

A
GENEALOGY
OF VACUUM TUBE ERA
RADIO AND ELECTRONIC
MAGAZINES

THIS IS A LIMITED LIST OF ELECTRONIC, SCIENCE AND ENGINEERING MAGAZINES FROM AND ABOUT THE ERA OF VACUUM TUBE RADIOS. THE LISTS ARE ARRANGED TO SHOW THE CONTINUITY OF PUBLICATIONS WHERE SUCH EXISTED. THE SUCCESSION OF TITLES, AND THE ABSORPTION OF FAILING PUBLICATIONS IS SHOWN, WITH THE DATES OF SUCH HAPPENINGS TO THE EXTENT THAT THEY ARE KNOWN. SINCE THE RELATIONSHIPS OF THE MAGAZINES IS SHOWN, THIS IS CALLED A "GENEALOGY OF MAGAZINES".

KEY WORDS:

PERIODICALS	RADIO
MAGAZINES	WIRELESS
LIST OF SERIALS	VACUUM TUBES
ELECTRONICS	VALVES

P R E F A C E

This is a compilation of titles of electrical and electronic magazines which have content, or relate to: THE HISTORY, DEVELOPMENT, AND APPLICATION OF VACUUM TUBES AS USED IN RADIO, TELEVISION, COMMUNICATIONS, AND INSTRUMENTATION.

This technology originated, developed and declined during the seventy year period from 1900 (invention of the triode vacuum tube in 1906), to the end of the vacuum tube era around 1970 (invention of the transistor in 1948). For this reason, little attempt has been made to carry titles past 1970 except where specific vacuum tube history or technology is covered. Of main interest are the technical magazines which contain information on the technology, use, or history of the vacuum tube.

Often, radio or vacuum tube information is in the advertising more than in the text of the magazines, leading to the inclusion of non-electronic magazines such as Talking Machine Journal, Popular Mechanics, which carried early radio advertisements. Some magazines are included simply because they were predecessors or successors of radio and electronic magazines of high interest.

While tracing magazine title changes, and "absorbed" publications, the concept grew of a "genealogy" of magazines which were "related". In this listing each "family" of magazines is formatted to show the parentage of each magazine title, its life span, and any subsequent magazine titles which were successors to the originals. Each such "family" has been given the name of the longest lived or best known magazine title of that "family", and these genealogical groups are arranged alphabetically by their "family" names. For convenience, the lists are organized into three sections: U.S. Magazines, Foreign Magazines in English, and Foreign Language Magazines. ©

NOTE: INDIVIDUAL MAGAZINE TITLES ARE ALMOST NEVER IN ALPHABETIC ORDER IN THE BODY OF THE LIST.

Alphanumeric codes have been assigned to each magazine, and these codes are arranged in alphanumeric order in each section. To locate a magazine, find its' title in the alphabetic INDEX list, use the alphanumeric code given there to select the indicated List (English, Foreign in English, or Foreign Language) and locate the magazine by finding its code location in the indicated list. Since the genealogical format has been confusing to some readers, explanations are given on page iii of this introduction, and on page 49 of the U.S. list for the RADIO NEWS "family".

Much of the information for these listings was derived from sources such as the Union List of Serials, but fellow collectors Charles Brett, Alan Douglas, Kent King, and Floyd Paul of the USA, and John Stokes and Ernie Hakanson of New Zealand have contributed significant information and corrections; still much is missing.

○ Additions or corrections which are documented by magazines, or related articles are earnestly solicited.

HOW TO READ THE MAGAZINE LISTS

All publications are issued monthly, unless noted otherwise.

If a magazine changes its frequency of publication, a separate line will show the duration of each such condition.

The successive titles of each continuously published magazine have the same margin down the left side of the page.

Where an indentation to the right occurs, it indicates the start of an unrelated series of publications which will be absorbed.

The publication in the indented second (or third) column is eventually absorbed by a publication in the column just to the left.

When a magazine is absorbed, it is given an asterisk in front of its title, a "LAST ISSUE" date, and a "NEW NAME" on the right.

The magazine into which the absorption takes place is identified by the alphanumeric code under "NEW NAME" in the last column.

This "NEW NAME" identity of the absorbing magazine is usually the next magazine title in the main publishing line. (see Note 1)

Where a magazine is still in publication at the time of being placed in the list, a plus (+) sign is shown in the "LAST ISSUE" column, instead of a date of last issue.

Here is an example of a merger of "MINNOW NEWS" into "SHARK NEWS", and for simplicity, dates are not shown:

	NAME	FIRST ISSUE	LAST ISSUE	NEW NAME
S1	EARLY SHARK NEWS			S2
	S1.1 EARLY MINNOW NEWS			S1.2
	S1.2 MATURE MINNOW NEWS			S1.3
	* S1.3 OLD MINNOW NEWS			S2
S2	MATURE SHARK & OLD MINNOW NEWS			S3
S3	OLD SHARK NEWS			+

A more complicated example is given on page 49 and 50 for the genealogy of Radio News.

NOTE 1. When two magazines were merged, if one of the magazines retained its title, it was assumed to be the stronger publication, but where both magazine titles were changed, it was difficult to tell which publishing line survived, and which was absorbed. In such cases, a magazine article or editorial at the time of the change, or a reversion to a prior title sometime after the merger has often supplied an answer.

EXPLANATORY NOTES ON THE RADIO NEWS GENEALOGY

Since it is widely known, Radio News is used as the example of how to read the information in this genealogy. The codes such as "RN1" are merely arbitrary identifiers assigned in alphanumerically sequential order to each magazine title or condition of publication to enable the indexing and location of any desired magazine title.

With each magazine is given the city in which it is published, the date it was begun, and it's initial volume/issue number. If publication has stopped, the last date and volume number is given, else a "+" in the "LAST ISSUE" column shows that it is still in publication. Where the volume and issue number are begun anew, a small "ns" indicates a new series of numbers.

For each continuously published periodical, the successive names under which it was offered are listed down the left side of the page, maintaining the same indentation for each name change, or change in the period of publication (for example; from weekly to monthly), or a change in Volume or Issue numbering.

This succession of titles is interrupted where it is known that at an upcoming date, a different line of publications (usually by a different publishing company) will be merged into the main-stream magazine. In the example of RADIO NEWS, it was POPULAR ELECTRONICS (RN1) which proved to be the stronger publication, and which in 1972 absorbed the RADIO NEWS line of publications.

So we start off with the beginning date of the main-line publication, POPULAR ELECTRONICS (RN1) in October, 1954 and show it running up to the last issue date of December, 1971. (see the FIRST ISSUE, and LAST ISSUE columns for these dates).

INDEX CODE	MAGAZINE NAME	FIRST ISSUE	1ST VOL	LAST ISSUE	END VOL	NEW NAME
---------------	------------------	----------------	------------	---------------	------------	-------------

We should pause here to note the code (RN2) given in the NEW NAME column on the far right. Scanning down the left column, we do not see this next magazine title of the main stream publications until almost the end of the entire tabulation. So POPULAR ELECTRONICS is on hold until we deal with all the other magazines it will gobble up by January, 1972.

Accordingly, we indent a column to the right, and show the entire RADIO NEWS series of publications at that indentation before it is merged, at which point we can again shift left to continue the titles of the POPULAR ELECTRONICS publications.

AMATEUR RADIO NEWS (RN1.1), was the name Hugo Bernsback chose for his new magazine. Unfortunately, a radio amateur was already publishing a newsletter under that name, so within a year, Bernsback changed the name of his magazine to RADIO NEWS (RN1.2).

Looking ahead (figuratively), we know that RADIO NEWS will absorb the RADIO CALL BOOK in December, 1932 so RADIO NEWS (RN1.2) is shown ending in November, 1932 (LAST ISSUE column) whereat a second right column indentation is made for the list of the CITIZEN'S RADIO CALL BOOK (RN1.2.2) publications.

RADIO CALL BOOK progressed from a twice a year publication to a monthly magazine, and the last issue of RADIO CALL BOOK AND TECHNICAL REVIEW (RN1.2.7) is November, 1932. An asterisk marks this magazine as the final title in that series of publications before its merger. The code (RN1.3) in the NEW NAME column shows that its new identity, RADIO NEWS AND RADIO CALL BOOK AND TECHNICAL REVIEW is on the next line below at the "RADIO NEWS" indentation.

NOTE: The merger still left the RADIO AMATEUR CALL BOOK (RA12) which was part of the CALL BOOK as a separate quarterly publication. The editorial of the first combined issue of RADIO NEWS AND RADIO CALL BOOK & TECHNICAL REVIEW (RN1.3), in December, 1932, welcomed the CALL BOOK subscribers, and reassured the RADIO NEWS subscribers, showing that RADIO NEWS was the dominant publication in the merger.

By August, 1938, RADIO NEWS AND RADIO CALL BOOK & TECHNICAL REVIEW (RN1.3) had changed its name to RADIO NEWS AND SHORT WAVE RADIO (RN1.5), and then absorbed another publication, ALL WAVE RADIO (RN1.5.1), and became RADIO NEWS AND ALL WAVE RADIO (RN1.6), dropping the "RADIO CALL BOOK & TECHNICAL REVIEW" from its title. It might be noted that ALL WAVE RADIO (1.5.1) ceased publication in June, 1938 but it was not merged into the RADIO NEWS AND ALL WAVE RADIO (RN1.6) until Aug, 1938).

Scanning down the list of to-be-merged publications, it is seen that the next merger (marked by an asterisk) doesn't occur until COMMUNICATIONS ENGINEERING (RN1.6.9) ceases publication in February, 1954. About this time, a separately paged section of RADIO NEWS was called RADIO-ELECTRONICS ENGINEERING (RN1.6.11), which was made a separate publication, (RN1.6.12) in August, 1954, and then reabsorbed in June, 1955. Before this time, RADIO NEWS AND ALL WAVE RADIO (RN1.5) had become RADIO AND TELEVISION NEWS (RN1.7) in August, 1948, which remained its title up to March, 1957.

We skipped a lot of magazine history in jumping immediately to the actual mergers. These included the evolution of FM (RN1.6.1) into COMMUNICATIONS ENGINEERING (RN1.6.9) during which time it absorbed the COMMUNICATIONS (RN1.6.7.3) line of publications. In turn, the COMMUNICATIONS line of publications had absorbed BROADCAST ENGINEERING (RN1.6.7.2a), which was the fourth level of indentation.

Note that, in order to keep the code short, a small "a" was used to distinguish this code from COMMUNICATIONS AND BROADCAST ENGINEERS (RN1.6.7.2b).

Returning to the RADIO NEWS series of publications, we find two more changes of title; RADIO AND TV NEWS (RN1.8), and ELECTRONICS WORLD (RN1.9) both of which seem to be an attempt by the the editor to increase the readership appeal of the magazine. But under the leadership of Oliver Read, POPULAR ELECTRONICS (RN1) was outselling its older rival, so Ziff-Davis merged their two magazines under the top editor, Oliver Read, as POPULAR ELECTRONICS INCLUDING ELECTRONICS WORLD (RN2).

The final title change in this list is the one to COMPUTERS AND ELECTRONICS. It is an odd fact that POPULAR ELECTRONICS (RN1) was started by Ziff-Davis in 1954 by taking Oliver Read from the head of RADIO AND TELEVISION NEWS (RN1.7), a magazine which he had headed since 1938, and placing him in charge of POPULAR ELECTRONICS (RN1). Since this was shortly after the absorption of COMMUNICATIONS ENGINEERING (RN1.6.9), it is probable that Oliver Read was given the task of organizing all the new talent which Ziff-Davis had inherited. He did it so well, that he wound up taking back his old publication.

Hugo Gernsback would have appreciated that.
