So as the frost begins to hit the pumpkins, dust off the radio and start listening, with this magazine in one hand and your favorite fail beverage in the other....

The DX Radio Magazine for Active SWLs

Up Front

Tom Kephart 1510-E Portabella Trail Mt. Pleasant, MI 48858-4035

SEPTEMBER ISSUE was mailed on 9 September 1986.

I recently received a few letters from members who state that if I can't mail their magazines so that it always arrives by the 7th, perhaps the club should find a new publisher. All I can do is remind these members that SPEEDX is a volunteer organization! I spend between 8-12 hours per week on SPEEDX, time I used to spend DXing. Publishing the magazine is a high priority to me, but occasionally due to work or family situations, I fall behind by a few days. The past four months, I also edited "Utility Scene", which I enjoyed, but it took some extra time, particularly last month.

My job situation is settling down a little, and we <u>currently</u> appear to be staying in Mount Pleasant. I plan on mailing this issue by the 4th of October, and will continue to do my best to get *SPEEDX* in the mail to you by the 5th each month. Nuff said.

MAILING LABELS Membership credits and status have been deleted from the labels. Although Membership Chairman John Trautschold and I have been cross-referencing our lists every six months, only a few months have to go by before many labels are inaccurate.

John will continue to keep records, of course, but the information will no longer appear on your mailing label. Watch **David Sharp's** "Spotlights" column for new Full Members, and if you have any questions about your current membership status, please write to John Trautschold, 354 North Winston Drive, Palatine, IL 60067-4132.

MISSING COLUMNS As of the 23rd, I've not received Carl Huffaker's "Latin America" or Woody Seymour's "Program Panorama" column. Carl's column probably got lost in the Mexican mail, something we'd been concerned about, but so far hadn't had to deal with. I don't know where Woody's column is.

OTHER MAG NEWS In this issue, you'll find the debut of Richard Wood's "Hawaii Report" column. With the apparently improving reception from Africa and Asia/Oceania (see those columns!). Managing Editor Rick Drollinger and I hope that Richard's column, along with Ralph Famularo's "Japan Report", will tip European and North American SPEEDXers to changes in those areas, and possibly to stations which may be audible later in the DX season. Your comments, as always, are welcome on both columns.

"MAYAK" In the "Americas" column in the September SWL, ASWLC member Wayne Thompson of Florida has been monitoring the "Mayak Relay" from Cuba, which has been operating on 4765 KHz for some time now. During one four-hour listening period, Wayne heard "at least three different identifications. These are Radiostantsiya Atlantika, Radiostantsiva Rodina, and a Radio Moscow ID. Rodina means 'homeland'. by the way. [Are the] 'radiostantsivas' true stations [or] programs originating at the Moscow studios? From what I have been able to figure out, this station (when it first came on the air) relayed just the 1st and 2nd programs (which includes "Mayak"), but later on switched to the 5th program (which includes the 1st and 2nd programs)."

I, too, have heard most of the Soviet programs on this relay, and am currently hearing **Mayak**, Atlantika, Rodina, and a Radio Moscow service. I believe these are all Moscow-originated programs, but I could be wrong. This relay has also been noted recently on 4770 instead of 4765, and operates 24 hours. If anyone has a definite schedule or other information on this relay station, send it along to Caribbean Editor **Tom Sable**!

CUN NOVEMBERI

April

Welcome again to Spotlights. Our congratulations to 3 new FMers...... CHRIS MERCHANT NH FRANK MEZEK CO GEOFFREY SHANKLIN, MA

Thanks to each of you for your interest in SPEEDX. As our way of thanking you for your input, headquarters will be sending a Full Membership Certificate (suitable for framing) for display in your shack. Remember, you'll need to maintain at least ten membership credits per year to re-

This month we welcome twenty-seven new and rejoining members to SPEEDX...

Some new names, and some old friends...all are welcome to SPEEDX. Each of you should have gotten a New Member Packet, and if you have any ques-tions about your club, just ask. That's why we're here! My editing duties continue on the next page with DX Montage, so keep reading.....

SPOOK MONTH (OCTOBER), 1986

Hello one and all; whether you're a hobgoblin, ghost, demon, or common household DXer...welcome to DXM. I've just added a new receiver to my shack, a Hammarlund HQ-180. I had the radio three days, and it worked great. Unfortunately, the thing is now in the shop. It seems one of the IF circuits went out, but I should have the radio back in a day or two. I'll also be adding an R4B to my shack in a month or two, and it'll be neat to see what it digs out of the QRM. I'm pleased to report that the response to our popularity poll has been excellent. Like I mentioned last month, I had to go to press early because of my move...there were five or six entries to the poll which could not be tabulated. To those people, my apologies once again, and y'all can expect a little something in the mail. I've rambled on way too much, so away we go with this month's column....

Notice to DXM Readers: Those of you, who've been with SPEEDX for awhile, know that several years ago, members were encouraged to write original material for the old Tips 'n' Topics column. TNT has been an integral part of this column for several months, but it has been quite some time since original material has appeared in our mag. Therefore, I urge you to take pen in hand and write about aspects of SW that interest you. Any length is okay, I'll edit down if necessary. I know there are some "closet editors" in our membership, and I want you to "strut your stuff." Of course, I'm not planning any drastic changes in the column, and the newspaper and magazine articles you've been sending are <u>still very welcome</u>. I just thoght it'd be nice to give members the opportunity to have a voice in the column. After all, we are "The Feature Pages of SPEEDX." Thanks for your support, SPEEDXers! ds.

DXM Station Profile: Radio Beijing English Service: The EE language service of Radio Beijing is one of the most important branches of China's overseas radio service. Its first broadcast, on September 11, 1947, was transmitted from a mountain cave in north China. It was then called "New China's Broadcasting Station, North Shanxi."

The English language service daily transmits 17 hours of programs around the world. It also beams a medium-wave English service to Beijing itself. The Capital Service began in 1984 and now broadcasts for 5 hours a day. The programs are relayed in Shanghai and Guangzhou.

The English service provides news and commentaries on domestic and international affairs, and often produces special programs for festivals, holidays and other noteworthy occasions. Cultural programming introduces noted figures in the arts. Music lovers can hear both traditional & modern Chinese music, along with foreign music from time to time.

Letters from all around the world pour into the English Department daily. They often include reception reports, comments on programs and suggestions. All questions are answered either on air or by mail. The English Department also sends out QSL cards and small souvenirs. Broadcast skeds are available by writing to: English Department, Radio Beijing, Beijing, China. (From a Radio Beijing press release. Contributed by our excellent Station Skeds editor, Ralph Bowden-CA. ds.)

Member Ralf F. Munster-GA passes word that Mr. Munro Vorster is the new frequency manager for Radio RSA. For subsequent freq changes, see Africa column.

Blimp Gets Stuck On Radio Tower: A Seattle man hired to fly a hot-air blimp to promote a local radio station escaped injury when the blimp got stuck 360 feet up on the radio station's transmission tower, authorities said.

Errol Van Eton was piloting the red-and-white blimp when its nose became entangled in guy wires anchoring the antenna of sister radio stations KCIS and KCMS (in Seattle, WA) shortly before 4 p.m., said Pamela Bailey, communications supervisor for the King County police. Eton was suspended in his gondola for more than two hours before firefighters and a rescue team were able to climb the tower, secure him with ropes and a lifeline and lower him. (From the Oregonian. Hand-delivered by David Klopfenstein upon his arrival at Tampa Int'I Airport. ds.) Also from David Klopfenstein upon his just issued a stamp, the image of which was entirely generated by computer. The 34-cent stamp marks the 50th anniversary of the founding of the CBC.

Radio began with Guglielmo Marconi's tower on Signal Hill, at St. John's, Newfoundland, and it is appropriate that the lst computer-generated stamp to be issued in Canada should commemorate the CBC. (Also from the Oregonian newspaper. Yes gang, Dave K. is having a BLAST in the Florida sun! ds.)

Radio 101 in Zagreb Rocks to Beat of its Own Drummer: Hey comrades, this is Omladinski Radio, 101 on the dial, coming your way. We're a party, not Party, station bringing you 15 hours, 17 hours on weekends, of music, commentary, chat, and all the news not fit to print. And sarcasm, plenty of sarcasm. Making waves on the airwaves. We're No. 1 in Zagreb. The wall stickers at the station-- "Disco is Dead," "Rock and Roll For-

The wall stickers at the station-- "Disco is Dead," "Rock and Roll Forever"--are those of your everyday, run-of-the-mill pop radio station. But what goes on within the walls makes Radio 101 quite unusual, and very popular. "Omladinski" means "youth," and Radio 101 is the voice of Yugoslavia's young, or at least those in Zagreb, the country's second-largest city. It is a voice that is speaking freely. Although it was founded two years ago by the official student-youth organization. Radio 101 says it is one of only 2 stations in Yugoslavia that don't belong to the state broadcasting union, run by the Communist Party.

run by the Communist Party. Unconventional is in at Radio 101. The news is laced with irony and satire. The discussions and call-in shows tackle personal and social problems head-on. Party officials listening in can hear their names linked to unpopular policies. Nearly all the music comes from Capitalist record labels. This fresh style isn't cramped by the station's narrow quarters. It operates in a set of rooms, formerly a storage attic, located above the student restaurant at the university. The ceilings are so low the tops of the door frames are lined with padding to soften the head knocking. It all adds to the off-beat, student-commune type atmosphere that is reflected in the programming. Talk shows sometimes feature university professors and others known for positions counter to the official party line.

The station tries to cater their listeners, and at last report, there were a lot of them. It has been estimated they have a listenership of over 600,000 people. (From Bob Moser-IL and the Wall Street Journal. Looks like you won't hear Radio 101 programming on Radio Yugoslavia. But then again, when was the last time you heard RY, anyway? Seriously.....reception of RY has been nonexistant at my shack! ds.)

<u>Ten-Tec to Market New Receiver:</u> At a time when Japanese products are skyrocketing in price because of the yen-dollar yo-yo, the first U.S. m ad e general coverage SW communications receiver in years is about to hit the market. The new Ten-Tec RX325 receiver, manufactured in southeast Tennessee, should be in production by the time you read this. An undated letter received August 27 and signed by Joe Redwine, Ten-Tec's communication sales manager, stated that "production of the RX325 is scheduled for early August." Suggested list price, \$549. The spec sheet indicates the RX325 is to compete with the FRG-8800 and R-2000. Ten-Tec has long been respected by radio amateurs for its quality SW transceivers and accessories. (Submitted to DXM by Don Brewer (W5VJQ)-AR. ds.)

Peggy Thompson, of beautiful La Crescenta, CA, forwards us a copy of the Free Radio Listeners Club, "Update." The June issue has 15 pages of tips & info on just about every Euro-pirate currently in operation. A <u>must</u> for any DXer needing to keep abreast of European "Free Radio." I could <u>uot</u> find subscription info in the mag, but more info can be obtained by writing to FRLC at: P.O. Box 99, Northhampton, ENCLAND. Let 'em know SPEEDX sent you.ds. **HEY DAVE, PASS ME SOME OF THAT SUNTAN OIL.....** Regional Politics Cause Static for VOA Relay: Construction in Sri Lanka of a new VOA transmitter has been delayed because of the government of Sri Lanka wants to change the site although ground has already been proken for the project. U.S. officials have expressed confidence that the station, designed to beam SW programs to India, the USSR, East Africa and China, will be completed at the new site. But according to other sources, the 100 milm dollar project is in trouble, mainly because of regional political considerations.

One source, a confident of Sri Lankan President Junius R. Jayewardene, said, "I doubt the station will ever be built." India, 20 miles from this island nation, strongly opposes the station, contending that it might be used as a covert listening post in South Asia. For the last two years the Indian government has sought to mediate differences between the government of Sri Lanka and Tamil separatist guerrilla groups, and Indian diplomats in Colombo said they have discussed the VOA project with Sri Lankan leaders.

The Sri Lankan government announced in late August that the site for the radio station will be changed from Chilaw, about 40 miles north of Colombo, to Puttalam, 50 miles farther north, because about 200 squatters living on the Chilaw land would have to be relocated. But the squatters, mostly fishermen and their families, have been living on the 1,000 acre site since negotiations began on the project five years ago. The alternative site, at Puttalam, was rejected earlier because of a teak forest project in that area. Nonetheless, U.S. officials said they have been assured by the Sri Lankan government that the agreement on the new site will be honored. U.S. and Sri Lankan officials agree that the new site will delay the project by as much as two years. When the station finally does come on-air,

Relay Broadcasts via Canada Starting on October 1st, to Improve Reception Conditions in North America

Radio Japan plans to lease the transmission facilities of Radio Canada International in Sackville, New Brunswick, Canada in order to relay its broadcasts to North America. The contract with RCI is expected to be signed by the end of August or early September, and the 250kW transmissions, which will be for one hour for both the English and the Japanese programs, are scheduled to start on October 1st this year.

At present. Radio Japan broadcasts to Europe, the Middle East and Africa are relayed via Gabon in West Africa. As remarkable improvement has been achieved by the Gabon relay, the planned relay via Canada is expected to improve reception conditions in North America, including New York Washington, and other big cities on the East Coast of the United States it will make the VOA signal in the region 25 times stronger. (From the LosAngeles <u>Times</u> and <u>Schlossman-CA</u>.)

Universal Shortwave Rudio, In Reynoldsburg, OH is compiling their next edition of "DX'ers Directory." Ordering information for the book can be found in the July DXM but to be included in the next "DX'ers Directory,"all you need to do is send your name, address, phone number (optional), listening in-

terests, and any shortwave clubs to which you belong (presumably SPEEDX, plus any others). Your listing is absolutely free and there is no obligation to buy the directory, but it's a great way to get to know DX'ers in your area! For more info on the directory or to send in your entry, write to Universal Shortwave Radio, 1280 Aida Dr., Reynoldsburg, OH 43068. (Via <u>Steve Balt-IL.</u> ds.)

From Beautiful New England Writes Steve George, who inquires about the RFO outlet in St. Pierre et Miquelon on listed 1375 kHz. If anyone reading DXM has heard the station, Steve would like to hear from you. Drop him a line at: 23 Dana Street, Amherst, MA 01002. Your assistance will be welcome.

Antenna Ordinance Stalled (Dunedin, FL): City commissioners issued differing signals on a proposed ordinance that would regulate satellite dish, as well as other antennas. Commission questions about the regulation of ham radio antennas, a grandfathering clause and a proposed 15-foot height limitation prompted them to table the proposal.

As presented, the ordinance would regulate satellite dish, television & radio antennas, by zoning district, according to their location, size, and placement within setbacks and on rooftops. General requirements would include compliance with applicable electrical and building codes. City attorney John Hubbard said the FCC made it clear in a February 1986 ruling that cities could not regulate satellite dish antennas and exclude others without risking court action. (From Jack Heaton-FL and the Clearwater Sun newspaper. Although a local issue in the Tampa area, I thought this would be of interest to members. Unfortunately, it seems many towns across the country are trying to restrict the erection and use of various outdoor antennas... It'll be interesting to see if their efforts succeed...ds.)

dx montage's CONTEST PAGE

More On Our All-Band DX Contest: Membership response over the past couple of weeks has been fantastic, and I've gotten a lot of input as to how it should be conducted. A few minor details still need to be worked out, but I believe something can be scheduled for a few weeks in late December.Stay tuned to Montage and the Contest Page for further details!

<u>Pin the Tail On Ye Ed:</u> I've got a toughle for you this month, gang. I want to know the year in which ZOE in Tristan da Cunha signed on the air? Since it may take awhile to dig up the answer, I'll make the deadline for this competition is <u>November</u> 12th. All correct entries received by that time will be eligible for a random drawing; lucky winner to get pamphlet of their choice (excluding SRGU) from hqs. <u>Be sure and indicate your choice on your</u> entry!

Geography Quiz: Our country profile for last month was <u>Thailand</u>. Winner of the SPEEDX "stick-on" logos is <u>Don Weber-OH</u>. Now, our October country profile; winner to get some air force stickers from this country. Location: Europe. Ethnic Groups: Finnish, Swedish, Lapps, European immigrants. <u>Population: 8,330,573 Religion:</u> Lutheran and Protestant. <u>Geographic Neighbors:</u> Norway and Finland. <u>Area:</u> 173,665 sq. mi, slightly larger than CA. <u>Languages:</u> Nordic languages. <u>Topography:</u> Mountains along the NW; flat, rolling terrain in the central and southern areas, which includes several large lakes. <u>Radios in use:</u> 3,327,000. TV Sets in use: 3,236,037. <u>History:</u> Independence from rule by Danish kings (dating from 1397) was secured by Gustavus I in a revolt, 1521-23; he built up the government and military and established the Lutheran Church. In the l7th century this country was a major European power, gaining most of the Baltic seacoast. The Napoleonic wars helped this country to annex Norway. This country remained neutral in both World Wars. Per capita GNP is among the highest in the world.

Language ID: Okay contest aficionados....no correct answers to our September contest, so we'll extend it one more month. Our mystery language is Eastern European, and our three words are: cot, ascensor, inginer.Identify our language and receive a SPEEDX bumper sticker.

Foreign Competition: This contest is only open to those members residing outside the U.S.A. and Canada...get those entries in by November 12th. Our question is: Which religious organization had its programs broadcast via Radio Andorra on shortwave? Correctly identify the organization and win a <u>Guide to Soviet Radio</u>. Good luck.

When entering one of our contests, please remember to clearly write or type your name and address on entry itself. Believe-you-me, I get enough paper here at press time, without having to worry about a ton of envelopes. That means they are usually the first thing to go into my circular file (garbage can). I hope you understand and your cooperation will be appreciated. Just one more reminder, and that is comments and ideas on new contests are always welcome...so let's hear from you!

That almost completes another DX Montage. But, as you know, I've been picking on David Klopfenstein, who, at press time, is spending his vacation with me here in FL. Anyway, in the interest of fair journalism,here is his rebuttal to my comments elsewhere in the column:"It's amazing isn'tit? Paper boys will travel 2,000 miles to deliver an <u>Oregonian</u>. The Florida sun is great, the beach is sandy and the bay is wet. As a matter of fact, the humidity contains moisture, which your last bottle of white-out could have used. Sorry...sun tan lotion is about as available in Oregon as Tristan QSL's....Oops! You gotta be careful with a man who has everything.How 'bout some well-used rain gear? Get your own oil. Let's get this off to Tom so we can get back to our (my) vacation.....

Chile is coming in very strong on 15145 as I type this. Maybe the sunspot cycle is looking up. Well, I'm back to school, so not as much time for dx or antenna raising ... but soon ... some more wire in the air. And now with the mists and mellow fruitfulness of fall in the air- to the loggings: language is English unless noted otherwise.

KVOH is supposed to have started testing around mid to late August on 17775 from 1700 to 2200 UTC. I have not heard them yet at this QTH nor were there any loggings of the site sent in yet, so last month's quick contest is still in effect. The first logging of KVOH from the California site that I receive earns a set of three Steamtown postcards.

Larry Miller passes on the information that Jeff White has been contracted by R. Clarin to produce programs for the international service on 11700. A new directional antenna pointed towards N. America is currently under construction. The international service is scheduled for 2200-0100 UTC. There will be one hour of English programming, but the exact time has not been determined.

For those of you with tube equipment, a handy source of information is *The Hollow State Newsletter*. Tropical band dxers find that some of the older tube equipment is less noisy. The summer issue features an article on Hammarlund gear by SPEEDX's own Al Quaglieri. The newsletter also offers a wealth of information on where to obtain replacement parts. For a year's subscription send \$4 to P.O. Box 1226, New York, N.Y. 10159. Say you saw it here.

For all of you returning to knob-twirling after the summer hiatus please remember that all Central America, clandestine, and South American loggings go to Carl Huffaker, editor of the next column. See his column masthead for the Mexico address. All North American, Caribbean, and North American pirate loggings go to me at the Scranton address on the masthead.Please send your loggings to me by the twelfth of the month and by the fifth of the month to our Central Distribution Editor, Peggy Thompson, whose California address is listed on the back cover. Goodbye for now from Steamtown, U.S.A. 73 es gd dx.

Bye for J.F.S.

(13)

Now that we're in October it won't be long before the gouls & goblins will be knocking at the door. Remember to stock up on candy, you don't want a trick played on you that may interfere with your DXing now that we're into the DXing season!

	[I seem to recall Comoros opening with Qur'an recitations in all reports
	seen here, 'tho admittedly haven't seen any detailed recent rpts so we
	can't assume anything. Situation further confused by both stns wandering aboutI last hrd Rwanda in late August on 3329.5, and there was a
	tantalyzing het (no, not CHU!) up on 3330.9 at that time. Anyway, I'm
	more inclined towards Rwanda than Comoros as you postulate. Why nitpick?
	Either is a real catch! -ed.]
>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>	

Etc. Haven't had much room to ramble past 2 columns, and that's probably all for the best...Like to thank everyone who contributed for reviving my faith in the communal nature of SPEEDX; don't let up--I love being swamped with info!...Met a nice gent in a map shop in D.C. who hailed from Burkina Faso. He was kind enough to explain why

and wherefore of new national monicker. Seems Burkina means something like fine, noble, and upstanding, and Faso means republic. Thus, name like RT du Burkina still makes sense without the Faso.....My apologies to all members subjected to my 35mm camera at ANAR-CON..at least now you're all nationally-known faces after this issue!....Here are a pair of features I wish I had more room for; one is first in a series, the other a one-shot.

<u>HEAR AFRICA</u>

Every month I hear from 2 or 3 people who want more info on how to catch all this neat African DX. This series will hopefully answer these questions en masse, and cover all aspects of this challenging side of SWLing.

Let's first deal with the equipment you'll need. Contrary to what many of you seem to believe, you can hear most countries in Africa on standard SWL equipment, even portables! You'll need a set that can tune 3200-3400kHz and 4700-5100kHz (the Tropical Bands), with a fair amount of sensitivity, good image rejection, and as much selectivity as you can reasonably afford. Larry Magne's receiver reviews, on RCI and in the past few WRTH's, are excellent guideposts, and his book, "Receiver Specification Guide" (details in SPEEDX 6/86, p.6) is worthwhile also. Also recommended for the DX-oriented is Rainer Lichte's "Radio Receiver--Chance or Choice" from Gilfer.

You'd be surprised if you ever took time to check most Africa logs with each issue's Contributor's List and saw what equipment was used in each case..most stns have been hrd with straightforward stuff like FRGs, R600s, R1000s, etc. The "trick", if one exists, is knowing when and where to listen. I'll fill you in on this in coming months, but for now why not try this: throughout this month's column, you'll see this • before a number of frequencies/times...this indicates what I consider to be your best shot at logging that particular country; I'll bet if you make a little "want list" up from these dot recommendations, you'll add one or more new countries to your logs by next month. Good luck!

RADIO VOICE OF THE GOSPEL

If you discovered shortwave radio within the past ten years, you'll probably be surprised to learn that Ethiopia used to be a pretty easy catch, as opposed to the DX challenge it has since become!

Station ETLF--The Radio Voice of the Gospel, beamed multi-language programs in almost all directions, throughout the day, using then-state-of-theart 100kw xmtrs and a reversible/slewable curtain array. This, briefly, is the story behind RVOG.

CILP As an attempt to bring modern technology to its ministry, the Lutheran World Federation decided, in 1958, to build its own station in Africa. The organization chose Ethiopia as its site, due to favorable geographical position, and that

country's Christian traditions, culture, and lack of a colonial past. Then-Emperor Haile Selaisse encouraged the LWF, granting 3 years of duty-free import of technical and building material; he believed a major international b/c'er would project a progressive image of Ethiopia as a country at the vanguard of the "new" Africa.

The station, consisting of modern studios, offices, and residences at Addis Ababa, and xmtr site at Gedja, began regular b/c's on 2/26/63, after several months of tests using a 1 kw xmtr. Callsign ETLF was chosen for ET (Ethiopia prefix) and LF= Lutheran Federation. The powerful xmtrs covered all of Africa and Arabia with excellent signals, and reached China and India with usable signals. Programming consisted of b/c's in French, English, Amharic (all from Ethiopian studios), plus 14 other languages in programs recorded at LWF's local church production studios in 16 African and Asian nations. This diversity made RVOG unique in the history of religious b/c'ers, in that it was designed to be an instrument for local churches to speak to their countrymen. A 30/70 formula was used: 30% religious programs, 70% educational, cultural, & news pgms. RVOG was fiercly proud of its accurate, unbiased news operation, something of a rarity even in present-day Africa. As political upheavals shook the country in the 70's, this insistence on factual newscasting proved to be a major thorn in the side of a forming revolutionary gvt.

Years of increasing tension and pressure from Ethiopia's new socialist regime came to a head, and ETLF's b/c's came to a halt on March 12, 1977, when government troops decided to nationalize the stn. Ethiopian citizens at RVOG were allowed to remain, but all other personnel were asked to leave the country with only their personal belongings.

Today's Voice of Revolutionary Ethiopia still uses RVOG's facilities, which have deteriorated to the point that VORE is now rare DX!

Many thanks to Pastor Gene Thieman, Fern Hagedorn, and Manfred Lundgren of Lutheran World Ministries for their input. Mr. Lundgren's book, "Proclaiming Christ to His World", is a complete and fascinating account of RVOG, and I'll provide more info on request. Thanks also to SPEEDXers Richard D'Angelo and Donald Weber for their assistance!

Bob Thunberg 409 Burt Street DuBois, PA 15801

DEADLINE: 12th Dates/Times: UTC Frequencies: KH2

Is there no justice? Last month A/O was allotted six pages, but because of the late arrival of Peggy's CDE logs, I only had enough material to fill four. Now this month everything has arrived on time providing me with seven pages of loggings and I am alotted only five! But as the saying goes, "When the going gets tough...." Please excuse the abbreviated listings and don't forget to check out the info in the Oceania section on the new Pacific island now broadcasting on Shortwave.

"Solar-powered DXing from the Big Island"

Hawaii Report

E komo mai: (Welcome) to my first monthly Column devoted to SWBC, and to a lesser extent MW, DX from the east side of the Big Island of Hawaii, from my home from which I have excellent views of the blue Pacific, on one side, and of the gruptions of Kilauea Volcano, currently shooting up 800 ft. orange lava gushers through Pu'u 'O'o Vent.

To introduce myself, I am Richard E. Wood, Ph.O., a full member of SPEEDX, a continuously active SWBC and MW DXer for 31 years.

Born in Dundes, Scotland, I began DXing in Newcastle upon Tyne, England, in 1957. I am now a U.S. citizen and businessman; a former professor of European languages and linguistics. I have lived and DXed in many countries including Germany, Curaçao and most recently Saudi Arabia, but now enjoy my listening post 15 miles southeast of Hilo, the island capital. My DX is truly solar; I use a passive solar tracker of 4 solar panels mounted on a frame which rotates, following the sun, on my roof; feeding six 12VDC batteries.

My receivers are a Trio (Kenwood) R-1000 and a Drake SPR-4; an ICOM R-71A is currently out of commission but I hope it will be in use in 1987. Speaking of 1987, the continuation of this column, and its possible growth to two pages, depend on your reaction to SPEEDX HQ. So please write.

For antennas I use five Beverage wave antennas arranged in a fan-like array in all major directions, averaging 1500 ft. each in length. These are of course directional on MW and on the lowest SW bands. Two of them can be phases against each other using a Connolly phasing unit (I generally use the North American and Buenos Aires, Argentina beams). For higher SWBC bands, an AN-l active antenna (stepped down to match my 12VDC house current) is also used, where the Beverages are too long.

Some points about DX in Hawaii:

1. Mm stations from all continents including Africa and Europe are regular.

- 2. The antipodean effect produces powerful signals from Southern Africa, 12,000 miles away, including Namibia-747 kHz, a regular MW catch. The antipode of most of Hawaii lies in Botswana. This is the only spot from which I have observed a pronounced antipodean effect.
- 3. European reception is, all in all, better than in California.
- 4. High-frequency bands are open late at night, more than in the mainland U.S. 19, 16 and even 13 m. are still open past local midnight.
- 5. Being close to the equator, seasonal variation is not as great as at higher latitudes. But Brazil, Argentina, Australia, Namibia, Indonesia, etc., dominate MW in summer. North Asia, Europe, the northern U.S., Canada, Alaska, etc., in winter.
- 6. Twilight is short, the difference betwaen daylight and darkness is extreme. MW reception around local noon is confined to Hawaii; the lower SWBC bands are more or less dead during the midday hours. Highlatitude low-frequency OX propagation is not noted here.

7. On MW, I am shielded by high, volcanic mountains from Honolulu stations. Space permits only a very fem recent loggings: AUSTRALIA

日本SPEEDXの会員の皆様へ

ヘッドクォーターからのお知らせをお届けします。 最近、日本からの情報提供が、 少なくなりました。 もし投稿量が増えす、この状態が続くようでしたら、Japan レポートは、 今後継続できなくなりますとの事でした。

That's just a note announcing my potential swan song unless contributions to the column increase. <u>Other happenings</u> : As noted in the August SPEEDXGRAM, the French government cancelled an agreement to relay R. Beijing via French Guiana. I think it's fair to assume that China reciprocated. That would explain the sudden absence of RFI's morning (local time) broadcast to South Asia.

Although too old for the loggings, there was an excellent grayline reception morning in early August which yielded catches from the likes of R. Chimbu, PNG (2376) and RRI Pontianak, Indonesia (3447). Hopefully a good sign for the Fall/Winter DX season. August's report of R. Free Afghanistan on 15685 is more likely

August's report of R. Free Afghanistan on 15685 is more likely the <u>Voice of Unity</u>. In any case it's certainly an anti-Soviet/proresistance transmission.

Via Koji Yamada comes more info about R. Japan's Sackville relay; scheduled times for the broadcast are Oct.1 - Oct.25, 1030-1100 UTC in JJ and 1100-1130 UTC in EE. From Oct.26, 1130-1200 in EE and 1200-1230 in JJ. The frequency should be 6120 khz with 250kw expected power. Also, in a Denpa Times article forwarded by Mr. Yamada is mention of the possible revision of a Japanese broadcasting law which would enable foreign broadcasters to utilize NHK's equipment. (a prelude to NHK relaying other broadcasters?)

Finally, I recently purchased a Sony ICF-6800A and am quite content. Most impressive is the sound quality (even the R.Cairo YL is almost understandable-Hi).

OSL REPORT

EDITOR:

DEADLINE: 12th

RAY FORSGREN RT. #4, BOX 213 CHIPPEWA FALLS, WI. 54729

Big news in the world of QSL'ing: Radio Botswana is once again being verified !!!! Details below in the Africa section. Also, the Honduran HRRI is answering reportes. Personally this was a bad month for menot one QSL! Oh well- these things do happen ...

AFRICA

<u>/BOTSWANA</u> R. Botswana: 3356, 4820 f/d Cattle cd. in 140 ds. V/S Ted Makgekgenene- Chief En. (George-NC with help from Gerry Dexter).4820 f/d Mochudi cd. in 33 ds. for an irc. (Havrilko-UK)...welcome!...7255 f/d pfc in 67 ds. for a taped rpt. 6 ms. V/S T.R. Dithabi. This via the Botswanan embassy. (Wilkins-CO)....Good to see this one verifying again.As mentioned in Al Quaglieri's column last month, the C.E. has said that he will verify reports- this mentioned over the Media Network pgm. PLEASE, send return postage and make sure that your rpt. is complete and courteous- no telling what made them guit before so we want to 'keep them on our side'. The QTH for the embassy, if you want to go that route, is: Ms. T.R. Dithabi @ Botswana Embassy 4301 Connecticut Avenue NW

Washington DC, 20011 Thanks to Bill Thim for this address. When sending to this address, make sure that you send a TAPE report- a good quality recording, along with a pfc & return postage. Again, lats keep them on our side ... rjf.

/BURKINA FASO/ R. Nationale: 4815 p/d form ltr. w/ sked. in 39 ds. for a FF rpt. 6 an irc. (Pimblett-AB).

CLANDESTINES & PIRATES

TNFM: 7414 f/d Logo cd. w/ sticker & info. in 15 ds. for ms.(Pimblett- \overline{AB}).

Some random thoughts about QSL'ing in general: the main thing that will greatly improve your reply rate begins with the initial logging. If you can tape the program, great- otherwise you should write down every thing; you can always exclude some items, but you can't just add them. This is where taping pays off; if there is something that you didn't catch, you can replay the tape any number of times until you get what's said. Make sure that you get the correct times also!!! This is where WWV really pays off; if you have any doubt, just hop on over to one of their frequencies and you've got the correct time.

Next month I'll go into some strategies for logging the foriegn language stations- this is where the real joy of QSL'ing takes place!

Below is a vintage QSL that was sent in by Carrol Weyrich...Thanks! Until next month, 73 & Best of DX!

Jeff Knapp 5465 Kirby Rd. Apt. 20 Cincinnati, Ohio 45223, USA

deadline: 12th of the month

Well, things finally settled down to the point that I could take up the reins, so here we are together again! Before I go further I want you all to stand up and applaud Tom Kephart. I think Tom did a really fine job filling in, and I really appreciate his efforts (as well as your patience).

Since this is a kind of re-start for me, I felt it might be helpful to review some of the finer points of contributing. I know I harp on the topic a lot but it is important; especially in the coming months as DXing gets more plentiful and my spare time is shortened due to job-related studies. By the way, the new job going great as Data Processing Manager for the Schoenling Brewing Company. We make Little Kings Cream Ale and Diamond Wine first project assigned to me; we ordered an IBM minicomputer and customized software in order to integrate and automate the functions done manually and on a half-dozen PCs. But I digress.

Use the contribution form; don't scrawl your logs on paper towels and such. By the way, don't scrawl either- if I can't make sense your log gets tossed. I realize English isn't natural for some of our foreign contributors, but there is no excuse for poor penmanship from Americans or from our overseas friends. Cut the form into strips where indicated. Be sure to write your name and state or country on each strip. Be as complete as possible. I won't have as much time as in the past to research the missing callsign et cetera. My page allocation has been cut, so be selective; send logs that are DX and/or unusual or interesting. For instance if you live in Miami, don't send Miami-based-USCC comms. If you would like an answer to a question, send an SASE along; otherwise your answer will appear if and when there is space.

Enough for now. Suffice it to say my time will be short and loggings will be up; your logs will have a better chance of making it if you help me out a little. On with the show....

That's all for now. Unfortunately, right after I said I'd take the column again and Tom sent me your logs, my computer went down with memory problems that took a few days to solve.

I hope to see some great logs next month. Grab a cup of cocoa (or a bottle of Little Kings) and settle down in front of the radio.....

73's and best DX (good to be back) - 1X

ANARCON '86 REPORT, Part Two by Tom Kephart and Woody Seymour

This year's convention in Montréal was Woody's fifth and my second. As we mentioned last month, it seems like the focus of the convention has moved away from the clubs and toward the broadcasters. While increased support and participation by the people who put out the signals is welcome, it was somewhat dismaying to see so few ANARC Member Clubs represented with table displays. The Canadian clubs were there in force, including the Ontario DX Association. the Canadian International DX Club, and Le Club Ondes Courtes du Québec. That last group had its display right next to the SPEEDX table on Friday, and as you might guess, this club does its business en francais | Combined with the fact that the convention was in Montréal, it assured a pretty fair number of French-speaking DXers holding an informal club meeting right next to us! I took a few years of French in high school and college, but am somewhat ashamed to admit that it is so bad that I could only converse with these fine folks if they talked to me like a child. very slowly and distinctly. Fortunately, they almost all spoke English quite well. but it didn't help my inferiority complex any, hi!

Among the American clubs, SPEEDX was pretty much the star of the show. The Worldwide TV-FM DX Association, the Association of DX Reporters, and the Michigan Association of Radio Enthusiasts all had displays or material on hand, but only MARE's table was regularly manned. SPEEDX had a table with all of our publications displayed, and in addition to doing over \$200 worth of sales, the table provided a gathering point for SPEEDX members.

Two special guests were in attendance at ANARCON '86. Jens Frost, Editor-in-Chief of the World Radio TV Handbook. was in Montréal from WRTH headquarters in Denmark, and Arthur Cushen, Secretary-General of the South Pacific Association of Radio Clubs (SPARC), who has made Invercargill, New Zealand, a fairly familiar DX location. especially among mediumwave DXers. Mr. Cushen was the banquet speaker, and he and his wife Relda provided an insight into the world of DXing "down under".

The annual ANARC achievement awards were given out at the banquet. The North American DXer award went to Gerry Dexter, who among other things. is editor of the "Listening Post" column in Popular Communications, Specialty Band DXer of the Year was Bruce Elving, author of the FM ATLAS and editor of "FCC News" in the WTFDA bulletin. International awards went to Jens Frost as Shortwave International DXer, and Glenn Hauser as International Broadcaster of the Year. In addition, special ANARC Executive Council awards for special service to the hobby went to Robert Horvitz (for his work on ANARC's "Woodpecker Project" and working to get changes made in the Electronic Communications Privacy Act) and Terry Colgan, for his four years as Executive Secretary of ANARC.

If you missed this year's convention, next year's is being sponsored by ODXA and will be held in Mississauga. Ontario. just outside of Toronto. More details shortly after the first of the year!

Finally, a special "thanks" and "good show" to Ian McParland and the entire Radio Canada International staff, who did so much to make ANARCON '86 run smoothly. See you in Mississauga!
