63d sfc (FOWLER ONT), date/time cd "Store grain Everywhere" in 18d air (FRASER MA)

James

Lots of new members in the past nine months, so for their information and as a reminder for old timers, I'll repeat a few of the things I've said so many times before. First, my deadline is the 15th of the month--that means here in my hot little hands on the fifteenth. Since QSIs are not classed as dated material, I normally start typing on the fifteenth -- anything arriving after that date will appear the following month. So allow yourself plenty of time. In general, mail from the east coast will arrive in 3-4 days, but it is not at all uncommon for it to take 6 days or longer. I would suggest mailing by the 10th if at all possible -- anything later than that and you are gambling -- and like

any gambler, you must be prepared to lose on occasion. Second, I am always glad to receive copies of your QSLs--common or uncommon. But they must be good, reproducible copies. Good contrast is essential. The lines of your copy should be as sharp and black as the typewritten copy (I use a carbon film ribbon). Line drawings and maps usually copy better than photos, although there are tremendous differences among different makes of copiers. If you don't think your copy is much good, throw it away; if you aren't sure, send it to me and I'll throw it away; if you know it is good, send it posthaste. Or, if you wish, you can send me the original and I'll try to get a usable copy. If you do this, however, be sure to let me know whether or not you wish your original QSL returned to you. I normally will not repeat a card within two years. If you send copies of both sides of the card, do not paste them together. And it doesn't hurt to fold them once or twice for mailing in a letter size envelope.

Third, the sign that (usually) appears each month. The signs are common signs that might be seen along our highways or around our public buildings and are written in languages that may be heard on SW radio, usually by a native of the country concerned. It may or may not be a literal translation, depending on the language and concepts available. To the first letter in with the correct translation, SPEEDX will award a SPEEDX pennant

and I will donate 5 bucks to HAP in your name. If there is no correct translation, the first one that correctly identifies the language will be awarded a bumper sticker. Take a chance-you lose nothing and if you win, so does HAP--and it's a worthy cause. Here A FRENTE ACABA O CAMINHO is an easy one. Finally, remember that I can accept only SW broadcast QSLs. No MW QSLs at all, and all Ute QSLs go to Ken Compton and the Ute Section. Sending them to me just means that I have to forward them on to Ken with the inevitable loss of time and postage. Guess that about wraps it up for this month. C U in 30. 9/15/77 73's, Bill

HOW TO FORM A LOCAL GROUP by chris hansen How chris hansen HOW TO FORM A LOCAL GROUP In recent years, the development on the DX scene which has seemed most promising has been the "local group." Whether in Boston, New York, Fhiladelphia, Washington, Virginia, Chicago, California, or other places, the local group has been the way by which the formerly isolated DXer has made contact with fellow hobbyists.

Before 1971, the most personal contact one had with other DXers would generally be at an ANARC convention, or at a one-to-one meeting with another local friend who was also a DXer. However, around 1971, the Boston Area DXers (BAD-Guys) met in a new type of situation - a large, pre-arranged semi-formal meeting of a group of DXers from a certain definite area. Other sections of the country took it up, and now in many major metropolitan areas there are many semi-formal groups. As coordinator of such a group, this author would like to offer some tips on forming a group, coordinating it, and arranging meetings.

1. <u>FORMING A GROUF</u>: Large groups evolve from small ones; therefore, if you start small and get friendly with the DXers in your vicinity, others will get the spirit and join in. The best way to begin is knowing a few DXers who live in your area. Inviting them to your home for a DX session could be the icebreaker which will begin the process. If you do not know local DXers, or do not know them well, you can watch the DX bulletins for names of people in your area. When you see a person's name in a bulletin, find his address (from the phone book, or another public source - NASWA's address book if you are a NASWA member, for example), and call or write him and others you know proposing an informal meeting. Even a few oneon-one meetings can break the ice enough to allow a larger meeting to be held.

2. <u>CCCRDINATICN</u>: This is very important. For a group to continue, once formed, on that ideal, semi-formal basis, one needs a person who is willing to arrange meetings, contact members, and receive inquiries, without pay. It is a sacrifice, but it will make regular meetings possible and will keep the members in touch with each other.

3. <u>ARRANGING THE MEETING</u>: Meetings should be arranged at least two months in advance. The coordinator should try to arrange it so that, at whatever interval the group wishes to meet, such as every two or three months, a host is found for the meeting. This author has found that, in general, DX meetings are not difficult to "cater for" and that if the burden is rotated amongst those who are willing and able to bear the cost, dues or "admission charges" are not necessary (therefore saving the coordinator the cost in time of bookkeeping, etc.) The meetings should be arranged with the host two months in advance, and the coordinator should get directions by public transportation and road to the host's house.

4. <u>FUBLICITY</u>: The best way to let the area DXers know about the meeting is to send out a letter. In it detail (1) Flace, date, and time, and (2) Directions. It is rather embarrassing when one writes and duplicates a letter and finds that one has left out the date or place. This author has done it.

Another method auxiliary to this is notices in the DX publications. If one arranges a meeting for November 1 on September 1st, one should immediately write the DX clubs with a notice, detailing: place, time, date, and your own address and phone number. Getting the notice by the 15th of the month two months before the meeting (by September 15th for our November 1st meeting) will normally be enough notice. Most clubs are very helpful in printing this information. An RSVP card can be included in the letter to the members to allow the host to have some idea of the number of people he will have. This author has had cards printed detailing the info needed (I (will, will not) attend the meeting on <u>(insert date here)</u>), and he prepays the postage so that as many people as possible will take advantage of it.

The day dawns! The meeting is to be held today. You are hosting. A couple of hints. The menu should be simple: cold cuts, hamburgers, salads, etc. Faper plates, cups, and plastic utensils are good. Munchies and cold drinks are also popular, so stock up. Also, put up a couple of antennas, since there is nothing more heartbreaking than for someone to bring a HQ 180 and have no antenna to hook up to it.

So, stand back and enjoy another interesting, informative, and friendly DX meeting.

VOICE OF AMERICA RELAY BASES - FART VIII

by Adrian M. Peterson

FUTURE PLANS

Currently VOA has at least two major projects in hand. One is the relocation of its Okinawa relay base, which was closed down on May 14, 1977. One possible location for this transmitter base is South Korea.

VOA is also studying at present the possibility of establishing a relay base in Portugal.

It is also possible that the Transportable used in Hue could be re-established at another location.

VOA STUDIOS

Over the years, VOA has established studios in several localities, such as New York, Los Angeles, San Francisco, Honolulu, London.

At the present time, there are 23 studios at the VOA head office in Washington DC, 3 in New York City, 1 in Miami, 1 in Los Angeles and 1 in Chicago.

The master control which is in the VOA building in Washington DC, can handle 100 electronic programs simultaneously. The outgoing programs are routed via FM link from Washington to Bethany and Greenville, and then by satellite or feeder frequency to Dixon and Delano or to Europe.

The VOA utilizes some 120 transmitters with a total power output in excess of 23 million watts. Their stations broadcast nearly 800 hours per week in 36 languages.

(This concludes the series. We hope these articles have been interesting and informative. Adrian M. Peterson is Director of Adventist World Radio Asia and Producer of the SLBC DX Program - Radio Monitors International.)

<u>NEWS AROUND THE DIALS</u>. .Glenn Hauser now has a regular feature on <u>HCI</u>'s DX Digest program which is hosted by Ian KoParland and broadcast each Sunday to NA. .<u>Radio Finland</u> has a new 90 minute English program to NA broadcast on Sundays. This new transmission is heard between 1325 and 1455 GMT on 15105 and 11755 kHz. . A megawatt SW station is going to be built in Tennessee. The station will broadcast religious programs and should be on the air in 3 or 4 years - after the ITU increases SW band allocations (Glenn Hauser via DX Juke Box). <u>. hemurdo Radio</u> in Antarctica will beam its antenna to NA from 2000-1200 GMT on a frequency of 6012 kHz. Their antenna was formerly omnidirectional (Glenn Hauser, DX Digest) ... <u>The EEC</u> is planning drastic cuts in the world service. In order

to increase programs to the Third World, the <u>BBC</u> plans to cut programs to developed countries between the hours of 2000-0500 GNT (DA Hotline of NASHA

via Glenn Hauser, DK Digest). . <u>Radio Nederland</u> plans to build 4 new 500 kw transmitters at the Lopik site. . <u>The Vatican Radio</u> will soon have on the air a new 500 kw transmitter along with a new long periodic arial antenna in order to extend its broadcasts to Australia and New arial antenna in order to extend its oroadcasts to Australia and New Zealand... The <u>BBC</u> has replaced its old Oranges and Lemons interval signal with a new Ball-bells signal (Via HCJB)... Clayton Howard is back on the <u>DX Harty Line</u> as of the 27th of August... <u>IBA</u> is now broadcasting an additional news broadcast in Hebrew from 2300 to 2305 GMT on 11655, 9435, and 9805 kHz... <u>Radio Clarin</u> no longer broadcasts on 11700 kHz. Thus, their English program at 2330 GMT is no more (Via Glenn Hausen DC Direct) Hauser, DA Digest). . .

Here is an addendum to the article by Dr. Richard E. Wood which appeared in the July, 1977 bulletin. This article is reprinted from ENGLISH AROUND THE WORLD, November 1976, organ of the English Speaking Union of the US, by the kind permission of the editor, Mr. John McBulloch.

RADIO MOSCOW SOFTENS HARD LINE. . Radio Moscow, once known for hardline Communist propaganda, now stresses detente in its broadcasts around the world. With 24 hour programming in nearly 70 languages, station officials claim Radio Moscow's broadcasts are reaching more people than ever. "We've "We've had a 50% rise in letters from listeners in the US and Britain just from 1975-1976, " says Ghely Shakhov, a Radio Moscow editor for English language programs. "We carry no insults or rude words in our programs to the US. For us, encouraging co-operation is the main thing."

To the ordinary Western listener, Radio Moscow's broadcasts may still sound heavily political. The emphasis is on world news - "written in line with our conceptions," as one station official put it - and on positive news from the Soviet Union. Even reports on Soviet problems, such as a recent program on housing shortages have an optimistic tone about the future. Yet The Radio Moscow staff gives itself high marks for keeping a generally friendly attitude in its broadcasts to the West.

Many Westerners do not have such a benign view of Radio Moscow, which a Soviet publication says includes a political board to make sure the station's ideological line is always correct. Two Radio Moscow staffers make a weekly trip to the Soviet Foreign Ministry to keep in touch with the latest official political positions.

No one - including Radio Moscow - can estimate the total size of its audience. The station says about 25,000 Americans write in regularly and it estimates 10 people may listen for every one that takes the time to write. Several million people may listen to the station in Asia, Africa and Latin America, it says. Most of the letters ask questions about the Soviet Union while a few compliment Soviet policies. Valdimir Fozner, an announcer for the NA service, also says, "Sometimes I get what you'd call hate mail."

The listening audience in NA is limited because Radio Moscow can reach the to receive. Broadcasts to Britain and other parts of the world, however, often are transmitted on ordinary medium-wave bands that any radio can pick up. The station transmits about 20 hours a day in English including musical programs. A recent half hour broadcast to the US included news, a feature called "What is Communism?" and brief programs on US Soviet cooperation, daycare centers in Moscow, environmental protection and a Moscow theater group.

While it is the largest Soviet broadcasting operation, Hadio Moscow is not the only Soviet voice on international radio. Other outlets are Radio Peace and Progress, a 16 year old station technically owned by "Soviet public or-ganizations," not the government, which sometimes broadcasts hard-line ma-terial; the "Voice of the Motherland," a station for Soviet emigres living abroad; and broadcasts for foreign listeners from stations in Armenia, the Ukraine and other Soviet republics. According to Western figures, the Soviet stations together broadcast nearly 2000 hours per week. The nearest competitor is the US with 776 hours per week from the VOA plus heavy broadcasting to the Soviet bloc by the US-funded RFE and Radio Liberty. (Santa Barbara News Press, March 31, 1977 via L. F. Benjamin.)

MISSION OF FAR EAST NETWORK-OKINAWA

American Forces Radio and Television is a service organization under the Department of Defense. As a part of AFRTS worldwide, FEN-Okinawa is a military unit with a military mission. DOD 5120.20 states "The Mission of American Forces Radio and Television is to provide United States Armed Forces personnel overseas, in certain isolated areas and in specific military and Veteran's Hospitals in the United States where US commercial radio and television programs are not available or adequate, with programs of <u>Information and Entertainment</u> which would otherwise be unavailable to them."

First With Color and the Largest of Independents FEN-Okinawa

As early as 17 May 1945, the troops on Okinawa were hearing sounds of "back home" broadcast over an Army operated Armed Forces Radio station. Late in 1955, the request of local military commanders had prompted the Department of Defense to introduce Armed Forces Television on Ckinawa to enhance the morals and welfare of the troops. This station, which was placed under the supervision of the Air Force, aired its first telecast on Christmas Eve, 1955.

It is from these two - a relatively small scale radio operation and a humble TV transmitter with a radiated power of less than 200 watts - that the world's largest military operated Radio-TV station has grown. The values of these two forms of communication were quickly recognized, and forward looking people saw in the combination of their facilities a more effective and economical utilization of their potential. This combination under Air Force supervision was effected 31 March 1958. AFRT-Okinawa briefly boasted two AM stations 650 and 1420, a FM station and a TV station. Radio 1420 joined the AFRT-Okinawa family 15 May 1971. The new station presented 24 hours of news, live sports coverage of major international events, features, commentary and discussion programs daily. The 1420 station was terminated 30 June 1973. On 16 May 1971, AFRT-Okinawa began a seven and a half hour block of continuous color television programs - the first AFRT outlet in the world to broadcast color.

After reversion of Okinawa to Japan in 1972, the station was redesignated Far East Network-Okinawa with network headquarters in Yokota, Japan. FEN Okinawa is a geographically independent AM-FM-TV broadcasting facility that serves the United States military community on Okinawa (57,000 approximate population) and provides broadcast media support for all army, Air Force, Marine Corps, and Navy commanders on Okinawa.

FEN-Okinawa is under the fiscal, administrative, and logistic aegis of the 6120th Broadcasting Squadron, 5th Air Force (PACAF). Manpower responsibilities are shared by the Air Force, Marines, Army, and Navy. This manning is prorated among the four services according to authorized troop strength. Interservice Support Agreements with the separate services provide on island support.

Under Management, which is responsible for policy, operations, and the . administration of the station, the basic departments are Engineering, Operations, and Administration.

The Engineering Department is responsible for requisition, installation, maintenance, and operation of all broadcast equipment. More simply stated, its mission is to put the outlet on the air and keep it there with a high quality signal. The Material Control function is a major element of the Engineering Department.

The Operations Department has the job of insuring a schedule of information and entertainment 24 hours a day, 7 days a week on AM radio, 164 hours weekly on FM radio, and more than 100 hours a week on television. Besides the scheduling of program materials received from American Forces Radio and Television Service in Los Angeles, this responsibility includes the writing, producing, and directing of local live programs, spot announcements, special events and features. In radio, about 60% of the programming is locally produced. Television has about 25% locally produced programming. Within the Operations Department is the News Section which compiles complete accurate, up to date reporting on international, regional, and local events for both radio and television. This entails selecting, writing, producing and editing of newscasts. For news sources on its 24 hour coverage, FEN Okinawa draws from the Associated Press, United Fresss International, the American Broadcasting Company, the American Forces News Bureau in Washington, local information offices, and coverage by the station news department. This material is broadcast around the clock with 5 minute summaries, 15 and 30 minute newscasts, and spot headlines. Specialized news features and special announcements are presented periodically in addition to the regular news fare.

Physical Plant and Broadcast Facilities

Located in Rycom Plaza, measuring 12,000 square feet of floor space, the FEN-Okinawa station building houses both the radio and television facilities --with the exception of the two AM radio transmitters which are located in Makiminato.

The radio facilities consist of three control rooms and a mobile studio, each with dual channel audio boards, professional type turntables, remote control Ampex tape recorders and cartridge tape machines. A master control (two Drake DSR-1 receivers) provides complete broadoast control and monitoring facilities with shortwave receivers, and VHF remote pickup broadcast facilities which can reach most of the island.

The AM radio transmitter site at Makiminato contains two 10 kw Gates BC-10B transmitters operating on 650 kHz with a top loaded insulated Tower Radiator Antenna which is capable of complete coverage of Okinawa and offshore islands, with a high quality signal. Backup for the 650 kHz AM broadcast is provided by a 1000 watt transmitter (Collins 20V2) located at Rycom Plaza studio.

FM radio signals are generated by a 1500 watt Bauer transmitter equipped with a stereo signal generator for multiplex broadcasting. American Forces Badio stereo programs have been received as far away as Miyako-Jima, an island 187 miles away. FEN-Okinawa scored a major breakthrough in bringing first FM radio, then FM stereo to Okinawa.

The television facilities consist of a main studio measuring approximately 2500 square feet, and an open air auxiliary roofdeck studio of about 1000 square feet, 2 studio cameras (Ampex CC-500), 2 complete RCA TK-22 telecine camera-projector chains for films and slide operations, one of which is equipped with an IVC-200 color television camera, and RCA TS-40 video control switching system including special effects, and two Ampex VR-1200 and VR-3000 portable videotape machines. The TV transmitter, housed in the Rycom Plaza building, is a RCA TT-5BH which transmits on Channel 8 (180-186 MHz) with a power of 40,000 watts (ERP).

Information

One of the primary aims of FEN-Okinawa is to keep the military community on Okinawa among the best informed in the world.

Approximately 20% of the programming on AM 650, FM, and television supports the information mission.

FEN-Okinawa also broadcasts special information shows, both locally produced and those furnished by the major network, covering such events as: the American Apollo program, Presidential press conferences, documentaries, and interviews with local, national and international dignitaries.

One of the most important aspects of this information function of FEN-Okinawa is its role as "The Voice of the Commander." FEN-Okinawa is a valuable tool for the various commanders to reach their men quickly and effectively, with command and emergency information. In case of an emergency, FEN-Okinawa is the quickest way to reach the greatest majority of personnel on Okinawa. For this reason, the station plays a key role in all alert and natural disaster plans. As could be expected, some of the busiest days are during typhcon season. Yet another aspect of the FEN-Okinawa information mission is the more than 5000 spot announcements aired each month in support of religious activities, unit activities, Special Service functions, educational programs, and many other activities of a command and general nature.

Entertainment

Yes, entertainment is an official military mission! In fact, its effect on the morale and welfare of the troops is very noticeable. What a man does on his off duty time, the way he gets his entertainment, often has a direct affect on his attitude and effectiveness on the job. In studies conducted at Loring Air Force Base in Maine (site of the first Armed Forces Television station) it was concluded that the introduction of television to that base had a definite affect on reducing the number of AWOL's and courts martials, while the number of reenlistments was significantly increased.

Besides the values inherent in the music, drama, and comedy programmed by FEN-Okinawa, the main benefit is that the station brings a little bit of "home" to Okinawa. The radio and television shows aired are top productions furnished by AFRTS by the major networks and producers. It would be impossible to please everyone all the time, but FEN-Okinawa tries.

(This information is from Mike Hardester.)

THIS IS RADYO PILIPINAS. . .Radyo Pilipinas the overseas broadcasting service of the National Media Production Center is barely six years old; but this shortwave station, making do with vintage equipment and facilities given by the American government in 1969 has gained for the country lots of goodwill. Through its daily broadcasts, Radyo Pilipinas has spread the Pilipino mystique to more people in more countries than any cultural mission can hope to do.

Radyo Pilipinas has been reaching out, as it were, and getting, literally, quite a few friends for the country. Some 60 individual listeners from different countries have come to the Philippines for a visit; the direct result of on-the-air come-ons. With the generous support of NMPC Director Gregorio S. Cendaña, everyone of those 69 guests were treated in the best traditions of Pilipino hospitality by Radyo Filipinas personnel.

The latest Radyo Pilipinas listener to visit was Kunihiko Takao in late February. A nuclear engineer and business executive of the Chubu Engineering Plant in Nagoya, Japan; Takao-san is a relative tyro in DXing. He said he has heard quite a number of shortwave stations but was hooked the minute he heard Radyo Pilipinas because of the. . . "casually friendly air about the announcers." During his short visit, he donated an expensive, late model receiver set to the staff for its personal use. He also gave charming little items like cigarette lighters, Japanese fans and magazines which endeared him the more to his Pilipino friends.

Towards the goal of fellowship with all peoples and the furtherance of the image of the Pilipino abroad, Radyo Pilipinas is totally committed. "Getting the news around" has been its most significant contribution to this end.

(This article was sent by Mr. Kunihiko Takao through SPEEDXer Bill Miller).

<u>VOA TO GIVE GOOD AND BAD OF AMERICA</u>. ..Washington (UFI) - John Heinhardt director of the USIA, pledged Saturday to let the VOA broadcast "straight news" about the US - warts and all. In a wide-ranging interview Reinhardt said, "The USIA is building four new transmitters to step up its signal in eastern and southern Africa." That "China continues to be the only nation jamming VOA broadcasts." That "the USIA is immersed in reorganization involving all aspects of public diplomacy." For example, the cultural and educational office in the State Department may be transferred to the USIA. He also said that President Carter's human rights statements will be broadcast by VOA. Reinhardt was asked if the VOA will present the news straight, even if it reflects poorly on America. "Absolutely," he said. "It's in our interest." (Via Mancy Robinson from the Florence Times - Tri-Cities Daily, 17 July, 1977, page 5.) <u>MAKE THAT STATION</u>. ... by Michael Maghakian. ... As you start out in this hobby, you will find that each shortwave band contains a tremendous number of international broadcasters. If you hope to become a good DXer, you will have to be able to handle this situation.

What is necessary is to acquire some "empathy" with the shortwave broadcast scene. This means that you should be able to identify a well known international broadcaster on the spot, without waiting for or hearing an ID.

It is not easy to learn how to do this, but it is necessary if you want to be a good DXer. The first step is to start listening to the major international broadcasters, i.e., Radio Sweden, RTE, HCJB, VOA, DW, BBC, etc. You should listen to these stations extensively each day until you become as familiar with their programming and announcers as with the pop music and DJs of your favorite local AM station. Listen to each station and mentally take note of the announcer's name, sex, personality, voice quality, and other characteristics which stand out; then you should listen to format, i.e., news, commentary, music, features. Does the station have set times for these items? Does the station talk more about internal or external affairs? You should not limit yourself to English language broadcasts to your area. You should also try to listen to non-English broadcasts and broadcasts to other areas (if the program is different, which sometimes is the case). After finishing with the international broadcasters, try lesser broadcaster, but do not bother with the rare stations! And after absorbling all this information, you should then sit back and reflect upon what you have learned. Can you remember how the announcer on the SBC sounds like? What kind of music does Radio Sweden play between breaks in features? These are some of the questions you should now ask yourself.

When you listen to a foreign language broadcast which has infrequent IDs, you must learn to identify the station without hearing an ID by being able to identify the voice of the announcer and/or the program content of the station. If you do not learn to do this, you may be wasting valuable time waiting for IDs from well known international broadcasters.

In the end, you should be able to say to yourself that "I know the SWBC bands" and that while someone wastes his or her time waiting for an ID from the BBC or DW, I am waiting for that unfamiliar station which turns out to be that rare 1 kw catch! (From the Radio DX Club News).

<u>NEW TRANSMITTERS FOR RFE/BL AND THE VOICE OF AMERICA</u>. ..President Carter has asked the Congress for an appropiation in order to construct 11 new superpower transmitters for Badio Free Europe/Radio Liberty and 17 new superpower transmitters for the Voice of America. These new transmitters, if they are built, should further overcrowd the international shortwave bands. (HCJB, DX Party Line, August 14, 1977)

<u>CDDS AND ENDS</u>. . The following books are available from International Scholarly Book Services, P.O. Box 555, Forest Grove, OR 97116. JAPAN"S RADIO WAR ON AUSTRALIA 1941-1945 By L.D. Meo, 300 pp. 1968, Melbourne Univ. Fress, Cloth \$16.00. The book is a survey of Japanese propaganda beamed to Australia during WW II. . BROADCASTING IN PAPUA NEW GUINEA By Ian K. McKay, Oct 1976, Melbourne Univ. Press, Cloth \$20.00. This book examines the growth of broadcasting in Papua New Guinea and the creation of the present National Broadcasting System. . The following are available from International Fublications Service, 114 East 32nd St., New York, NY 10016. RADIO HAURAKI: THE PIRATES WHO STRUGGLED ASHORE By Adrian Blackburn, 1974, 180 pp., illustrated, \$9.25. The story of a pirate radio station off the coast of New Zealand; its financial problems, political, and legal problems. COMMERCIAL RADIO IN AFRICA By Deutsche Afrika Gesellschaft, 1970, \$20.00, 520 pp. Covers 55 African States, arranged A-Z. Entries include official name, address, languages, broadcast coverage, transmitter power, frequencies, times of transmission, advertising rates, special regulations and services. The above may be of some interest to the general membership of SFEEDX. (This information is from Faul Kilroy)

As you probably realize, T & T was 7 pages this month. I hope you enjoyed this enlarged T & T column. I hope to bring you 8 full pages at least four times a year for now on. Keep those articles coming. I remain. Best Dx,

OCTOBER CONTRIBUTORS PAGE

Each contributors name is preceded by a number. This number indicates how many SPEEDX columns a specific reporter contributed to this month. Credits for sections other than SWBC, QSL, UTE & SKEDS, are not listed here, they are recorded separately by the membership chairman by perusing each issue. The * preceding a number indicates credit is given for credits that did not appear in the previous month contributors page.

KEYNOTE ITEMS CONTINUED FROM PAGE 2

SOUTHERN CALIFORNIA AREA DXERS

The next meeting of SCADS is scheduled for Saturday October 22, at the Valley View School Auditorium, 5361 Sisson Drive, Huntington Beach, CA. An interesting program has been arranged. Discussion leaders will be Jim Young, Iden Rogers, Grant Manning, just to name a few. By popular demand, Karen Young, will lead a discussion on TV DXing. Program will begin at 9:00 AM and will continue until---.

LOUISIANA DXERS

Bob Martin, Route 2 Box 31C, Franklinton, LA 70438, is interested in organizing a group of DXers in Louisiana, especially the New Orleans area. Bob, formerly of Southern California, attended SCAD meets, and would like to see such a group formed in the New Orleans area. Get in touch with Bob, if you too are interested.

CANADIAN-S-W-L-INTERNATIONAL

This is a relatively new club, their 30 to 40 page bulletin is known as CANDX address is P.O.Box 142 Thunder Bay, Ontario, Canada P7C 4V5. Membership rates are: \$10.00 in North America, \$12.00 elsewhere. Info sent to us by SPEEDXER, Wesley Rogers, who is also a member of CANDX.

AUSTRALIAN RADIO DX CLUB

ARDXC 3 Kadana Street, Oak Park, Victoria 3046, Australia is offering two publications; "DXing the USSR" and "Frequency measurements for the DXer". Discusses measurement techniques. Price: for both articles 6 IRC via air mail. Price per article via sea mail is 4 IRC.

ASSOCIATION OF NORTH AMERICAN RADIO CLUBS

ANARC'S new revised "Directory of DX Club Publications in North America" is now available for a large business size SASE (24¢ postage) in North America, 4 IRC elsewhere. ANARC 557 North Madison Ave, Pasadena, CA 91101, USA.

CENTRAL DISTRIBUTION EDITOR

A reminder that the CDE address is Bob Zilmer, P.O. Box 697, Milwaukee, WI. His deadline is the 10th of the month, the deadline to the editors are the 15th of the month. Late loggings causes delays in the editors job, and through-out the entire assembly line including the printing and mailing of the magazine.

Sorry, no room for for sale items. Some very good ones too. Will try and squeeze them in next month.

(Yes folks, SPEEDX is late this month. Don't blame your local postal person though. An errant editor is the cause for the two week delay)
