BOTH VOLUMES NOW AVAILABLE!!!!!!

The special 45th Anniversary Edition...

1990 TELEVISION & CABLE FACTBOOK

“The numerous sections of the two volumes provide complete listings of virtually every organization involved in the television and cable industries. It is very handy to have when I need information quickly about a station or manufacturer, and it is indispensable for identifying which stations are carried by a particular cable system. I use it nearly every day.”

Joe Bruno, V.P./Engineering
 WMAR-TV, Baltimore, MD

For your convenience, the Factbook continues to be published in *two volumes*. Volume I, Stations, provides detailed information on every television station in the United States, Canada and major foreign markets. All U.S. commercial stations data is organized and displayed on a single page so it's especially easy to find and use. It's all there for you at a glance. Volume II, Cable & Services, covers cable systems. Systems are listed alphabetically by state and city. This remarkable volume manages to include a vast amount of new material each year to keep up with the rapid developments within the industry. Much of the information it contains is unavailable in any other source.
