ISOPOLE 144

A.E.A. ISOPOLE™ 2M AND 70cm VERTICAL ANTENNAS

These antennas simply put your signal where you want it—on the horizon. Most other VHF verticals radiate at 10-15° above the horizontal, but the Iso Pole's unique (aesthetically pleasing) decoupling cones stop any feeder radiation and ensure a proper 0° radiation pattern.

All users report dramatic improvement over previous, similar sized, antennas they have used. One of the hottest selling antennas in the U.S.A.
