DEPARTMENT OF COMMUNICATIONS

MOREHEAD, KENTUCKY 40351

Dear Sirs:

I am enclosing information about an unique opportunity for members of your DX club who are college students to spend the summer in the heart of Europe and study international broadcasting for college credit! I would appreciate it if you could include an item about this in your next newsletter. If your publication would only prefer to mention this topic in a paid advertisement, please let me know, but if you could help us out with a regular announcement it would greatly help.

We will he living in Bregenz, Austria for the six week class period and then the students will have two additional weeks for independent travel. As Bregenz is within sight of both Germany and Switzerland we will be easily able to view and hear the local domestic TV and radio of these countries full-time, and since Austria is centrally located almost all of Europe can be received at night. We will be travelling to visit broadcasters in these countries and will also venture behind the "iron curtain" to spend several days in Budapest, Hungary. I was treated royally at Radio Budapest and Hungarian Television during my visit this past September and they are looking forward to the class visit.

Students can earn six hours of undergraduate or graduate credit in Radio-TV/Journalism that can be transferred to their home school. The bodie cost includes air fare, room and most meals in Bregenz, d two-month Eurail Pass for free train travel in most of Western Europe and Hungary, and an international student ID and Youth Hostel Card that can help get reduced lodging during independent travel. Non-Kentucky residents will have a slight additional charge for the out-of-state tuition, and the lodging in Budapest will probably be \$100 extra. But the cost of \$2438 for eight weeks is not much more than tours that are half the time length and do not offer course credit.

Thank you very much for your help. I would also appreciate it if you could geve me details of membership in your organization and a sample copy of your newsletter or bulletin.

Sincerely,

Michael Biel, Ph.D. Associate Professor, Radio-TV

Dr. Michael Biel Morehead State University UPO 893 Morehead, Kentucky 40351 (606) 783-2794, 783-2134, 784-8404 fax: (606) 783-2678

### NAME YOUR RECEIVER...

Remember a few months ago when I mentioned that some DXers name their receiver? Well, I've been flooded (would you believe a heavy trickle?) with other's that name their receivers as well! Well known SPEEDXer Bill Flynn says... "Back in the early 1970's I gave my two SONY portables..they were then "State of the art"...names: the big CRF-320 became THE GRAND WIZARD and the smaller ICF5900W was THE CROWN PRINCE! There have been many advances since then & I never got around to assigning more name!" Hmmm...I've used The Grand Wizard and The Crown Prince too, but in relation to something else not related to DXing (grin)! Eddie Janusz, our illustrious publisher sez he named his Selena Vega 215 "Viktor" after Viktor Korchnoi, one of the greatest chess players of all time (Ed...you're supposed to DX with the danged receiver...not play chess on it!). He also named his typewriter "Butter" after his fingers (oh grunzzz!) Keep those tards.

### 1989 WRTH NOW AVAILABLE...

Set 'em while their hot from Don Erickson's Century Print Shop! Don always nanages to offer the current WRTH's for a good rate, and this year is no exception. The "DX'ers Bible" can be purchased for \$20 each, or 5 for \$60, bostpaid Book Rate. CA residents please ad 6% sales tax. (6.5% after 1/1/89). Please add \$2 per copy for Priority Mail. Please make your checks or money orders payable to the Century Print Shop, and mail to: Century Print Shop, Don Erickson, 6059 Essex Street, Riverside, CA 92504-1599. Make sure to mention SPEEDX when ordering!!! If you have a questions, call Don it (714) 687-5910. Back copies between 1981 - 1986 may be ordered at \$18 'ach... Call for availability!

### NARC news and information...

ccording to ANARC's Executive Secretary, Robert Horvitz, the Boy Scout of merica have decided to award Merit Badges to Scouts demonstrating skill in hortwave listening. Up until now, the merit badge was based solely on kills based on "ham radio" operations. Since this badge drew little nterest, the national BSA leadership decided to expand the badges ctivities to include the logging of shortwave broadcasts, band surveys at ifferent times of the day, compiling the schedules of major broadcasters, nd locating broadcast sites on a map. ANARC plans on helping the Boy couts implement the program. The new badge guidelines will be published owards the end of March. If you would like to volunteer as a counselor for his badge for your local Boy Scout group, look them up in the phone book nd call them. To obtain the guidelines for the Radio Merit Badge, go to bur local Boy Scout shop and ask for pamphlet #3333. To order a copy call he national Boy Scouts order line.. 1-B00-323-0732. For more information patact Bob Horvitz at 703-534-7443 or drop him a note on the ANARC BBS.

### OR SALE....WANTED....TRADE... (No collect calls please!)

y the way...we will start to run your ads for 2 consecutive months now! If ou sell or obtain whatever it is you are advertising before the second onth is up, then drop us a line so we won't run it again! If you only want our ad run for one month, please let me know when you send the ad in!

<u>JR SALE OR TRADE:</u> Speedx's 1976-77-78 complete.' 1983 (10 issues), 1984 linus July), 1985 (minus September), 1986 (8 issues). Make an offer. loking for January 1974 or before issues. Ed Janusz, Box 149, Bricktown, 08723.

About three years later, I started to wonder about the people with the big antennas in their back yards. I went to visit one of these guys one day; this very nice man named John helped me get my Novice license; within a year I had obtained the Advanced license and the call sign WB7CAG, which is still current. I worked on my Morse skills until I could copy about 28 words a minute. Now I'm one of those guys with a big antenna in their back yard!

My main interest is in marine radio. I check into amateur nets which run traffic, usually telephone patches, for boats at sea. I also enjoy tuning in on commercial marine traffic. When I win the Arizona Lottery, I'll be able to buy a real nice sailboat and sail off into the sunset. My marine callsign is WSD7810.

I've been a member of SPEEDX for about 15 years. There were a few years when I let my subscription run out, but I always seem to come back.

On a final note, I'd like to compile a list of Hams that belong to SPEEDX. Please send me your OSL card and I'll try to set up a time and frequency where we can talk. I'm good in any callbook and will respond by radiogram.

I'm sure glad that I got into this radio hobby. I do everything I can to let others know about it; I hope you will do the same. Nice essay, Gary! Let me know when you get some SPEEDX QSO's! Check out John Trautschold's column ("ANARC News") for a way you can help popularize the hobby; the Boy Scouts are going DX!

### BEEB NOOZ

Starting on about 23 March, the BBC will re-orient its 9915 kHz transmitter to give better reception for listeners on the West Coast. (I'm apparently the only person on Earth who likes "Waveguide," so I thought I'd pass this along).

HOW TO HEAR PIRATE STATIONS, by William Blight You might begin by asking, "What's the difference between a pirate and a clandestine broadcaster?" SWL's don't always see the difference.

A pirate station is broadcasting for the fun of it, usually, even if it takes a political stance. However, a clandestine is NOT on the air just for fun; it's there to broadcast to the population of a certain nation, and often encourages citizens to overthrow that nation's current govern ment.

Here are a few hints on how to hear pirate stations. The best time to listen as from 0000-1000 UTC oo weekends, especially on holiday weekends. when pirate activity is the heaviest. One place to look is just above the AM band, from 1620-1700 kHz. Shortwave pirates in the USA utilize the 7400-7500 kHz range (mostly between 7410 and 7425). European pirates often use the 6200-6300 kHz range. In the upcoming two or three years, there should be an increase in pirate activity, as sunspot activity in-creases. Since pirates often run on low power, they need "help" from the sunspots if they are even thinking about getting a good signal out over long distances.

If you are already into listening to pirate stations (or clandestine or spy/"numbers" stations), a good bulletin is available from the Association of Clandestine Enthusiasts. A sample is \$1.50 from A\*C\*E, Box 46199,

Baton Rouge, LA 70895-6199. Thanks, William. Since you sent this to me, I've actually heard one of these guys. Friends, check the last page of this column for info about a new Tiare publication on pirates by George Zeller.

### WHY IS THIS MAGAZINE LATE?

Late/missing columns, that's why. That's why this page exists, in fact: It's called "filling the gap." We have no intention of turning this bulletin into SLOWEDX, and the problem will be corrected next month. hope.

Judging from the mail, people aren't satisfied with a two-page DXM, anyway. It's gratifying to know that you like this column that much, and we 11 try to juggle the allocations around somehow.

I should have gotten this to the printer on Thursday; now it's Sunday, I just got back from the Winter SWL Festival...maybe I'll wrap this up tonight, but it'll probably be tomorrow, as Paul just got in a lot of cool stuff and can do an extra page, which I'll pick up tomorrow.

 $\frac{\text{THE WINTER SWL FESTIVAL, 2nd EDITION}}{\text{The thing about Pennsylvania is that once you leave the major cities,}}$ you're apt to find yourself in someplace you've never heard of, i. e., Kulpsville. But there is a Holiday Inn there, and I'll give the place \*\*\*\*: Four stars, because the people there are really nice and seemed genuinely excited about having a shortwave convention there.

Four stars for Bob Brown, who should go into the convention business, as he's getting to be a real pro at running these things. (Nothing to it, right, Bob?) Seriously, though, without making a big deal about it, Bob KW3F has turned into a bridge-builder--between HamOps and listeners, between (and among) the various clubs and ANARC, and between the faces behind the names.

I treat these things as social events, but there were a few seminars and round-tables. One in particular, which was called "The future of clubs," or "Meet Bob Horvitz," or something, gave a number of club leader-types (Sheldon Harvey [CIDX], Harold Sellers [ODXA], Chuck Rippel and Harold Cones [NASWA], and a healthy SPEEDX contingent, among many others) a chance to swap ideas; one very promising development is that a marketing specialist from the Wharton School has offered his services to ANARC. Promoting radio listening in general should help us all.

Sheldon Harvey is an amazing person: He goes anywhere he's asked, all in the service of promoting radio. He and Bill Westenhaver have a DX-program on CKUT in Montreal (this station reaches 10% of the population of Canada); he's been on a couple of television shows; he runs classes and seminars all over southwestern Quebec; and, as he said in his afterdinner speech, "Every day I'd go by this nursing home, and I'd sea the people sitting there. Watching 'The Price is Right.' Watching Bob Barker. It's people like that who need the radio hobby." If you ask him why he guit a well-paid job (chief accountant in a Montreal law firm) to pursue this, he just says, "I believe in it. It's something I have to do.

He isn't promoting CIDX, necessarily; the thinking is that the more people get into radio, the more will eventually find out about radio clubs. He's come up with some very creative ideas about reaching out to the general public, and has printed up a few of them. You can write to Sheldon at: 79 Kipps St.

Greenfield Park, Quebec, Canada .74V 3B1

I'd suggest that you enclose some Canadian stamps or something. He gets paid for some of this, but not for very much of it.

If you happen to be talking to one Richard A. D'Angelo, he might try to tell you that I am prone to over-eating. Don't believe a word of it! The food was good-o, that's all.... Anyway, Richard agreed (at the SPEEDX Summit Conference) that I don't have to type a Table of Contents on the front cover if I don't have the time (which I don't, not this month), so thank you, and \*\*\*\*. (Four more stars to Don Thornton, who supplied sufficient quantities of Australian DX, so to speak, helping to while away theafter-hours).

Your humble editor won a door prize, to wit, the Spanish "Language Lab," generously donated by Gerry Dexter. Unfortunately, I don't have a list of donors on hand and would have to leave someone out, but Paul and Adam brought down a bunch of goodies from Gilfer, NASWA and we tossed in some free memberships, and the prize table was surely a bounteous sight. don't know where the paint-can AM/FM radios came from.

So now, start THINKING FLORIDA!

Here's a preliminary schedule from ANARCON '89.

FRIDAY: Exhibits by stations, clubs, manufacturers, equipment dealers, publishers, &tc., start at 10:00 AM.

An "Island Welcome" at 7:00 PM--poolside reception with a Caribbean

theme, including steel band. SATURDAY: The seminars start at 9:00 AM (yeah, right...), including something called "Florida's Unique Utility Stations." Bob Horvitz was telling me something about this, and it sounds great: You'll be able to track Cape Canaveral to some extent, and ANARC is expecting a full display from our Space program. It turns out that we'll be just up the road from a major USCG "intercept" station, where the Coast Guard seeks out drug smugglers via radio and technology--Bob tells me that this is truly a state-of-the-art monitoring station, and it will be an exciting privilege to check it out. Sounds good, yeah.

The ANARC Banquet is at 8:00 that night. Dinner will consist of Floridian and Caribbean specialties. (Pray tell...) This also includes the ANARC Award presentations, the keynote speaker, and a raffle. It set here that this may be a poolside banguet if the weather is OK, which may mean that I can leave the necktie at home. What a relief! But maybe I'm extrapolating...

SUNDAY: Andy Sennitt's annual WRTH Quiz, at 10:00 AM, followed at 11:30 by the International Broadcasters' Forum.

1:00 PM is the Official Closing, followed by an optional sightseeing tour or a "lazy afternoon at the beach." (Is there another kind? A "hyperactive, stress-laden afternoon at the beach?" I dunno....) But we're not done ....

MONDAY: An International Broadcasting Conference will take place for broadcasters and other shortwave professionals. For everyone else, there will be an optional all-day trip to Disney World and EPCOT. (You didn't seriously think I'd get through this without alluding to Da Mouse, didja?)

Anyway, this does sound great. As I said, I like the social aspects more than anything, but ANARC and organizer Jeff White have obviously gone to great lengths to offer "something for everybody." For more info, call ANARCON 1989 or write:

P. O. Box 272301 Tampa, FL 33688 (813) 384-2354, ask for Jeff

PUBLIC SERVICE ANNOUNCEMENT: THE FRIENDS OF SPEEDX, by Bob Thunberg Are you a non-contributing member of SPEEDX, but still wish to become a Full Member? Do you desire to show your appreciation of the fine work performed by our dedicated staff? If so, why not make a donation to the Friends of SPEEDX? All monetary donations will be extremely appreciated. and those who donate at least \$10.00 will be rewarded with a Certificate of Appreciation, suitable for framing. Please send all donations to SPEEDX HQ, P. O. Box 196, DuBois, PA 15801-0196. Thanks, Bob. And thanks to all of you who have contributed so far. The text was written on a blue index card at the Winter SWL Fest.

I LIKE MAPS

...so I want to tell you about this catalogue I got from Champion Map Corporation. They've got thousands of city and state maps, covering just about everyplace in the USA; I've seen a couple, and they're real beauties, with nice typefaces and cheerful graphics. If you're planning to catch ANARCON '89, for instance, you might want to get "St. Petersburg City" and/or "Metro Pinellas County;" it's really frustrating to get somewhere and discover that the local distributor is on strike or the hotel doesn't know what it's doing.

You can request a catalogue from them at: 200 Fentress Blvd., Daytona Beach, FL 32014, (904) 258-1270.

For outside the USA, there's a store in Asbury Park called Around the World in Maps. I was there just last weekend, and I found road maps for places like Guinea-Bissau, Afghanistan, Mongolia, and (my personal favorite!) Reunion Island. They don't have a catalogue, but, if you're looking for a particular map, you can write to them at: 548 Cookman Ave., Asbury Park, NJ 07712, (201) 774-8822. If you're not in a real hurry, I get there every 4 weeks or so, and can check out what they have or what they can order for you (please send an SASE if you want me to look something up for you).

### WHO IS FAMILY RADIO?

Family Stations, Inc., the parent corporation of WYFR, has attracted some attention through its controversial policy of applying for FM "translators" (low-powered relays) in locations which are apparently not the markets which they actually want to serve. Recently, for instance, they applied for a translator permit to cover Long Island, Alaska, which has been deserted since World War II. In this particular case, their intent is apparently to get a transmitter into neighboring Kodiak without going through normal procedures. Translators, unlike most primary FM stations, can have directional antennas; and the FCC gives permits for them more easily than for new stations. It is possible that Family Stations is affiliated with the Chicago-based

Moody Bible that Family Stations is affiliated with the Chicago-based Moody Bible Institute. Dr. Bruce Elving has detected a pattern of "noninterference" between the two organizations in terms of market coverage, challenges to one another's applications to broadcast, and so forth. This is conjecture, but it's interesting; Family Radio has been conspicuously closed-mouthed (unlike most Christian broadcasters) about the foundation or source which backs them.

Dr. Elving is the publisher of <u>FMedia</u>!, a monthly newsletter which I can recommend. He's opinionated (he's already converted the USA to the metric system, for instance, and he's predicting the imminent demise of AM radio as a viable medium) but always ready to entertain debate. If you're interested in North American domestic radio, <u>FMedia</u>! is well worth a look. (Adolph, MN 55701-0024 [that's right, no street or postal address--can a Family Stations translator be far behind?]; \$2 should get you a sample).

### ABOUT OUR COVER

...this information arrived at HQ in the middle of February, so it's still current. Just in case the address doesn't come out well on the cover, it's: Dr. Michael Biel

Morehead State University, UPO 893 Morehead, Kentucky 40351 (606) 783-2794; (606) 783-2134; (606) 784-8404

It kind of makes me want to go back to school. (???)

### CAROLINE, NO

When the ship from which Radio Caroline broadcast sunk in a storm in 1980, the famed Europirate's operator, Ronan O'Rahilly, decided to raise some money in the United States. He and a New York lawyer named John Leonard approached one James Ryan of Philadelphia to help with fundraising. Ryan had just served 30 months in federal prison for mail fraud. Ryan raised \$1.4 million (including \$225,000 from a local drug kingpin

Nyah laised \$1.4 million (Including \$225,000 from a local drug kingpin who is currently serving a life term) over a two-year span, but accused O'Rahilly, Leonard, and a third party (Ernst Kunz of Liechtenstein) of skimming some of the investors' money for their own purposes. No charges were filed, but it seems that the accusation was itself a sophisticated con; Ryan was convicted last month of pocketing \$325,000 from the investment kitty, and will be sentenced on 23 March. He faces up to 35 years in prison. (Philadelphia Inquirer)

I could make a remark here about pirates, but I'll spare you all....

NEW PUBLICATIONS FROM TIARE

THE SWL ANTENNA SURVEY, by Ted Benson WA6BEJ. Reports on both outdoor and indoor models, including set-up requirements, prices, and specs. (\$6.00 in the USA; \$7.00 elsewhere).

THE 1989 PIRATE RADIO DIRECTORY, by George Zeller. Reviews pirate activity during 1988; includes names of active stations, formats, frequen-LOS NUMEROS: The Numbers Stations Log, by Havana Moon. An up-to-date frequency list which now includes numbers stations in languages other than Spanish and English. Hundreds of frequencies for the numbers

hunter! (\$5.00 USA; \$6.00 elsewhere). SHORTWAVE GOES TO SCHOOL: A Teacher's Guide to Using Shortwave Radio in the Classroom, by Myles Mustoe. Contains an introduction to shortwave, discusses how shortwave can be used to enhance learning, and tells how to set up a Shortwave Learning Center in the classroom, along with over 40 learning activities including listening to or working with shortwave. (\$26.95 USA; \$28.95 elsewhere). Tiare Publications, Box 493, Lake Geneva, WI 53147. Payment in \$US only,

please.

<u>PROGRAMMING: PART 2</u>, by Greg Fischer I'd like to plug the program "What Do You Know About Turkey?"--a regular Thursday (or UTC 04:00 Friday) feature on VoT, written by the talented Duygu Baykal (be still, my beating heart), who never, ever gets credit on the air. The program is always filled with mythology, history, pithy idioms, and at times appropriate music related to the weekly topic. Subjects recently have included meerschaum; the history of mirrors; and the myth of Bellerophon and the Chimera, to give some examples. I would recommend the program highly to our membership. Me, too. Thanks for writing, Greg!

### CODA

SPEEDX is having elections for the Board of Directors this year; details will be in next month's DXM, I hope.

Let us know what you think of the "new look." I'm not sure what this month's issue is going to "look" like yet, myself; but, as soon as I do, I'll tell somebody. If there's not room for "What's On...," hang on until next month, when more of the spring skeds will be in place. OK, here's Harold, with the first Awards Update! 73's, Eddic

Thanks for the intro, Ed! So far, the awards program isn't doing too badly. I hope the trend continues. I received twelve requests for the Awards Pamphlet in January.

PATRICK O'CONNOR will receive the "360 Award" for 50 countries; the "CW Beacon Award" for 100 stations, and the "Armed Forces Award" for 100 stations. Not a bad start at all!

DAVID CULP will receive the "Americas Award" for 25, "Asian" for 15, "European" for 25, "USSR" for 20, and "VOA" for 5, as well as the "360 Award" for 100 countries verified. See how easy it is once you get started??

I'm adding a new "Cruise Ship" award, and will send an addendum to the pamphlet and an update list to everybody who has received the pamphlet already.

A special thanks to Betsy, who sent me her SWL QSL/PFC.

Look for another update in the May edition of "DX Montage." Hope to hear from you. If I get the same response this month as I did in January, I'll add another award!

73's till next time, Harold

Carl Huffaker Domicilio Conocido Huasca De Ocampo Estado De Hidalgo Mexico

Several people -- and some in other publications -- have tentatively identified the Peruvian on 4785 kHz as Radio Cooperativa, Satipo. The reports had a familiar ring, "Indian language religious", "no ID, but mentions of Satipo", Angean and Indian music", etc. It was familiar, a sleepy morning back on December 8th and the hastily scribbled notes in my own log were essencially the same. But there was more, on the edge opposite 11:20 I'd noted 'possible ID, 22A, 444'. It was the cassette and footage number, so I dug through the box and replayed the tape. Ιt was an ID, but in the Indian language. The name, in my approximate phonetics, sounded something like "Chichiamayi" (the final 'i' in the Spanish that sounds like the English 'e'). Then they went to clear Spanish with "frequencia 4785 kcs de 60 metros". This was followed by a talk in Spanish about the Virgin of Guadalupe whose anniversary is on December 12th, the most important Saint's Day in Latin America. They faded under a UTE at 11:38 with no chance for another ID.

Several, if not many, Indian-language stations use a translated station name when broadcasting in the local language, so it's probable that the station is Radio Cooperativa in Satipo. It does illustrate the value of taping everything for future reference and saving the tapes until the reports come in from the DX bulletins and broadcasts. I use a cycle of 40 1-hour tapes which gives me adequate delay time even at the height of the season. The cassettes are numbered in sequence with A and B for the two sides. On the edge of my log, I mark the footage when I start and stop recording each station. more important, I note the footage of each ID or important announcement that I want to copy later. This makes it easy, very easy, to go to the proper spot on the tape when writing a report.

There's a section of tape from earlier the same morning that's waiting for confirming information. At 07:43, I picked up a station on 4885 kHz, typical Ancean music, but the cowboy style with yipping. They ID'd at 07:45 "Aqui es Radio Nuevo Mundo, (?) sesenta". Later there was a GMT -4 timecheck. That was all as Radio Clube do Para came on at 07:55 and blanked them. I have no reference to them in any shortwave list, but checking througn WRTH, there is a Radio Nuevo Mundo in Sucre, Bolivia that broadcasts on 1160 kHz. It was a good Bolivian morning as I had a good signal from Juan XXIII on 4965 kHz between 09:30 and 10:00.

On the 6th, Colombia open up rather dramatically on 49 meters. Between 19:30 and 11:00, 1 ID'd <u>L V de los Centauros 5955 kHz</u>, <u>L V de la Selva</u> 617C, <u>L V del Llano</u> 6115, <u>Radio Macarena 5975</u>, <u>Radio Super, Bogotá</u> 6065, <u>Ondas de Darien</u> 6085, and <u>Radio Mira</u> 6015, all with good signals. I was reworking my second receiver at the time and feel that I missed several because I was busy listening to another station.

In Guatemala, <u>Radio Tezulutlán</u> uses the slogan "La Voz Official de la Iglesia Catolica". This must be a local exaggeration as unless the situation has changed recently, each station is owned and operated by the local church or mission and completely atomomous as far as radio goes. The Protestant stations, too, are stressing church affiliation and the days of one group or the other suddenly becoming quiet after each revolution seem to have passed. Here in Mexico, <u>Redio Huayacocotla</u>, the

(9)

only really local snortwave station in the country, is carrying more and more church announcements and religious programs, Catholic of course **as** is the village. XEUJ continues to beam its Sunday morning Evangelical broadcast towards the border. Radio's role in the Fhilippine revolution has been largely forgetten and most governments no longer see religious radio as a political threat.

After <u>Radio Huayacocotla signs off around 01:00, La Voz de Atlitlán</u> comes in with a good signal on 2390 kHz until their signoff at 62:00. The program is usually requests, popular Mexican music but often with typical Guatemalean instrumentation. If you hear them before 01:00, be careful. Radio Huaya often dedicates music to listeners in Acatlán, a nearby village whose name sounds a bit like Atlitlán to ears unfamiliar with Indian names.

Because thermal inversions are most frequent in January, and because the smog is most lethal during the early morning hours, the goverment has declared the entire month of January a school holiday (and added an extra month in June). This will keep the children off the streets during the critical hours and should reduce traffic as it seems that every mother operates a schoolbus for her several children each of which attend a school in a different area and on a slightly different schedule. After my escape from "the largest city in the world", I've been slowly, very slowly, disassembling my equipment, cleaning the switch contacts, resoldering the joints that suffered from the acid air, cleaning most of the metal to metal joints, and only now realizing that the poor maintence of Mexico radio is a result of enviornment and not technical ineptitude.

In most of Brasil sunrise changes little, but the legal time does during summer (winter? what do you call December on the equator?) and the sequence of early morning stations during the early mornings is more aramatic than ever. Those that I hear now are typical of our winter, but if the pattern follows previous years, there should be a sudden change around the March equinox, and this year despite killjoys who say this sun cycle ain't much, reception is better than ever....

The Spanish on 5005 kHz is Bata in Equatorial Guinea. In past years, the station sounded rather African, but the present LV talks like an Argentine. (That's the typical Latin-American way of describing a rather cultured, easily understandable Spanish accent.)

And in answer to several questions, <u>Radio Madre de Dios</u> is active and on its normal schedule. Reception here is limited to evenings as they are blanked by Sarawak in the mornings. Try for them around 01:00 UTC. The program at that time is church announcements and personal messages. Towards summer when the greyline approximates our continental axis, morning reception is possible and sometimes excellent.

1 11

<u>Radio Mil</u>, Sŵ on 6008 kHz, was on full power (250 watt) operation again this year during the Christmas-New Years holidays. Their taped ID goes "Radio Mil, XEOY y XEOI, onda larga y corta, transmite desde la zona azul y oro, ciudad de Mexico, entregada de la (..?..) R N, Nucleo Radio Mil."

The transmitter is located near several politicians who can't concieve that their TV set is faulty, so they've been ordered to quit interfering. To keep their license, they go to full operation during the holidays when everyone who can afford it is at the beach. This has been going on for 6 or 7 years now, and will probably continue as there was almost no change in power from the last election. Some years, but not always, they have also come on the air during the Easter Holidays. Check for them during that week.

(10)

From Benet, possibly incorrectly as this is from memory:

"The ghostdance has been blotted from the map. Call as you will, those dancers will not come to tear their breasts upon the bloody strap, mute-visaged to the passion of the drum ....."

Yet it does reappear, in a different form and farther to the south, the "being Indian", the resistance to European culture, and somehow, mixed with Christianity, and radio. I'm not being alermist, for it's a revolution doomed to failure by its own goals. And there is no shade of religious partiality, for it appears that other churches are taking the same blundering steps. It's a movement that exists, secretly, but it does help explain the almost-schizophrenic programming of the Central American religious stations.

I'd been monitoring Guatemala, the religious stations. There was a pattern, the musical programs with their long lists of dedications, the Indian-language religious teaching heavy with Spanish vocabulary, the campasino news always a bit to the left, and the official news blocks that always sounded a bit incongruent on that frequency. I couldn't put my finger on it, and it bothered me. But the morning was bright, I was restless, so I drove to Huayacocotla.

I arrived at the station before 3:00. Gemma, the YL/DJ on the 3:00 to 7:00 FM times segment, let me in. We talked DX and drank coffee, she makes good coffee, while she fired up the transmitter and got the station on the air. They do start at half-power for the first few minutes of each transmission. I noticed the lights flickered and dimmed. "Oh that" she explained "is the mill across the street where they grind flour for tortillas. When they start the motor, the transmitter goes down."

The station had progressed since my last visit, new offices downstairs, new offices, workrooms, and conferencerooms upstairs all done in the attractive wood of the Mexican mountains. And they're building an audience, for in one workroom, I saw detailed instructions for a project of modifying 400 receivers to tune to 120 meters.

I asked about the large number of dedication on her program. She explained that they were current as they received between 35 and 40 listener's letters every day. With less than that number of DX reports for a season, the SWL/DXer ratio becomes apparent, hardly that that the international broadcasters cry about at conventions. We talked of the history of the station. She'd only been there three years, but her enthusiasm for the present management was apparent.

The station is operated by "Fomento", a local organization dedicated to economic and social development of the area. My infrequent visits confirm that this is one of the few areas in the Republic where this development is a continuing reality. Fomento is headed by the local priest which explains the acceptance of Catholicism as a cultural reality, and the station's bending Mexico's anti-clergical and broadcast laws. There seemed, too, an organization "ALER" involved. I managed to pick up some literature, politely and with permission, of course. This gave me an insight into the confused history of the station. It starts in Ecuador.

When Monseñor Leonidas Proaño was ordained as a priest, he dedicated his life to the poor, but when he was ordained as Archbishop of Riobamba in 1954, the dedication was redefined as to the Indians. He was an active activist, founded many organizations within and without the church, was involved in demonstrations, land reform, and liberation theology. Just before he died in 1988, he had arranged a commeration for 500 years of Indian resistance, a resistance he defined as against domination by Spain, by various governments, and by American imperialism. Radio was to be a means, (I quote in translation) "The programs that our radio launch into space are, first, that the people be well informed, and second, that we know who is with us, who is fighting .....", and the revolutionary goal, (again, I translate) "Little by little, the latinamerican people are going to realize that we're not distinct countries. We're going to realize that we're part of one great country, Latin America."

Monseñor Leonidas founded Escuelas Radiofónicas de Ecuador in 1962. Shortly thereafter, Radio Huayacocotla was established as Escuelas Radiofónicas de Mexico, and Escuelas Radiofónicas were established in several Latin-American countries. The followed a period of education by radio, and the creation of several organizations whose professed aim was the production of campasino leaders. In 1973, operation of Radio Huayacocotla was moved to Fomento because of "internal conflicts". Around this time, an advisorary organization, Asociación Latinoamericana de Educación Radiofónica (ALER) was formed in Ecuador. The 5th ALER Assembly was held in Guatemala in 1983 soon after La Voz de Atlitlan returned to the air.

I was alone when I walked along the hall upstairs. In one of the offices, I noticed a map. It was well done in brightly colored wood. The title was the country "Latin America". The old political boundries were there, but unnamed. There were no cities, just the names of radio stations and those long letter-abbreviations that the Latins use for organizational names. The "Gran Patria" had the Rio Grande for its northern border, but to the east, west and south, it was simply ocean.

The ALER calendar marks religious holidays, and on some dates, evidently birthdays, the names of radio stations and organizations. Some are familiar on shortwave: 1/15 R Tezulutlan, Guatemala; 3/19 Escuelas Radiofónicas, Ecuador; 3/20 R Mam, Guatemala; 4/4 L V de la Selva, Peru; 5/13 R Onda Azul, Peru; 8/4 R Chortis, Guatemala; 8/25 L V de Atlitlan, Guatemala; 9/8 R Occidente, Venezuela; 10/25 R Huayacocotla, Mexico; 11/ 21 L V Nahuala, Guatemala; 12/25 R Juan XXIII, Bolivia.

There'll be no Gran Patria, an impossible dream, but it has established a pattern for evangalization and radio that even the new stations follow because it's there.

(12)

Welcome to the column. We are continuing our series on audio filtering. I said last month that we would "take a *closer* look at the Autek QF-1A", which we can't do until we take a quick peek at its features first! Oh, by the way, I still have a mint condition Kenwood R-2000 sitting in a box collecting dust. I WILL sell this excellent receiver for the highest REASONABLE offer that I receive within the next few weeks. I have an R-5000 and about 10 R-392's and other assorted rx's lying around the house and I simply don't need it. Here is your chance for a real bargain!

## Principles of Audio Filtering: Part 2, The Autek QF-1A

The reasons that I chose the Autek filter over other comparable devices such as the Datong and MFJ units are simple: price and performance. The Datong filter is quite expensive; it is priced at about \$229. It is an excellent performer and it can accomplish a *few* things that the Autek and MFJ models can not. But in my opinion it is not worth the additional price. (Datong actually has two audio filters available; the other is also expensive). The MFJ model is no longer available and 1 am not certain whother MFJ Enterprises has a new design on the way or is discontinuing manufacture of audio filters. The Autek sells for \$79 postpaid and is only available from the manufacturer. You can write them for more information at: Autek Research, Box 302, Odessa, Florida 33556. And if you are thinking that I have a vested interest in the Autek outfit, forget it! I simply think that the Autek delivers the "most bang for the buck". I spent \$79 of my hard-earned money on the QF-1A last year and I have certainly received my moneys worth.

There are some misconceptions regarding audio filtering techniques that we should address at the outset. First of all, an audio filter is not a panacea. No audio filter can make every signal that finds its way to your speaker or headphones intelligible. Audio filtering is not an "alternate technique" for accomplishing what should have been performed in the RF and IF stages of a communications receiver. Limiting the bandwidth of the signals being processed in the RX is more effectively accomplished in the IF stage.

Interfering signals on the same frequency can not be separated with ordinary techniques. A few sophisticated procedures that digitize the information of two co-channel signals in an attempt to separate them do exist. The techniques involve very complex algorithms which evaluate the time and frequency spectrum of the waveforms and group the related "samples" of information together and store them in separate blocks of incredibly large amounts of computer memory. The audio output is shifted in real time because of the delay created by sampling, analysis, grouping and reconstruction of the audio signals. This technique is far from perfect and doesn't work very well on two signals with similar spectral characteristics. It would work best in a situation where a slow-speaking male voice was mixed with a fast-speaking female voice. And you too could have one for only \$100,000 -hi! Needless to say, the Autek QF-1A can't separate co-channel signals and neither can any other commercially available filter. using an external audio filter depends a great deal upon the receiver it is connected to. Some of the more expensive receivers which have excellent IF sections and quality audio in the first place may show little if any improvement when adding an external filter. With an external filter you could certainly "squeeze, poke and push" and otherwise wildly manipulate the signal so that it *sounded* different, but you may not make the desired signal *more intelligible*. The most important factors to a DX'er attempting to pull a weak signal out of the mud are intelligibility and stability. Lower priced receivers with poor IF selectivity and inferior (cost-effective) audio circuitry will usually benefit more noticeably from addition of an outboard filter.

Perhaps the most important factors in successful application of an external filter are the skill and patience of the operator. Some SWL/DX'ers expect instant "magic" crystal-clear response with any signal with the mere flip of the "on switch". Filters like the Autek QF-1A require a considerable amount of "trial and error" setting of the controls in order to obtain an optimum response. The Autek does come with instructions which offer guidelines for the control settings depending upon the situation. Patience in manipulation of the knobs of your receiver and the filter are important. A fair amount of experimentation involving different interference scenarios is required when using any such audio filter in order to produce a usable signal.

Many available filters can be used with headphones or external speakers. Most every DX'er has a pair of headphones, but many do not have a complete external speaker. The Autek QF-1A has an audio amplifier circuit which will easily drive an external speaker. If you do not have an external speaker you will need headphones when using the filter; an arrangement that is undesired by many armchair travelers who enjoy listening to music without the feeling of "ice-tongs around the skull". The Autek can easily be interfaced (by anyone with a little "kit building" experience) so that you can use the existing internal speaker in your rx with the addition of single switch and select filtered or unfiltered audio. It is also simple to connect the output of the QF-1A to the audio input of most stereo systems, but overdriving the stereo input and the subsequent distortion could be a problem. The QF-1A has no audio gain control; it is fixed internally in an economical attempt to provide adequate gain with minimal distortion. An extra audio gain potentiometer could have been added to the front panel, but at the expense of increased cost and consumption of more of the available front panel real-estate. Consequently, the filter output level is controlled by adjusting the AF gain of your receiver.

The QF-1A has an annoying loud "pop" which is heard when both turning on and turning off the unit because of the charging and discharging of capacitors in the power supply circuit. If you are using headphones, this "pop" can be quite disconcerting. I modified mine with a special switch so that the audio is removed from my headphones before the power supply is de-energized. This isn't necessary if you simply remember to take your headphones off before you turn off the QF-1A! (Gee, this has turned into a review of the QF-1A and that wasn't my original objective!).

Next month we will look at the capabilities of the Autek QF-1A. There are four major filter functions available; peak (bandpass), notch, lowpass and highpass. Most readers are familiar with these terms and have a basic understanding of what each type of filter does. We will explain what and how each type of filter accomplishes its function. The principles that apply to audio filters apply to filters in general, including many of the other types found in most communications receivers. By examining what happens at audio frequencies, we will build a foundation for a better understanding of the signal processing that occurs in our receiver. Hopefully sometime before they fire me we will have peeked inside our receivers on a journey from the antenna terminals to the headphone jack and stopped everywhere along the way. 73's and great DX!

The programme is repeated several times in different antenna beams to cover all parts of the glob. All Sunday transmissions marked "P" in the schedule carry Norway Today, up to and including 05 UTC MONDAY MORING. (Forest Bishop,NY) UNITED KINGDOM - On the 1/9 "Waveguide" program, Mike Still of BBC's
- UNITED KINGDOM On the 1/9 "Waveguide" program, Mike Still of BBC's Transmission Planning Unit said that 2 new 250 kW transmitters and 4 new high-gain antennas are being added to the relay station on Ascension Island. Tests from these new installations may start as early as May; they should be fully operational by September 1989. These should improve reception quality in West/Central/Southern Africa and the southern cone of South America. Mr. Still also said that the BBC is currently bringing into operation 4 new 300 kW transmitters at UK sites (to replace 6 old 100 kW transmitters dating back to World War II), and 2 new 300 KW transmitters in Cyprus (to replace 2 old 20 kW transmitters). Also as of July 1, 1989, the BBC will be discontinuing use of their long established freq of 18080 due to that fact that WARC has allocated this range of freqs to other purposes. The BBC is negotiating for a replacement freq, but nothing has been yet decided. (via Bill Westenhaver) UNITED STATES -KJES, Vado, New Mexico -New Shortwave Station. Jim Bush,
- UNITED STATES -KJES, Vado, New Mexico -New Shortwave Station. Jim Bush, Missionary Radio Evangelism told me that I probably heard their first test on frequency 11730 on 1/21 @2016 tune in w/a M saying prayer petitions repeated by a group of children. @2020 a W took over with same type of stuff! @2029 The children said "This is KJES Radio owned and operated by Missionary Radio Evangelism, Vado, New Mexico 88072. We are testing. The Lord your God is testing you to find out whether you love him with all your heart and with all your soul." This type of broadcast went on till 2100\* on 1/21. Via Glenn Hauser on RCI's SWLD on 2/2, Glenn says first reported on 1/12 at 16 past 17 by Ed Lacrosse in CA and Glenn Hauser heard them testing again Tuesday the 31st only from 1515-18 UTC on 15140. 1/31-Per my (bmm) telephone conversation with Don Smith, a Technician 1st Class Phone, at KJES: KJES is located on the 'Lord's Ranch', a working farm, in Vado, New Mexico. Vado NM is 12 miles from the Texas line SE of Las Cruces. The ranch is owned by Father Rick Thomas, SJ. There are a few bugs in the transmitter. Grid Tuning needs tightening. The address for

17

to: Missionary Radio Evangelism, 3720 Greenwich Dr. El Paso, Texas 79902. Either one will get you a QSL Card which Jim Bush at Missionary Radio Evangelism, in conversation with him on 1/30, tells me are not printed Telephone # for KJES is (505)-233-4018 and the Telephone # for yet. The Missionary Radio Evangelism is (915)-533-2911. Excerpts from Jonathan Mark's interview with Paul Warren, one of the directors, on Radio Nederland's Media Network on 2/2: JM: So what is the power of the transmitter you're using? PW: Right now we're testing with only a 5 kW transmitter. Our main transmitter will be a 50 kW and we expect to have it on the air about Feb 15th. The present transmnitter is a 20 kW transmitter that we're operating at 5. It will actually be the driver transmitter for the 50 kW that we will be using later. JM: And what's the antenna? PW: The antenna is a 360 degree steerable Log Periodic 108' long boom and 108' long, longest element 27 elements 27 DB gain and it's on top of a 90' tower, that's very unique. It looks like a 3-legged Eifel tower. JM: 15140 has been tested towards Europe and between 15-0000 they may also try 11730 towards the Pacific and later in the local evening between 01 and 04 hours UTC, look for them on 6070 or 6095 beaming towards between 01 and 04 nours UTC, look for them on 60/0 or 6095 beaming towards South America." 2/6-Bill Westenhaver, Montreal called me (bmm) to say KJES is testing on 17840. He heard them from 2320, having audio problems. I (bmm) then called KJES in Vado, NM and talked to Pete Warren, an Engineer. He said the 17840 freq is testing today from 23-01 towards Japan and Korea. He said they had problems with audio system they are installing. Also said they would not start broadcasting until April 15th. Said look for them on 15140 to Europe (N = 1515 19, and on 1516) for them on 15140 to Europe/N. Africa 1515-18 and on 11730 to Australia /New Zealand & Japan from 15-21. They are looking for people in their target areas to send them reception reports. They have an onsite Amateur station W5MQA, Pete Warren. (bmm) On 2/7 I (bmm) received a letter from Father Rick Thomas, SJ saying KJES has broadcast only about 7 times. We do not have a QSL card yet. The transmitter is about 6 miles east of Vado, NM. Per letter from Father Rick Thomas, SJ on 2/7: "The license is owned by Missionary Radio Evangelism which is an ecumenical group. the equipment is owned by Our Lady's Youth Center and located at the Lord's Ranch. This is a joint venture. Our purpose is to broadcast the Word of God once we get cranked up. Yes, there will be need of monetary donations to pay expenses." Also inclosed 2 pictures. (Antenna and A11 transmitter). (I wrote 2 letters. One to Missionary Radio Evangelism and KJES. Both letters answered by Father Rick Thomas, SJ. ### DX NOOZ

(32)

ANGOLA - Luanda is back on 4953.2 with good signals, // to 3375.7, but no trace of 3355v. Benguela is reactivated but irregular on 5040.3 until 2300%, 77 6152.2. Lobito is on 7151.6. Lunda Sul has been heard regularly on 4860.4 with improved signals. Moxico seems to be inactive. (Vashel Forinel - RSA)

Huambo is active on 5062.8 until 2015\*. (OZDX/Tyson/Hauser/SWLD)

Replaced 5955 with new 9800, sled 0700-1500. (RNMN) BOTSWANA

DJIBDUTI - Sked on 4780 is 0000-0400 Somali, 0400-0600 Afar, 0600-0800 Anabic, 0800-1100 Afar, 1100-1000 Somali, 1000-1500 Anabic, 1600-1700 Somali, 1700-1800 Afar Fridays 0700-0800 Somali, 1100-1000 Somali, 1000-1600 Arabic, and 1600-1700 Somali. (Hancock/DXSpread/Hauser/SWLD)

EGYPT - Cairo on new 9940 in AA from @2030-past 2200. (MacGibbon/Hauser/SWLD)

GABON - Africa No. 1 has been heard since Feb. 1 08:00-16:00 hrs on 17630 Hbs. 15475 has been replaced by 15200 from 1700-2100. (BBCMS/SCDX and SENNITT/WRTH)

LIBERIA - LBS is back on shortwave, 6090 at 0800-1800, 3255 from 1800-2400. (BBCMS/Hauser/SWLD)

MADAGASCAR - The morning broadcast is now heard on 5010, apparently not 7/3287.6. The 90mb frequency is still used during the evening, (Forinel - RSA)

MOZAMBIQUE ~ Emis. Interprovincial, Maputo has been heard on strong 9851.0, the second harmonic of 4925.5. Beira has been heard on various days on 3440.5, 3420.0, and 3316.9, all pres ex-3370; not heard at all on other days. (Forine) - RSA)

NIGERIA - Kaduna now on 6088.4 until 2245\*. (Allen/Hauser/SWLD)

SOUTH AFRICA - The SABC's R. Suid Afrika has added 11770 to 9665 for daytime broadcasts.

ZAIRE - Lubumbashi has been regular on 7202.9, but 4751v is inactive lately. (forine) -

ZAMBIA - Sked 0255-0600 and 1570-2205 on 3046; 0600-1500 on 3205; and 0255-2205 on 6165. (Ginbey/RNMN)

ZIMBABWE - The only daytime (L.T.) frequency currently audible is 7174.7 (Radio Two), with really poor modulation. (Forinek - RSA)

CLANDESTINE - Iran's Flag of Freedom address is 20 Rue de Compurcet, 75009 Paris France. Sked: 0330-0525 9045, 15560, 1630-1825 9045, 11615, (WOR/Snyder)

JUST ABOUT EVERYWHERE - DXer/publisher Joerg Flingenfuss managed to do some listening in Somalia, the lucky dog' His logs were too brief to include in the logging section, but here are some of the more interesting frequencies: 3210.5/1827/Maputo, Mozambigue: 3330/ 1830/Comoros: 4780/1745/Djibouti: 4785/0413/Tanzania: 4885/0355/kenya: 4915/0356/kenya: 6075/07537/enya: 7140/12417/enya. Most intriguing was a note that a very strong carrier was evident 24 hours a day on 11640.7, which might be the Hargeise transmitter idling with no modulation present.

\*\*\*\*\*\* Greetings and felicitations from your editor. Your loggings are hereby ordered to report in person to the Africa induction center (address above) by 12 March, 1989. Failure to do in person to the normalized so is punishable by law, under the terms of the curb terms of ter so is punishable by law, under the terms of the ECPA (Electronic Communications Publicity

William Westenhaver 3525 Aylmer St., #610 Montreal, Quebec, Canada H2X 2C1

Deadline: 12th Dates/Times: UTC Frequencies: KHz

What a March column! I've never had this many loggings to deal with before! Due to space limitations, I'll have to condense loggings for the most commonly heard stations. Sorry about that!

**2**.0

Hoom for one DX tip this month: R. Ulan Bator started JJ px on 1/20/1989. Sked is 1200-1230 and 2210-2240 Tuesdays/Fridays only on 9615 and 12015 kHz. ID is "Kochirawa Uran Batoru Hosokyoku desu." (This from Feb. 1989 SW DX GUIDE of JSWC, via Matsushita-JAPAK. Thanks for this!-ed.)

Well, we made it through this column; wonder what next month's got in store? Thanks to all contributors for this blizzard of loggings, and a special welcome to R. Kunkel-CA, Larry Saarikko-NY and Bryan Sharpe-CA on their first visits to A/O-land. Come on back next month, everybody! No visas required!

73- Bill 37

BETWEEN A BOUT WITH THE FLU AND SEVERAL OR MORE SYSTEM CRASHES, I was not able to include all that I would have liked to this month. Bill Battles sent many good tactical and aero loggings, Dick Moon passed along a whole bunch of stuff from South Africa, and Daryll Symington supplied a lot of military loggings. Some of this is included above. What I did not get to this month will appear in April's column.

THE FEBRUARY ISSUE OF OMNI MAGAZINE featured a piece on listening in to manned space missions with HF and VHF radios. I thought this was done very tastefully and without portraying the hobby as being out of the reach of the average individual. To the contrary, it stressed that this type of monitoring can be done with minimal expense. Also, not once did the words "world band radio" appear. Maybe there is some hope...

NASA IS INTENT ON RESUMING THEIR SCHEDULE of regular shuttle launches. The following launch calender was found on one of my local Packet BBS stations. Many of the payload acronyms are a mystery, but some are obvious: DOD indicates a classified Department of Defense mission, Galileo is a probe that will be sent into Jupiter's atmosphere, and HST is the Hubble Space Telescope (man's ultimate DX rigi).

Date	Mission and Vehicle
Feb 18, 1988 ***	STS-29 Discovery

nch has been pushed back,and will most likely occur in early or mid-April.

NASA, USAF and USN frequencies for shuttle support include the following (all USB except where noted);

2622.0 kHz	NASA booster rocket recovery	
2678.0 kHz	Cape Radio Range	
3385.0 kHz	NASA tracking	
3395.0 kHz	NASA tracking	
5190.0 kHz	NASA tracking vessels	
5518.0kHz	NASA tracking	
5810.0kHz	NASA booster recovery vessels	
6693.0 kHz	NASA aircraft	
6708.0 kHz	NASA aircraft	
6783.0 kHz	NASA tracking	
6896.0 kHz	NASA aircraft	
7461.0 kHz	NASA airport	
7675.0 kHz	NASA Kennedy operations	
7765.0 kHz	NASA tracking	
10780.0 kHz	USAF Cape Radio - Primary	
11205.0 kHz	NASA Pacific operations	
11407.0 kHz	NASA booster recovery	
13170.0 kHz	NASA aircraft	
14456.0 kHz	NASA tracking	
20186 0 kHz	NASA tracking - Ascension Island	
20191.0 kHz	NASA tracking - Ascension Island	
20197 0 kHz	NASA tracking - Ascension Island (LSB)	
20390.0 kHz	USAF Cape Radio - Secondary	
20393.0 kHz	NASA tracking	
tle schedule eeum		

Shuttle schedule courtesy of Michael East (via KD6TH-4 PBBS). Frequencies courtesy of John Nashmy, N2EVD and the N4WF RBBS.

ANOTHER TIP FOR LISTENING IN ON SHUTTLE MISSIONS is to check the ham bands. As noted in The above mentioned issue of Omni, amateurs at Goddard Space Flight Center operate a club station which re-transmits shuttle-to-ground VHF communications on the HF ham frequencies. Try 3860.0, 7185.0, 21395.0, and 28650.0 kHz. A local New York City-area club was relaying the audio from NASA's satellite feed. I found this audio transmission to be a fraction of a second ahead of the live coverage from Cable News Network due to the extra trip the signal has to make from CNN HQ in Atlanta to their own bird and back to the local cable company. So, we can once again say that radio hobbyists have earlier access to ground breaking news, although in this case it's only about a half second!

USS TENNESSEE, AN OHIO-CLASS TRIDENT BALISTIC MISSLE SUB, was logged by (who else) Andy Gordon on 14 February at 1000 UTC on 2716.0 kHz calling Canaveral Control. The TENNESSEE was using the tactical callsign 4PF, and Canaveral ID'ed as H1V. The sub's homeport is Kings Bay, GA, and it's the first Trident to be homeported on the East Coast

TENTATIVE IDENTIFICATION OF STATION UVA is Batumi Radio, USSR. The station, which normally uses the call UFA, has in the past used the callsign UVA on the VLF frequency of 14.6 kHz, a frequency that suggests a military operation. Any more info is welcome. (Tnx to Bob Rankin, WONXN) (46)

A NEW UTILITY NEWSLETTER IS AVAILABLE. <u>SSBulletin</u> is published bi-monthly by Tim Braun (2064 Royal Fern Court #12B, Reston, VA/22091, and is available for 50 cents each. The bulletin focuses on voice communications only. In addition to the standard loggings section, <u>SSBulletin</u> features sections on equipment and tips on every aspect of the hobby. The next issue is slated for April 1. Contact Tim for more information.

SPECIAL NOTE to all who sent SASEs for the logging forms: I expect to have them available before the second week in March. They will also be available from Bob Thunberg as part of the new member package. Also, special thanks to those who have adopted my suggested report format on their home computers.

AS EXPECTED, THE WINTER SWL FEST IN KULPSVILLE, PA was a great success. Kudos to Bob Brown, KW3F, and all who helped pull the whole thing off. One of the more interesting things that happened to me occured during the panel discussion of utility DX'ing, when I was asked about the apparent paranoid psychosis of a certain German publisher who feels that not only are all other radio authors out to get him, but the whole United States as well. Don't you just hate hobby politics? A low point of the fest was finding an empty beer keg in the hospitality suite, not surprising when you consider that the good Doctor Harold Cones was present. It was a pleasure to meet many of the people that I have known only from the radio and telephone, and I look forward to doing it again next year.

IN DECEMBER, GREAT BRITAIN IMPOSED HEAVY FINES on five radio amateurs and threatened jail sentances for the horrendous crime of listening to "unauthorized" radio transmissions. They were ultimately caught as a result of their own discrepencies; the five exchanged utility frequencies over the air for ten months. An article in Britain's <u>New Statesman</u> & Society (16 December 1988) does a faily good job of pointing out the absurdity of such laws. The United States' own Electronic Privacy laws pale by comparison to those in England, which ban the reception of any signals for which the government has not issued a license. The article stresses that the attention this case is getting will most likely inspire more people to commit the "crime" of utility DXing, and at the same time warn them to be a little more careful about exchanging information with fellow hobbyists. (Thanks to William Borland for the clipping from New Statesman)
